Post-Operative Wound Dressings Market

Global Forecast 2026-2032

MRR-505B17105E4C | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 20
   1.5. Currency Considered for the Study 21
   1.6. Language Considered for the Study 21
   1.7. Key Stakeholders 21
2. Research Methodology 23
   2.1. Introduction 23
   2.2. Research Design 23
      2.2.1. Primary Research 24
      2.2.2. Secondary Research 24
   2.3. Research Framework 24
      2.3.1. Qualitative Analysis 25
      2.3.2. Quantitative Analysis 25
   2.4. Market Size Estimation 26
      2.4.1. Top-Down Approach 26
      2.4.2. Bottom-Up Approach 26
   2.5. Data Triangulation 26
   2.6. Research Outcomes 27
   2.7. Research Assumptions 27
   2.8. Research Limitations 28
3. Executive Summary 29
   3.1. Introduction 29
   3.2. CXO Perspective 30
   3.3. New Revenue Opportunities 30
   3.4. Next-Generation Business Models 31
   3.5. Industry Roadmap 32
4. Market Overview 34
   4.1. Introduction 34
   4.2. Key Growth Contribution 36
   4.3. Industry Ecosystem & Value Chain Analysis 65
      4.3.1. Supply-Side Analysis 66
      4.3.2. Demand-Side Analysis 66
      4.3.3. Stakeholder Analysis 67
   4.4. Market Dynamics 68
      4.4.1. Key Drivers 69
         4.4.1.1. Risk-selected complication prevention supports differentiated purchasing 69
         4.4.1.2. Supported portable offerings enable continuity beyond the surgical facility 69
         4.4.1.3. Purchasing-system integration enables institutional ordering 69

4.4.2. Key Restraints 70
4.4.2.1. Payer eligibility separates product availability from funded access 70
4.4.2.2. Application-specific evidence constrains broad substitution claims 70
4.4.2.3. Organized purchasing exposes suppliers to recurring substitution pressure 70
4.4.3. Key Opportunities 71
4.4.3.1. Account-ready alternatives for controlled institutional substitution 71
4.4.3.2. Accountable continuation across discharge 71
4.4.3.3. Rights-defined own-label portfolio extension 71
4.4.4. Key Challenges 72
4.4.4.1. Documentation handoffs can interrupt an otherwise eligible supply relationship 72
4.4.4.2. Local resilience commitments create obligations beyond product supply 72
4.4.4.3. Cross-market qualification requires aligned but noninterchangeable records 73
4.5. Porter's Five Forces Analysis 73
4.6. PESTLE Analysis 74
4.7. Market Outlook 75
4.7.1. Near-Term Market Outlook (0-2 Years) 76
4.7.2. Medium-Term Market Outlook (3-5 Years) 76
4.7.3. Long-Term Market Outlook (5-10 Years) 77
4.8. Go-to-Market Strategy 77
5. Market Insights 79
5.1. Consumer Insights & End-User Perspective 79
5.2. Consumer Experience Benchmarking 79
5.3. Opportunity Mapping 80
5.4. Distribution Channel Analysis 82
5.5. Pricing Trend Analysis 83
5.6. Regulatory Compliance & Standards Framework 84
5.7. ESG & Sustainability Analysis 85
5.8. Disruption & Risk Scenarios 85
5.9. Return on Investment & Cost-Benefit Analysis 87
6. Cumulative Impact of Artificial Intelligence 2026 89
7. Post-Operative Wound Dressings Market, by Dressing Type 90
7.1. Foam Dressings 100
7.2. Gauze & Absorbent Pad Dressings 106
7.3. Composite & Island Dressings 112
7.4. Gelling Fiber Dressings 118
7.5. Wound Contact Layers 123
7.6. Superabsorbent Dressings 129
7.7. Film & Membrane Dressings 134
7.8. Alginate Dressings 140
7.9. Hydrocolloid Dressings 145
7.10. Collagen Dressings 150
7.11. Acellular Extracellular Matrix Dressings 156
7.12. Hydrogel Dressings 162
7.13. Hyaluronic Acid Dressings 167

7.14. Absorbent Acrylic Dressings 173
7.15. Chitosan Dressings 178
7.16. Biocellulose Dressings 184
7.17. Activated Charcoal Dressings 189
7.18. Capillary Action Dressings 194
8. Post-Operative Wound Dressings Market, by Therapy Platform 200
8.1. Standard Dressing Therapy 206
8.2. Negative Pressure Wound Therapy 212
8.3. Bioelectric Wound Therapy 217
8.4. Topical Oxygen Therapy 223
9. Post-Operative Wound Dressings Market, by Antimicrobial Technology 229
9.1. No Declared Antimicrobial Technology 239
9.2. Silver-Based Antimicrobials 244
9.3. Iodine-Based Antimicrobials 249
9.4. DACC Microbial Binding 254
9.5. Polyhexamethylene Biguanide 259
9.6. Honey-Based Antimicrobials 264
9.7. Enzyme-Based Antimicrobials 270
9.8. Bismuth Compounds 275
9.9. Multi-Agent Antimicrobial Systems 281
9.10. Antibiotics 287
9.11. Chlorhexidine 292
9.12. Octenidine 297
9.13. Quaternary Ammonium Compounds 302
9.14. Copper-Based Antimicrobials 308
9.15. Chitosan-Based Antimicrobials 313
10. Post-Operative Wound Dressings Market, by Healing Pathway 319
10.1. Closed Surgical Wounds 325
10.2. Open Wounds Healing by Secondary Intention 331
10.3. Open Wounds Awaiting Surgical Closure 337
11. Post-Operative Wound Dressings Market, by Surgical Application 345
11.1. Musculoskeletal Surgery 353
11.2. Skin & Breast Surgery 359
11.3. Gastrointestinal & Abdominal Surgery 365
11.4. Cardiovascular Surgery 371
11.5. Obstetric Surgery 377
11.6. Gynecologic Surgery 382
11.7. Neurological Surgery 387
11.8. Respiratory Surgery 393
11.9. Urinary Tract Surgery 399
11.10. Ear, Nose, Oral & Throat Surgery 405
11.11. Male Reproductive Surgery 411

11.12. Hematologic & Lymphatic Surgery 417
11.13. Ophthalmic Surgery 423
11.14. Endocrine Surgery 429
12. Post-Operative Wound Dressings Market, by End User 435
12.1. Hospitals 443
12.2. Home Healthcare Providers 449
12.3. Office-Based & Community Providers 456
12.4. Freestanding Surgical Centers 462
12.5. Residential & Post-Acute Care Facilities 468
12.6. Self-Care Households 473
13. Post-Operative Wound Dressings Market, by Sales Channel 481
13.1. Wholesale & Distribution 487
13.2. Direct Institutional Sales 492
13.3. Retail & Dispensing 498
13.4. Direct-to-Consumer Sales 503
14. Post-Operative Wound Dressings Market, by Fixation Design 510
14.1. Bordered Adhesive Dressings 515
14.2. Nonadhesive Dressings 521
14.3. Borderless Adhesive Dressings 527
15. Post-Operative Wound Dressings Market, by Absorbency 533
15.1. Low Absorbency 539
15.2. High Absorbency 544
15.3. Moderate Absorbency 549
15.4. Nonabsorptive 555
15.5. Ultra-High Absorbency 561
16. Post-Operative Wound Dressings Market, by Region 568
16.1. Europe 574
16.2. North America 608
16.3. Asia-Pacific 642
16.4. Latin America 676
16.5. Middle East 710
16.6. Africa 743
17. Post-Operative Wound Dressings Market, by Group 776
17.1. NATO 781
17.2. G7 815
17.3. European Union 848
17.4. BRICS 883
17.5. ASEAN 916
17.6. GCC 949
18. Post-Operative Wound Dressings Market, by Country 981
18.1. United States 988
18.2. China 1019

18.3. Germany....1052
18.4. France....1084
18.5. United Kingdom....1115
18.6. Japan....1146
18.7. Italy....1177
18.8. Spain....1208
18.9. Mexico....1239
18.10. Brazil....1271
18.11. India....1303
18.12. Canada....1334
18.13. South Korea....1365
18.14. Australia....1396
18.15. Russia....1427
19. Competitive Landscape....1460
19.1. Market Share Analysis, 2025....1460
19.2. Market Concentration Analysis, 2025....1469
19.3. Recent Developments & Impact Analysis, 2025....1471
19.4. Product Portfolio Analysis, 2025....1473
19.5. Benchmarking Analysis, 2025....1478
20. Company Profiles....1484
20.1. Solventum Corporation....1484
20.2. Smith+Nephew....1485
20.3. Mölnlycke Health Care....1485
20.4. Convatec....1486
20.5. Essity....1487
20.6. Medline Inc.....1488
20.7. Advanced Medical Solutions Group plc....1489
20.8. Pharmaplast S.A.E.....1490
20.9. Covalon Technologies Ltd.....1491
20.10. Advamedica Inc.....1491
20.11. Vuelo Pharma....1492
20.12. MedCu Technologies....1493
20.13. Jamjoom Medical Industries....1494
20.14. Médicale Gaze....1494
20.15. ALCARE Co., Ltd.....1495
20.16. Aroa Biosurgery Limited....1496
21. Companies Covered....1498
22. Key Experts....1526

1. Preface

1.1. Objectives of the Study

- Which suppliers document identifiable Post-Operative Wound Dressings and accepted therapy-platform offerings, and how do ownership or licensing relationships define their commercial rights?
- What qualification, formulary, purchasing-evidence, or contractual conditions must an offering satisfy for Hospitals, Freestanding Surgical Centers, and the other included end users?
- How do jurisdiction-specific authorization and purchasing conditions distinguish legal access from documented commercial availability and buyer acceptance?
- Which distribution, delivery, and support commitments distinguish Direct Institutional Sales, Wholesale & Distribution, Retail & Dispensing, and Direct-to-Consumer Sales?
- What product-comparison evidence, incumbent relationships, contractual terms, and continuity requirements affect a buyer's ability to switch dressings or therapy-platform arrangements?
- How do Healing Pathway and Surgical Application relate to documented offering eligibility and purchasing requirements without treating taxonomy membership as proof of clinical equivalence?
- What qualitative trade-offs in purchasing budgets, reimbursement conditions, delivery obligations, and organizational support distinguish commercial options, and what must be verified before commitment?

1.2. Market Definition

The Global Post-Operative Wound Dressings market covers finished dressing offerings across the accepted Dressing Type hierarchy, together with Standard Dressing Therapy, Negative Pressure Wound Therapy, Topical Oxygen Therapy, and Bioelectric Wound Therapy within the accepted therapy-platform scope. It includes Closed Surgical Wounds, Open Wounds Healing by Secondary Intention, and Open Wounds Awaiting Surgical Closure across the accepted Surgical Application categories.

The commercial focus is the identifiable dressing or therapy-platform offering and its supplier-to-buyer relationship. Manufacturers, offering owners, licensors, distributors, and purchasing organizations are considered in relation to those offerings, not their entire corporate portfolios. Upstream materials provide value-chain context rather than equivalent finished offerings; surgical procedures and professional care delivery are downstream activities rather than dressing products.

The geographic boundary is Global. End-user coverage includes Hospitals, Freestanding Surgical Centers, Office-Based & Community Providers, Residential & Post-Acute Care Facilities, Home Healthcare Providers, and Self-Care Households. Category inclusion establishes study coverage without implying that every offering is authorized, available, or

eligible for purchase in every jurisdiction. Unrelated wound-care activity does not enter the market solely because it shares a supplier, material, or channel.

1.3. Market Segmentation & Coverage

Dressing Type distinguishes the accepted material and format categories: Gauze & Absorbent Pad Dressings, Composite & Island Dressings, Film & Membrane Dressings, Wound Contact Layers, Foam Dressings, Alginate Dressings, Gelling Fiber Dressings, Hydrocolloid Dressings, Hydrogel Dressings, Superabsorbent Dressings, Absorbent Acrylic Dressings, Collagen Dressings, Acellular Extracellular Matrix Dressings, Chitosan Dressings, Hyaluronic Acid Dressings, Activated Charcoal Dressings, Capillary Action Dressings, and Biocellulose Dressings. This axis organizes offering comparisons without treating a shared material label as evidence of interchangeability.

Therapy Platform includes Standard Dressing Therapy, Negative Pressure Wound Therapy, Topical Oxygen Therapy, and Bioelectric Wound Therapy. These are distinct commercial platform categories within the study. Dressing and platform relationships require separate interpretation of the offering, buyer arrangement, and delivery obligations; their inclusion does not make the categories additive.

Antimicrobial Technology includes No Declared Antimicrobial Technology, Silver-Based Antimicrobials, Iodine-Based Antimicrobials, Honey-Based Antimicrobials, Polyhexamethylene Biguanide, Chlorhexidine, Copper-Based Antimicrobials, Chitosan-Based Antimicrobials, Octenidine, Quaternary Ammonium Compounds, Bismuth Compounds, Enzyme-Based Antimicrobials, Antibiotics, DACC Microbial Binding, and Multi-Agent Antimicrobial Systems. The axis preserves the declared commercial classifications without inferring a common mechanism, equivalent product claims, or clinical superiority. No Declared Antimicrobial Technology is a disclosure category, not a conclusion about biological activity.

Healing Pathway separates Closed Surgical Wounds, Open Wounds Healing by Secondary Intention, and Open Wounds Awaiting Surgical Closure. It frames application-specific commercial questions without assuming that an offering documented for one pathway is eligible for another.

Surgical Application covers Neurological Surgery, Endocrine Surgery, Ophthalmic Surgery, Ear, Nose, Oral & Throat Surgery, Respiratory Surgery, Cardiovascular Surgery, Hematologic & Lymphatic Surgery, Gastrointestinal & Abdominal Surgery, Urinary Tract Surgery, Male Reproductive Surgery, Gynecologic Surgery, Obstetric Surgery, Musculoskeletal Surgery, and Skin & Breast Surgery. This axis identifies the surgical context for evaluating documented participation and purchasing requirements rather than attributing all activity in a specialty to wound dressings.

End User distinguishes Hospitals, Freestanding Surgical Centers, Office-Based & Community Providers, Residential & Post-Acute Care Facilities, Home Healthcare Providers, and Self-Care Households. It locates the buyer or care-setting relationship relevant to qualification, procurement responsibility, and continuity of supply.

Sales Channel includes Direct Institutional Sales, Wholesale & Distribution, Retail & Dispensing, and Direct-to-Consumer Sales. It distinguishes the commercial route from the identity of the end user: a buyer setting does not, by itself, establish how an offering reaches that buyer or who holds the relevant channel rights.

Fixation Design includes Bordered Adhesive Dressings, Borderless Adhesive Dressings, and Nonadhesive Dressings. This axis supports comparison of documented offering formats and buyer requirements without implying suitability or switching equivalence from the category name alone.

Absorbency includes Nonabsorptive, Low Absorbency, Moderate Absorbency, High Absorbency, and Ultra-High Absorbency. These classifications organize the offering comparison; they do not independently demonstrate that different products satisfy the same purchasing requirement.

All axes describe the same accepted market through different commercial lenses. An offering can be represented across several axes without creating separate incremental activity, and a category's inclusion does not establish a particular supplier's capability or local commercial access.

Table 1. Global Post-Operative Wound Dressings Market Segmentation & Coverage

Segmentation	Coverage
Absorbency	• Low Absorbency • High Absorbency • Moderate Absorbency • Nonabsorptive • Ultra-High Absorbency
Antimicrobial Technology	• No Declared Antimicrobial Technology • Silver-Based Antimicrobials • Iodine-Based Antimicrobials • DACC Microbial Binding • Polyhexamethylene Biguanide • Honey-Based Antimicrobials • Enzyme-Based Antimicrobials • Bismuth Compounds • Multi-Agent Antimicrobial Systems • Antibiotics • Chlorhexidine • Octenidine • Quaternary Ammonium Compounds • Copper-Based Antimicrobials • Chitosan-Based Antimicrobials

Table 1 - continued

Segmentation	Coverage
Dressing Type	• Foam Dressings • Gauze & Absorbent Pad Dressings • Composite & Island Dressings • Gelling Fiber Dressings • Wound Contact Layers • Superabsorbent Dressings • Film & Membrane Dressings • Alginate Dressings • Hydrocolloid Dressings • Collagen Dressings • Acellular Extracellular Matrix Dressings • Hydrogel Dressings • Hyaluronic Acid Dressings • Absorbent Acrylic Dressings • Chitosan Dressings • Biocellulose Dressings • Activated Charcoal Dressings • Capillary Action Dressings
End User	• Hospitals • Home Healthcare Providers • Office-Based & Community Providers • Freestanding Surgical Centers • Residential & Post-Acute Care Facilities • Self-Care Households
Fixation Design	• Bordered Adhesive Dressings • Nonadhesive Dressings • Borderless Adhesive Dressings
Healing Pathway	• Closed Surgical Wounds • Open Wounds Healing by Secondary Intention • Open Wounds Awaiting Surgical Closure

Table 1 - continued

Segmentation	Coverage
Sales Channel	• Wholesale & Distribution • Direct Institutional Sales • Retail & Dispensing • Direct-to-Consumer Sales
Surgical Application	• Musculoskeletal Surgery • Skin & Breast Surgery • Gastrointestinal & Abdominal Surgery • Cardiovascular Surgery • Obstetric Surgery • Gynecologic Surgery • Neurological Surgery • Respiratory Surgery • Urinary Tract Surgery • Ear, Nose, Oral & Throat Surgery • Male Reproductive Surgery • Hematologic & Lymphatic Surgery • Ophthalmic Surgery • Endocrine Surgery
Therapy Platform	• Standard Dressing Therapy • Negative Pressure Wound Therapy • Bioelectric Wound Therapy • Topical Oxygen Therapy

Sources & Evidence

1. FDA K261311 - HYALOMATRIX: Clearance and 510(k) Summary

   · Taxonomy evidence: The September xx.xx 2026 clearance and enclosed summary identify HYALOMATRIX as a single-use hyaluronic-acid-derivative wound dressing with surgical-wound indications, including donor sites and dehiscence. This directly supports category identity, not Global sales or 2025 revenue. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf26/K261311.pdf))

2. FDA K210024 - NeoMatriX Wound Matrix: Clearance and 510(k) Summary

   · Taxonomy evidence: The October xx.xx 2021 record identifies NeoMatriX as an acellular extracellular-matrix wound dressing and includes surgical wounds among its indications. It establishes a qualifying category example without resolving all dressing-versus-tissue-replacement boundaries. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))

   · Taxonomy evidence: The same record calls the device a collagen wound dressing while expressly describing acellular extracellular-matrix characteristics. Therefore, regulatory collagen terminology alone cannot separate the retained commercial Collagen Dressings and Acellular Extracellular Matrix Dressings peers. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))

   · Taxonomy evidence: The shared terminology supports an explicit product-identity precedence rule rather than treating the commercial construction partition as a reproduction of regulatory codes. This is a classification inference, not a new regulatory distinction. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))

3. AccessGUDID - OASIS, Device Identifier 00827002466234

   · Taxonomy evidence: The OASIS record identifies an animal-derived wound matrix dressing, links it to K061711 and reports In Commercial Distribution. Its public version date is July xx.xx 2025. This corroborates a registered commercial matrix-dressing identity, not realized postoperative sales or blanket eligibility of matrix products. ([accessgudid.nlm.nih.gov](https://accessgudid.nlm.nih.gov/devices/xx.xx))

4. FDA K190268 - Hydrofera Blue READY-Border: 510(k) Summary
   - Taxonomy evidence: The 2019 regulatory summary identifies methylene blue and gentian violet as antibacterial dyes in one finished dressing and includes post-surgical incisions among its indications. This directly establishes a postoperative dual-agent example for the commercial combination category without relying on drug-device combination status. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))
   - Taxonomy evidence: The same postoperative dressing is described as an absorptive polyurethane foam with an outer film and silicone adhesive border. This independently corroborates that a foam construction can retain a distinct multi-agent antimicrobial allocation. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))
   - Taxonomy evidence: The documented silicone adhesive border supplies a postoperative regulatory example of integral bordered fixation, separate from the foam matrix and antibacterial agents. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))
5. FDA K180533 - Procellera Composite Antibacterial Wound Dressing
   - Taxonomy evidence: The December xx.xx 2018 clearance identifies a finished antibacterial dressing with an integral electrical architecture and professional-use indications including surgical incisions and graft sites. This establishes postoperative regulatory identity without asserting clinical superiority or worldwide availability. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf18/K180533.pdf))
   - Taxonomy evidence: The finished product has a contact layer, an absorbent layer and an adhesive outer layer. It is a regulatory example of an integrated cover architecture that can be allocated independently from its therapy platform. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf18/K180533.pdf))
6. AccessGUDID - Procellera Composite, Device Identifier 00894318002456
   - Taxonomy evidence: The registry assigns the explicit nomenclature Bioelectric wound dressing, links the device to K180533 and reports a single-use prescription product In Commercial Distribution. The visible public version is dated January xx.xx 2026. This supports current recorded commercial identity, not attributed sales or a Global platform share. ([accessgudid.nlm.nih.gov](https://accessgudid.nlm.nih.gov/devices/xx.xx))
7. Sandwell Area Formulary - Wound Management Products
   - Taxonomy evidence: The public formulary explicitly describes Flaminal Forte and Hydro as alginate gels containing antimicrobial enzymes. This independently establishes enzyme-platform terminology beyond the earlier product-name lead; the broad wound listing does not establish exact current postoperative labeling. ([sandwellandwestbhamccgformulary.nhs.uk](https://sandwellandwestbhamccgformulary.nhs.uk/chaptersSubDetails.asp?FC=xx.xx&FormularySectionID=xx.xx&SubSectionID=A100&SubSectionRef=A5))
8. Schülke UK - octenilin Wound Gel
   - Taxonomy evidence: The manufacturer's UK description explicitly identifies octenidine as a preservative with an antimicrobial protective role in the wound gel. Its listed applications concern chronic wounds and burns, not an explicit postoperative indication. This resolves the ingredient lead only; it does not independently prove market-level category coverage or postoperative eligibility. ([schuelke.com](https://www.schuelke.com/en-uk/products/xx.xx/octenilin-wound-gel/))
9. Leukomed Sorbact - Supporting Documentation, Independent External Assessment, August 2020
   - Taxonomy evidence: The independent assessment's technology overview identifies a single-use postoperative DACC bacteria-binding dressing and distinguishes its binding function from killing microorganisms. This directly supports the retained microbial-binding category without claiming chemical biocidal equivalence or adopting an efficacy estimate. ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))
   - Taxonomy evidence: The assessment separates the DACC contact technology from the absorbent pad, adhesive film and postoperative application. It supports treating microbial-binding technology as a cross-cutting allocation rather than a substitute dressing-construction family. ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))

10. NHS Supply Chain - Advanced Wound Care Specification
    - Taxonomy evidence: The specialty procurement specification explicitly recognizes temporary matrix dressings separately from collagen dressings and sets a nonimplant purchasing boundary for that named group. This is an English procurement-category anchor, not a universal regulatory definition or automatic eligibility rule for acellular products. ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
    - Taxonomy evidence: Procurement separates base dressing families and treats antimicrobial status as a cross-cutting property. These are English purchasing definitions, not Global demand estimates. ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
    - Taxonomy evidence: Recognition of temporary matrix dressings supports a dressing-versus-implant distinction at the commercial category level, but does not identify every qualifying acellular matrix or settle dual-described skin-substitute products. ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
    - Taxonomy evidence: Separate nonwoven-island and film-island purchasing groups support aggregating conventional integrated pad-and-backing covers.
    - Taxonomy evidence: Alginates and gelling fibers are explicitly distinguished within their purchasing group.
    - Taxonomy evidence: Superabsorbent dressings form a dedicated lot, distinct from foams and conventional pads.
    - Taxonomy evidence: Hydrobalance biocellulose dressings are explicitly named.
    - Taxonomy evidence: Specialty purchasing includes topical oxygen and electrostimulation wound therapy.
    - Taxonomy evidence: Electrostimulation wound therapy is recognized, without separately establishing postoperative dressing-only demand.
    - Taxonomy evidence: Antimicrobial properties occur across material-based dressing families rather than constituting one base construction.
11. Surgical Dressings - Policy Article A54563
    - Taxonomy evidence: Multi-component dressings are classified by a predominant component; composite products cannot be unbundled into constituent dressing claims. US coding rules are terminology anchors, not the Global market boundary. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx&bc=xx.xx&contractorName=all&contractorNumber=all&sortBy=updated&updatePeriod=xx.xx&ver=xx.xx))
    - Taxonomy evidence: Recognizes woven/nonwoven gauze and specialty absorptive pads.
    - Taxonomy evidence: Defines conventional composite covers separately from foam, gelling-fiber, hydrocolloid and hydrogel absorptive layers.
    - Taxonomy evidence: Contact layers are porous, nonabsorptive interfaces, distinct from absorptive covers.
    - Taxonomy evidence: Recognizes foam wound covers and foam fillers.
    - Taxonomy evidence: Recognizes alginate/gelling-fiber covers and fillers.
12. Surgical Dressings - Local Coverage Determination L33831
    - Taxonomy evidence: The US policy recognizes transparent-film dressings as a named dressing family; reimbursement eligibility is not a Global sales measure. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
    - Taxonomy evidence: Separately recognizes hydrocolloid dressings and wound fillers.
    - Taxonomy evidence: Separately recognizes hydrogel dressings and wound fillers.
    - Taxonomy evidence: Recognizes collagen-based dressings and wound fillers as a distinct commercial family.

