Wafer-Level Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
40. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
41. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16. SoC & Memory Semiconductor Tester Market, by Group

Americas-wide procurement can centralize account management while retaining separate project commitments. ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ A regional framework should therefore release equipment obligations against the relevant country's buyer approval and project milestones, rather than assume that support for one investment establishes eligibility for another.

Europe, Middle East & Africa is a useful commercial management territory, but its access conditions require separate schedules. ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ An EMEA agreement can consolidate counterparties while still naming the responsible importer and applicable conditions for each destination.

ASEAN offers a regional trade-information framework without replacing national import requirements. Its trade repository directs businesses to country-level tariffs, origin rules, non-tariff measures, and documentation. ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■

GCC procurement benefits from a common procedural reference, not an assumption of unconditional release. The GCC's 2015 first-point-of-entry guide requires commercial importer identification and applicable approvals for restricted goods. ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■

■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ A distributor serving Australia and New Zealand should verify the relevant origin and product conditions rather than promise preferential treatment merely because equipment is stocked on one side of the Tasman. A combined service agreement remains a separate commercial commitment.

Nordic planning should distinguish shared internal-market participation from customs treatment. ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■ ■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■

[redacted] Centralized support may simplify account administration without removing that distinction.

European Union procurement can use common conformity responsibilities for covered products. [redacted] This can standardize part of procurement, but does not establish uniform site service or make every configuration in a tester family equivalent.

BRICS provides an industrial-cooperation framework rather than a demonstrated common tester-purchasing entitlement. The September 2026 New Delhi Declaration describes industrial-competency initiatives and cooperation respecting national priorities. [redacted]

G7 coordination has a different emphasis: the 2024 Apulia communiqué welcomed a semiconductor point-of-contact group to address industry issues. [redacted] Commercial commitments should remain tied to the resulting national requirements and the actual buyer's acceptance rather than presumed alignment among members.

[redacted] A tester supplier targeting Aerospace and Defense should first identify the actual purchasing body and a relevant requirement before committing to bid preparation or security-related expenditure. Registration can support access to opportunities; it does not establish an award or replace the solicitation's requirements.

[redacted] The same customer relationship can appear in European Union, Nordic, G7, or NATO analysis, while Americas and Europe, Middle East & Africa overlap their constituent regional views. Group membership should explain access or coordination conditions, not create separate equipment opportunities for the same deployment.

Figure 27. Global SoC & Memory Semiconductor Tester Market Size, by Group, 2025 vs 2026 vs 2032

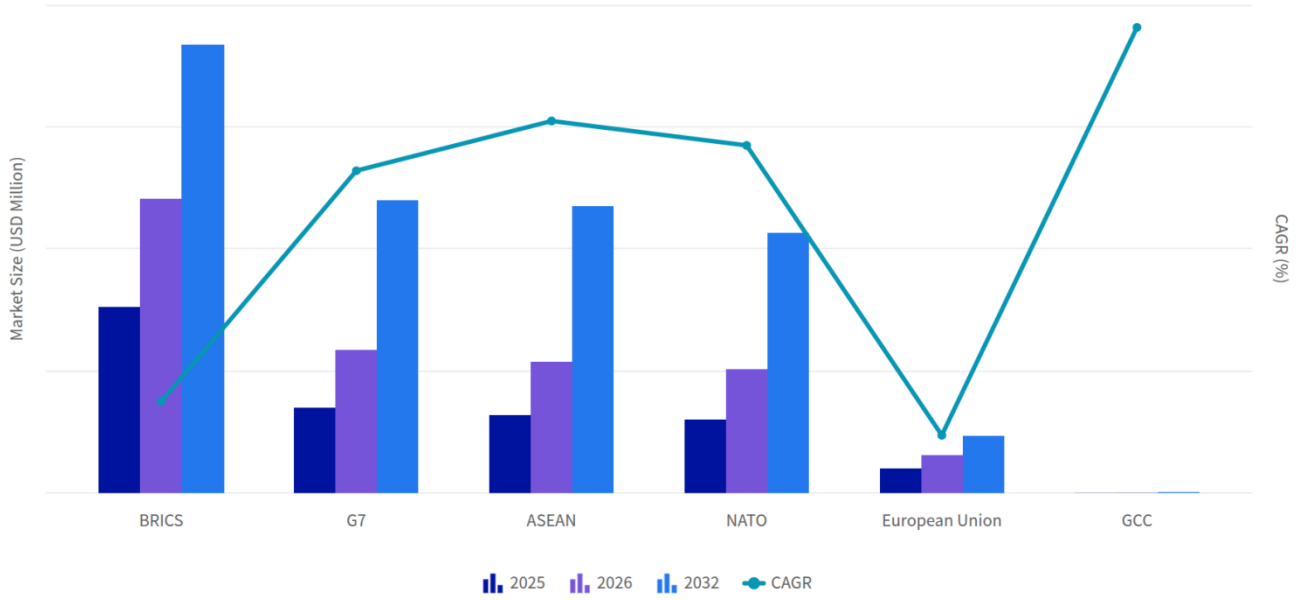

Table 191. Global SoC & Memory Semiconductor Tester Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Amkor Technology, Inc. Form 10-K for the Year Ended December 31, 2025