13. Drug Tariff Part IX - October 2026
    - Taxonomy evidence: The October 2026 tariff contains a named transparent absorbent acrylic-dressing category. Listing establishes purchasing recognition, not postoperative demand. ([nhsbsa.nhs.uk](https://www.nhsbsa.nhs.uk/sites/default/files/2026-xx.xx/Drug%20Tariff%20Part%20IX%20October%xx.xx.pdf))
    - Taxonomy evidence: Lists activated-charcoal absorbent dressings.
    - Taxonomy evidence: Lists a capillary-action absorbent-wound-dressing category.
    - Taxonomy evidence: Explicitly identifies DACC-impregnated contact and pad products; the listing alone does not establish postoperative labeling or chemical biocidal action.
14. FDA K143124 - KA01 Chitosan Wound Dressing
    - Taxonomy evidence: The regulatory summary identifies a chitosan wound-dressing family with surgical-wound and donor-site applications. It establishes category and indication history, not current sales or a commercial antimicrobial claim. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf14/K143124.pdf))
    - Taxonomy evidence: Chitosan construction and surgical applications are documented, but this record does not establish the antimicrobial positioning required for this technology allocation.
15. GPSDP October 26-27, 2022 Presentation - Wound Dressings with Animal-Derived Materials
    - Taxonomy evidence: The regulator's October xx.xx-xx.xx 2022 presentation addresses animal-derived wound dressings as a category. This record alone does not settle product-level exclusions for skin substitutes or reconstructive implants. ([fda.gov](https://www.fda.gov/media/xx.xx/download))
16. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
    - Taxonomy evidence: The regulatory overview separates dressing substrates from antimicrobial additives and distinguishes antimicrobial claims from passive protection. It is a historical category reference, not current market-share evidence. ([fda.gov](https://www.fda.gov/media/xx.xx/download))
    - Taxonomy evidence: Drug-free gauze, hydrophilic, occlusive and hydrogel classifications are distinguished from antimicrobial-containing dressings.
    - Taxonomy evidence: Identifies silver among antimicrobial additives to solid wound dressings.
    - Taxonomy evidence: Identifies PHMB as an antimicrobial dressing additive.
    - Taxonomy evidence: Identifies chlorhexidine as an antimicrobial dressing additive.
    - Taxonomy evidence: Recognizes pDADMAC-containing dressings and cites a surgical-wound indication.
    - Taxonomy evidence: Identifies bismuth as an antimicrobial dressing additive.
    - Taxonomy evidence: Identifies bacitracin among antimicrobial additives to solid dressings.
    - Taxonomy evidence: Describes dressing functions including wound protection, exudate management and maintenance of a moist environment, supporting a standalone dressing-therapy class.
17. Trust BNF - Wound Management Products and Elasticated Garments
    - Taxonomy evidence: The institutional formulary organizes antimicrobial agents independently from base dressing construction; its broader wound-care scope does not establish postoperative sales. ([primarycare.northeastlondon.icb.nhs.uk](https://primarycare.northeastlondon.icb.nhs.uk/wp-content/uploads/2024/xx.xx/Wound-management-products-and-elasticated-garments.html))
    - Taxonomy evidence: Lists silver-containing alginate, foam, low-adherence and hydrocolloid dressing families.
    - Taxonomy evidence: Separately lists cadexomer-iodine preparations and povidone-iodine fabric dressings.
    - Taxonomy evidence: Lists honey sheet dressings and honey-based wound-dressing gels.
    - Taxonomy evidence: Lists Suprasorb X+PHMB as an antimicrobial dressing.
    - Taxonomy evidence: Lists chlorhexidine gauze dressings under antimicrobials.
    - Taxonomy evidence: Lists Cutimed Sorbact within antimicrobial wound-care products; this grouping does not establish chemical biocidal action.
    - Taxonomy evidence: Lists Flaminal Forte and Hydro among antimicrobial gels; enzyme-platform classification still requires separate support.
    - Taxonomy evidence: Lists Octenilin Wound Gel as an antimicrobial product; the page does not establish its octenidine ingredient or postoperative label.

18. NHS Supply Chain - Negative Pressure Wound Therapy
    - Taxonomy evidence: Procurement separates therapy equipment and pump rentals from NPWT consumables, supporting dressing-only accounting. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Taxonomy evidence: The framework covers vacuum dressings for surgical wounds and includes a distinct consumables lot; it does not establish the dressing value inside every integrated system.
19. FDA Product Classification - Wound Dressings Containing Oxygen
    - Taxonomy evidence: FDA product code SIL recognizes oxygen-containing wound dressings for external skin wounds. The category does not establish authorization in every country or actual postoperative sales. ([accessdata.fda.gov](https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm?id=SIL))
20. OxyBand Technologies - FDA Clearance
    - Taxonomy evidence: The company's prescription oxygen-delivering dressing listing includes closed surgical incisions and skin-graft donor sites, corroborating a postoperative finished-dressing use case without establishing market size or comparative efficacy. ([oxyband.com](https://oxyband.com/Research/OxyBand-FDA.php))
21. MEDCU - Advanced Copper-Based Wound Dressings
    - Taxonomy evidence: The official US portfolio is explicitly presented as copper-based wound dressings. This establishes an own-product commercial category, not the completeness of the market partition or quantified postoperative demand. ([medcu.com](https://medcu.com/us/))
22. FDA K152970 - Dynarex Xeroform Petrolatum Dressing
    - Taxonomy evidence: The regulatory summary describes a bismuth-containing nonadherent gauze dressing with newly sutured and surgical-wound applications. It does not establish every bismuth dressing's antimicrobial claim. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf15/K152970.pdf))
    - Taxonomy evidence: The product is positioned as a primary contact layer, supporting role-based classification of qualifying low-adherence impregnated fabric.
23. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Taxonomy evidence: The May 2024 glossary distinguishes primary, secondary and tertiary healing, supporting three pathway concepts rather than a separate dehiscence sibling. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
    - Taxonomy evidence: Primary-intention healing is identified with surgical wound closure, establishing the closed-wound category's clinical identity. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
    - Taxonomy evidence: Secondary-intention healing includes open surgical wounds and dehisced wounds not subsequently closed surgically. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
    - Taxonomy evidence: Tertiary-intention healing is expressly identified as delayed surgical closure, supporting the awaiting-closure category. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
    - Taxonomy evidence: The postoperative pathway includes transfer between surgical teams, subsequent providers and supported self-management, establishing that final users extend beyond the operating institution. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
    - Taxonomy evidence: Supported postoperative self-management and patient-held dressing supplies are explicitly recognized; this establishes a household-use pathway, not its market share. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))

24. International Classification of Health Interventions (ICHI)
    - Taxonomy evidence: ICHI separates intervention Target, Action and Means and covers surgical interventions. This supports a procedure-based analytical axis; the proposed commercial groupings are an adaptation, not an official ICHI reproduction. ([who.int](https://www.who.int/standards/classifications/international-classification-of-health-interventions))
25. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
    - Taxonomy evidence: The appendix organizes surgery by body system. Its 2014 US hospital observations establish classification terminology, not Global 2025 dressing demand. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Identifies nervous-system operations, including peripheral-nerve procedures. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies endocrine-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies eye operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Identifies ear and nose, mouth and pharynx operation groups. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies respiratory-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies cardiovascular operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies hemic and lymphatic operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Groups digestive operations and hernia repairs together. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies urinary-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies male genital-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Separately identifies female genital-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: Identifies musculoskeletal operations, including joint replacement, amputation and fusion. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
    - Taxonomy evidence: The integumentary group includes skin and breast operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))

26. Surgical Site Infection Event - January 2026
    - Taxonomy evidence: The January 2026 procedure categories corroborate distinct operative targets; surveillance categories are not adopted as the complete Global commercial taxonomy. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists craniotomy and ventricular-shunt surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists thyroid and parathyroid surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists thoracic surgery separately from cardiac procedures. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists cardiac, bypass, vascular and pacemaker operations. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists spleen surgery as a distinct operative category. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists digestive, hernia and exploratory-laparotomy categories. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists kidney surgery and transplantation. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists prostate surgery separately from kidney surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists cesarean section separately from hysterectomy. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists fracture repair, joint prosthesis, amputation and spinal fusion. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Lists breast surgery as an operative category. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
    - Taxonomy evidence: Its procedure-level primary-closure flag can include partly closed incisions; it is not equivalent to current wound-level pathway allocation. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
27. FAQs: Surgical Site Procedure Codes
    - Taxonomy evidence: The January xx.xx 2026 FAQ retains hysterectomy procedures within gynecologic procedure categories even when abdominal incisions or laparoscopic access are involved. This corroborates keeping operative target separate from access location. ([cdc.gov](https://www.cdc.gov/nhsn/faqs/faq-ssi-proc-codes.html))
    - Taxonomy evidence: The hysterectomy examples demonstrate why an abdominal incision cannot by itself determine the principal surgical-application group. ([cdc.gov](https://www.cdc.gov/nhsn/faqs/faq-ssi-proc-codes.html))
28. Product Classification
    - Taxonomy evidence: FDA recognizes an eye-pad device category under product code HMP and regulation xx.xx. This establishes a dressing-category identity, not postoperative use for every eye pad. ([accessdata.fda.gov](https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm?id=HMP))

29. Key classifications of the System of Health Accounts 2011 - Best Practice in Institutionalising Health Accounts

· Taxonomy evidence: The international provider classification distinguishes hospitals, residential care, ambulatory providers, home healthcare, retailers and households. It also separates provider classification from financing schemes, supporting exclusion of payers and resellers from this final-user axis. ([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))

· Taxonomy evidence: Medical practices, dental practices, healthcare practitioners and ambulatory centers are recognized provider groups, supporting the proposed outpatient/community aggregation. ([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))

· Taxonomy evidence: Households providing home healthcare are distinguished from professional provider establishments and medical-goods retailers. The proposed self-care boundary is a commercial adaptation. ([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))

30. A System of Health Accounts 2011

· Taxonomy evidence: The provider manual keeps integrated hospital ambulatory services within hospitals rather than freestanding ambulatory establishments. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

· Taxonomy evidence: HP.xx.xx.xx.xx identifies freestanding ambulatory surgery centers as specialized outpatient surgical establishments, distinct from hospitals and ordinary medical practices. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

· Taxonomy evidence: Residential nursing examples include nursing homes, skilled nursing facilities, convalescent homes and inpatient hospices, supporting the nonhospital residential/post-acute grouping. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

· Taxonomy evidence: HP.xx.xx identifies home-healthcare establishments, including community nurses, domiciliary nursing and home-healthcare agencies. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

31. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers

· Taxonomy evidence: The manual identifies surgical dressings among ASC facility services, establishing a direct institutional dressing-use role rather than a resale-only role. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/clm104c14.pdf))

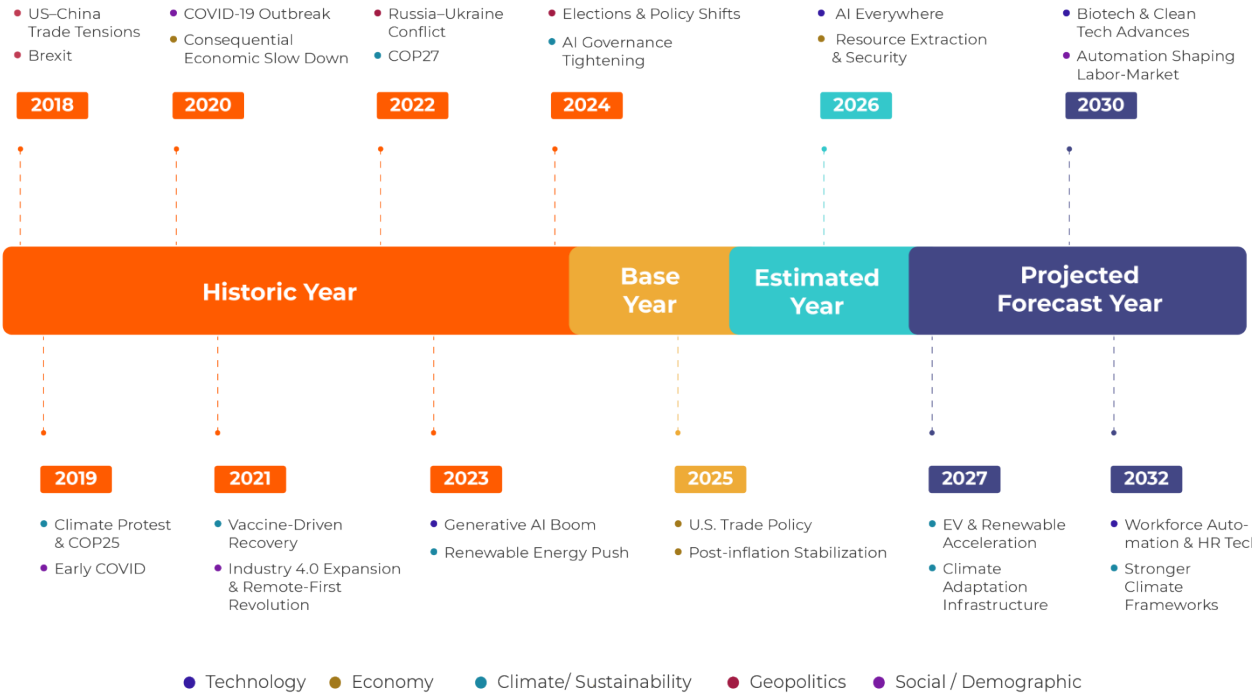
· Taxonomy evidence: The manual separately recognizes surgical dressings furnished with physician-office services, supporting an office-based user category distinct from ASCs. ([edit.cms.gov](https://edit.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c14.pdf))

· Taxonomy evidence: Postoperative dressings may subsequently be used by patients or family members and obtained from suppliers. The supplying drugstore and the household user therefore represent different commercial roles. ([edit.cms.gov](https://edit.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c14.pdf))

32. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services

· Taxonomy evidence: The home-health manual explicitly identifies postoperative wound aftercare and dressing supplies within home-health services, establishing a professional home-care role. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/bp102c07.pdf))

· Taxonomy evidence: Its examples recognize overlapping family and professional wound-care participation. This supports retaining an explicit responsibility rule rather than classifying every home episode as household self-care. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/bp102c07.pdf))



33. Sirona (BNSSG) Wound Management Formulary and Dressing Guide - Version 3, January 2025
    - Taxonomy evidence: The January 2025 public formulary lists surgical-wound dressings available for ordering by GP and practice-nurse teams, providing a market-specific outpatient purchasing-role anchor. It does not establish realized use volumes. ([remedy.bnssg.icb.nhs.uk](https://remedy.bnssg.icb.nhs.uk/media/ghxbkml3/sirona-wound-management-formulary-and-dressing-guide-jan-2025.pdf))
    - Taxonomy evidence: The same surgical-wound dressing section names nursing homes among permitted ordering organizations, independently establishing a residential-care purchasing role without inferring Global buyer shares. ([remedy.bnssg.icb.nhs.uk](https://remedy.bnssg.icb.nhs.uk/media/ghxbkml3/sirona-wound-management-formulary-and-dressing-guide-jan-2025.pdf))
34. Cataract surgery - After cataract surgery
    - Taxonomy evidence: The hospital's April 2026-reviewed information identifies an eye pad as a possible postoperative covering after cataract surgery, distinguishing that dressing use from shield-only coverage. This supports the ophthalmic application without implying universal pad use. ([guysandstthomas.nhs.uk](https://www.guysandstthomas.nhs.uk/health-information/cataract-surgery/after-cataract-surgery?utm_source=openai))
35. Advanced Wound Care
    - Taxonomy evidence: The September 2025-August 2027 framework publishes four total-fluid-handling bands in product listings. These are procurement classifications, not evidence of universal international adoption.
    - Taxonomy evidence: The published Low band is xx.xx-xx.xx g/xx.xx cm^2.
    - Taxonomy evidence: The published Moderate band is xx.xx-xx.xx g/xx.xx cm^2.
    - Taxonomy evidence: The published High band is xx.xx-xx.xx g/xx.xx cm^2.
    - Taxonomy evidence: The published Ultra-High band begins at xx.xx g/xx.xx cm^2.
    - Taxonomy evidence: The framework distinguishes supply routes from online ordering and offers commitment-dependent pricing. Neither ordering medium nor a pricing agreement alone identifies the first independent purchasing counterparty.
36. Surgical Dressings - Policy Article (A54563)
    - Taxonomy evidence: Surgical-dressing coding distinguishes wound covers with and without an adhesive border, independently of their wound-management material.
    - Taxonomy evidence: An adhesive-border wound cover has an integrated cover and distinct adhesive border around all sides. Coding uses pad dimensions rather than the outside border dimensions.
    - Taxonomy evidence: The surgical-dressing policy explicitly identifies contact-layer dressings as nonabsorptive, distinguishing them from a separate absorptive cover.
    - Taxonomy evidence: The policy recognizes both nonabsorptive contact layers and absorptive dressing categories. It does not supply a universal cross-material absorbency-band system.
37. Sandwell Area Formulary - Wound Management Products
    - Taxonomy evidence: The formulary distinguishes adhesive and nonadhesive foam offerings and separately describes bordered and nonbordered silicone-adhesive products.
    - Taxonomy evidence: The postoperative-eligible silicone-adhesive foam range is explicitly available in border and nonborder versions, establishing that borderlessness does not imply absence of adhesive.
    - Taxonomy evidence: The foam-dressing portfolio explicitly includes nonadhesive versions, supporting a separate no-integral-adhesive category rather than treating every borderless dressing as adhesive.

38. North American Industry Classification System - United States, 2022
    - Taxonomy evidence: The official classification distinguishes own-account merchants from agents that do not take title, and describes retailing as the final merchandise-distribution step. This supports transaction-role allocation rather than channel labels based on ordering technology.
    - Taxonomy evidence: NAICS xx.xx expressly includes surgical-dressing merchant wholesalers. Group purchasing organizations buying and selling on their own account are distinguished from agency-only organizations.
    - Taxonomy evidence: The classification separately recognizes pharmacies and health-product retailers, including convalescent-supply retailers. These establish retail intermediary roles, not Global postoperative-dressing shares.
39. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Taxonomy evidence: The wound-care framework supports organizational purchasing, supplier awards and online ordering. Under its total-purchase route, dressings belong to the purchasing organization rather than the patient.
    - Taxonomy evidence: Organizational ownership can differ from patient delivery destination. Framework award terminology alone does not determine whether the counted principal sells directly or through a reseller.
40. Partnering with the NHS to Sell Goods and Services
    - Taxonomy evidence: Government commercial guidance distinguishes selling directly to healthcare providers from selling through supply-chain and collaborative purchasing arrangements.
    - Taxonomy evidence: The guidance expressly describes direct supplier sales to trusts and primary-care organizations, while noting that providers may buy from either manufacturers or distributors. Its historical procurement rules are not adopted as current Global requirements.
41. Medline Inc. - Form S-1 Registration Statement
    - Taxonomy evidence: The registration statement explicitly identifies the company's direct-to-consumer channel. This establishes a disclosed commercial model, not its postoperative-specific revenue, market-wide prevalence or Global share.
42. Consumer - Medline
    - Taxonomy evidence: The company's consumer-business page identifies wound-care products among home offerings and lists third-party pharmacy, general-retail and online-retail outlets. This supports observed retail participation, not an exhaustive market partition.
    - Taxonomy evidence: The same business page links its own consumer storefront alongside independent retail outlets, corroborating distinct own-storefront and reseller routes without establishing postoperative-specific sales.

1.4. Years Considered for the Study

The study spans 2024 through 2032. The designated historical year is 2024, the base year is 2025, the estimated year is 2026, and the forecast year and endpoint of the study horizon is 2032. These roles distinguish historical context, the base-period reference, estimated-year interpretation, and forward-looking analysis.

Figure 1. Global Post-Operative Wound Dressings Market, Years Considered for the Study

1.5. Currency Considered for the Study

Monetary reporting uses U.S. dollars (USD) on an absolute-value basis.

1.6. Language Considered for the Study

The study is published in American English.

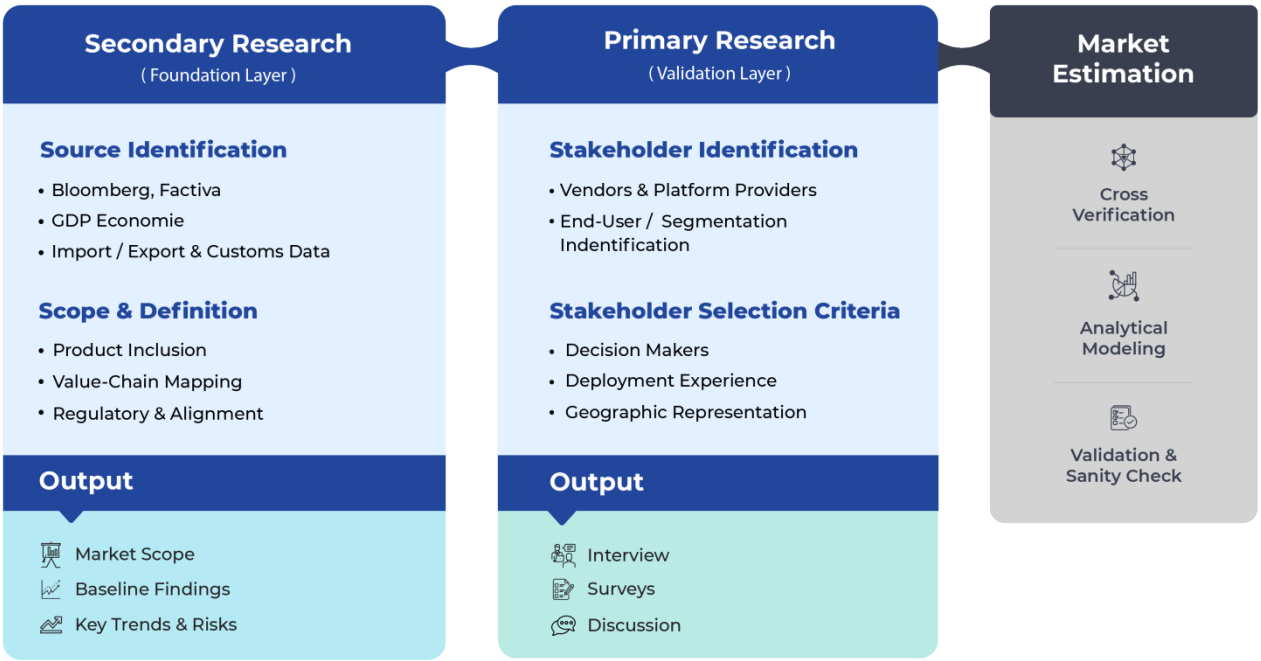
1.7. Key Stakeholders

- Dressing manufacturers and therapy-platform offering owners: assess documented participation, portfolio fit, buyer requirements, and the capabilities needed to support an in-scope offering.
- Licensors, licensees, and commercial partners: assess territorial and offering-specific rights, retained responsibilities, and conditions affecting market access.
- Institutional purchasers and procurement organizations: evaluate qualification, contractual comparability, supply commitments, and switching conditions for Hospitals and Freestanding Surgical Centers.
- Clinical, nursing, and care-provider decision-makers: connect offering eligibility and purchasing requirements with the needs of Office-Based & Community Providers, Residential & Post-Acute Care Facilities, and Home Healthcare Providers.
- Wholesalers, distributors, retailers, and dispensing organizations: assess channel rights, customer eligibility, delivery responsibilities, and the distinction between distributing an offering and controlling its commercial rights.

- Self-Care Households and caregivers: understand purchasing routes, provider-linked access conditions, and the support responsibilities attached to an offering.
- Regulators, payers, and reimbursement authorities: distinguish legal product status, purchasing eligibility, and payment conditions within their respective jurisdictions.
- Investors and corporate development teams: assess whether documented offerings, business rights, and routes to buyers support a proposed acquisition, partnership, or market-entry rationale.

2. Research Methodology

2.1. Introduction



The study frames Post-Operative Wound Dressings as a commercial offering and market-access question across the accepted Global scope. It connects dressing and platform classifications with supplier participation, buyer qualification, business rights, channels, and purchasing choices. Commercial evidence provides the basis for observed conditions, while qualitative interpretation explains possible mechanisms and preserves the conditions that could change a conclusion.

2.2. Research Design

The design separates four questions: what offering belongs to the accepted market, who controls or supplies it, what commercial access is documented, and which buyer conditions govern its consideration. Inclusion of a dressing or platform category establishes study coverage, not the capability of a particular supplier or availability in a particular jurisdiction.

Comparisons are organized around identifiable offerings and supplier-to-buyer relationships across the accepted surgical pathways and care settings. Broader wound-care participation, an expert's organizational affiliation, and a product announcement cannot substitute for evidence addressing the specific commercial question.

Figure 2. Global Post-Operative Wound Dressings Market, Research Design

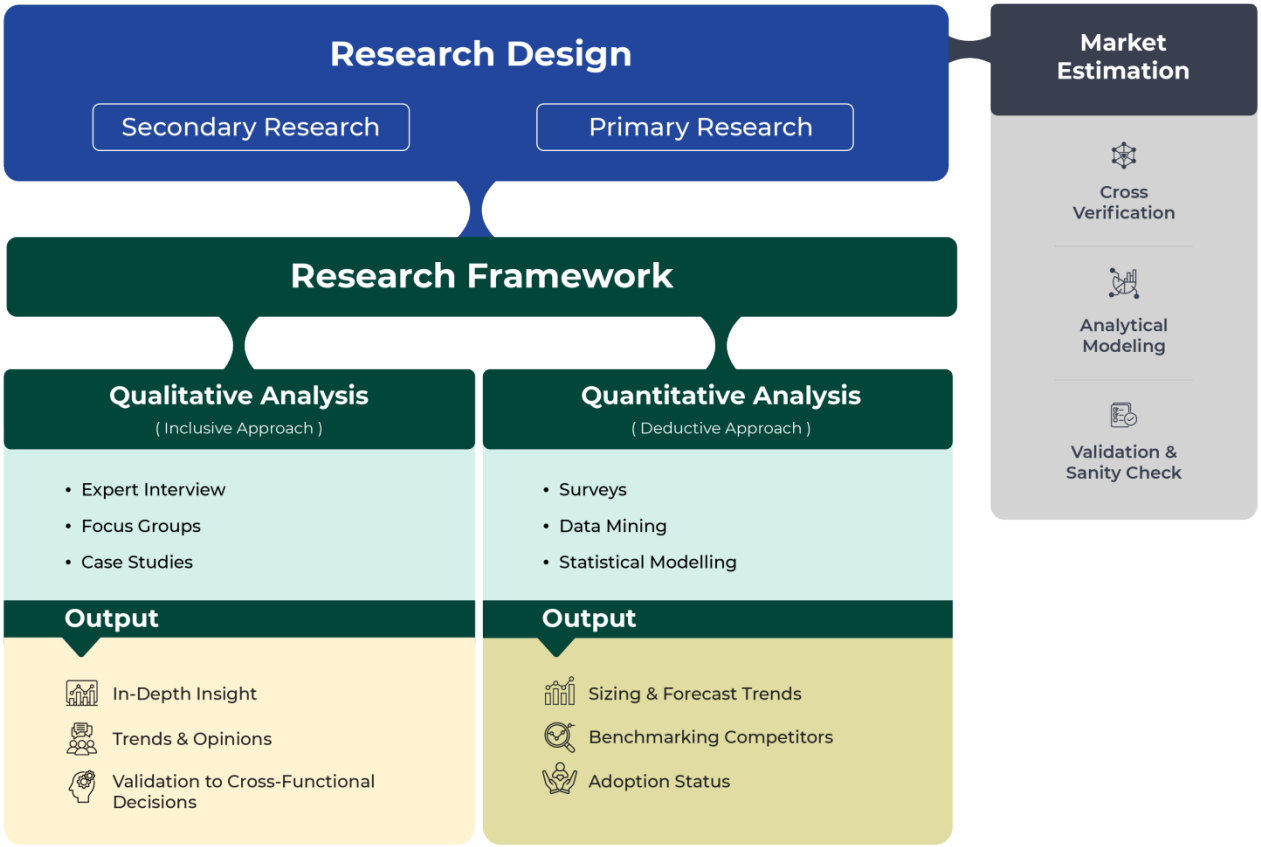
2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary evidence is assigned to the commercial fact it can establish. Official supplier portfolios can support named offerings; regulatory records can support authorization status and jurisdiction; company filings can support disclosed ownership and business operations; and public purchasing policies or awards can support stated procurement conditions. Licensing and channel materials can support commercial rights or delivery responsibilities where these are expressly described.



These source roles are complementary rather than interchangeable. An advertised offering does not establish continuing local availability, an authorization does not establish adoption, and a broader corporate disclosure does not establish post-operative participation for every product. Interpretation requires attention to the offering identity, effective period, territory, underlying authority, and scope of the claim.

2.3. Research Framework

The framework connects the market definition and accepted taxonomy to questions about supplier participation, offering identity, business rights, buyer access, and competition. The relevant supplier universe is defined through documented participation in in-scope offerings rather than membership in the wider wound-care industry.

Commercial interpretation then connects an offering to its buyer setting and route to market. Observed facts, economic explanations, and strategic options remain distinct: a proposed entry route or purchasing change must retain any unresolved authorization, licensing, qualification, or service condition on which it depends.

Figure 3. Global Post-Operative Wound Dressings Market, Research Framework

2.3.1. Qualitative Analysis

Qualitative analysis examines how Dressing Type, Therapy Platform, Antimicrobial Technology, Fixation Design, and Absorbency relate to commercial differentiation and buyer requirements. Healing Pathway, Surgical Application, End User, and Sales Channel provide context for interpreting qualification, access, switching, and delivery obligations. Category membership organizes the comparison; it does not establish interchangeability, clinical superiority, or a supplier's ability to satisfy a particular purchaser.

Economic explanations distinguish a documented commercial condition from its proposed effect on adoption, bargaining, or competitive choice. An interpretation remains conditional where the relevant purchasing requirement, contractual right, or delivery commitment has not been established.

2.3.2. Quantitative Analysis

The quantitative framework is bounded by the Global market, the designated historical, base, estimated, and forecast years, and reporting in USD on an absolute-value basis. The accepted segmentation axes provide independent classification lenses rather than additive opportunities. An offering classified by dressing material, therapy platform, antimicrobial technology, and end user remains part of the same commercial perimeter.

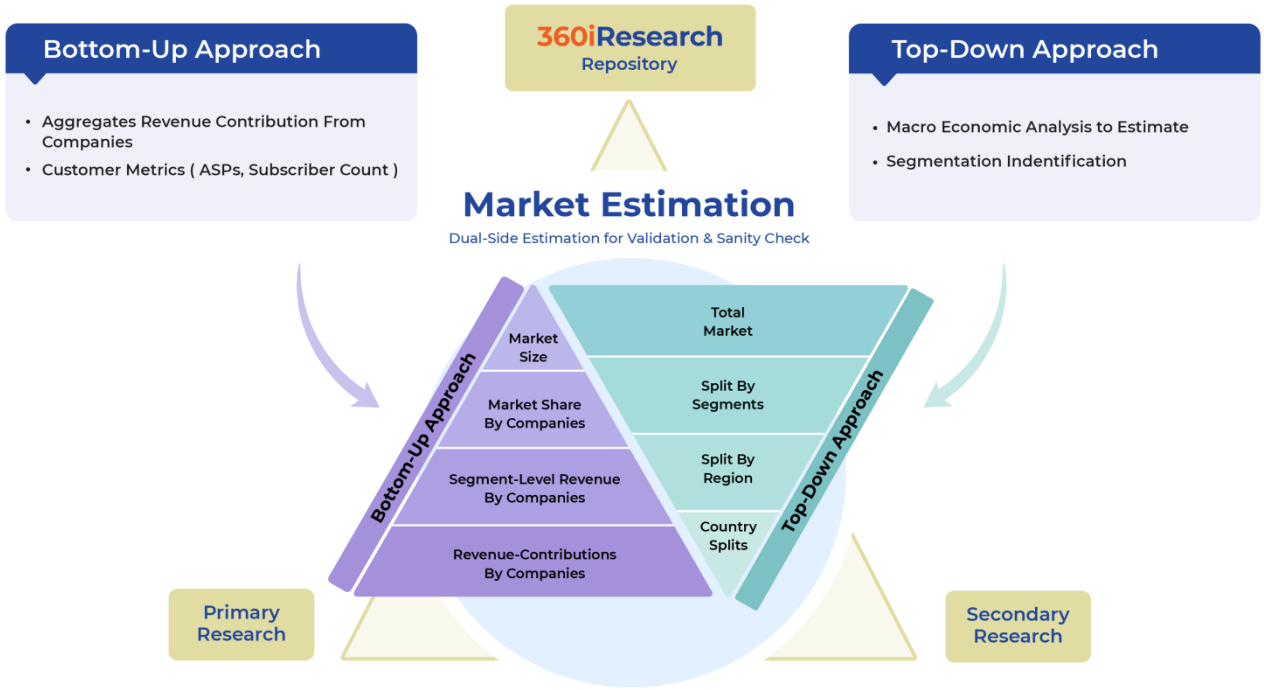
Any numerical attribution requires compatible offering scope, geography, period, and commercial relationship. A classification label or qualitative explanation cannot independently establish an allocation, and an estimate derived from an assumption cannot serve as independent confirmation of that assumption.

2.4. Market Size Estimation

The market-value question concerns activity attributable to the defined Global Post-Operative Wound Dressings market, not the whole wound-care industry, upstream materials, or downstream professional care. Any estimate must retain the accepted offering hierarchy, designated period roles, and USD absolute-value presentation. Dressing and platform relationships require compatible boundaries, while classification through several axes must not create duplicate attribution. Qualitative evidence informs interpretation but does not independently establish a numerical estimate.

2.4.1. Top-Down Approach

A top-down interpretation is defensible only where a broader business or wound-care disclosure can be related to the accepted post-operative offering boundary, geography, and period. A corporate or portfolio total is not equivalent to this market. It cannot establish attribution to a Dressing Type, Therapy Platform, or other category without support for the relevant boundary and allocation.



2.4.2. Bottom-Up Approach

A bottom-up interpretation requires offering-level or business-level evidence that can be attributed to the defined post-operative activity. The key boundary questions are whether an observation concerns a finished dressing, an accepted therapy-platform offering, or a broader business, and whether apparently separate records describe the same commercial activity. Supplier participation, channel presence, and category inclusion alone do not determine a numerical contribution.

2.5. Data Triangulation

Triangulation concerns consistency of commercial meaning as well as corroboration. An offering record, authorization, licensing statement, and purchasing record may describe different aspects of the same business relationship; one does not automatically confirm the others. Their interpretation requires matching the offering, territory, period, and stated commercial role. Where evidence conflicts, the affected conclusion must retain the unresolved condition rather than substitute a broader claim for the narrower fact.

Figure 4. Global Post-Operative Wound Dressings Market, Data Triangulation

2.6. Research Outcomes

The study is intended to help suppliers assess participation and market-access prerequisites, buyers distinguish comparable offerings and switching conditions, and investors evaluate whether commercial rights and delivery capabilities match the defined opportunity. Its decision value rests on separating documented offerings and relationships from conditional interpretations, with unresolved authorization, contractual, purchasing, or support requirements retained as conditions on a commercial commitment.

2.7. Research Assumptions

- The accepted dressing and therapy-platform categories remain in scope. Attribution of a particular offering to post-operative activity requires its own commercial support rather than a general wound-care label.
- The segmentation axes describe different attributes of the same market. Membership across Dressing Type, Therapy Platform, End User, and other axes does not represent separate additive activity.
- Global category inclusion does not imply uniform authorization, purchasing eligibility, reimbursement, or availability. Commercial choices remain conditional on the applicable jurisdiction and buyer.
- Shared material, antimicrobial, fixation, or absorbency classifications are not treated as proof of interchangeability. Switching conclusions require evidence relevant to the specific offerings and purchaser requirements.

- Where dressings and therapy-platform offerings are commercially linked, their distinct roles must be preserved without attributing a supplier's entire platform portfolio to post-operative wound dressings.

2.8. Research Limitations

- Where a disclosure combines surgical and nonsurgical applications, it cannot by itself establish the post-operative portion. Commercial comparisons must remain within the activity actually identified.
- A portfolio entry, announcement, or authorization establishes only its stated status and scope. It does not alone establish local purchasing, continuing availability, or buyer acceptance.
- Public business information may not settle exclusivity, territorial rights, renewal conditions, purchasing eligibility, or support obligations for a particular relationship. A commercial commitment remains conditional where an unresolved term is material.
- Evidence tied to one offering, surgical application, or buyer setting cannot automatically establish procurement eligibility or commercial acceptance in another. Cross-setting conclusions require support for the relevant setting.

3. Executive Summary

3.1. Introduction

Commercial advantage in the Global Post-Operative Wound Dressings market depends on matching a finished offering to an accepted surgical application and an accountable purchasing relationship, not on material or platform complexity alone. NHS wound-care arrangements illustrate the distinction: organized switching exposes suppliers to comparison, while NPWT consumables and equipment-access agreements follow separate routes. Buyers need qualified alternatives and continuity of the complete arrangement; suppliers need customer acceptance as well as an orderable product.

Adoption is selective rather than a uniform shift away from Standard Dressing Therapy. NICE's PICO assessment provides a risk-selected closed-incision purchasing rationale, but SUNRRISE did not show an infection-prevention advantage from routine incisional NPWT after emergency laparotomy. SWHSI-xx.xx separately found no clear healing-time benefit and an unfavorable cost-effectiveness result in its predominantly lower-limb, vascular-surgery secondary-intention population. These boundaries favor application-specific comparison and preserve standard dressings as a credible alternative rather than supporting all-surgery platform conversion.

Sources & Evidence

1. PICO negative pressure wound dressings for closed surgical incisions
   · NICE's PICO assessment emphasizes careful patient selection and recognizes variation by surgical application, supporting a bounded closed-incision purchasing interpretation. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
2. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   · SWHSI-xx.xx found no clear healing-time benefit and found NPWT not cost-effective against usual care; participants predominantly had lower-limb wounds after vascular surgery. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))
3. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · The NHS SBS framework describes multidisciplinary formulary selection and Tissue Viability team involvement for products outside the ordering system, distinguishing ordering access from customer acceptance. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
4. Advanced Wound Care
   · NHS Supply Chain supports dressing switching and mini-competitions, providing a documented mechanism for recurring supplier comparison. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/?utm_source=openai))
5. Negative Pressure Wound Therapy
   · Catalog consumable ordering is distinguished from direct equipment arrangements, including purchase, rental, and free-on-loan routes. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

6. Negative Pressure Dressings to Prevent Surgical Site Infection After Emergency Laparotomy: The SUNRRISE Randomized Clinical Trial
   · SUNRRISE found no surgical-site-infection advantage from routine incisional NPWT after emergency laparotomy, limiting transfer of a prevention proposition to that setting.
   ([jamanetwork.com](https://jamanetwork.com/journals/jama/fullarticle/xx.xx))

3.2. CXO Perspective

Provider executives should connect procurement to the budget and party responsible for continuation after discharge. Medicare bundles dressings furnished within a billed professional service, while eligible take-home supplies follow the applicable claims route. Solventum's US V.A.C. arrangement separately makes billing dependent on provider records. Hospitals and receiving suppliers should therefore assign eligibility resolution, documentation, replenishment, and equipment responsibilities before transfer; product selection alone cannot establish a funded continuation arrangement.

For offering owners and distributors, market-access investment should follow the actual customer interface rather than regional reach. HealthShare NSW assigns onward catalog publication to the contracted distributor where it supplies the customer; direct suppliers retain direct publication duties. A partner contributes access when it holds the relevant mandate and maintains that interface, at the cost of direct control. Direct supply remains an alternative where the owner can maintain those duties itself. Neither route justifies broad assortment or territorial commitments without accepted products and enforceable delivery responsibilities.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Medicare includes dressings supplied within a billed professional service in that service's payment; take-home dressing claims follow the applicable benefit requirements.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. V.A.C. Therapy patient support
   · Solventum states that missing provider documentation can prevent V.A.C. insurance billing and change equipment or personal-payment arrangements.
   ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
3. Procurement Services
   · HealthShare NSW assigns onward catalog publication to the contracted distributor where it supplies the customer; direct suppliers retain direct publication responsibilities.
   ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
4. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · Formulary-controlled ordering provides a documented reason to condition institutional channel investment on customer product acceptance.
   ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

3.3. New Revenue Opportunities

The assessed revenue routes are qualified institutional substitution for procurement and formulary teams, application-specific prevention where purchasers accept the evidence, accountable platform continuation for post-acute and home-care buyers, and rights-defined

own-label portfolio extension. Each depends on an accepted offering and a workable customer arrangement; none establishes universal replacement demand. The Opportunity Mapping section assesses these routes and specialist matrix access in detail. Dedicated Topical Oxygen Therapy and Bioelectric Wound Therapy channel commitments should remain deferred until the exact postoperative offering, territorial mandate, accountable seller, and applicable funding route are established.

Sources & Evidence

1. Buy Products
   · Vomaris identifies an exclusive Arthrex JumpStart route for specified surgical specialties alongside a separate professional Procellera inquiry route; the page does not settle every territorial or funding condition. ([vomaris.com](https://vomaris.com/buy-products))
2. PICO negative pressure wound dressings for closed surgical incisions
   · The assessment's patient-selection and surgical-application boundaries constrain a universal prevention opportunity interpretation. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
3. V.A.C. Therapy patient support
   · The US V.A.C. patient relationship includes replenishment, support, and documentation-dependent billing, supporting an accountable-continuation proposition rather than portability alone. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
4. Topical Oxygen Therapy (L37873)
   · Palmetto GBA's identified LCD specifies topical-oxygen noncoverage within its stated service and jurisdictional scope; it does not establish every oxygen-dressing or payer outcome. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
5. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · The formulary and exception arrangements identify procurement and clinical-selection constituencies that gate institutional substitution. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
6. Advanced Wound Care
   · The framework's switching arrangements support a conditional institutional substitution route, not automatic customer acceptance. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/?utm_source=openai))
7. Ways of Working - OEM
   · AMS advertises finished-goods OEM supply for portfolio extension and gap filling; this establishes a business capability rather than partner-specific postoperative rights. ([admedsol.com](https://admedsol.com/capabilities/ways-of-working-oem/))
8. Foam Dressing - Wound Care Range - ActivHeal Foam
   · ActivHeal Foam Adhesive and Foam Non-Adhesive identify postoperative surgical applications, establishing a named branded alternative to a separately negotiated own-label route. ([activheal.com](https://activheal.com/wound-care-dressing-range/foam-dressing/))

3.4. Next-Generation Business Models

Advanced Medical Solutions Group plc's advertised finished-goods OEM route supports a conditional choice between own-label portfolio extension and an existing ActivHeal offering. Brand control brings agreement-specific supply dependence, rights, authorization, and

customer-acceptance obligations; the branded product's purchasing status does not automatically transfer. Own-label entry is defensible only where confirmed postoperative availability and customer needs justify those added commitments.

Co-promotion separates customer reach from product ownership. Mölnlycke Health Care's exclusive US post-acute Endoform agreement, effective October xx.xx 2026, adds a promotional interface while Aroa Biosurgery Limited retains ownership and supply responsibility. Providers should confirm the purchasing contact, eligible configuration, and payer conditions before conversion. The relationship establishes a commercial model, not demonstrated postoperative adoption or transferred fulfillment accountability.

Sources & Evidence

1. Ways of Working - OEM
   · The advertised finished-goods OEM model supports a conditional own-label route; exact product availability and customer-specific rights require an agreement. ([admedsol.com](https://admedsol.com/capabilities/ways-of-working-oem/))
2. Foam Dressing - Wound Care Range - ActivHeal Foam
   · The existing ActivHeal postoperative foam offerings support comparison with branded procurement; their product identity does not establish purchasing acceptance for a future OEM customer's version. ([activheal.com](https://activheal.com/wound-care-dressing-range/foam-dressing/))
3. Endoform | AROA
   · AROA identifies surgical applications for Endoform, qualifies country availability and licensed indications, and expressly does not guarantee payer coverage. ([aroa.com](https://aroa.com/product/endoform/))
4. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
   · The exclusive US post-acute Endoform co-promotion agreement is effective October xx.xx 2026; AROA retains ownership and continues distribution and supply. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news---molnlycke-and-aroa-partner-to-expand-access-to-endoformtm-in-the-us/))

3.5. Industry Roadmap

During 2026-2027, sequence commitments around operative contracts and active offerings. The published NHS NPWT framework ends March xx.xx 2027; Advanced Wound Care states August xx.xx 2027, with an extension option. Formal continuation or replacement notices, not the option alone, should govern commitments beyond those arrangements.

During 2028-2029, affected Great Britain suppliers should resolve certificate-specific continuation or an accepted replacement before extending customer commitments. Published guidance limits qualifying legacy-directive general devices to the earlier applicable certificate expiry or June xx.xx 2028, subject to stated exceptions. Other routes and Northern Ireland differ; consultation on indefinite CE recognition is not an enacted extension.

During 2030-2032, international expansion should combine eligible documentation reuse with explicit destination-level accountability. MDSAP offers a shared-audit mechanism, while Brazil requires a legally constituted domestic partner for foreign companies' authorization arrangements. Reusable records do not consolidate product access, local mandates, or purchasing authority. Changes in authority acceptance and executed partner responsibilities, rather than presumed harmonization, are the relevant commitment triggers.

Sources & Evidence

1. Advanced Wound Care

   · The stated expiry is August xx.xx 2027, with an option to extend; the option is not confirmation of an extension.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/?utm_source=openai))

2. Medical devices

   · Anvisa states that foreign companies require legally constituted Brazilian partners responsible for imported and distributed products rather than obtaining marketing authorizations directly.
   ([gov.br](https://www.gov.br/anvisa/en/regulation-of-products/medical-devices))

3. Medical Device Single Audit Program (MDSAP)

   · MDSAP permits a recognized organization to conduct a single regulatory audit addressing participating authorities' relevant requirements; this is an audit mechanism rather than a common purchasing authorization.
   ([fda.gov](https://www.fda.gov/medical-devices/cdrh-international-affairs/medical-device-single-audit-program-mdsap))

4. Regulating medical devices in the UK

   · Great Britain guidance limits qualifying legacy-directive general devices to the earlier applicable certificate expiry or June xx.xx 2028, subject to stated exceptions. Other routes differ, and the announced consultation on indefinite CE recognition is not an enacted extension.
   ([gov.uk](https://www.gov.uk/guidance/regulating-medical-devices-in-the-uk))

5. Negative Pressure Wound Therapy

   · The published NPWT framework ends March xx.xx 2027.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

4. Market Overview

4.1. Introduction

The Global Post-Operative Wound Dressings market combines finished dressing offerings with the accepted Standard Dressing Therapy, Negative Pressure Wound Therapy, Topical Oxygen Therapy, and Bioelectric Wound Therapy categories. Established product catalogs coexist with application-specific platform decisions: Convatec lists AQUACEL SURGICAL for postoperative incisions, Arthrex lists JumpStart for surgical-incision management, and NHS purchasing arrangements distinguish NPWT equipment from associated consumables. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪

Commercial participation is offering- and jurisdiction-specific. ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Across Closed Surgical Wounds, Open Wounds Healing by Secondary Intention, and Open Wounds Awaiting Surgical Closure, the relevant business boundary is the documented offering, its permitted application, and the buyer relationship-not the supplier's entire wound-care portfolio.

Figure 5. Global Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million, Growth %)

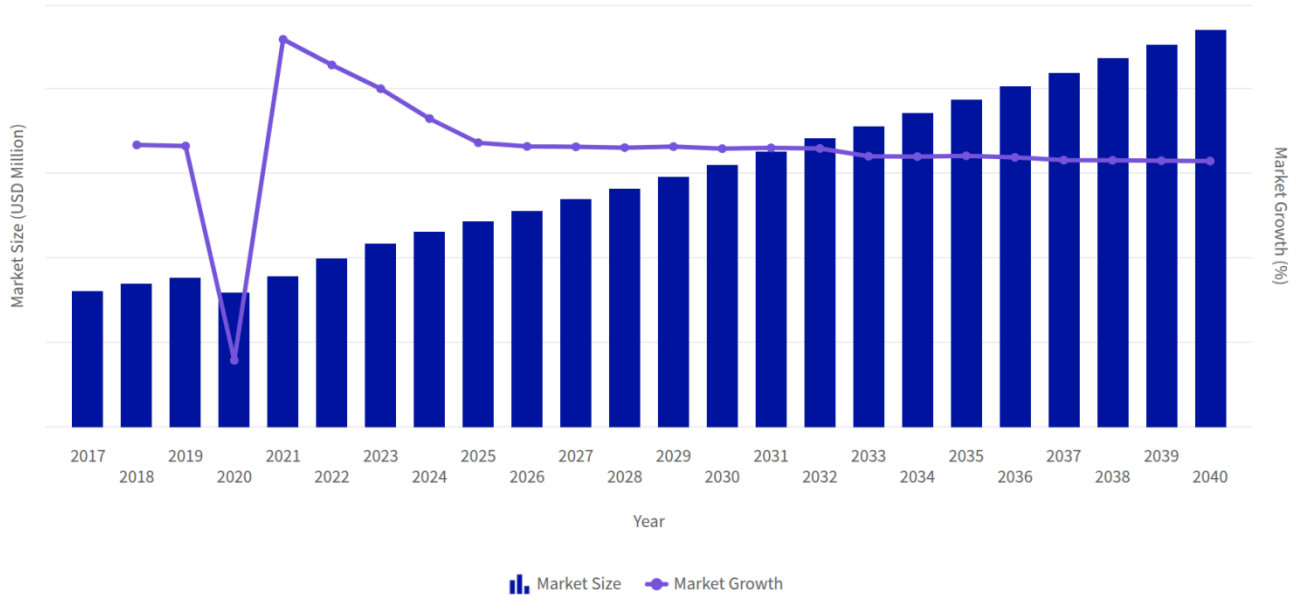


Table 2. Global Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million, Growth %)

Metric	2017	2024	2025	2026	2027	2032	2040
Market Size (USD Million)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Market Growth (%)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. AQUACEL SURGICAL cover dressing

   · Convatec's UK portfolio identifies AQUACEL SURGICAL as a postoperative surgical-incision offering. ([convatec.com](https://www.convatec.com/en-gb/products/advanced-wound-care/wound-type/pc-wound-closed-surgical-solutions/aquacel-surgical-cover-dressing/))

2. JumpStart Antimicrobial Wound Dressing

   · Arthrex lists JumpStart as an offering for surgical-incision management. ([arthrex.com](https://www.arthrex.com/orthobiologics/jumpstart))

3. Convatec Australia Pty Ltd - AQUACEL Ag Surgical Cover Dressing - Dressing, hydrophilic gel-forming (216814)

   · ARTG entry xx.xx identifies AQUACEL Ag Surgical Cover Dressing, Convatec Australia Pty Ltd as sponsor, and Convatec Limited as manufacturer. ([tga.gov.au](https://www.tga.gov.au/resources/artg/xx.xx))

4. Negative Pressure Wound Therapy

   · The framework distinguishes NPWT equipment and related consumables. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))

5. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

6. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

7. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

8. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

9. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

10. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

11. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
12. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

4.2. Key Growth Contribution

Risk-selected complication prevention can support adoption of differentiated closed-incision dressings when an institution values the consequences across the care episode. NICE's PICO guidance provides a defined purchasing rationale, requiring an application-relevant proposition and an accepted supply route. A high-risk label alone is insufficient: SUNRRISE found no infection-prevention advantage from routine PICO xx.xx use after emergency laparotomy. Suppliers therefore need buyer-approved use cases and accountable commercial support; standard dressings remain a counterforce to indiscriminate platform substitution.

Figure 6. Global Post-Operative Wound Dressings Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

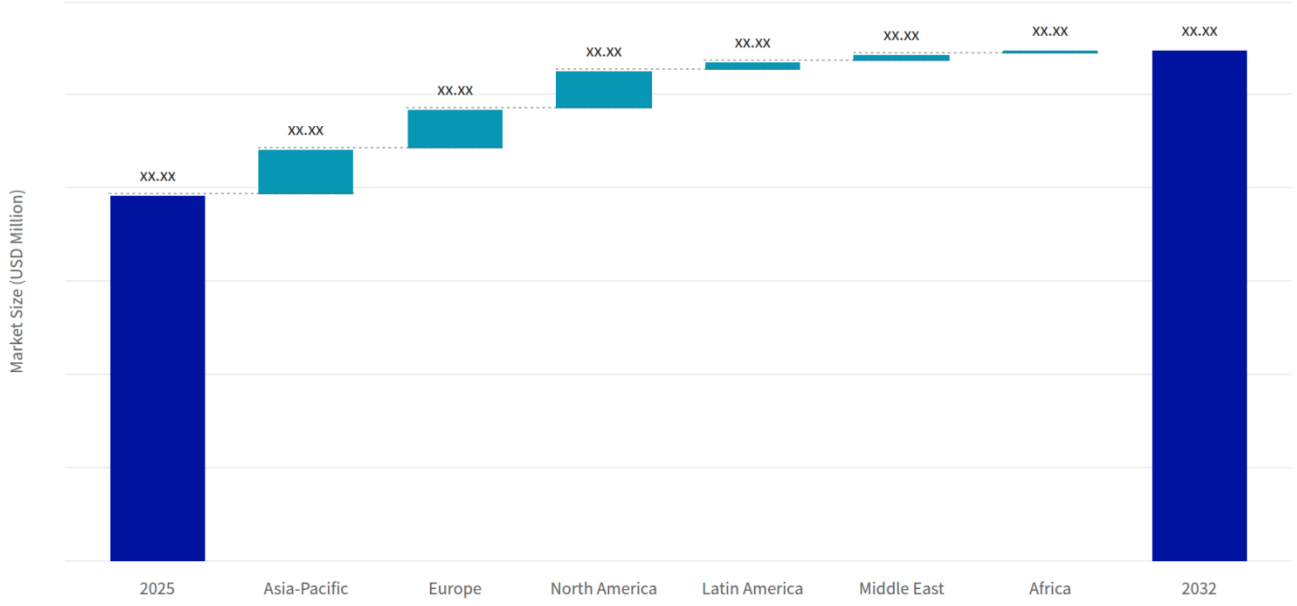

Figure 7. Global Post-Operative Wound Dressings Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

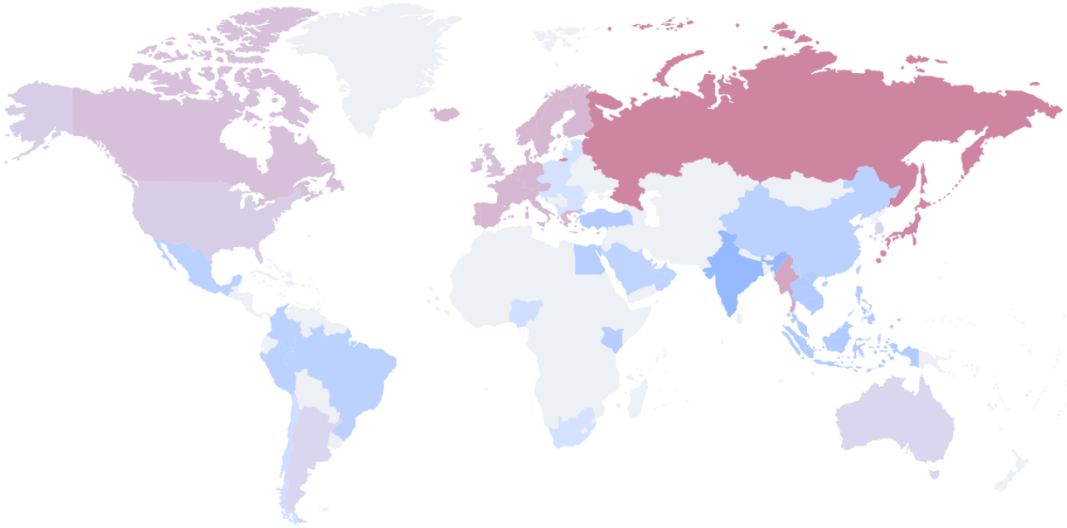

Table 3. Global Post-Operative Wound Dressings Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Absorbency	xx.xx	xx.xx	xx.xx	xx.xx
Antimicrobial Technology	xx.xx	xx.xx	xx.xx	xx.xx
Country	xx.xx	xx.xx	xx.xx	xx.xx
Dressing Type	xx.xx	xx.xx	xx.xx	xx.xx
End User	xx.xx	xx.xx	xx.xx	xx.xx

Healing Pathway	xx.xx	xx.xx	xx.xx	xx.xx
Region	xx.xx	xx.xx	xx.xx	xx.xx
Sales Channel	xx.xx	xx.xx	xx.xx	xx.xx
Surgical Application	xx.xx	xx.xx	xx.xx	xx.xx
Therapy Platform	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. PICO negative pressure wound dressings for closed surgical incisions

   · NICE supports considering PICO for selected high-risk closed surgical incisions. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))

2. Negative Pressure Dressings to Prevent Surgical Site Infection After Emergency Laparotomy: The SUNRRISE Randomized Clinical Trial
   - SUNRRISE used PICO xx.xx and found no surgical-site-infection advantage from routine application after emergency laparotomy. ([jamanetwork.com](https://jamanetwork.com/journals/jama/fullarticle/xx.xx))
3. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
4. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

5. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
6. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
7. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

8. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
9. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

11. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
12. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

13. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

14. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
15. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

16. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

17. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

18. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
19. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
20. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
21. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
22. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
23. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

24. Convatec 2025 Annual Results Transcript - 24 February 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.

25. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.

26. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.

27. FDA K143124 - KA01 Chitosan Wound Dressing
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.

28. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

29. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
30. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
31. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
32. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

33. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
34. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
35. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

36. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
37. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

38. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
39. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
40. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
41. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
42. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
43. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
44. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

45. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
46. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
47. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
48. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

49. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
50. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

51. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
52. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

53. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

54. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

55. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
56. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
57. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
58. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

59. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

60. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
61. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
62. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
63. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

64. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
65. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

66. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

67. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

68. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

69. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
70. Solventum Corporation - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
71. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
72. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.

73. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
74. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
75. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
76. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

77. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
78. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

4.3. Industry Ecosystem & Value Chain Analysis

[redacted] The procurement decision therefore allocates equipment access, replenishment responsibility, and contractual obligations as well as selecting a dressing. A free-on-loan label should not be interpreted as eliminating the commercial obligations of the overall arrangement.

[redacted] Separately sourcing components may offer flexibility, but only where the authorized product relationship and

service responsibilities remain acceptable to the customer. The framework summaries do not establish universal exclusivity or interoperability.

Sources & Evidence

1. Negative Pressure Wound Therapy
   · Consumables use catalog routes; equipment arrangements include purchase, rental, and free-on-loan options.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
2. Medical support
   · Solventum advertises continuous US V.A.C. support and supply-ordering assistance.
   ([solventum.com](https://www.solventum.com/en-us/home/medical/support/))

4.3.1. Supply-Side Analysis

A contract award and an active offering are different supply-side facts. The NHS NPWT framework identifies GB UK Healthcare as awarded but without listed products and records Medela UK Ltd as delisted after exiting the market. ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■

Channel rights can differ within a technology family. ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ The relevant commercial questions are the permitted field, territory, contracting party, and remaining customer approvals; the public offering pages do not settle every contractual term.

Sources & Evidence

1. JumpStart Antimicrobial Wound Dressing
   · The distributor's own portfolio independently identifies the JumpStart surgical offering.
   ([arthrex.com](https://www.arthrex.com/orthobiologics/jumpstart))
2. Negative Pressure Wound Therapy
   · The supplier section distinguishes GB UK Healthcare's award without listed products and Medela UK Ltd's delisting.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
3. Buy Products
   · Vomaris distinguishes professional prescription inquiries from the exclusive Arthrex JumpStart route for specified surgical specialties. ([vomaris.com](https://vomaris.com/buy-products/))

4.3.2. Demand-Side Analysis

The party selecting a postoperative dressing is not necessarily the party bearing its cost. ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■ ■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■

[redacted] A facility's product choice should not be treated as confirmation of covered replenishment after discharge.

For differentiated closed-incision products, the purchasing question can extend beyond acquisition expense to the consequences of complications. NICE's PICO recommendation provides a risk-selected example, but its economic conclusion is modeled rather than a guarantee for each institution. [redacted]

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Professional-service dressings are not separately payable; eligible take-home supplies may be claimed under applicable requirements.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. PICO negative pressure wound dressings for closed surgical incisions
   · NICE recommends considering PICO for high-risk closed surgical incisions and presents a modeled whole-treatment economic conclusion.
   ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
3. V.A.C. Therapy patient support
   · Solventum identifies prescription and clinical-information requirements affecting insurance billing for continuing V.A.C. therapy.
   ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

4.3.3. Stakeholder Analysis

Clinical, payment, and supply authority remain distributed. Treating professionals provide the orders and supporting records, payers determine eligibility, and the supplying business carries fulfillment and claims responsibilities. [redacted]

Self-Care Households are participants in the market, but consumer access does not remove professional oversight or claim restrictions. [redacted] The permission establishes the scope of specified advertising representations, not adoption or equivalence with another offering.

Sources & Evidence

1. Negative Pressure Wound Therapy - Medicare Provider Compliance Tips
   · CMS illustrates payment recoupment following insufficient NPWT documentation. ([cms.gov](https://www.cms.gov/training-education/medicare-learning-networkr-mln/compliance/medicare-provider-compliance-tips/negative-pressure-wound-therapy))
2. Procurement Services
   · HealthShare NSW assigns catalog-publication responsibilities according to the direct or contracted distributor relationship. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
3. Molnlycke Health Care Pty Ltd - Adhesive bandage
   · The TGA permission allows specified Mepilex Border Post Op consumer representations accompanied by healthcare-professional-supervision statements. ([tga.gov.au](https://www.tga.gov.au/resources/advertising-permissions/molnlycke-health-care-pty-ltd-adhesive-bandage))

4.4. Market Dynamics

[illegible] Support for complication prevention in one pathway does not establish an economic advantage for accelerated healing in another. Selective adoption and continued use of standard dressings can therefore coexist without contradiction.

Commercial differentiation is also filtered through the organization paying for care and the channel fulfilling it. A provider may accept an offering while the subsequent supply relationship still requires separate coverage, documentation, and purchasing approval. [illegible]

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · The benefit and payment distinctions support the synthesis of setting-dependent commercial access. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. PICO negative pressure wound dressings for closed surgical incisions
   · The recommendation is risk-selected and specific to closed surgical incisions. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
3. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   · The 2025 SWHSI-xx.xx publication reports no clear healing-time benefit and finds NPWT not cost-effective against usual care in the studied population. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))

4.4.1. Key Drivers

4.4.1.1. Risk-selected complication prevention supports differentiated purchasing

Risk-selected prevention creates a differentiated purchasing rationale for closed-incision offerings. NICE recommends considering PICO for people at high risk of surgical-site infection and describes a modeled whole-treatment economic case. ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. PICO negative pressure wound dressings for closed surgical incisions
   - The recommendation supports targeted procurement, not universal replacement of standard dressings. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))

4.4.1.2. Supported portable offerings enable continuity beyond the surgical facility

Portable NPWT purchasing options and documented patient-support commitments make continuation outside the surgical facility commercially feasible. ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ These arrangements can support adoption where the receiving provider and payer accept the pathway; portability alone does not establish a funded or adequately supported home-care arrangement.

Sources & Evidence

1. Negative Pressure Wound Therapy
   - Portable pumps are a stated framework category. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
2. Medical support
   - The documented support commitment supports fulfillment analysis, not an inference of adoption or outcomes. ([solventum.com](https://www.solventum.com/en-us/home/medical/support/))

4.4.1.3. Purchasing-system integration enables institutional ordering

Integration into the buyer's purchasing infrastructure can turn an eligible dressing into an orderable offering. HealthShare NSW uses the National Product Catalogue and assigns publication responsibilities according to the direct or distributor supply relationship. ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■ ■■■ ■■ ■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Procurement Services
   - NSW Health purchasing uses the National Product Catalogue; supplier information responsibilities accompany that route. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

4.4.2. Key Restraints

4.4.2.1. Payer eligibility separates product availability from funded access

[illegible] Separately, Palmetto GBA's topical-oxygen LCD specifies noncoverage within its listed jurisdictions, not a universal US rule. Suppliers must establish the applicable benefit and payer decision before treating an authorized offering as a reimbursable postoperative sale.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   - Coverage requires both a qualifying wound and an eligible dressing. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. Surgical Dressings (L33831)
   - The LCD applies dressing-type and material-based coverage conditions; antimicrobial classification alone does not establish payment eligibility. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
3. Topical Oxygen Therapy (L37873)
   - Palmetto GBA's LCD specifies topical-oxygen noncoverage within its listed jurisdictions and describes local-contractor coverage authority. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))

4.4.2.2. Application-specific evidence constrains broad substitution claims

Evidence cannot be transferred automatically between healing pathways. SWHSI-xx.xx found no clear healing-time benefit and found NPWT not cost-effective against usual care in its predominantly lower-limb, vascular-surgery population. [illegible]

Sources & Evidence

1. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   - Participants predominantly had lower-limb wounds arising after vascular surgery; wider transfer requires qualification. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))

4.4.2.3. Organized purchasing exposes suppliers to recurring substitution pressure

NHS Supply Chain supports switching and mini-competitions in specified dressing classes. [illegible]

■■■■■■■■■■■■■ A specialty offering can retain a distinct proposition where the purchaser accepts its application-specific evidence, but framework membership alone does not establish that advantage.

Sources & Evidence

1. Advanced Wound Care
   · The framework supports product switching and mini-competitions in specified dressing classes. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))

4.4.3. Key Opportunities

4.4.3.1. Account-ready alternatives for controlled institutional substitution

Institutional substitution creates an opportunity for suppliers that can provide a comparable finished offering with an active purchasing identity and an accountable seller. ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ The opportunity is to reduce qualification and ordering friction, not to infer interchangeability from a material label; customer acceptance and delivery remain necessary.

Sources & Evidence

1. Procurement Services
   · HealthShare NSW assigns catalog-publication responsibilities according to the actual direct or contracted-distributor relationship. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
2. Advanced Wound Care
   · The framework supports product switching and qualified purchasing comparison. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))

4.4.3.2. Accountable continuation across discharge

Post-discharge platform supply creates a need for an accountable commercial handoff. ■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ Providers and receiving suppliers can address that need by allocating records, replenishment, support, and payment-resolution duties before transfer, provided the actual product, payer, and equipment relationship permit continuation.

Sources & Evidence

1. Medical support
   · Solventum advertises continuing US V.A.C. support and supply-ordering assistance. ([solventum.com](https://www.solventum.com/en-us/home/medical/support/))
2. V.A.C. Therapy patient support
   · Solventum identifies provider-documentation dependencies for V.A.C. insurance billing. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

4.4.3.3. Rights-defined own-label portfolio extension

■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■ ■■■■■■■■■■■ ■■■ ■■ ■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■ Capture requires a confirmed

offering, territorial rights, applicable authorization, customer acceptance, and supply commitments. An existing accepted branded product remains the alternative where own-label control does not justify those additional obligations.

Sources & Evidence

1. Ways of Working - OEM
   · AMS advertises finished-goods OEM supply for portfolio extension and gap filling. ([admedsol.com](https://admedsol.com/capabilities/ways-of-working-oem/))

4.4.4. Key Challenges

4.4.4.1. Documentation handoffs can interrupt an otherwise eligible supply relationship

[redacted] CMS also illustrates recoupment following insufficient documentation. The execution challenge is an accountable administrative handoff, not merely delivery of a portable product.

Sources & Evidence

1. V.A.C. Therapy patient support
   · The patient page states that missing medical data can prevent insurance billing and change payment responsibility. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
2. Negative Pressure Wound Therapy - Medicare Provider Compliance Tips
   · The compliance example establishes a payment consequence of inadequate records, not a postoperative adoption measure. ([cms.gov](https://www.cms.gov/training-education/medicare-learning-networkr-mln/compliance/medicare-provider-compliance-tips/negative-pressure-wound-therapy))
3. Negative Pressure Wound Therapy Pumps (L33821)
   · The NPWT LCD requires appropriate written orders, proof of delivery, and documented affirmative refill requests. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?LCDid=xx.xx))

4.4.4.2. Local resilience commitments create obligations beyond product supply

NHS Supply Chain's Advanced Wound Care framework calls for UK warehouse stock and forward planning to improve resilience. [redacted] The appropriate commitment depends on the executed customer agreement and replenishment responsibilities.

Sources & Evidence

1. Advanced Wound Care
   · Resilience measures include UK warehouse stock and forward planning. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))

4.4.4.3. Cross-market qualification requires aligned but noninterchangeable records

Commercial qualification must stay aligned across intended-use claims, quality-system obligations, and purchasing records. European classification guidance, the US QMSR, and HealthShare NSW's catalog responsibilities govern different parts of that relationship. ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■■

Sources & Evidence

1. Procurement Services
   · Purchasing-record responsibilities are distinct from product authorization and product evaluation. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
2. MDCG 2021-24 Rev.1 - Guidance on classification of medical devices
   · The April 2026 guidance makes wound-dressing classification dependent on intended use and applicable special rules. ([health.ec.europa.eu](https://health.ec.europa.eu/system/files/2021-xx.xx/mdcg_2021-24_en_0.pdf))
3. Quality Management System Regulation (QMSR)
   · The QMSR applies to finished-device manufacturers within its stated scope and incorporates ISO xx.xx:2016. ([fda.gov](https://www.fda.gov/medical-devices/postmarket-requirements-devices/quality-management-system-regulation-qmsr))

4.5. Porter’s Five Forces Analysis

Buyer leverage is strongest where an institution can choose among qualified alternatives through an established purchasing arrangement. The NHS Supply Chain NPWT framework lists competing suppliers and several equipment-access models. ■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■

Entry barriers combine regulatory obligations, intellectual-property rights, and fulfillment capability. ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ An entrant must establish its own commercial rights and purchasing eligibility; a distributor relationship does not itself resolve those requirements.

Substitution can occur between standard dressings and therapy platforms as well as between suppliers. The SWHSI-xx.xx findings preserve a credible standard-dressing alternative for the

lower-limb secondary-intention population studied. ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■

Sources & Evidence

1. Negative Pressure Wound Therapy
   · Named competing suppliers and alternative equipment-access models support a bounded buyer-choice analysis.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
2. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   · The comparative findings support a bounded standard-dressing substitute analysis.
   ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))
3. MDCG 2021-24 Rev.1 - Guidance on classification of medical devices
   · A material or dressing-type label cannot by itself determine the applicable regulatory class.
   ([health.ec.europa.eu](https://health.ec.europa.eu/system/files/2021-xx.xx/mdcg_2021-24_en_0.pdf))
4. Solventum Corporation - 2025 Form 10-K
   · Solventum discloses reliance on proprietary rights, including patents, and third-party licensing. This does not establish a specific postoperative patent barrier.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4.6. PESTLE Analysis

Trade policy and macroeconomic exposure affect fulfillment economics without creating a uniform tariff outcome for Post-Operative Wound Dressings. ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■ ■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■ ■■ ■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ Buyers and distributors should establish product origin, contractual responsibility for duties, and delivery commitments before assuming that an existing sourcing arrangement will preserve its economics.

Regulatory treatment follows the offering's intended use rather than its material name alone. The European Commission's April 2026 classification guidance distinguishes wound-dressing classes according to intended purpose and applicable special rules. ■■ ■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■

Environmental and social requirements can determine purchasing eligibility independently of a dressing's clinical proposition. NHS Supply Chain's Advanced Wound Care framework incorporates carbon-reduction, modern-slavery, sustainability-assessment, and social-value requirements. ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■

[redacted]

Sources & Evidence

1. Advanced Wound Care
   · Supplier requirements include carbon reduction, sustainability assessment, modern slavery, and social value. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))
2. MDCG 2021-24 Rev.1 - Guidance on classification of medical devices
   · The guidance distinguishes classes according to intended purpose rather than treating all wound dressings alike. ([health.ec.europa.eu](https://health.ec.europa.eu/system/files/2021-xx.xx/mdcg_2021-24_en_0.pdf))
3. Quality Management System Regulation (QMSR)
   · The FDA states that the QMSR became effective on February xx.xx 2026, aligning quality-system requirements with international standards. ([fda.gov](https://www.fda.gov/medical-devices/postmarket-requirements-devices/quality-management-system-regulation-qmsr))
4. Solventum Corporation - 2025 Form 10-K
   · The 2025 filing attributes MedSurg cost pressure partly to tariffs, logistics, and 3M supply arrangements; its scope is not a dressing-specific tariff schedule. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4.7. Market Outlook

[redacted] Organized NHS switching provides a counterforce to unsupported differentiation, while the Endoform co-promotion relationship illustrates how selling reach can change without transferring supply accountability. The meaningful catalysts are buyer acceptance, an operative mandate, and a funded, deliverable arrangement-not portfolio expansion alone.

A favorable scenario combines application-relevant evidence with an active listing and dependable fulfillment. [redacted] Buyers should preserve qualified alternatives rather than assume that supplier familiarity or a newly announced relationship resolves every access condition across the Global market.

Sources & Evidence

1. Advanced Wound Care
   · Organized switching and competing supplier arrangements provide counterforces to unsupported differentiation. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
2. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
   · The Endoform relationship adds co-promotion while AROA retains ownership and supply responsibilities. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news---molnlycke-and-aroa-partner-to-expand-access-to-endoformtm-in-the-us/))

4.7.1. Near-Term Market Outlook (0-2 Years)

During 2026-2027, purchasing continuity and contract activation are more actionable than relying on a presumed successor arrangement. The published NHS NPWT framework expires March xx.xx 2027, and the Advanced Wound Care framework states August xx.xx 2027, with an extension option. ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■

The US post-acute Endoform co-promotion agreement effective October xx.xx 2026 creates a specific customer-interface decision. ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ The near-term milestone is an accepted and orderable relationship, not the agreement's announcement alone.

Sources & Evidence

1. Advanced Wound Care
   - The stated framework expires August xx.xx 2027 and includes an extension option, not a confirmed future extension. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
2. Negative Pressure Wound Therapy
   - The NPWT framework states an expiry of March xx.xx 2027. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
3. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
   - The exclusive US post-acute co-promotion agreement is effective October xx.xx 2026; AROA continues manufacture, distribution, and supply. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news---molnlycke-and-aroa-partner-to-expand-access-to-endoformtm-in-the-us/))

4.7.2. Medium-Term Market Outlook (3-5 Years)

■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■■■ ■■■ ■■■■■ ■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ Monitor actual certificates, enacted MHRA changes, and replacement acceptance. The announced consultation on indefinite CE recognition should not be treated as an enacted extension or as a reason to defer offering-specific continuity decisions.

Sources & Evidence

1. Regulating medical devices in the UK
   · Great Britain guidance gives qualifying legacy-directive general devices an earlier-certificate-expiry or June xx.xx 2028 limit, subject to stated exceptions. Other routes and Northern Ireland differ. An announced consultation on indefinite CE recognition is not an enacted extension. ([gov.uk](https://www.gov.uk/guidance/regulating-medical-devices-in-the-uk))

4.7.3. Long-Term Market Outlook (5-10 Years)

During 2030-2032, the strategic opportunity is to reuse eligible compliance work without surrendering control of destination-specific commercial relationships. ■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■ Offering owners should organize reusable records around actual program acceptance rather than synchronize every territory commitment by a broad regional label.

Local accountability remains a separate dependency. Brazil's requirement for legally constituted domestic partners illustrates why a portfolio's international reach can depend on the entity controlling local records and obligations. ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■ ■■ ■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■

Sources & Evidence

1. Medical devices
   · The Brazilian requirement establishes a local accountable-party dependency that shared audit documentation does not replace. ([gov.br](https://www.gov.br/anvisa/en/regulation-of-products/medical-devices))
2. Medical Device Single Audit Program (MDSAP)
   · MDSAP permits a single regulatory audit to address participating authorities' relevant requirements; participation and acceptance have defined scopes. ([fda.gov](https://www.fda.gov/medical-devices/cdrh-international-affairs/medical-device-single-audit-program-mdsap))

4.8. Go-to-Market Strategy

■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ NHS Shared Business Services' multidisciplinary formulary and exception arrangements illustrate the access barrier: an ordering channel does not replace product acceptance. A supplier should establish the permitted application and customer inclusion route before promising a broad conversion.

Choose Wholesale & Distribution where the partner demonstrably controls the relevant purchasing interface and accepts its associated duties. ■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■

[redacted] Agreements should identify the product, territory, responsible legal party, records ownership, support, and lawful transition arrangements before broad exclusivity is granted.

[redacted] Otherwise, a less restrictive purchasing arrangement is preferable. Neither a financing label nor a purchasing concession should be presented as evidence of clinical benefit or payer eligibility.

Sources & Evidence

1. Procurement Services
   · A contracted distributor publishes onward to NSW Health; direct suppliers retain direct publication duties. Catalog participation does not itself constitute a tender award. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
2. National Pricing Matrices
   · National Pricing Matrices offer supplier-approved discounts against time-bound purchasing commitments. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/savings/npms))
3. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · The framework describes multidisciplinary formulary selection and Tissue Viability team involvement for products outside the ordering system. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
4. Medical devices
   · Anvisa states that foreign companies need legally constituted Brazilian partners responsible for imported and distributed products. ([gov.br](https://www.gov.br/anvisa/en/regulation-of-products/medical-devices))
5. Negative Pressure Wound Therapy
   · Consumables ordering is distinct from directly arranged equipment purchase, rental, and free-on-loan relationships. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

Clinical selection, provider budget ownership, and home-supply payment are separate purchasing decisions. ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ Discharging providers should not treat product selection as confirmation that subsequent household replenishment is funded.

For Home Healthcare Providers and Self-Care Households, continuity of an accepted supply relationship is a decision-relevant need. ■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ Familiarity with the product cannot replace this commercial handoff, and these US examples do not establish a uniform global payment pathway.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   - Medicare includes dressings applied within a billed professional service in that service's payment; eligible take-home dressing claims follow the applicable benefit requirements. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. V.A.C. Therapy patient support
   - Solventum's US V.A.C. patient information identifies prescribing and clinical-documentation requirements for insurance billing and describes possible equipment collection or personal payment responsibility when records are missing. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

5.2. Consumer Experience Benchmarking

■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ This supports including staff handling and patient experience in arthroplasty purchasing criteria, not a universal brand preference. Subjective results from an open-label comparison require caution when transferred to other procedures or patient groups.

■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■

Standard dressings therefore remain a necessary purchasing comparator for that pathway. The result neither proves product interchangeability nor settles closed-incision prevention: buyers should match the comparator, surgical population, and purchasing objective before changing a formulary.

Sources & Evidence

1. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   • SWHSI-xx.xx reported no clear healing-time benefit and found NPWT not cost-effective against usual care; participants predominantly had foot or leg wounds arising after vascular surgery. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))
2. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement...
   • The 2020 open-label elective hip and knee replacement trial reported low dressing failure with both products, while Mepilex Border Post-Op performed better on handling and patient-experience measures than Aquacel Surgical. ([biblio.ugent.be](https://biblio.ugent.be/publication/xx.xx))

5.3. Opportunity Mapping

Institutional substitution is a more immediately actionable route for a supplier with an accepted offering than a broad claim of technological superiority. [redacted] These are route priorities, not geographic or supplier rankings.

[redacted] Suppliers should pursue buyer-approved applications rather than an all-surgery conversion campaign. Buyers should retain standard dressings as a credible comparator and reassess the proposition when relevant guidance or comparative evidence changes.

Post-discharge continuity offers a different commercial opportunity for providers and suppliers already able to support the selected platform. [redacted]

Keeping an existing accepted arrangement is preferable to changing channels when the replacement cannot assume those responsibilities.

[redacted] Own-label supply preserves market-facing brand control but adds rights, authorization, customer-acceptance, and continuity obligations; the branded route can be simpler where the customer already accepts it. The branded product's purchasing references do not automatically transfer to an OEM customer's version.

[redacted] Endoform has documented surgical applications, and the Mölnlycke Health Care-Aroa Biosurgery Limited US post-acute relationship provides an additional promotional interface while AROA retains supply responsibility. A receiving provider should confirm the eligible configuration, purchasing contact, and payer conditions rather than interpret promotion as funded postoperative adoption.

Topical Oxygen Therapy and Bioelectric Wound Therapy remain included but warrant verification before dedicated channel commitments. Palmetto GBA's topical-oxygen noncoverage determination has a defined local service scope and does not settle every oxygen-containing dressing. [redacted]

Sources & Evidence

1. Medical support
   · The documented support interface is a concrete service capability, not evidence of payer acceptance or postoperative outcomes. ([solventum.com](https://www.solventum.com/en-us/home/medical/support/))
2. Buy Products
   · Vomaris identifies an exclusive Arthrex JumpStart route for specified surgical specialties alongside a separate professional Procellera inquiry route. ([vomaris.com](https://vomaris.com/buy-products))
3. PICO negative pressure wound dressings for closed surgical incisions
   · The recommendation provides a bounded prevention proposition, not universal postoperative substitution. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
4. V.A.C. Therapy patient support
   · The US V.A.C. relationship includes replenishment and documentation-dependent billing; missing records can change equipment or payment arrangements. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

5. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   · SWHSI-xx.xx found no clear healing-time benefit and found NPWT not cost-effective against usual care; the population predominantly had lower-limb wounds after vascular surgery. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))
6. Topical Oxygen Therapy (L37873)
   · Palmetto GBA's topical-oxygen LCD specifies noncoverage within its stated service and jurisdictional scope; it does not settle every oxygen-containing dressing or payer. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
7. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · Its formulary-controlled ordering illustrates why a purchasing channel remains conditional on customer acceptance. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
8. Advanced Wound Care
   · Switching and mini-competitions create an institutional route for accepted alternatives, not automatic customer access. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
9. Ways of Working - OEM
   · The advertised finished-goods route establishes a business capability but not a customer's product-specific rights, authorization, or purchasing acceptance. ([admedsol.com](https://admedsol.com/capabilities/ways-of-working-oem/))
10. Foam Dressing - Wound Care Range - ActivHeal Foam
    · ActivHeal Foam Adhesive and Foam Non-Adhesive identify postoperative surgical applications and provide UK purchasing references. ([activheal.com](https://activheal.com/wound-care-dressing-range/foam-dressing/))
11. Endoform | AROA
    · AROA identifies specified surgical applications for Endoform, qualifies country availability and licensed indications, and does not guarantee payer coverage. ([aroa.com](https://aroa.com/product/endoform/))
12. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
    · The agreement establishes a promotional interface, not transfer of fulfillment accountability or demonstrated postoperative acceptance. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news---molnlycke-and-aroa-partner-to-expand-access-to-endoformtm-in-the-us/))
13. Negative Pressure Dressings to Prevent Surgical Site Infection After Emergency Laparotomy: The SUNRRISE Randomized Clinical Trial
    · The emergency-laparotomy comparison challenges automatic transfer of a prevention proposition across closed-incision applications. ([jamanetwork.com](https://jamanetwork.com/journals/jama/fullarticle/xx.xx))

5.4. Distribution Channel Analysis

[redacted] Buyers should identify who owns the equipment contract, replenishment obligation, and support commitment before changing the supplying party. A replacement consumables channel should not be assumed to transfer the equipment relationship.

Institutional channel partners can contribute purchasing-system access and information maintenance. HealthShare NSW assigns onward catalog publication to the contracted distributor when it supplies the customer; direct vendors retain direct publication

responsibility. ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■

Patient-facing digital ordering can also operate within a professionally controlled supply relationship. Solventum offers app-based ordering and direct support for V.A.■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Negative Pressure Wound Therapy
   - The NHS NPWT framework runs through March xx.xx 2027, separates catalog consumables from direct equipment arrangements, and includes purchase, rental, and free-on-loan options. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
2. V.A.C. Therapy patient support
   - Solventum offers patient-facing app and telephone routes for V.A.C. supply ordering and support within its professionally directed supply relationship. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
3. Procurement Services
   - HealthShare NSW assigns onward catalog publication to contracted distributors where they supply the customer; direct vendors publish directly. Invalid effective-date records can block item processing. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

5.5. Pricing Trend Analysis

Institutional pricing can exchange purchasing flexibility for contractual certainty. NHS Supply Chain lists Advanced Wound Care among frameworks with National Pricing Matrices, under which supplier-approved discounts depend on a purchasing commitment over an agreed period. ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■

Upstream cost exposure does not establish automatic customer repricing. ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■ Fixed commitments can protect customer budgets while leaving suppliers exposed when recovery mechanisms are limited.

Sources & Evidence

1. Solventum Corporation - 2025 Form 10-K
   - Solventum attributed 2025 MedSurg cost pressure to tariffs, logistics, and 3M supply-agreement markups; it separately identifies inflation and input availability as supply risks. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

2. National Pricing Matrices
   - NHS Supply Chain lists Advanced Wound Care among frameworks with National Pricing Matrices. Supplier-approved discounts require time-bound purchasing commitments, and agreed tiers may be amended when commitments are not met. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/savings/npms/))

5.6. Regulatory Compliance & Standards Framework

[redacted] The April 2026 MDCG classification guidance distinguishes wound-dressing classes and applicable special rules; it is interpretive guidance, not legally binding legislation. Suppliers entering European purchasing processes should establish the applicable classification and conformity route for their actual claims rather than assume that a shared dressing category creates equivalent access.

[redacted] Australia's ARTG separately identifies AQUACEL Ag Surgical Cover Dressing with Convatec Australia Pty Ltd as sponsor and Convatec Limited as manufacturer. Neither quality-system alignment nor that registry relationship alone establishes reimbursement, fulfillment, or acceptance by an institutional purchaser.

Consumer communication and commercial rights also require separate review. The TGA's June xx.xx 2023 approval for specified Mepilex Border Post Op advertising representations requires accompanying professional-supervision statements. [redacted]

Sources & Evidence

1. Convatec Australia Pty Ltd - AQUACEL Ag Surgical Cover Dressing - Dressing, hydrophilic gel-forming (216814)
   - ARTG entry xx.xx identifies AQUACEL Ag Surgical Cover Dressing, Convatec Australia Pty Ltd as sponsor, and Convatec Limited as manufacturer. ([tga.gov.au](https://www.tga.gov.au/resources/artg/xx.xx))
2. Molnlycke Health Care Pty Ltd - Adhesive bandage
   - The TGA's June xx.xx 2023 approval permits specified Mepilex Border Post Op consumer advertising representations with accompanying healthcare-professional-supervision statements. ([tga.gov.au](https://www.tga.gov.au/resources/advertising-permissions/molnlycke-health-care-pty-ltd-adhesive-bandage))
3. MDCG 2021-24 Rev.1 - Guidance on classification of medical devices
   - The April 2026 MDCG classification guidance distinguishes wound-dressing classes by intended purpose and applicable special rules. The guidance explicitly states that it is not legally binding. ([health.ec.europa.eu](https://health.ec.europa.eu/system/files/2021-xx.xx/mdcg_2021-24_en_0.pdf))
4. Quality Management System Regulation (QMSR)
   - FDA's QMSR became effective on February xx.xx 2026, incorporates ISO xx.xx:2016, and applies to finished-device manufacturers within its stated scope and exemptions. ([fda.gov](https://www.fda.gov/medical-devices/postmarket-requirements-devices/quality-management-system-regulation-qmsr))

5. Solventum Corporation - 2025 Form 10-K
   · Solventum discloses patent protections and third-party IP licensing, without establishing an offering-specific postoperative patent barrier. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5.7. ESG & Sustainability Analysis

Environmental and social performance can affect institutional eligibility before product differentiation is considered. The NHS Advanced Wound Care framework requires supplier records covering carbon reduction, Evergreen assessment, modern slavery, social value, and its net zero roadmap. [redacted]

Product-level sustainability claims require a different comparison. [redacted] Clinical requirements can limit whether a service-life proposition produces the claimed environmental benefit.

Sources & Evidence

1. Advanced Wound Care
   · The NHS Advanced Wound Care framework includes mandatory supplier requirements covering carbon reduction, Evergreen assessment, modern slavery, social value, and the net zero supplier roadmap. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))
2. Sustainable portfolios
   · Mölnlycke positions longer Mepilex Border Post-Op service life as a potential waste-reduction lever. Its published LCA comparison policy uses its own portfolio rather than competitors as the comparison boundary. ([molnlycke.com](https://www.molnlycke.com/en-us/sustainability/sustainable-healthcare-solutions/))

5.8. Disruption & Risk Scenarios

Offering withdrawal can invalidate a familiar purchasing route without removing the supplier's entire portfolio. [redacted] Buyers should establish an unaffected, lawfully available, accepted alternative rather than substitute on a shared material label.

[redacted]

[redacted] Providers and suppliers should assign records ownership, escalation, and payer-resolution duties before transfer. The monitoring signal is an unresolved eligibility or documentation exception, not proof of product inadequacy; requirements must remain matched to the actual benefit.

[redacted] Offering owners should negotiate continuity, customer-record access, and transition responsibilities before granting broad rights. Direct coverage retains greater interface control but adds commercial obligations; appointing another intermediary is unsuitable until its actual rights and customer acceptance are established.

Trade-cost shocks expose the party unable to adjust an existing commitment. Solventum disclosed 2025 MedSurg pressure from tariffs and logistics alongside company-specific supply arrangements. [redacted]

Sources & Evidence

1. Negative Pressure Wound Therapy Pumps (L33821)
   · The NPWT LCD requires applicable written orders, delivery evidence, and affirmative refill requests; unmet requirements can lead to denial.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?LCDid=xx.xx))
2. Solventum Corporation - 2025 Form 10-K
   · Solventum attributes 2025 MedSurg cost pressure partly to tariffs, logistics, and 3M supply-agreement markups; this is not a postoperative-dressing-wide result.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. National Pricing Matrices
   · Suppliers may amend agreed tiers when purchasing commitments are unmet; this is not automatic tariff pass-through. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/savings/npms))
4. Covalon Technologies Ltd. - MD&A Q1 F-2026
   · Covalon's fiscal 2026 first-quarter disclosure reports disruption associated with an advanced-wound-care partner's ownership transition, without postoperative-specific attribution.
   ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_financials/2026/q1/Q1-FY2026-MD-A.pdf))
5. Wound and Burn Dressing Recall: Integra LifeSciences Removes Certain MediHoney and CVS Products
   · FDA's March xx.xx 2026 update classifies the identified MediHoney and CVS action as a Class II recall; the notice is product-specific.
   ([fda.gov](https://www.fda.gov/medical-devices/medical-device-recalls-and-early-alerts/wound-and-burn-dressing-recall-integra-lifesciences-removes-certain-medihoney-and-cvs-wound-and-burn))

5.9. Return on Investment & Cost-Benefit Analysis

[redacted] Standard dressings remain a necessary alternative. The commitment should be narrowed or deferred where the proposed application lacks the benefit assumed in the business case.

Budget ownership can also separate clinical value from financial realization. Medicare includes professional-service dressings in the service payment while eligible take-home supplies follow their applicable benefit. [redacted]

For an offering owner or distributor, direct coverage and partner commercialization exchange selling responsibility for interface control. [redacted] If these prerequisites are unsettled, retaining an existing qualified route or limiting the commercial commitment is preferable to assuming that broader reach will produce a satisfactory return.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Medicare includes dressings furnished within a billed professional service in that service's payment; qualifying take-home supplies follow a separate benefit determination. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. PICO negative pressure wound dressings for closed surgical incisions
   · NICE's overall-cost conclusion is modeled and compares PICO with standard dressings within its stated scope. ([nice.org.uk](https://www.nice.org.uk/guidance/htg509/resources/pico-negative-pressure-wound-dressings-for-closed-surgical-incisions-pdf-xx.xx))
3. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)
   · The unfavorable economic comparison is pathway-specific and cannot establish a result for every postoperative application. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))

4. National Pricing Matrices
   - The commitment structure creates a qualitative trade-off between purchasing concessions and flexibility. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/savings/npms))
5. Advanced Wound Care
   - The framework's resilience measures include UK warehouse stockholding and forward planning. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
6. Covalon Technologies Ltd. - MD&A Q1 F-2026
   - Covalon describes both direct selling and independent-distributor commercialization, providing distinct customer-interface alternatives. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_financials/2026/q1/Q1-FY2026-MD-A.pdf))
7. Negative Pressure Dressings to Prevent Surgical Site Infection After Emergency Laparotomy: The SUNRRISE Randomized Clinical Trial
   - The trial does not support assuming an infection-prevention benefit from routine incisional NPWT in the studied setting. ([jamanetwork.com](https://jamanetwork.com/journals/jama/fullarticle/xx.xx))

6. Cumulative Impact of Artificial Intelligence 2026

AI's evidenced commercial influence reaches the information surrounding dressing decisions, rather than demonstrating an AI feature of the dressings themselves. ■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ This establishes reported workflow adoption, not postoperative-specific effectiveness or proof that AI improves the choice of dressing.

■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■ If postoperative episodes and offering identities are captured consistently, such information could support formulary review and cross-setting coordination. This remains a conditional commercial use: observational records do not establish comparative product causation, and an advertised integration does not guarantee compatibility with a particular customer's environment.

Implementation also changes the buying constituency. NHS guidance recommends DTAC assessment across clinical safety, data protection, technical assurance, interoperability, usability, and accessibility. ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. AI-powered wound care receives high commendation
   · West London NHS Trust reports implementing Healthy.io's Minuteful for Wound in July 2022 across general wound services, with remote image review and management reporting. ([westlondon.nhs.uk](https://www.westlondon.nhs.uk/news/latest-news/ai-powered-wound-care-receives-high-commendation))
2. Transforming Wound Care Data into Intelligence
   · eKare describes inSight as combining computer vision and machine learning with structured wound records, including dressing-use information. These are advertised capabilities, not independent evidence of postoperative purchasing outcomes. ([ekare.ai](https://ekare.ai/uk-wound-management-digital-system/))
3. eKare Launches Enhanced Integration with EMIS
   · eKare reports integration between inSight and EMIS for patient-information exchange and wound-record transfer, subject to information-governance and clinical-safety requirements. ([ekare.ai](https://ekare.ai/ekare-launches-enhanced-integration-with-emis/))
4. Digital healthcare technologies in the NHS
   · NHS guidance recommends DTAC when introducing digital technologies, covering clinical safety, data protection, technical assurance, interoperability, usability, and accessibility. ([innovation.nhs.uk](https://innovation.nhs.uk/innovation-guides/regulation/digital-product-or-service/))

7. Post-Operative Wound Dressings Market, by Dressing Type

Dressing Type changes the purchasing comparison, not simply the material description. NHS Supply Chain separates pads, contact layers, foams, hydrogels, hydrocolloids, films, and other constructions into purchasing groups and supports switching within specified categories. ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■

Collagen Dressings and Acellular Extracellular Matrix Dressings require particular care when matching commercial categories to regulatory identities. ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ Suppliers should identify the actual offering and applicable purchasing route before assuming that a collagen-related code establishes eligibility for a matrix tender, or vice versa.

Specialty material identities also require presentation-specific interpretation. ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■ These records establish particular regulatory identities, not comparative purchasing superiority or continuing availability in every territory.

Absorbent Acrylic Dressings, Activated Charcoal Dressings, and Capillary Action Dressings have named categories in the October 2026 Drug Tariff, while NHS specialty specifications also recognize Biocellulose Dressings. ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ Specialty differentiation can justify retaining an alternative; a broad wound-care listing alone cannot establish that justification.

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   - Composite and multicomponent dressings cannot be unbundled into separate component claims. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.

2. Advanced Wound Care
   - The framework separates dressing constructions and supports switching and mini-competitions in specified categories.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))
3. Advanced Wound Care Specification
   - The specification recognizes collagen, temporary matrix, acrylic, capillary-action, and biocellulose dressings; temporary matrices have distinct purchasing eligibility conditions.
   ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
   - Taxonomy evidence: The specialty procurement specification explicitly recognizes temporary matrix dressings separately from collagen dressings and sets a nonimplant purchasing boundary for that named group. This is an English procurement-category anchor, not a universal regulatory definition or automatic eligibility rule for acellular products.
   ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
   - Taxonomy evidence: Procurement separates base dressing families and treats antimicrobial status as a cross-cutting property. These are English purchasing definitions, not Global demand estimates.
   ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.

4. NeoMatriX Wound Matrix (K210024) - FDA clearance letter and 510(k) summary
   - NeoMatriX is described using collagen-dressing terminology and acellular extracellular-matrix characteristics, with surgical-wound indications. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))
   - Taxonomy evidence: The shared terminology supports an explicit product-identity precedence rule rather than treating the commercial construction partition as a reproduction of regulatory codes. This is a classification inference, not a new regulatory distinction. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
5. HYALOMATRIX (K261311) - FDA clearance letter and 510(k) summary
   - The September xx.xx 2026 HYALOMATRIX clearance addresses an updated presentation against an earlier predicate and includes surgical-wound indications. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf26/K261311.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
6. KA01 Chitosan Wound Dressing (K143124) - 510(k) summary
   - KA01 Chitosan Wound Dressing has prescription surgical-wound indications. The record establishes a named product identity, not continuing global availability. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf14/K143124.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
7. Drug Tariff Part IX - October 2026
   - The October 2026 tariff names absorbent acrylic, activated-charcoal, and capillary-action dressing categories; these listings do not establish every postoperative application. ([nhsbsa.nhs.uk](https://www.nhsbsa.nhs.uk/sites/default/files/2026-xx.xx/Drug%20Tariff%20Part%20IX%20October%xx.xx.pdf))
8. Surgical Dressings - Policy Article A54563
   - Taxonomy evidence: Multi-component dressings are classified by a predominant component; composite products cannot be unbundled into constituent dressing claims. US coding rules are terminology anchors, not the Global market boundary. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx&bc=xx.xx&contractorName=all&contractorNumber=all&sortBy=updated&updatePeriod=xx.xx&ver=xx.xx))
9. GPSDP October 26-27, 2022 Presentation - Wound Dressings with Animal-Derived Materials
   - Taxonomy evidence: The regulator's October xx.xx-xx.xx 2022 presentation addresses animal-derived wound dressings as a category. This record alone does not settle product-level exclusions for skin substitutes or reconstructive implants. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

10. Size and distribution of the global volume of surgery in 2012.

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

11. Solventum Corporation - 2025 Form 10-K

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

12. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

13. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

14. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

15. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

16. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

17. NHS Supply Chain - Negative Pressure Wound Therapy

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration.
([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement.
([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.

19. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
20. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
21. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
22. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
23. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.

24. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
25. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
26. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
27. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.

7.1. Foam Dressings

Table 6. Global Post-Operative Wound Dressings Market Size, by Foam Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 7. Global Post-Operative Wound Dressings Market Size, by Foam Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K190268 - Hydrofera Blue READY-Border: 510(k) Summary
   · Taxonomy evidence: The same postoperative dressing is described as an absorptive polyurethane foam with an outer film and silicone adhesive border. This independently corroborates that a foam construction can retain a distinct multi-agent antimicrobial allocation.
   ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))
2. Surgical Dressings - Policy Article A54563
   · Taxonomy evidence: Recognizes foam wound covers and foam fillers.
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
20. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.

7.2. Gauze & Absorbent Pad Dressings

Table 9. Global Post-Operative Wound Dressings Market Size, by Gauze & Absorbent Pad Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article A54563
   - Taxonomy evidence: Recognizes woven/nonwoven gauze and specialty absorptive pads.
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. **Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.

7.3. Composite & Island Dressings

Table 12. Global Post-Operative Wound Dressings Market Size, by Composite & Island Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. FDA K180533 - Procellera Composite Antibacterial Wound Dressing
   · Taxonomy evidence: The finished product has a contact layer, an absorbent layer and an adhesive outer layer. It is a regulatory example of an integrated cover architecture that can be allocated independently from its therapy platform. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf18/K180533.pdf))
2. NHS Supply Chain - Advanced Wound Care Specification
   · Taxonomy evidence: Separate nonwoven-island and film-island purchasing groups support aggregating conventional integrated pad-and-backing covers.
3. Surgical Dressings - Policy Article A54563
   · Taxonomy evidence: Defines conventional composite covers separately from foam, gelling-fiber, hydrocolloid and hydrogel absorptive layers.
4. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

5. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

6. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

8. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

9. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
21. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
22. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.

7.4. Gelling Fiber Dressings

Table 15. Global Post-Operative Wound Dressings Market Size, by Gelling Fiber Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. NHS Supply Chain - Advanced Wound Care Specification
   - Taxonomy evidence: Alginates and gelling fibers are explicitly distinguished within their purchasing group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
19. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.

7.5. Wound Contact Layers

Table 18. Global Post-Operative Wound Dressings Market Size, by Wound Contact Layers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article A54563
   - Taxonomy evidence: Contact layers are porous, nonabsorptive interfaces, distinct from absorptive covers.
2. FDA K152970 - Dynarex Xeroform Petrolatum Dressing
   - Taxonomy evidence: The product is positioned as a primary contact layer, supporting role-based classification of qualifying low-adherence impregnated fabric.
3. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

7.6. Superabsorbent Dressings

Table 21. Global Post-Operative Wound Dressings Market Size, by Superabsorbent Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 22. Global Post-Operative Wound Dressings Market Size, by Superabsorbent Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. NHS Supply Chain - Advanced Wound Care Specification
   - Taxonomy evidence: Superabsorbent dressings form a dedicated lot, distinct from foams and conventional pads.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
19. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.

7.7. Film & Membrane Dressings

Table 24. Global Post-Operative Wound Dressings Market Size, by Film & Membrane Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 25. Global Post-Operative Wound Dressings Market Size, by Film & Membrane Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgical Dressings - Local Coverage Determination L33831

   · Taxonomy evidence: The US policy recognizes transparent-film dressings as a named dressing family; reimbursement eligibility is not a Global sales measure. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

7.8. Alginate Dressings

Table 27. Global Post-Operative Wound Dressings Market Size, by Alginate Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgical Dressings - Policy Article A54563
   - Taxonomy evidence: Recognizes alginate/gelling-fiber covers and fillers.

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.

7.9. Hydrocolloid Dressings

Table 30. Global Post-Operative Wound Dressings Market Size, by Hydrocolloid Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 31. Global Post-Operative Wound Dressings Market Size, by Hydrocolloid Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Local Coverage Determination L33831
   - Taxonomy evidence: Separately recognizes hydrocolloid dressings and wound fillers.

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

7.10. Collagen Dressings

Table 33. Global Post-Operative Wound Dressings Market Size, by Collagen Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K210024 - NeoMatriX Wound Matrix: Clearance and 510(k) Summary

   · Taxonomy evidence: The same record calls the device a collagen wound dressing while expressly describing acellular extracellular-matrix characteristics. Therefore, regulatory collagen terminology alone cannot separate the retained commercial Collagen Dressings and Acellular Extracellular Matrix Dressings peers. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.

2. Surgical Dressings - Local Coverage Determination L33831

   · Taxonomy evidence: Recognizes collagen-based dressings and wound fillers as a distinct commercial family.

3. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.

20. NHS Supply Chain Advanced Wound Care Specification
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.

7.11. Acellular Extracellular Matrix Dressings

Table 36. Global Post-Operative Wound Dressings Market Size, by Acellular Extracellular Matrix Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K210024 - NeoMatriX Wound Matrix: Clearance and 510(k) Summary

   · Taxonomy evidence: The October xx.xx 2021 record identifies NeoMatriX as an acellular extracellular-matrix wound dressing and includes surgical wounds among its indications. It establishes a qualifying category example without resolving all dressing-versus-tissue-replacement boundaries. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.

2. AccessGUDID - OASIS, Device Identifier 00827002466234
   - Taxonomy evidence: The OASIS record identifies an animal-derived wound matrix dressing, links it to K061711 and reports In Commercial Distribution. Its public version date is July xx.xx 2025. This corroborates a registered commercial matrix-dressing identity, not realized postoperative sales or blanket eligibility of matrix products. ([accessgudid.nlm.nih.gov](https://accessgudid.nlm.nih.gov/devices/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
3. NHS Supply Chain - Advanced Wound Care Specification
   - Taxonomy evidence: Recognition of temporary matrix dressings supports a dressing-versus-implant distinction at the commercial category level, but does not identify every qualifying acellular matrix or settle dual-described skin-substitute products. ([sccl.nhs.uk](https://www.sccl.nhs.uk/wp-content/uploads/2026/xx.xx/Advanced-Wound-Care-Specification.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
4. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
5. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
6. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
8. Smith+Nephew Second Quarter and First Half 2026 Results
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

9. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.

7.12. Hydrogel Dressings

Table 39. Global Post-Operative Wound Dressings Market Size, by Hydrogel Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgical Dressings - Local Coverage Determination L33831
   · Taxonomy evidence: Separately recognizes hydrogel dressings and wound fillers.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

7.13. Hyaluronic Acid Dressings

Table 42. Global Post-Operative Wound Dressings Market Size, by Hyaluronic Acid Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K261311 - HYALOMATRIX: Clearance and 510(k) Summary

   · Taxonomy evidence: The September xx.xx 2026 clearance and enclosed summary identify HYALOMATRIX as a single-use hyaluronic-acid-derivative wound dressing with surgical-wound indications, including donor sites and dehiscence. This directly supports category identity, not Global sales or 2025 revenue. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf26/K261311.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.

7.14. Absorbent Acrylic Dressings

Table 45. Global Post-Operative Wound Dressings Market Size, by Absorbent Acrylic Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Drug Tariff Part IX - October 2026
   - Taxonomy evidence: The October 2026 tariff contains a named transparent absorbent acrylic-dressing category. Listing establishes purchasing recognition, not postoperative demand. ([nhsbsa.nhs.uk](https://www.nhsbsa.nhs.uk/sites/default/files/2026-xx.xx/Drug%20Tariff%20Part%20IX%20October%xx.xx.pdf))
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.

7.15. Chitosan Dressings

Table 48. Global Post-Operative Wound Dressings Market Size, by Chitosan Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K143124 - KA01 Chitosan Wound Dressing

   · Taxonomy evidence: The regulatory summary identifies a chitosan wound-dressing family with surgical-wound and donor-site applications. It establishes category and indication history, not current sales or a commercial antimicrobial claim. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf14/K143124.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.

19. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.

7.16. Biocellulose Dressings

Table 51. Global Post-Operative Wound Dressings Market Size, by Biocellulose Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 52. Global Post-Operative Wound Dressings Market Size, by Biocellulose Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. NHS Supply Chain - Advanced Wound Care Specification
   - Taxonomy evidence: Hydrobalance biocellulose dressings are explicitly named.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.

7.17. Activated Charcoal Dressings

Table 54. Global Post-Operative Wound Dressings Market Size, by Activated Charcoal Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Drug Tariff Part IX - October 2026
   - Taxonomy evidence: Lists activated-charcoal absorbent dressings.

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.

7.18. Capillary Action Dressings

Table 57. Global Post-Operative Wound Dressings Market Size, by Capillary Action Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Drug Tariff Part IX - October 2026
   - Taxonomy evidence: Lists a capillary-action absorbent-wound-dressing category.

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.

8. Post-Operative Wound Dressings Market, by Therapy Platform

[redacted] Institutional buyers should compare equipment access and replenishment together before selecting a financing route. An alternative consumables supplier is not automatically a replacement for the equipment relationship.

Topical Oxygen Therapy includes finished dressings whose published applications must be distinguished from oxygen-service coverage. OxyBand's manufacturer information identifies clean closed surgical incisions within its prescription indications, while describing a different scope for its over-the-counter products. [redacted]

Bioelectric Wound Therapy introduces offering-specific channel rights. [redacted] The established specialty route offers a defined commercial contact, but the public pages do not establish every contractual obligation, local authorization, or purchasing approval.

Figure 10. Global Post-Operative Wound Dressings Market Size, by Therapy Platform, 2025 (%)

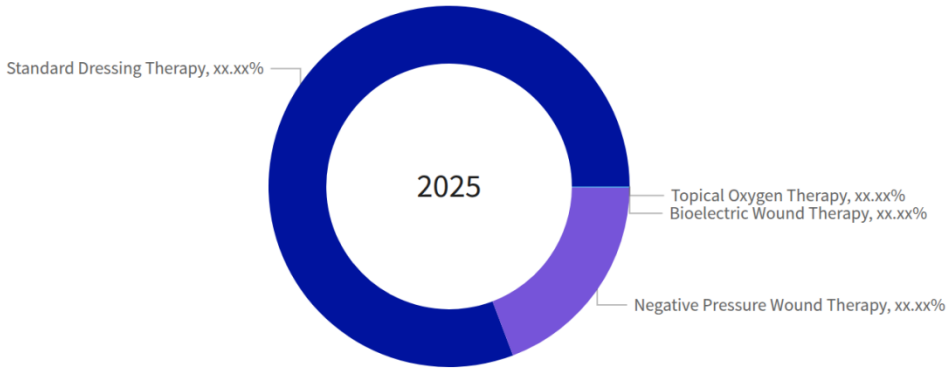

Figure 11. Global Post-Operative Wound Dressings Market, by Therapy Platform, 2032 (USD Million)

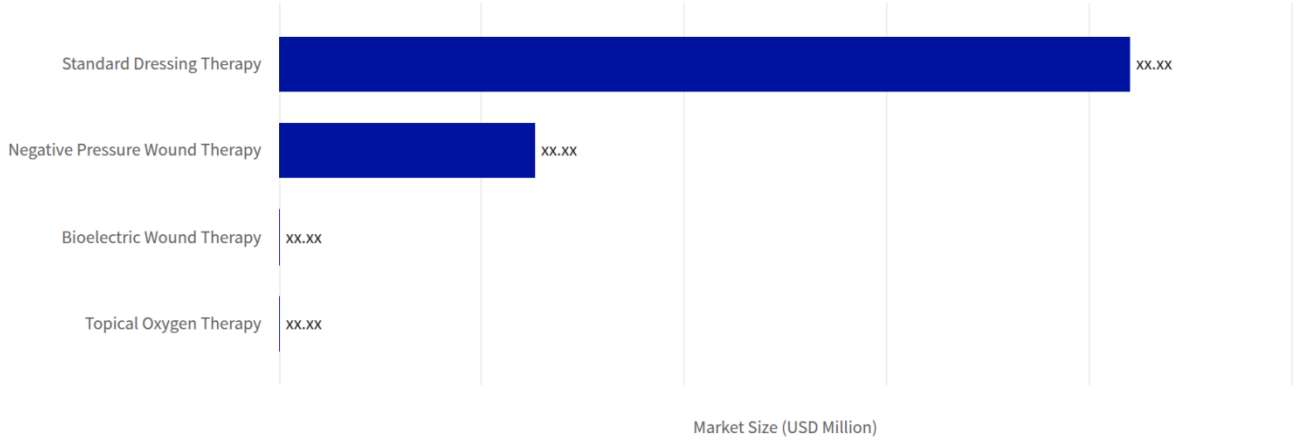

Table 60. Global Post-Operative Wound Dressings Market, by Therapy Platform growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 61. Global Post-Operative Wound Dressings Market Size, by Therapy Platform, 2017-2040 (USD Million)

Therapy Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. JumpStart Antimicrobial Wound Dressing
   - Arthrex independently lists JumpStart for surgical-incision management. ([arthrex.com](https://www.arthrex.com/orthobiologics/jumpstart))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
2. Negative Pressure Wound Therapy
   - The NPWT framework separates catalog consumables from direct equipment arrangements and offers purchase, rental, and free-on-loan options. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy))
3. Buy Products
   - Vomaris directs specified surgical specialties exclusively to Arthrex for JumpStart and maintains a separate professional Procellera inquiry route. ([vomaris.com](https://vomaris.com/buy-products))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.

4. Topical Oxygen Therapy (L37873)
   - Palmetto's LCD establishes topical-oxygen service noncoverage within its stated scope and explains local-contractor coverage authority. It does not settle every oxygen-containing dressing. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
5. OxyBand Technologies - FDA Clearance
   - OxyBand distinguishes prescription indications including clean closed surgical incisions from its over-the-counter application scope. ([oxyband.com](https://oxyband.com/Research/OxyBand-FDA.php))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
6. NHS Supply Chain - Advanced Wound Care Specification
   - Taxonomy evidence: Specialty purchasing includes topical oxygen and electrostimulation wound therapy.

7. NHS Supply Chain - Negative Pressure Wound Therapy

   · Taxonomy evidence: Procurement separates therapy equipment and pump rentals from NPWT consumables, supporting dressing-only accounting. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.

8. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

9. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

10. Smith+Nephew Fourth Quarter and Full Year 2020 Results

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

11. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

12. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

13. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

14. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

15. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

16. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.

17. Vomaris Innovations - Corporate Overview, 2023

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.

18. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.

8.1. Standard Dressing Therapy

Table 62. Global Post-Operative Wound Dressings Market Size, by Standard Dressing Therapy, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 63. Global Post-Operative Wound Dressings Market Size, by Standard Dressing Therapy, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Describes dressing functions including wound protection, exudate management and maintenance of a moist environment, supporting a standalone dressing-therapy class.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.

8.2. Negative Pressure Wound Therapy

Table 65. Global Post-Operative Wound Dressings Market Size, by Negative Pressure Wound Therapy, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 66. Global Post-Operative Wound Dressings Market Size, by Negative Pressure Wound Therapy, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. NHS Supply Chain - Negative Pressure Wound Therapy

   · Taxonomy evidence: The framework covers vacuum dressings for surgical wounds and includes a distinct consumables lot; it does not establish the dressing value inside every integrated system.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

13. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
14. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
15. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
16. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

8.3. Bioelectric Wound Therapy

Table 68. Global Post-Operative Wound Dressings Market Size, by Bioelectric Wound Therapy, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K180533 - Procellera Composite Antibacterial Wound Dressing

   · Taxonomy evidence: The December xx.xx 2018 clearance identifies a finished antibacterial dressing with an integral electrical architecture and professional-use indications including surgical incisions and graft sites. This establishes postoperative regulatory identity without asserting clinical superiority or worldwide availability. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf18/K180533.pdf))

2. AccessGUDID - Procellera Composite, Device Identifier 00894318002456

· Taxonomy evidence: The registry assigns the explicit nomenclature Bioelectric wound dressing, links the device to K180533 and reports a single-use prescription product In Commercial Distribution. The visible public version is dated January xx.xx 2026. This supports current recorded commercial identity, not attributed sales or a Global platform share. ([accessgudid.nlm.nih.gov](https://accessgudid.nlm.nih.gov/devices/xx.xx))

3. NHS Supply Chain - Advanced Wound Care Specification

· Taxonomy evidence: Electrostimulation wound therapy is recognized, without separately establishing postoperative dressing-only demand.

4. Size and distribution of the global volume of surgery in 2012.

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

5. Solventum Corporation - 2025 Form 10-K

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

6. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

8. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

9. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
21. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
22. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.

23. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
24. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

8.4. Topical Oxygen Therapy

Table 71. Global Post-Operative Wound Dressings Market Size, by Topical Oxygen Therapy, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 72. Global Post-Operative Wound Dressings Market Size, by Topical Oxygen Therapy, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Product Classification - Wound Dressings Containing Oxygen

   · Taxonomy evidence: FDA product code SIL recognizes oxygen-containing wound dressings for external skin wounds. The category does not establish authorization in every country or actual postoperative sales. ([accessdata.fda.gov](https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm?id=SIL))

2. OxyBand Technologies - FDA Clearance

   · Taxonomy evidence: The company's prescription oxygen-delivering dressing listing includes closed surgical incisions and skin-graft donor sites, corroborating a postoperative finished-dressing use case without establishing market size or comparative efficacy. ([oxyband.com](https://oxyband.com/Research/OxyBand-FDA.php))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.

3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
8. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
20. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

9. Post-Operative Wound Dressings Market, by Antimicrobial Technology

Antimicrobial Technology is a cross-cutting purchasing attribute, not a substitute for Dressing Type. An NHS-hosted wound-products list separates honey and iodine products and lists silver across several dressing constructions, alongside PHMB and chlorhexidine offerings. ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■ ■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■

Different declared functions should not be collapsed into one infection-prevention claim. The independent assessment of Leukomed Sorbact describes DACC Microbial Binding as a binding rather than a microbe-killing proposition. ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■ ■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■

■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ Suppliers should verify the finished product's applicable construction, coding, and coverage conditions before assuming a reimbursable sale. MedCu's own positioning of copper dressings for surgical wounds establishes a commercial proposition, not payer acceptance.

Specialty categories require particularly careful separation of substrate, protective function, and treatment representation. ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■ ■■■■■■■■■■■■■ ■■■■■ ■ ■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■ Current offering-level postoperative positioning remains unresolved where only broader classifications are documented.

Sources & Evidence

1. Surgical Dressings (L33831)
   - The LCD identifies materials not recognized as effective and evaluates predominant composition in multicomponent dressings; an antimicrobial label alone does not establish reimbursement. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
2. KA01 Chitosan Wound Dressing (K143124) - 510(k) summary
   - The chitosan construction and surgical indications do not independently establish the postoperative antimicrobial positioning discussed in the narrative. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf14/K143124.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
3. Trust BNF - Wound Management Products and Elasticated Garments
   - The NHS-hosted list separates honey and iodine products, lists PHMB and chlorhexidine offerings, and identifies silver across several dressing constructions. ([primarycare.northeastlondon.icb.nhs.uk](https://primarycare.northeastlondon.icb.nhs.uk/wp-content/uploads/2024/xx.xx/Wound-management-products-and-elasticated-garments.html))
   - Taxonomy evidence: The institutional formulary organizes antimicrobial agents independently from base dressing construction; its broader wound-care scope does not establish postoperative sales. ([primarycare.northeastlondon.icb.nhs.uk](https://primarycare.northeastlondon.icb.nhs.uk/wp-content/uploads/2024/xx.xx/Wound-management-products-and-elasticated-garments.html))
4. Leukomed Sorbact for Preventing Surgical Site Infection - Supporting Documentation
   - The independent assessment describes Leukomed Sorbact's DACC function as microbial binding rather than killing. ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))
   - Taxonomy evidence: The assessment separates the DACC contact technology from the absorbent pad, adhesive film and postoperative application. It supports treating microbial-binding technology as a cross-cutting allocation rather than a substitute dressing-construction family. ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))

5. Hydrofera Blue READY-Border (K190268) - FDA clearance letter and 510(k) summary
   · Hydrofera Blue READY-Border is a foam dressing with gentian violet and methylene blue antibacterial components and post-surgical-incision indications. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
6. octenilin wound gel
   · Schülke describes octenidine as a preservative with a protective role in the gel; the published page does not explicitly identify a postoperative indication. ([schuelke.com](https://www.schuelke.com/en-uk/products/xx.xx/octenilin-wound-gel/))
7. Wound Dressings Containing Drugs - FDA Executive Summary, September 2016
   · FDA's historical review distinguishes preservation, dressing protection, and differing indication statements; it does not establish current authorization for every named ingredient or product. ([fda.gov](https://www.fda.gov/media/xx.xx/download))
   · Taxonomy evidence: The regulatory overview separates dressing substrates from antimicrobial additives and distinguishes antimicrobial claims from passive protection. It is a historical category reference, not current market-share evidence. ([fda.gov](https://www.fda.gov/media/xx.xx/download))
8. MedCu - Advanced Copper-Based Wound Dressings
   · MedCu presents its own copper-based dressings for surgical wounds; the portfolio does not establish payer acceptance. ([medcu.com](https://medcu.com/us))
9. NHS Supply Chain - Advanced Wound Care Specification
   · Taxonomy evidence: Antimicrobial properties occur across material-based dressing families rather than constituting one base construction.
10. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
11. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
12. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
13. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

14. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

15. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

16. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

17. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel pricing supplies the chitosan commercial-price comparison.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel pricing supplies the chitosan commercial-price comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Octenilin gel pricing anchors the modeled finished-gel realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Octenilin gel pricing anchors the modeled finished-gel realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flaminal prices support a distinct enzyme-gel value comparison.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Flaminal prices support a distinct enzyme-gel value comparison.

19. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
20. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
21. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
22. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.

23. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
24. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
25. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
26. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
27. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
28. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.

9.1. No Declared Antimicrobial Technology

Table 76. Global Post-Operative Wound Dressings Market Size, by No Declared Antimicrobial Technology, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Drug-free gauze, hydrophilic, occlusive and hydrogel classifications are distinguished from antimicrobial-containing dressings.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.

19. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
20. CMS Local Coverage Determination - Surgical Dressings, L33831
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.

9.2. Silver-Based Antimicrobials

Table 79. Global Post-Operative Wound Dressings Market Size, by Silver-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Identifies silver among antimicrobial additives to solid wound dressings.
2. Trust BNF - Wound Management Products and Elasticated Garments
   · Taxonomy evidence: Lists silver-containing alginate, foam, low-adherence and hydrocolloid dressing families.
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.

20. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.

21. CMS Local Coverage Determination - Surgical Dressings, L33831

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.

9.3. Iodine-Based Antimicrobials

Table 82. Global Post-Operative Wound Dressings Market Size, by Iodine-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 83. Global Post-Operative Wound Dressings Market Size, by Iodine-Based Antimicrobials, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 84. Global Post-Operative Wound Dressings Market Size, by Iodine-Based Antimicrobials, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Trust BNF - Wound Management Products and Elasticated Garments
   · Taxonomy evidence: Separately lists cadexomer-iodine preparations and povidone-iodine fabric dressings.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.

9.4. DACC Microbial Binding

Table 85. Global Post-Operative Wound Dressings Market Size, by DACC Microbial Binding, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 86. Global Post-Operative Wound Dressings Market Size, by DACC Microbial Binding, by Group, 2017-2040 (USD Million)

Sources & Evidence

1. Leukomed Sorbact - Supporting Documentation, Independent External Assessment, August 2020
   · Taxonomy evidence: The independent assessment's technology overview identifies a single-use postoperative DACC bacteria-binding dressing and distinguishes its binding function from killing microorganisms. This directly supports the retained microbial-binding category without claiming chemical biocidal equivalence or adopting an efficacy estimate. ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))
2. Drug Tariff Part IX - October 2026
   · Taxonomy evidence: Explicitly identifies DACC-impregnated contact and pad products; the listing alone does not establish postoperative labeling or chemical biocidal action.
3. Trust BNF - Wound Management Products and Elasticated Garments
   · Taxonomy evidence: Lists Cutimed Sorbact within antimicrobial wound-care products; this grouping does not establish chemical biocidal action.
4. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

5. Solventum Corporation - 2025 Form 10-K

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

6. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

8. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

9. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.

9.5. Polyhexamethylene Biguanide

Table 88. Global Post-Operative Wound Dressings Market Size, by Polyhexamethylene Biguanide, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   - Taxonomy evidence: Identifies PHMB as an antimicrobial dressing additive.
2. Trust BNF - Wound Management Products and Elasticated Garments
   - Taxonomy evidence: Lists Suprasorb X+PHMB as an antimicrobial dressing.

3. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
20. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.

9.6. Honey-Based Antimicrobials

Table 91. Global Post-Operative Wound Dressings Market Size, by Honey-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Trust BNF - Wound Management Products and Elasticated Garments
   · Taxonomy evidence: Lists honey sheet dressings and honey-based wound-dressing gels.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
19. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.

9.7. Enzyme-Based Antimicrobials

Table 94. Global Post-Operative Wound Dressings Market Size, by Enzyme-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Sandwell Area Formulary - Wound Management Products
   - Taxonomy evidence: The public formulary explicitly describes Flaminal Forte and Hydro as alginate gels containing antimicrobial enzymes. This independently establishes enzyme-platform terminology beyond the earlier product-name lead; the broad wound listing does not establish exact current postoperative labeling. ([sandwellandwestbhamccgformulary.nhs.uk](https://sandwellandwestbhamccgformulary.nhs.uk/chaptersSubDetails.asp?FC=xx.xx&FormularySectionID=xx.xx&SubSectionID=A100&SubSectionRef=A5))
2. Trust BNF - Wound Management Products and Elasticated Garments
   - Taxonomy evidence: Lists Flaminal Forte and Hydro among antimicrobial gels; enzyme-platform classification still requires separate support.
3. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flaminal prices support a distinct enzyme-gel value comparison.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Flaminal prices support a distinct enzyme-gel value comparison.
20. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.

9.8. Bismuth Compounds

Table 97. Global Post-Operative Wound Dressings Market Size, by Bismuth Compounds, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 98. Global Post-Operative Wound Dressings Market Size, by Bismuth Compounds, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 99. Global Post-Operative Wound Dressings Market Size, by Bismuth Compounds, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   - Taxonomy evidence: Identifies bismuth as an antimicrobial dressing additive.
2. FDA K152970 - Dynarex Xeroform Petrolatum Dressing
   - Taxonomy evidence: The regulatory summary describes a bismuth-containing nonadherent gauze dressing with newly sutured and surgical-wound applications. It does not establish every bismuth dressing's antimicrobial claim. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf15/K152970.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
3. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

9.9. Multi-Agent Antimicrobial Systems

Table 100. Global Post-Operative Wound Dressings Market Size, by Multi-Agent Antimicrobial Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K190268 - Hydrofera Blue READY-Border: 510(k) Summary

   · Taxonomy evidence: The 2019 regulatory summary identifies methylene blue and gentian violet as antibacterial dyes in one finished dressing and includes post-surgical incisions among its indications. This directly establishes a postoperative dual-agent example for the commercial combination category without relying on drug-device combination status.
   ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.

9.10. Antibiotics

Table 103. Global Post-Operative Wound Dressings Market Size, by Antibiotics, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Identifies bacitracin among antimicrobial additives to solid dressings.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.

9.11. Chlorhexidine

Table 106. Global Post-Operative Wound Dressings Market Size, by Chlorhexidine, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Identifies chlorhexidine as an antimicrobial dressing additive.
2. Trust BNF - Wound Management Products and Elasticated Garments
   · Taxonomy evidence: Lists chlorhexidine gauze dressings under antimicrobials.
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.

9.12. Octenidine

Table 109. Global Post-Operative Wound Dressings Market Size, by Octenidine, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Schülke UK - octenilin Wound Gel

   · Taxonomy evidence: The manufacturer's UK description explicitly identifies octenidine as a preservative with an antimicrobial protective role in the wound gel. Its listed applications concern chronic wounds and burns, not an explicit postoperative indication. This resolves the ingredient lead only; it does not independently prove market-level category coverage or postoperative eligibility.
   ([schuelke.com](https://www.schuelke.com/en-uk/products/xx.xx/octenilin-wound-gel/))

2. Trust BNF - Wound Management Products and Elasticated Garments

   · Taxonomy evidence: Lists Octenilin Wound Gel as an antimicrobial product; the page does not establish its octenidine ingredient or postoperative label.

3. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Octenilin gel pricing anchors the modeled finished-gel realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Octenilin gel pricing anchors the modeled finished-gel realization.
20. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.

9.13. Quaternary Ammonium Compounds

Table 112. Global Post-Operative Wound Dressings Market Size, by Quaternary Ammonium Compounds, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Executive Summary - Classification of Wound Dressings Containing Drugs, September 20-21, 2016
   · Taxonomy evidence: Recognizes pDADMAC-containing dressings and cites a surgical-wound indication.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
19. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.

9.14. Copper-Based Antimicrobials

Table 115. Global Post-Operative Wound Dressings Market Size, by Copper-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. MEDCU - Advanced Copper-Based Wound Dressings
   · Taxonomy evidence: The official US portfolio is explicitly presented as copper-based wound dressings. This establishes an own-product commercial category, not the completeness of the market partition or quantified postoperative demand. ([medcu.com](https://medcu.com/us/))
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

19. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
20. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.

9.15. Chitosan-Based Antimicrobials

Table 118. Global Post-Operative Wound Dressings Market Size, by Chitosan-Based Antimicrobials, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 119. Global Post-Operative Wound Dressings Market Size, by Chitosan-Based Antimicrobials, by Group, 2017-2040 (USD Million)

Sources & Evidence

1. FDA K143124 - KA01 Chitosan Wound Dressing
   - Taxonomy evidence: Chitosan construction and surgical applications are documented, but this record does not establish the antimicrobial positioning required for this technology allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel pricing supplies the chitosan commercial-price comparison.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel pricing supplies the chitosan commercial-price comparison.
19. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.

10. Post-Operative Wound Dressings Market, by Healing Pathway

Healing Pathway separates purchasing objectives that cannot be inferred from the word surgical alone. The National Wound Care Strategy Programme distinguishes primary closure, secondary-intention healing, and delayed surgical closure. ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■

For Open Wounds Healing by Secondary Intention, standard dressings remain a necessary commercial comparator. ■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■ The result supports pathway-specific comparison, not rejection of every NPWT application or every postoperative population.

Open Wounds Awaiting Surgical Closure create an interim procurement question because further closure is planned, whereas secondary-intention wounds have a different endpoint. ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■ ■■■■■■ ■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ This stage-based approach adds coordination but avoids treating a temporary supply decision as an indefinite selection.

Figure 14. Global Post-Operative Wound Dressings Market Size, by Healing Pathway, 2025 (%)

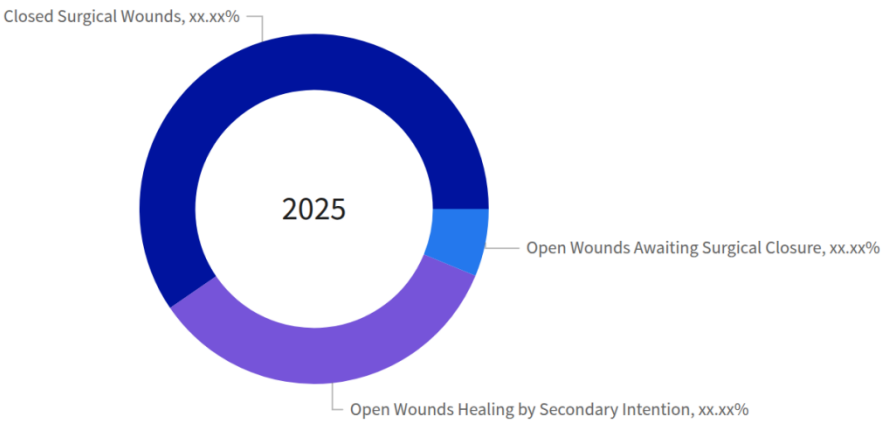

Figure 15. Global Post-Operative Wound Dressings Market, by Healing Pathway, 2032 (USD Million)

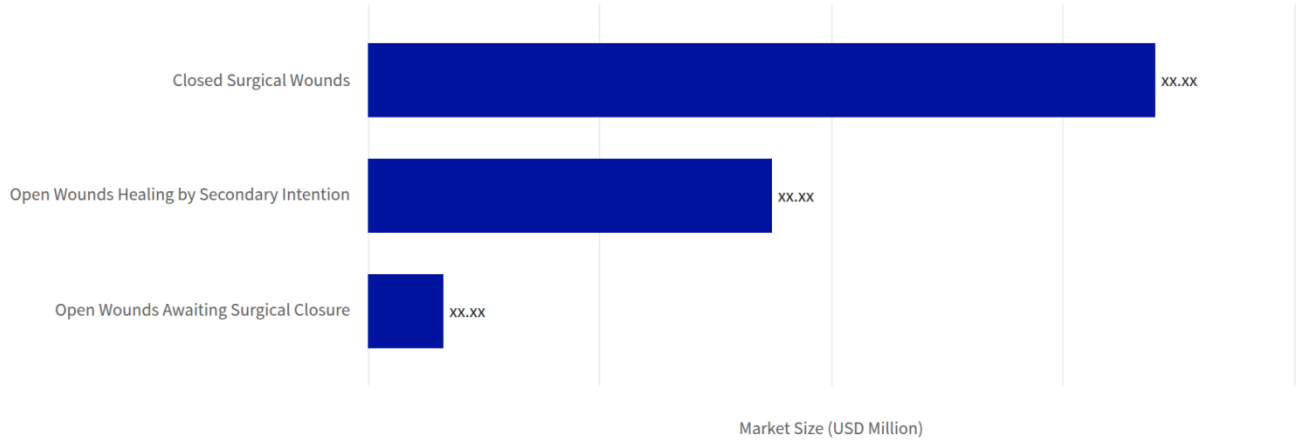

Table 121. Global Post-Operative Wound Dressings Market, by Healing Pathway growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 122. Global Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2)

   · SWHSI-xx.xx found no clear healing-time advantage and found NPWT not cost-effective against usual care in its predominantly lower-limb vascular-surgery population. ([pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov/xx.xx/))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

2. OxyBand Technologies - FDA Clearance

   · The published prescription indication identifies a closed-incision application, not automatic eligibility for both open-wound pathways. ([oxyband.com](https://oxyband.com/Research/OxyBand-FDA.php))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.

3. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
   - The May 2024 glossary distinguishes primary closure, secondary-intention healing, and delayed surgical closure, supporting separate commercial review boundaries. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
   - Taxonomy evidence: The May 2024 glossary distinguishes primary, secondary and tertiary healing, supporting three pathway concepts rather than a separate dehiscence sibling. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
4. Surgical Site Infection Event - January 2026
   - Taxonomy evidence: Its procedure-level primary-closure flag can include partly closed incisions; it is not equivalent to current wound-level pathway allocation. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
5. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
6. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
7. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
8. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

9. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

10. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

11. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.

12. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
13. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

14. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
15. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

10.1. Closed Surgical Wounds

Table 123. Global Post-Operative Wound Dressings Market Size, by Closed Surgical Wounds, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
   · Taxonomy evidence: Primary-intention healing is identified with surgical wound closure, establishing the closed-wound category's clinical identity. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.

19. **The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
20. **Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
21. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
22. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.

10.2. Open Wounds Healing by Secondary Intention

Table 126. Global Post-Operative Wound Dressings Market Size, by Open Wounds Healing by Secondary Intention, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 128. Global Post-Operative Wound Dressings Market Size, by Open Wounds Healing by Secondary Intention, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
   · Taxonomy evidence: Secondary-intention healing includes open surgical wounds and dehisced wounds not subsequently closed surgically. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
19. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
20. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
21. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
22. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.

10.3. Open Wounds Awaiting Surgical Closure

Table 129. Global Post-Operative Wound Dressings Market Size, by Open Wounds Awaiting Surgical Closure, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 130. Global Post-Operative Wound Dressings Market Size, by Open Wounds Awaiting Surgical Closure, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024

   · Taxonomy evidence: Tertiary-intention healing is expressly identified as delayed surgical closure, supporting the awaiting-closure category. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.

19. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
20. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
21. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
22. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

11. Post-Operative Wound Dressings Market, by Surgical Application

Surgical Application should guide evidence and account selection rather than serve as a proxy for uniform dressing demand. Within Musculoskeletal Surgery, the 2020 elective hip-and-knee replacement comparison of Mepilex Border Post-Op and Aquacel Surgical supports attention to handling and patient experience, while reporting low dressing failure with both offerings. ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■

■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ Conversely, NeoMatriX's FDA record includes donor-site, graft, and post-Mohs applications relevant to parts of Skin & Breast Surgery. Such regulatory indications establish a permitted offering context, not independent proof of comparative value across that entire application group.

Ophthalmic Surgery illustrates why an operation does not necessarily imply a particular dressing purchase. Guy's and St Thomas' describes an eye pad and shield, or a shield alone, after cataract surgery. ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■

Across the remaining surgical applications, a general surgical-wound indication should remain distinct from specialty-specific comparative evidence and customer acceptance. Before committing to a specialty launch, a supplier should connect the exact offering to the relevant procedure context, permitted proposition, and institutional purchasing decision. ■■■■■ ■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■ ■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Figure 16. Global Post-Operative Wound Dressings Market Size, by Surgical Application, 2025 (%)

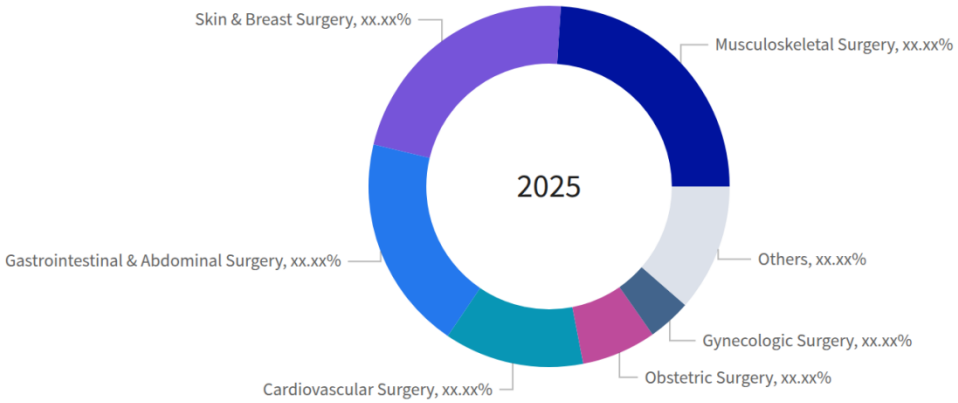

Figure 17. Global Post-Operative Wound Dressings Market, by Surgical Application, 2032 (USD Million)

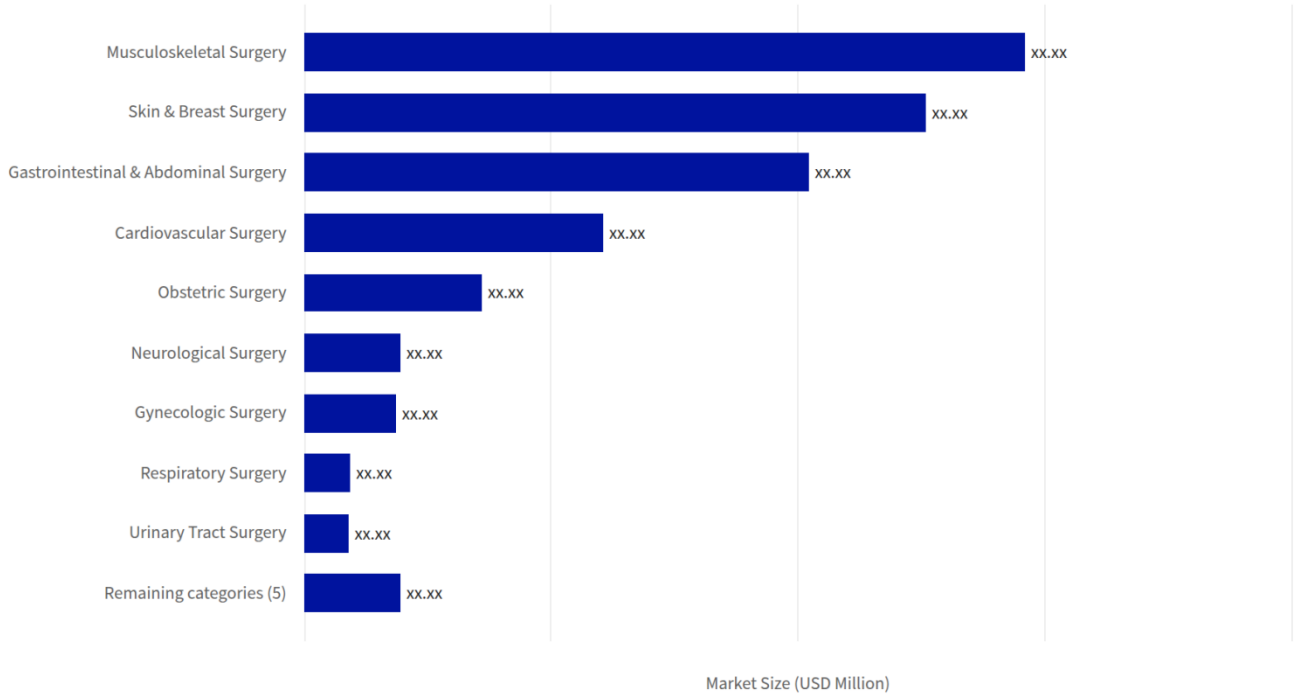

Table 132. Global Post-Operative Wound Dressings Market, by Surgical Application growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement...
   - The 2020 arthroplasty comparison reports low failure with both dressings and favors Mepilex Border Post-Op on handling and patient-experience measures. ([biblio.ugent.be](https://biblio.ugent.be/publication/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
2. NeoMatriX Wound Matrix (K210024) - FDA clearance letter and 510(k) summary
   - The indications include donor sites, grafts, and post-Mohs wounds; they do not establish comparative specialty-wide benefit. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf21/K210024.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.

3. Leukomed Sorbact for Preventing Surgical Site Infection - Supporting Documentation
   · The August 2020 assessment examines caesarean-section and vascular-surgery evidence and identifies limitations in wider surgical transfer.
   ([nice.org.uk](https://www.nice.org.uk/guidance/HTG567/documents/supporting-documentation))
4. Cataract surgery - After cataract surgery
   · The provider's cataract information describes an eye pad and shield, or a shield alone, establishing that pad use is not universal in that pathway.
   ([guysandstthomas.nhs.uk](https://www.guysandstthomas.nhs.uk/health-information/cataract-surgery/after-cataract-surgery))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
5. International Classification of Health Interventions (ICHI)
   · Taxonomy evidence: ICHI separates intervention Target, Action and Means and covers surgical interventions. This supports a procedure-based analytical axis; the proposed commercial groupings are an adaptation, not an official ICHI reproduction.
   ([who.int](https://www.who.int/standards/classifications/international-classification-of-health-interventions))
6. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: The appendix organizes surgery by body system. Its 2014 US hospital observations establish classification terminology, not Global 2025 dressing demand.
   ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
7. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: The January 2026 procedure categories corroborate distinct operative targets; surveillance categories are not adopted as the complete Global commercial taxonomy.
   ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
8. FAQs: Surgical Site Procedure Codes
   · Taxonomy evidence: The hysterectomy examples demonstrate why an abdominal incision cannot by itself determine the principal surgical-application group.
   ([cdc.gov](https://www.cdc.gov/nhsn/faqs/faq-ssi-proc-codes.html))
9. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
10. Solventum Corporation - 2025 Form 10-K
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
    ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
11. Smith+Nephew Fourth Quarter and Full Year 2020 Results
    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
    ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

12. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

13. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

14. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

15. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

16. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

17. NHSBSA Drug Tariff April 2025 - Part IXA

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eye-pad price anchors the low-value basket assumption.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eye-pad price anchors the low-value basket assumption.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Conventional/foam price dispersion supports heterogeneous baskets.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Conventional/foam price dispersion supports heterogeneous baskets.

18. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

19. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.

20. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.

11.1. Musculoskeletal Surgery

Table 134. Global Post-Operative Wound Dressings Market Size, by Musculoskeletal Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 135. Global Post-Operative Wound Dressings Market Size, by Musculoskeletal Surgery, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 136. Global Post-Operative Wound Dressings Market Size, by Musculoskeletal Surgery, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Identifies musculoskeletal operations, including joint replacement, amputation and fusion. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists fracture repair, joint prosthesis, amputation and spinal fusion. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Conventional/foam price dispersion supports heterogeneous baskets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Conventional/foam price dispersion supports heterogeneous baskets.
20. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
21. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
22. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.

11.2. Skin & Breast Surgery

Table 137. Global Post-Operative Wound Dressings Market Size, by Skin & Breast Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: The integumentary group includes skin and breast operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists breast surgery as an operative category. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
20. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
21. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
22. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.

11.3. Gastrointestinal & Abdominal Surgery

Table 140. Global Post-Operative Wound Dressings Market Size, by Gastrointestinal & Abdominal Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 141. Global Post-Operative Wound Dressings Market Size, by Gastrointestinal & Abdominal Surgery, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Groups digestive operations and hernia repairs together. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists digestive, hernia and exploratory-laparotomy categories. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
20. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
21. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.

11.4. Cardiovascular Surgery

Table 143. Global Post-Operative Wound Dressings Market Size, by Cardiovascular Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 144. Global Post-Operative Wound Dressings Market Size, by Cardiovascular Surgery, by Group, 2017-2040 (USD Million)

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies cardiovascular operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists cardiac, bypass, vascular and pacemaker operations. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
20. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
21. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.

11.5. Obstetric Surgery

Table 146. Global Post-Operative Wound Dressings Market Size, by Obstetric Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgical Site Infection Event - January 2026
   - Taxonomy evidence: Lists cesarean section separately from hysterectomy. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
2. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Relative product prices constrain modeled expenditure baskets.

19. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.

11.6. Gynecologic Surgery

Table 149. Global Post-Operative Wound Dressings Market Size, by Gynecologic Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 150. Global Post-Operative Wound Dressings Market Size, by Gynecologic Surgery, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 151. Global Post-Operative Wound Dressings Market Size, by Gynecologic Surgery, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies female genital-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. FAQs: Surgical Site Procedure Codes
   · Taxonomy evidence: The January xx.xx 2026 FAQ retains hysterectomy procedures within gynecologic procedure categories even when abdominal incisions or laparoscopic access are involved. This corroborates keeping operative target separate from access location. ([cdc.gov](https://www.cdc.gov/nhsn/faqs/faq-ssi-proc-codes.html))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
20. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.

11.7. Neurological Surgery

Table 152. Global Post-Operative Wound Dressings Market Size, by Neurological Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Identifies nervous-system operations, including peripheral-nerve procedures. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists craniotomy and ventricular-shunt surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
20. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.

11.8. Respiratory Surgery

Table 155. Global Post-Operative Wound Dressings Market Size, by Respiratory Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies respiratory-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists thoracic surgery separately from cardiac procedures. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
20. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.

11.9. Urinary Tract Surgery

Table 158. Global Post-Operative Wound Dressings Market Size, by Urinary Tract Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies urinary-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists kidney surgery and transplantation. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
20. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.

11.10. Ear, Nose, Oral & Throat Surgery

Table 161. Global Post-Operative Wound Dressings Market Size, by Ear, Nose, Oral & Throat Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Identifies ear and nose, mouth and pharynx operation groups. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
19. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.

11.11. Male Reproductive Surgery

Table 164. Global Post-Operative Wound Dressings Market Size, by Male Reproductive Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies male genital-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists prostate surgery separately from kidney surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
20. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.

11.12. Hematologic & Lymphatic Surgery

Table 167. Global Post-Operative Wound Dressings Market Size, by Hematologic & Lymphatic Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies hemic and lymphatic operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists spleen surgery as a distinct operative category. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.

11.13. Ophthalmic Surgery

Table 170. Global Post-Operative Wound Dressings Market Size, by Ophthalmic Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 171. Global Post-Operative Wound Dressings Market Size, by Ophthalmic Surgery, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   - Taxonomy evidence: Separately identifies eye operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))

2. Product Classification

   · Taxonomy evidence: FDA recognizes an eye-pad device category under product code HMP and regulation xx.xx. This establishes a dressing-category identity, not postoperative use for every eye pad. ([accessdata.fda.gov](https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm?id=HMP))

3. Cataract surgery - After cataract surgery

   · Taxonomy evidence: The hospital's April 2026-reviewed information identifies an eye pad as a possible postoperative covering after cataract surgery, distinguishing that dressing use from shield-only coverage. This supports the ophthalmic application without implying universal pad use. ([guysandstthomas.nhs.uk](https://www.guysandstthomas.nhs.uk/health-information/cataract-surgery/after-cataract-surgery?utm_source=openai))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.

4. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

5. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

6. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

8. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

9. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.
11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eye-pad price anchors the low-value basket assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eye-pad price anchors the low-value basket assumption.

21. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
22. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.

11.14. Endocrine Surgery

Table 173. Global Post-Operative Wound Dressings Market Size, by Endocrine Surgery, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgeries in Hospital-Based Ambulatory Surgery and Hospital Inpatient Settings, 2014 - Statistical Brief 223
   · Taxonomy evidence: Separately identifies endocrine-system operations. ([hcup-us.ahrq.gov](https://hcup-us.ahrq.gov/reports/statbriefs/sb223-Ambulatory-Inpatient-Surgeries-2014.jsp))
2. Surgical Site Infection Event - January 2026
   · Taxonomy evidence: Lists thyroid and parathyroid surgery. ([cdc.gov](https://www.cdc.gov/nhsn/pdfs/pscmanual/9pscssicurrent.pdf))
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.

12. Post-Operative Wound Dressings Market, by End User

End User changes the accountable purchasing relationship, even when the dressing is unchanged. ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ Suppliers serving these centers should address the facility's complete purchasing requirements rather than assume an independently reimbursable dressing transaction.

■■■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ Medicare treats dressings applied within a billed professional service as included in that service, while allowing qualifying take-home claims under the applicable benefit. The commercial implication is to identify whether the customer is purchasing for its own service or arranging a subsequent supply relationship; the location of the original selection does not answer that question.

Residential & Post-Acute Care Facilities require status-based account selection. Medicare-covered Part A skilled-nursing stays generally use consolidated billing, subject to exclusions, while noncovered stays follow different rules. ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■

Home Healthcare Providers are not interchangeable with Self-Care Households. ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■ ■ ■■■■■■■■■■■ ■■■■ ■■ ■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ Household involvement can support continuity, but it does not transfer professional or payment responsibilities automatically.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)

   · Professional-service dressings are not separately payable; eligible take-home supplies may follow the applicable claims route.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.

2. V.A.C. Therapy patient support

   · Solventum states that missing professional documentation can prevent V.A.C. insurance billing and lead to equipment collection or personal payment arrangements.
   ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.

3. Advanced Wound Care

   · Catalog purchasing and dedicated acute-care support establish an institutional purchasing route, not a uniform payment model.
   ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care))

4. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
   - Medicare includes surgical dressings within ASC facility services and distinguishes subsequent eligible patient supplies obtained on a physician's order. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/clm104c14.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
5. SNF Consolidated Billing
   - Covered Part A SNF stays generally use consolidated billing, subject to exclusions; noncovered stays have different billing treatment. ([cms.gov](https://www.cms.gov/medicare/coding-billing/skilled-nursing-facility-snf-consolidated-billing))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
6. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
   - Ordinary medical supplies are bundled during a Medicare home-health plan of care, while DME and related supplies are treated separately. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/bp102c07.pdf))
   - Taxonomy evidence: Its examples recognize overlapping family and professional wound-care participation. This supports retaining an explicit responsibility rule rather than classifying every home episode as household self-care. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/bp102c07.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.

7. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
· Taxonomy evidence: The postoperative pathway includes transfer between surgical teams, subsequent providers and supported self-management, establishing that final users extend beyond the operating institution.
([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))
8. Key classifications of the System of Health Accounts 2011 - Best Practice in Institutionalising Health Accounts
· Taxonomy evidence: The international provider classification distinguishes hospitals, residential care, ambulatory providers, home healthcare, retailers and households. It also separates provider classification from financing schemes, supporting exclusion of payers and resellers from this final-user axis.
([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))
9. Size and distribution of the global volume of surgery in 2012.
· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
10. Solventum Corporation - 2025 Form 10-K
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
11. Smith+Nephew Fourth Quarter and Full Year 2020 Results
· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
12. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
13. Smith+Nephew Second Quarter and First Half 2026 Results
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
14. Convatec - Interim Results for the Six Months Ended 30 June 2026
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

15. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

16. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

17. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

18. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

19. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
20. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.

21. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

12.1. Hospitals

Table 178. Global Post-Operative Wound Dressings Market Size, by Hospitals, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. A System of Health Accounts 2011

   · Taxonomy evidence: The provider manual keeps integrated hospital ambulatory services within hospitals rather than freestanding ambulatory establishments. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

2. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

3. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

4. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.

19. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

20. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.

21. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.

22. NHS Supply Chain - National Pricing Matrices
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.

12.2. Home Healthcare Providers

Table 181. Global Post-Operative Wound Dressings Market Size, by Home Healthcare Providers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 182. Global Post-Operative Wound Dressings Market Size, by Home Healthcare Providers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. A System of Health Accounts 2011
   - Taxonomy evidence: HP.xx.xx identifies home-healthcare establishments, including community nurses, domiciliary nursing and home-healthcare agencies. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))
2. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
   - Taxonomy evidence: The home-health manual explicitly identifies postoperative wound aftercare and dressing supplies within home-health services, establishing a professional home-care role. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/bp102c07.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.

3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
8. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

19. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
20. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.

12.3. Office-Based & Community Providers

Table 184. Global Post-Operative Wound Dressings Market Size, by Office-Based & Community Providers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 185. Global Post-Operative Wound Dressings Market Size, by Office-Based & Community Providers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Key classifications of the System of Health Accounts 2011 - Best Practice in Institutionalising Health Accounts
   - Taxonomy evidence: Medical practices, dental practices, healthcare practitioners and ambulatory centers are recognized provider groups, supporting the proposed outpatient/community aggregation. ([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))
2. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
   - Taxonomy evidence: The manual separately recognizes surgical dressings furnished with physician-office services, supporting an office-based user category distinct from ASCs. ([edit.cms.gov](https://edit.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c14.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
3. Sirona (BNSSG) Wound Management Formulary and Dressing Guide - Version 3, January 2025
   - Taxonomy evidence: The January 2025 public formulary lists surgical-wound dressings available for ordering by GP and practice-nurse teams, providing a market-specific outpatient purchasing-role anchor. It does not establish realized use volumes. ([remedy.bnssg.icb.nhs.uk](https://remedy.bnssg.icb.nhs.uk/media/ghxbkml3/sirona-wound-management-formulary-and-dressing-guide-jan-2025.pdf))

4. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
5. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
6. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
8. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
9. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
21. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
22. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

12.4. Freestanding Surgical Centers

Table 187. Global Post-Operative Wound Dressings Market Size, by Freestanding Surgical Centers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. A System of Health Accounts 2011

   · Taxonomy evidence: HP.xx.xx.xx.xx identifies freestanding ambulatory surgery centers as specialized outpatient surgical establishments, distinct from hospitals and ordinary medical practices. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

2. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers

   · Taxonomy evidence: The manual identifies surgical dressings among ASC facility services, establishing a direct institutional dressing-use role rather than a resale-only role. ([cms.gov](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/clm104c14.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.

3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
8. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
20. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
21. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.

12.5. Residential & Post-Acute Care Facilities

Table 190. Global Post-Operative Wound Dressings Market Size, by Residential & Post-Acute Care Facilities, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. A System of Health Accounts 2011

   · Taxonomy evidence: Residential nursing examples include nursing homes, skilled nursing facilities, convalescent homes and inpatient hospices, supporting the nonhospital residential/post-acute grouping. ([oecd.org](https://www.oecd.org/content/dam/oecd/en/publications/reports/2011/xx.xx/a-system-of-health-accounts_g1g13e12/xx.xx-en.pdf))

2. Sirona (BNSSG) Wound Management Formulary and Dressing Guide - Version 3, January 2025

   · Taxonomy evidence: The same surgical-wound dressing section names nursing homes among permitted ordering organizations, independently establishing a residential-care purchasing role without inferring Global buyer shares. ([remedy.bnssg.icb.nhs.uk](https://remedy.bnssg.icb.nhs.uk/media/ghxbkml3/sirona-wound-management-formulary-and-dressing-guide-jan-2025.pdf))

3. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
20. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

12.6. Self-Care Households

Table 193. Global Post-Operative Wound Dressings Market Size, by Self-Care Households, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 194. Global Post-Operative Wound Dressings Market Size, by Self-Care Households, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 195. Global Post-Operative Wound Dressings Market Size, by Self-Care Households, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024

   · Taxonomy evidence: Supported postoperative self-management and patient-held dressing supplies are explicitly recognized; this establishes a household-use pathway, not its market share. ([hwetraininghub.org.uk](https://www.hwetraininghub.org.uk/storage/nwcsp-surgical-wound-complications-recommendations-xx.xx.xx.xx.pdf))

2. Key classifications of the System of Health Accounts 2011 - Best Practice in Institutionalising Health Accounts

   · Taxonomy evidence: Households providing home healthcare are distinguished from professional provider establishments and medical-goods retailers. The proposed self-care boundary is a commercial adaptation. ([oecd.org](https://www.oecd.org/en/publications/best-practice-in-institutionalising-health-accounts_cf997130-en/full-report/key-classifications-of-the-system-of-health-accounts-2011_a2857acf.html))

3. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
   · Taxonomy evidence: Postoperative dressings may subsequently be used by patients or family members and obtained from suppliers. The supplying drugstore and the household user therefore represent different commercial roles.
   ([edit.cms.gov](https://edit.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c14.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
4. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
5. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
6. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
7. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
8. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
9. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
10. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

11. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

13. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
14. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
15. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

16. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
17. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
18. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
19. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
20. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
21. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
22. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.

23. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.

13. Post-Operative Wound Dressings Market, by Sales Channel

[illegible] A distributor route is useful when the partner holds the relevant customer relationship and maintains the required records; direct supply retains control of that interface and the associated work. Neither arrangement substitutes for product acceptance.

[illegible] Suppliers should identify the purchasing principal before classifying a home-delivery relationship. This distinction matters when comparing institutional contracting with household ordering, particularly where the institution controls the formulary.

Retail & Dispensing and Direct-to-Consumer Sales can coexist within a supplier's commercial model. Medline identifies third-party pharmacy and retail outlets alongside its own consumer storefront. [illegible]

Figure 20. Global Post-Operative Wound Dressings Market Size, by Sales Channel, 2025 (%)

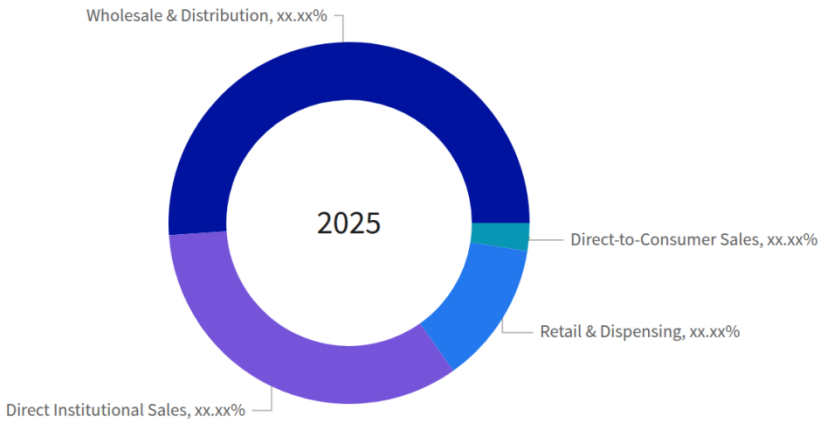

Figure 21. Global Post-Operative Wound Dressings Market, by Sales Channel, 2032 (USD Million)

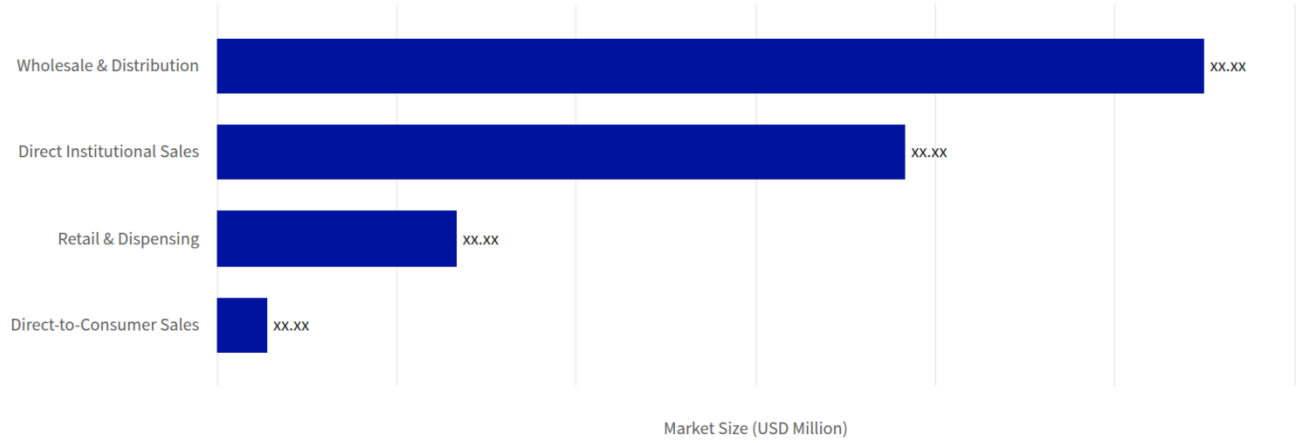

Table 196. Global Post-Operative Wound Dressings Market, by Sales Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 197. Global Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Procurement Services

   · HealthShare NSW assigns onward catalog publication to the contracted distributor where that distributor supplies the customer; direct suppliers retain direct publication responsibility. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

2. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142

   · Under the framework's total-purchase route, dressings belong to the organization rather than the patient, separating purchasing ownership from patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

   · Taxonomy evidence: Organizational ownership can differ from patient delivery destination. Framework award terminology alone does not determine whether the counted principal sells directly or through a reseller.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

3. Consumer - Medline
   - Medline's consumer-business page identifies wound-care offerings and names third-party retail and pharmacy outlets alongside its Medline at Home storefront link. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
4. Shop - PowerHeal Bandage
   - PowerHeal's branded shop provides consumer checkout while identifying surgical incisions within its prescription-use category; this does not establish unrestricted postoperative over-the-counter access. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
5. Advanced Wound Care
   - Taxonomy evidence: The framework distinguishes supply routes from online ordering and offers commitment-dependent pricing. Neither ordering medium nor a pricing agreement alone identifies the first independent purchasing counterparty.
6. North American Industry Classification System - United States, 2022
   - Taxonomy evidence: The official classification distinguishes own-account merchants from agents that do not take title, and describes retailing as the final merchandise-distribution step. This supports transaction-role allocation rather than channel labels based on ordering technology.
7. Partnering with the NHS to Sell Goods and Services
   - Taxonomy evidence: Government commercial guidance distinguishes selling directly to healthcare providers from selling through supply-chain and collaborative purchasing arrangements.
8. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

9. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

10. Smith+Nephew Fourth Quarter and Full Year 2020 Results

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

11. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

12. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

13. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

14. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

15. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration.
([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement.
([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

16. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share.
([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share.
([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

17. Medline Inc. - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

18. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

13.1. Wholesale & Distribution

Table 198. Global Post-Operative Wound Dressings Market Size, by Wholesale & Distribution, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. North American Industry Classification System - United States, 2022
   · Taxonomy evidence: NAICS xx.xx expressly includes surgical-dressing merchant wholesalers. Group purchasing organizations buying and selling on their own account are distinguished from agency-only organizations.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
19. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
20. HealthShare NSW - Procurement Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

13.2. Direct Institutional Sales

Table 201. Global Post-Operative Wound Dressings Market Size, by Direct Institutional Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

   · Taxonomy evidence: The wound-care framework supports organizational purchasing, supplier awards and online ordering. Under its total-purchase route, dressings belong to the purchasing organization rather than the patient.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment.
   ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment.
   ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

2. Partnering with the NHS to Sell Goods and Services

   · Taxonomy evidence: The guidance expressly describes direct supplier sales to trusts and primary-care organizations, while noting that providers may buy from either manufacturers or distributors. Its historical procurement rules are not adopted as current Global requirements.

3. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

4. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

5. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

7. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

19. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
20. HealthShare NSW - Procurement Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

13.3. Retail & Dispensing

Table 204. Global Post-Operative Wound Dressings Market Size, by Retail & Dispensing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. North American Industry Classification System - United States, 2022

   · Taxonomy evidence: The classification separately recognizes pharmacies and health-product retailers, including convalescent-supply retailers. These establish retail intermediary roles, not Global postoperative-dressing shares.

2. Consumer - Medline

   · Taxonomy evidence: The company's consumer-business page identifies wound-care products among home offerings and lists third-party pharmacy, general-retail and online-retail outlets. This supports observed retail participation, not an exhaustive market partition.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
8. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

13.4. Direct-to-Consumer Sales

Table 207. Global Post-Operative Wound Dressings Market Size, by Direct-to-Consumer Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 208. Global Post-Operative Wound Dressings Market Size, by Direct-to-Consumer Sales, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 209. Global Post-Operative Wound Dressings Market Size, by Direct-to-Consumer Sales, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Medline Inc. - Form S-1 Registration Statement
   - Taxonomy evidence: The registration statement explicitly identifies the company's direct-to-consumer channel. This establishes a disclosed commercial model, not its postoperative-specific revenue, market-wide prevalence or Global share.

2. Consumer - Medline
   - Taxonomy evidence: The same business page links its own consumer storefront alongside independent retail outlets, corroborating distinct own-storefront and reseller routes without establishing postoperative-specific sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
3. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

8. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
20. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

14. Post-Operative Wound Dressings Market, by Fixation Design

Fixation Design changes the offering being purchased independently of dressing material. Mepilex Border Post-Op provides a marketed bordered adhesive incision-dressing example. ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■

US Medicare coding adds a commercial consequence: its adhesive-border classification requires an integrated cover with a distinct surrounding border, and coding uses the dressing pad rather than the outside border dimensions. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ That flexibility adds an inventory and responsibility check; neither format establishes clinical equivalence or a universal switching preference.

Figure 22. Global Post-Operative Wound Dressings Market Size, by Fixation Design, 2025 (%)

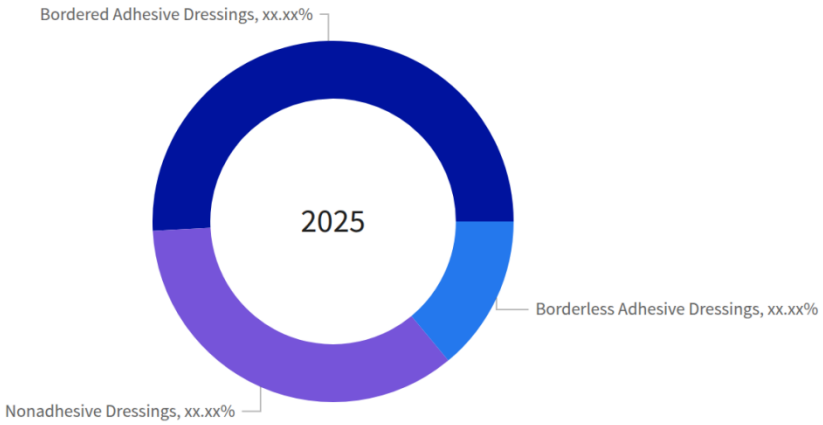

Figure 23. Global Post-Operative Wound Dressings Market, by Fixation Design, 2032 (USD Million)

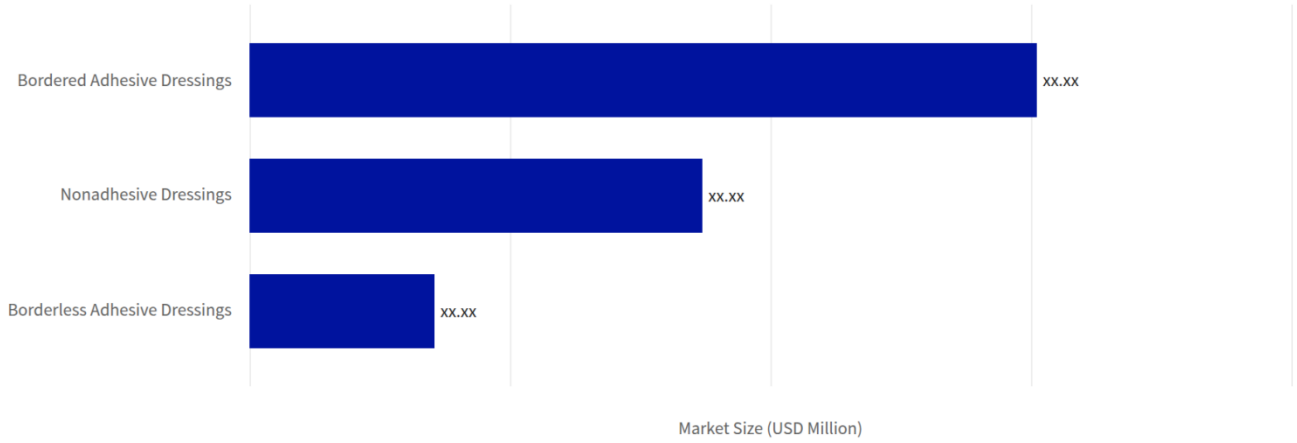

Table 210. Global Post-Operative Wound Dressings Market, by Fixation Design growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 211. Global Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Medicare coding distinguishes integrated adhesive-border covers and uses pad dimensions rather than outside border dimensions.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
2. ALLEVYN Non-Bordered Foam Dressings | Smith+Nephew USA
   · Smith+Nephew's non-bordered range separately identifies adhesive ALLEVYN GENTLE and ALLEVYN Non-Adhesive offerings and includes surgical wounds among the range's stated applications.
   ([smith-nephew.com](https://www.smith-nephew.com/en-us/health-care-professionals/products/advanced-wound-management/allevyn-non-bordered-global))
3. Mepilex® Border Post-Op
   · Mölnlycke identifies Mepilex Border Post-Op as an incision-dressing offering with adhesive technology, providing a bordered commercial example.
   ([molnlycke.com](https://www.molnlycke.com/en-gb/products/wound-care/incision-dressings/mepilex-border-post-op?variantId=xx.xx))
4. Surgical Dressings - Policy Article (A54563)
   · Taxonomy evidence: Surgical-dressing coding distinguishes wound covers with and without an adhesive border, independently of their wound-management material.
5. Sandwell Area Formulary - Wound Management Products
   · Taxonomy evidence: The formulary distinguishes adhesive and nonadhesive foam offerings and separately describes bordered and nonbordered silicone-adhesive products.
6. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
7. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
8. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
9. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

10. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

11. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

12. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

13. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

14. NHSBSA Drug Tariff April 2025 - Part IXA

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advapore and matched-pad CovaWound bordered prices constrain representative bordered value weights; tariff prices are purchasing proxies, not supplier revenue observations.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advapore and matched-pad CovaWound bordered prices constrain representative bordered value weights; tariff prices are purchasing proxies, not supplier revenue observations.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: OpSite Flexigrid and ALLEVYN GENTLE basic prices constrain borderless adhesive relative-price inputs retained in the forecast model.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OpSite Flexigrid and ALLEVYN GENTLE basic prices constrain borderless adhesive relative-price inputs retained in the forecast model.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Absopad, CovaWound nonadhesive foam and ALLEVYN Non-Adhesive basic prices supply the comparison prices for nonadhesive value weights.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Absopad, CovaWound nonadhesive foam and ALLEVYN Non-Adhesive basic prices supply the comparison prices for nonadhesive value weights.

15. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
16. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
17. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

18. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
19. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

14.1. Bordered Adhesive Dressings

Table 212. Global Post-Operative Wound Dressings Market Size, by Bordered Adhesive Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA K190268 - Hydrofera Blue READY-Border: 510(k) Summary

   · Taxonomy evidence: The documented silicone adhesive border supplies a postoperative regulatory example of integral bordered fixation, separate from the foam matrix and antibacterial agents. ([accessdata.fda.gov](https://www.accessdata.fda.gov/cdrh_docs/pdf19/K190268.pdf))

2. Surgical Dressings - Policy Article (A54563)
   · Taxonomy evidence: An adhesive-border wound cover has an integrated cover and distinct adhesive border around all sides. Coding uses pad dimensions rather than the outside border dimensions.
3. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
4. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
5. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
6. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
7. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
8. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
9. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

10. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

12. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
13. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
14. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

15. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
16. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
17. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
18. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
19. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advapore and matched-pad CovaWound bordered prices constrain representative bordered value weights; tariff prices are purchasing proxies, not supplier revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advapore and matched-pad CovaWound bordered prices constrain representative bordered value weights; tariff prices are purchasing proxies, not supplier revenue observations.
20. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
21. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.

22. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
23. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
24. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
25. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.

14.2. Nonadhesive Dressings

Table 215. Global Post-Operative Wound Dressings Market Size, by Nonadhesive Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 216. Global Post-Operative Wound Dressings Market Size, by Nonadhesive Dressings, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Sandwell Area Formulary - Wound Management Products

   · Taxonomy evidence: The foam-dressing portfolio explicitly includes nonadhesive versions, supporting a separate no-integral-adhesive category rather than treating every borderless dressing as adhesive.

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Absopad, CovaWound nonadhesive foam and ALLEVYN Non-Adhesive basic prices supply the comparison prices for nonadhesive value weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Absopad, CovaWound nonadhesive foam and ALLEVYN Non-Adhesive basic prices supply the comparison prices for nonadhesive value weights.
19. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
20. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

21. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
22. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

14.3. Borderless Adhesive Dressings

Table 218. Global Post-Operative Wound Dressings Market Size, by Borderless Adhesive Dressings, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 219. Global Post-Operative Wound Dressings Market Size, by Borderless Adhesive Dressings, by Group, 2017-2040 (USD Million)

Sources & Evidence

1. Sandwell Area Formulary - Wound Management Products
   · Taxonomy evidence: The postoperative-eligible silicone-adhesive foam range is explicitly available in border and nonborder versions, establishing that borderlessness does not imply absence of adhesive.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: OpSite Flexigrid and ALLEVYN GENTLE basic prices constrain borderless adhesive relative-price inputs retained in the forecast model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OpSite Flexigrid and ALLEVYN GENTLE basic prices constrain borderless adhesive relative-price inputs retained in the forecast model.
19. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
20. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.

15. Post-Operative Wound Dressings Market, by Absorbency

Absorbency is a buyer-relevant classification, not a ladder of product superiority. NHS Supply Chain's Advanced Wound Care framework, scheduled from September 2025 through August 2027, publishes Low Absorbency, Moderate Absorbency, High Absorbency, and Ultra-High Absorbency bands using Total Fluid Handling Capacity. ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■

Nonabsorptive offerings have a different commercial role rather than simply occupying the bottom band. ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ A cross-system equivalence rule is not established by these procurement and coding examples; where declarations cannot be aligned, separate product comparisons are more defensible than forced reclassification.

Figure 24. Global Post-Operative Wound Dressings Market Size, by Absorbency, 2025 (%)

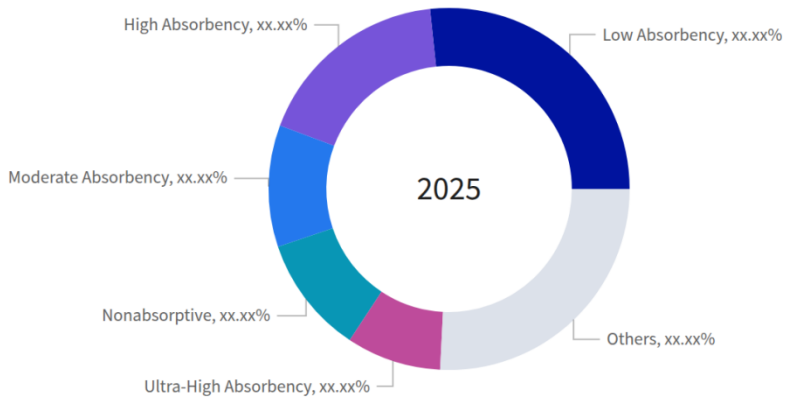

Figure 25. Global Post-Operative Wound Dressings Market, by Absorbency, 2032 (USD Million)

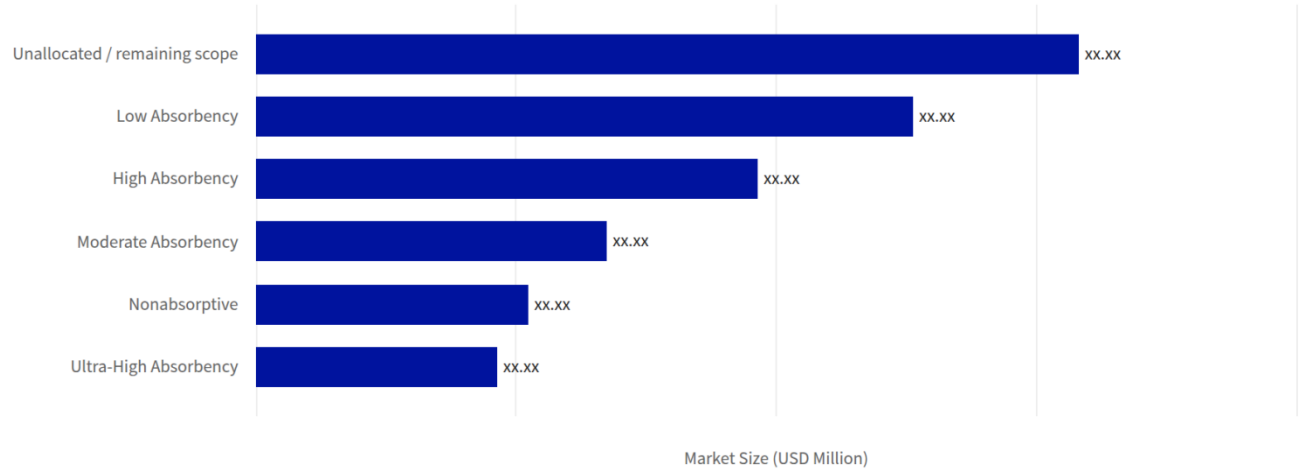

Table 221. Global Post-Operative Wound Dressings Market, by Absorbency growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 222. Global Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   - The policy identifies contact-layer dressings as nonabsorptive and distinguishes them from an absorptive cover. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
2. Advanced Wound Care
   - The framework runs from September xx.xx 2025 to August xx.xx 2027 and publishes Low, Moderate, High, and Ultra-High classifications using Total Fluid Handling Capacity. These establish a specific procurement language, not a universal crosswalk. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
3. Advanced Wound Care
   - Taxonomy evidence: The September 2025-August 2027 framework publishes four total-fluid-handling bands in product listings. These are procurement classifications, not evidence of universal international adoption.
4. Surgical Dressings - Policy Article (A54563)
   - Taxonomy evidence: The policy recognizes both nonabsorptive contact layers and absorptive dressing categories. It does not supply a universal cross-material absorbency-band system.
5. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
6. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
7. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
8. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
9. Smith+Nephew Second Quarter and First Half 2026 Results
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

10. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

11. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

12. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

13. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Jelonet's April 2025 basic price of xx.xx pence supplies a low-priced mesh comparator; its use as a contact-product price proxy is modeled, not a claimed coding equivalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jelonet's April 2025 basic price of xx.xx pence supplies a low-priced mesh comparator; its use as a contact-product price proxy is modeled, not a claimed coding equivalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primapore's representative basic price of xx.xx pence supports the conventional-offering relative-price bridge; Low-band classification coverage remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primapore's representative basic price of xx.xx pence supports the conventional-offering relative-price bridge; Low-band classification coverage remains assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence ActivHeal Silicone Foam Border Lite comparator supports the moderate-archetype value weight, with relative realization held constant in the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence ActivHeal Silicone Foam Border Lite comparator supports the moderate-archetype value weight, with relative realization held constant in the forecast.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FoamLite comparator supports the high-archetype value weight; the source does not report future prices or global net revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FoamLite comparator supports the high-archetype value weight; the source does not report future prices or global net revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FarlaFOAM S comparator supports the ultra-high-archetype value weight and challenges an automatic monotonic price premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FarlaFOAM S comparator supports the ultra-high-archetype value weight and challenges an automatic monotonic price premium.
14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm²; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm²; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm², constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm², constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm²; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm²; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm², without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm², without establishing an international sales distribution.

15. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
16. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

17. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

15.1. Low Absorbency

Table 223. Global Post-Operative Wound Dressings Market Size, by Low Absorbency, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 224. Global Post-Operative Wound Dressings Market Size, by Low Absorbency, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advanced Wound Care
   · Taxonomy evidence: The published Low band is xx.xx-xx.xx g/xx.xx cm².
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primapore's representative basic price of xx.xx pence supports the conventional-offering relative-price bridge; Low-band classification coverage remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primapore's representative basic price of xx.xx pence supports the conventional-offering relative-price bridge; Low-band classification coverage remains assumed.
19. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm²; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm²; this supplies a classification boundary, not a sales weight.

15.2. High Absorbency

Table 226. Global Post-Operative Wound Dressings Market Size, by High Absorbency, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advanced Wound Care
   · Taxonomy evidence: The published High band is xx.xx-xx.xx g/xx.xx cm².
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FoamLite comparator supports the high-archetype value weight; the source does not report future prices or global net revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FoamLite comparator supports the high-archetype value weight; the source does not report future prices or global net revenue.
19. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
20. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
21. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
22. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.

15.3. Moderate Absorbency

Table 229. Global Post-Operative Wound Dressings Market Size, by Moderate Absorbency, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 230. Global Post-Operative Wound Dressings Market Size, by Moderate Absorbency, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 231. Global Post-Operative Wound Dressings Market Size, by Moderate Absorbency, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advanced Wound Care
   · Taxonomy evidence: The published Moderate band is xx.xx-xx.xx g/xx.xx cm².
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence ActivHeal Silicone Foam Border Lite comparator supports the moderate-archetype value weight, with relative realization held constant in the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence ActivHeal Silicone Foam Border Lite comparator supports the moderate-archetype value weight, with relative realization held constant in the forecast.
19. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
20. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
21. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
22. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.

15.4. Nonabsorptive

Table 232. Global Post-Operative Wound Dressings Market Size, by Nonabsorptive, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 233. Global Post-Operative Wound Dressings Market Size, by Nonabsorptive, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Taxonomy evidence: The surgical-dressing policy explicitly identifies contact-layer dressings as nonabsorptive, distinguishing them from a separate absorptive cover.
2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

6. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

7. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Jelonet's April 2025 basic price of xx.xx pence supplies a low-priced mesh comparator; its use as a contact-product price proxy is modeled, not a claimed coding equivalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jelonet's April 2025 basic price of xx.xx pence supplies a low-priced mesh comparator; its use as a contact-product price proxy is modeled, not a claimed coding equivalence.
19. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
20. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.

15.5. Ultra-High Absorbency

Table 235. Global Post-Operative Wound Dressings Market Size, by Ultra-High Absorbency, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advanced Wound Care
   - Taxonomy evidence: The published Ultra-High band begins at xx.xx g/xx.xx cm².

2. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
   ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
3. Solventum Corporation - 2025 Form 10-K
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
4. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
5. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census.
   ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))
6. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth.
   ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
7. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary.
   ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
8. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

9. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.

11. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
12. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
18. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FarlaFOAM S comparator supports the ultra-high-archetype value weight and challenges an automatic monotonic price premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-pence FarlaFOAM S comparator supports the ultra-high-archetype value weight and challenges an automatic monotonic price premium.
19. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
20. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
21. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

22. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16. Post-Operative Wound Dressings Market, by Region

Asia-Pacific requires separate treatment of regulatory distribution and institutional ordering. Singapore requires licenses for medical-device manufacturers, importers, and wholesalers, while HealthShare NSW assigns catalog-publication responsibility according to the direct or distributor supply relationship. [redacted]

[redacted] Suppliers should not transfer a facility purchasing proposition unchanged into home replenishment or across the border. The relevant commitment is an accepted product, supplying party, and payment arrangement-not a North American portfolio listing alone.

In Latin America, Brazil provides a concrete reason to examine control of the local commercial relationship. Anvisa states that foreign companies need legally constituted Brazilian partners responsible for imported and distributed products rather than obtaining authorizations directly. [redacted]

[redacted] Buyers gain purchasing control, while specialist offerings require an accepted exception or inclusion route. This is a documented European example, not a uniform rule for all European purchasers.

For Middle East entry, Saudi Arabia illustrates why regulatory representation is a separate commercial control point. SFDA's published requirements distinguish marketing authorization and the licensed authorized representative acting for an overseas manufacturer. [redacted]

In Africa, South Africa separates establishment licensing from state purchasing. ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ The bid documents demonstrate a route and its conditions, not an individual award, and South African qualification should not be treated as an Africa-wide authorization.

Sources & Evidence

1. Surgical Dressings - Policy Article (A54563)
   · Dressings furnished within a billed professional service are included in that service's payment rather than separately payable.
   ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/article.aspx?articleid=xx.xx))
2. Procurement Services
   · The NSW example establishes a purchasing-information responsibility distinct from a supplier's regional distribution footprint.
   ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
3. Advanced Wound Care and Lymphoedema Products and Services Framework Agreement | SBS10142
   · The framework describes formulary-controlled online ordering and Tissue Viability team involvement for products outside the system.
   ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
4. Regulatory requirements for importing medical devices
   · Health Canada distinguishes device licensing and importer establishment licensing according to class and exemptions, establishing separate product and supplying-party questions.
   ([canada.ca](https://www.canada.ca/en/health-canada/services/drugs-health-products/compliance-enforcement/importation-exportation/regulatory-importing-medical-devices.html))
5. Medical devices
   · Anvisa states that foreign companies cannot obtain marketing authorizations directly and must have legally constituted Brazilian partners responsible for imported and distributed products.
   ([gov.br](https://www.gov.br/anvisa/en/regulation-of-products/medical-devices))
6. Requirements for Medical Devices Marketing Authorization (MDS-REQ 1)
   · SFDA's requirements distinguish medical-device marketing authorization and licensed authorized representation for overseas manufacturers. ([sfda.gov.sa](https://www.sfda.gov.sa/sites/default/files/2021-xx.xx/REQ1En_0.pdf))
7. Medical Devices
   · SAHPRA distinguishes manufacturer, distributor, and wholesaler establishment licenses with different activity scopes. ([sahpra.org.za](https://www.sahpra.org.za/medical-devices/?utm_source=openai))
8. Importer, wholesaler and manufacturers' licensing
   · Singapore requires dealer licenses for medical-device manufacturing, importing, and wholesaling.
   ([hsa.gov.sg](https://www.hsa.gov.sg/medical-devices/manufacturing-import-and-supply/dealers-licence/))
9. RT42-2025: Special Conditions of the Contract
   · The RT42-2025 special conditions concern state procurement of bandages and dressings and distinguish bid evaluation and appointment from general establishment licensing.
   ([etenders.gov.za](https://www.etenders.gov.za/home/Download/?blobName=484281e2-e139-4d40-xx.xx-15e1e346262b.pdf&downloadedFileName=xx.xx.+RT42-2025+Special+Conditions+of+Contract.pdf))
10. Size and distribution of the global volume of surgery in 2012.
    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value.
    ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
11. Solventum Corporation - 2025 Form 10-K
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint.
    ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

12. Smith+Nephew Fourth Quarter and Full Year 2020 Results

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

13. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

14. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

15. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

16. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

17. NHS Supply Chain - Negative Pressure Wound Therapy

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.

18. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
19. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.

20. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement separation constrains the European allocation boundary and avoids counting equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support European scores, subject to domestic-supply and intra-European-flow adjustments.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support European country and background inputs.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations identify material outward flows requiring European hub adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.
13. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
14. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.

15. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

16. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

17. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
18. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

19. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

20. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

21. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
22. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
23. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
24. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
25. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
26. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

27. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
28. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
29. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
30. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
31. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

32. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
33. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
34. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
35. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

36. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
37. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
38. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

39. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
40. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

41. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
42. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
43. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
44. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
45. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
46. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
47. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

48. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
49. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
50. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
51. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

52. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

53. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

54. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
55. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

56. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

57. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

58. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
59. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
60. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
61. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

62. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

63. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
64. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
65. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
66. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

67. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

68. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

69. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

70. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

71. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

72. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
73. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
74. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
75. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

76. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
77. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
78. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

79. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
80. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16.2. North America

Table 251. North America Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 252. North America Post-Operative Wound Dressings Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 253. North America Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Capillary Action Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Collagen Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Composite & Island Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Film & Membrane Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foam Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gauze & Absorbent Pad Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gelling Fiber Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hyaluronic Acid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrocolloid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrogel Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Superabsorbent Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wound Contact Layers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 254. North America Post-Operative Wound Dressings Market Size, by Therapy Platform, 2017-2040 (USD Million)

Therapy Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 255. North America Post-Operative Wound Dressings Market Size, by Antimicrobial Technology, 2017-2040 (USD Million)

Antimicrobial Technology	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Antibiotics	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Bismuth Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chlorhexidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Copper-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
DACC Microbial Binding	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Enzyme-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Honey-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Iodine-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Agent Antimicrobial Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Declared Antimicrobial Technology	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Octenidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Polyhexamethylene Biguanide	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Quaternary Ammonium Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Silver-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 256. North America Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 257. North America Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 258. North America Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 259. North America Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 260. North America Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 261. North America Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2023 adhesive-dressing import inputs support the regional purchasing-score model; not postoperative sales.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code medical-dressing imports support the North American score denominator.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations challenge treating manufacturing and gross inward trade as domestic demand.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.

13. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

14. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
15. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

16. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

17. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

18. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
19. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
20. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
21. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
22. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
23. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

24. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
25. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
26. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
27. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
28. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

29. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
30. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
31. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
32. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

33. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
34. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
35. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

36. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
37. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

38. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
39. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
40. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
41. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
42. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
43. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
44. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

45. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
46. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
47. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
48. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

49. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
50. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

51. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
52. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

53. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

54. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

55. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
56. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
57. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
58. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

59. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

60. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