   · Amkor identifies operations in Malaysia, the Philippines, and Singapore, providing a concrete multi-country customer setting for ASEAN coordination.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

   · Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

2. CE marking - European Commission

   · European Commission guidance assigns conformity assessment and declaration responsibilities to manufacturers and compliance responsibilities to importers and distributors for covered EEA products.
   ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/single-market/goods/ce-marking_en))

3. Amkor Technology Announces Phase 2 of Arizona Advanced Packaging and Test Campus; Expands Investment to $12 Billion

   · The Arizona announcement concerns a specific United States project, supporting project-specific rather than Americas-wide commitment assumptions.
   ([ir.amkor.com](https://ir.amkor.com/news-releases/news-release-details/amkor-technology-announces-phase-xx.xx-arizona-advanced-packaging))

4. Complexo Eletroeletrônico e de Semicondutores - Ministério do Desenvolvimento, Indústria, Comércio e Serviços

   · Brasil Semicon is a national program; the overview does not establish eligibility for investments elsewhere in the Americas.
   ([gov.br](https://www.gov.br/mdic/pt-br/composicao/sdic/dial/complexo-eletroeletronico-e-de-semicondutores))

5. Frequently Asked Questions - Import Control - International Trade Administration Commission

   · South Africa's used-goods treatment illustrates a national import condition within EMEA.
   ([itac.org.za](https://itac.org.za/import-control/faqs/))

6. GCC Unified Guide for Customs Procedures at First Points of Entry

   · The GCC's 2015 first-point-of-entry guide requires commercial importer identification and competent-authority approvals for restricted goods; it does not classify a particular tester.
   ([gcc-sg.org](https://gcc-sg.org/en/MediaCenter/DigitalLibrary/Documents/xx.xx.pdf))

7. NTR - ASEAN Member States' National Trade Repositories

   · The ASEAN Trade Repository directs traders to national information covering tariffs, origin, non-tariff measures, procedures, and documentation; this supports endpoint-specific diligence.
   ([atr.asean.org](https://atr.asean.org/read/national-trade-repositories-asean-member-countries/xx.xx))

8. Australia-New Zealand Closer Economic Relations Trade Agreement

· Australia's official ANZCERTA overview ties goods preferences to qualifying origin and describes mutual-recognition arrangements; stock location alone does not establish those conditions. ([dfat.gov.au](https://www.dfat.gov.au/trade/agreements/in-force/anzcerta/australia-new-zealand-closer-economic-relations-trade-agreement))

9. The EEA Agreement - Norway and the EU

· Norway's government explains that the EEA extends internal-market participation to Norway and Iceland but excludes the EU customs union and common trade policy. ([norway.no](https://www.norway.no/en/missions/eu/areas-of-cooperation/the-eea-agreement/))

10. BRICS New Delhi Declaration: Building for Resilience, Innovation, Cooperation and Sustainability

· The September xx.xx 2026 New Delhi Declaration describes industrial-competency initiatives and cooperation respecting national priorities; it is not transaction-specific tester authorization. ([eoiriyadh.gov.in](https://www.eoiriyadh.gov.in/section/news/brics-new-delhi-declaration-building-for-resilience-innovation-cooperation-and-sustainability/))

11. Apulia G7 Leaders' Communiqué

· The 2024 Apulia communiqué welcomes a semiconductor G7 point-of-contact group for coordination on industry issues; it does not establish customer qualification. ([consilium.europa.eu](https://www.consilium.europa.eu/media/fttjqncg/apulia-g7-leaders-communique.pdf))

12. Navigating NATO procurement - GOV.UK

· UK guidance updated January xx.xx 2026 describes decentralized NATO procurement and the NSPA Source File as a supplier invitation channel, supporting procuring-body-specific access analysis. ([gov.uk](https://www.gov.uk/government/publications/navigating-nato-procurement/navigating-nato-procurement))

13. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

14. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

15. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

16. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
17. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
18. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
19. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))

20. YC Corporation - Business Report for the Year Ended December 31, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
21. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
22. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
23. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))
24. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

25. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion
    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))
    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))
    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))
26. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion
    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))
    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))
27. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022
    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))
28. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
29. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market. ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
30. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

31. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

16.1. BRICS

Table 192. BRICS SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China deliveries constrain the base country equipment-demand proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Micron Technology, Inc. - Form 10-K for the Fiscal Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: India's disclosed component assembly/test location supports the base procurement pipeline, not a reported spending amount.
22. Micron - Celebrates Opening of India's First Semiconductor Assembly and Test Facility, February 28, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial commencement and aggregate shipment expectations support a post-2025 expansion premise; they do not measure tester expenditure.
23. HT Micron - Quality Management and Brazilian Operating Scope
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
24. NXP Semiconductors - 2025 Annual Report and Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.
25. Brazil MDIC - Complexo Eletroeletrônico e de Semicondutores
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brasil Semicon is national policy context; its overview does not establish a particular eligible tester purchase or fiscal benefit.

26. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
27. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

28. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
29. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
30. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
31. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
32. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
33. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

34. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

35. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

36. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

37. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

38. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

39. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

40. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

41. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

42. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

43. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

44. Teradyne - 2025 Annual Report to Shareholders
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

45. TSMC - 2025 Form 20-F
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

46. Micron Technology - Form 10-K for the Year Ended August 28, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

47. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

48. WSTS - Semiconductor Market Insights, October 2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

49. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

50. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
51. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
52. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
53. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
54. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
55. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

56. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

57. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

58. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

59. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

60. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

61. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
62. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
63. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
64. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16.2. G7

Table 203. G7 SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 204. G7 SoC & Memory Semiconductor Tester Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan deliveries constrain the base country equipment-demand proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site geography and broader revenue disclosures support the scoped national destination bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Germany expansion constrains the forecast; no canceled-project tester increment is included.
22. Amkor - Announces Phase 2 of Arizona Advanced Packaging and Test Campus, September 8, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phase-two construction and completion expectations support delayed procurement conversion, not a 2025 equipment award.
23. NIST - Appendix: The CHIPS Program Office Vision for Success, Two Years Later, January 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-manufacturing and packaging project locations constrain the national expansion opportunity; award ceilings are not tester spending.
24. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

25. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
26. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
27. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
28. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
29. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
30. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
31. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

32. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

33. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

34. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

35. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

36. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

37. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

38. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

39. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
40. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
41. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

42. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

43. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

44. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

45. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

46. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

47. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

48. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
49. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
50. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
51. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
52. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
53. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

54. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

55. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

56. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

57. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

58. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

59. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
60. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
61. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
62. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16.3. ASEAN

Table 214. ASEAN SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brunei	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cambodia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Indonesia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Lao People's Democratic Republic	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Malaysia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Myanmar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Malaysia customer-site revenue is an input to the eligible equipment-demand model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Philippines customer-site revenue is an input to the eligible equipment-demand model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Singapore customer-site revenue is an input to the eligible equipment-demand model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Thailand customer-site revenue is an input to the eligible equipment-demand model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.

6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shipment-destination revenue corroborates a material Philippines purchaser pool, with substantial product-scope exclusions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shipment-destination revenue corroborates a material Malaysia purchaser pool, with substantial product-scope exclusions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))

8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market. ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vietnam operating assets support the local purchaser pool; future equipment conversion remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vietnam operating assets support the local purchaser pool; future equipment conversion remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator

21. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assembly/test consolidation into Malaysia supports a relative expansion premise, not the exact multiplier.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assembly/test consolidation into Vietnam supports a relative expansion premise, not the exact multiplier.
22. Micron Technology, Inc. - Form 10-K for the Fiscal Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Component assembly/test locations support a Malaysia equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Component assembly/test locations support a Malaysia equipment-purchaser pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Singapore manufacturing and assembly/test activity supports an equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Singapore manufacturing and assembly/test activity supports an equipment-purchaser pool.
23. NXP Semiconductors - 2025 Annual Report and Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed Malaysia back-end activity supports a local equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed Malaysia back-end activity supports a local equipment-purchaser pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed Thailand back-end activity supports a local equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed Thailand back-end activity supports a local equipment-purchaser pool.

24. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
25. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

26. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
27. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
28. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
29. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
30. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
31. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

32. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

33. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

34. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

35. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

36. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

37. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

38. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

39. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
40. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
41. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

42. Teradyne - 2025 Annual Report to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

43. TSMC - 2025 Form 20-F

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

44. Micron Technology - Form 10-K for the Year Ended August 28, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

45. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

46. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

47. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

48. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
49. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
50. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
51. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
52. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
53. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

54. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

55. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

56. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

57. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

58. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

59. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
60. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
61. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
62. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16.4. NATO

Table 225. NATO SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site geography and broader revenue disclosures support the scoped national destination bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portugal operating assets support an eligible production and engineering purchaser pool.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portugal operating assets support an eligible production and engineering purchaser pool.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator

21. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Germany expansion constrains the forecast; no canceled-project tester increment is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Poland expansion constrains the forecast equipment pool.
22. Amkor - Announces Phase 2 of Arizona Advanced Packaging and Test Campus, September 8, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phase-two construction and completion expectations support delayed procurement conversion, not a 2025 equipment award.
23. NIST - Appendix: The CHIPS Program Office Vision for Success, Two Years Later, January 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-manufacturing and packaging project locations constrain the national expansion opportunity; award ceilings are not tester spending.
24. NXP Semiconductors - 2025 Annual Report and Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A Netherlands operating manufacturing site constrains the local equipment-purchaser premise without equating chip output to tester demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A Netherlands operating manufacturing site constrains the local equipment-purchaser premise without equating chip output to tester demand.

25. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
26. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

27. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
28. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
29. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
30. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
31. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
32. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

33. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

34. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

35. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

36. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

37. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

38. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

39. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

40. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

41. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

42. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

43. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

44. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

45. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

46. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

47. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

48. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

49. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
50. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
51. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
52. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
53. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
54. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

55. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

56. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

57. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

58. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

59. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

60. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
61. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
62. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
63. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16.5. European Union

Table 236. European Union SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Austria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portugal operating assets support an eligible production and engineering purchaser pool.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portugal operating assets support an eligible production and engineering purchaser pool.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator

21. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Germany expansion constrains the forecast; no canceled-project tester increment is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Poland expansion constrains the forecast equipment pool.
22. NXP Semiconductors - 2025 Annual Report and Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A Netherlands operating manufacturing site constrains the local equipment-purchaser premise without equating chip output to tester demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A Netherlands operating manufacturing site constrains the local equipment-purchaser premise without equating chip output to tester demand.
23. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

24. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
25. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
26. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
27. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
28. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
29. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
30. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

31. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

32. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

33. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

34. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

35. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

36. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

37. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

38. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
39. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
40. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

41. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
42. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
43. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

44. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

45. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

46. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

47. NXP Semiconductors - Product Longevity

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

48. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

49. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

50. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

51. Alchip - Advanced Testing Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

52. University of Utah Nanofab - Verigy Tester

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

53. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

54. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

55. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

56. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

57. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

58. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
59. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
60. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
61. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

16.6. GCC

Table 247. GCC SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bahrain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kuwait	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Oman	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Saudi Arabia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Arab Emirates	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 255. GCC SoC & Memory Semiconductor Tester Market Size, by Acquisition Model, 2017-2040 (USD Million)

Acquisition Model	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Equipment Leasing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Equipment Purchase	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 256. GCC SoC & Memory Semiconductor Tester Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 257. GCC SoC & Memory Semiconductor Tester Market Size, by Test Insertion, 2017-2040 (USD Million)

Test Insertion	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
In-Process Assembly Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Insertion Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Packaged-Device Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Singulated-Die Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wafer-Level Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. KAUST - Saudi Future of Semiconductors Forum 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional and chip-design ecosystem activity supports a small engineering-demand premise, not an observed equipment award.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional and chip-design ecosystem activity supports a small engineering-demand premise, not an observed equipment award.
22. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

23. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
24. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
25. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
26. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
27. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
28. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
29. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

30. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

31. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

32. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

33. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

34. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

35. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

36. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

37. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
38. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
39. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

40. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

41. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

42. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

43. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

44. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

45. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

46. NXP Semiconductors - Product Longevity

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

47. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

48. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

49. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

50. Alchip - Advanced Testing Services

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

51. University of Utah Nanofab - Verigy Tester

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

52. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

53. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

54. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

55. Spirox Corporation - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
56. KYEC (2449) - Q4 2025 Investor Update
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

57. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
58. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
59. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
60. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17. SoC & Memory Semiconductor Tester Market, by Country

■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■ ■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ These stated functions give buyers a local engagement route, but do not establish stocked replacement assets or a particular response obligation. A buyer should obtain a written platform and site-support schedule before relying on the office for continuing production support.

■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ Purchasers should verify the appointment applicable to the named configuration and customer rather than treat a distributor relationship as unrestricted portfolio access. Separately, Teradyne's 2025 filing reports restrictions affecting certain Chinese customers; an intermediary appointment does not settle the actual transaction's export eligibility.

■■ ■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■ ■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■ ■■■ ■■ ■■■■■ Suppliers should tie equipment commitments to the phase's actual purchasing schedule and configuration acceptance. The stated development timetable does not identify tester awards.

Brazil's policy framework creates a verification requirement before fiscal treatment can inform procurement. ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ Procurement should obtain the applicable eligibility determination before relying on program treatment in an acquisition decision.

South Africa distinguishes acquisition routes through import status. ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■ This concerns import access, not a judgment that used equipment is commercially unsuitable.

Figure 28. Global SoC & Memory Semiconductor Tester Market Size, by Country, 2025 vs 2032 (%)

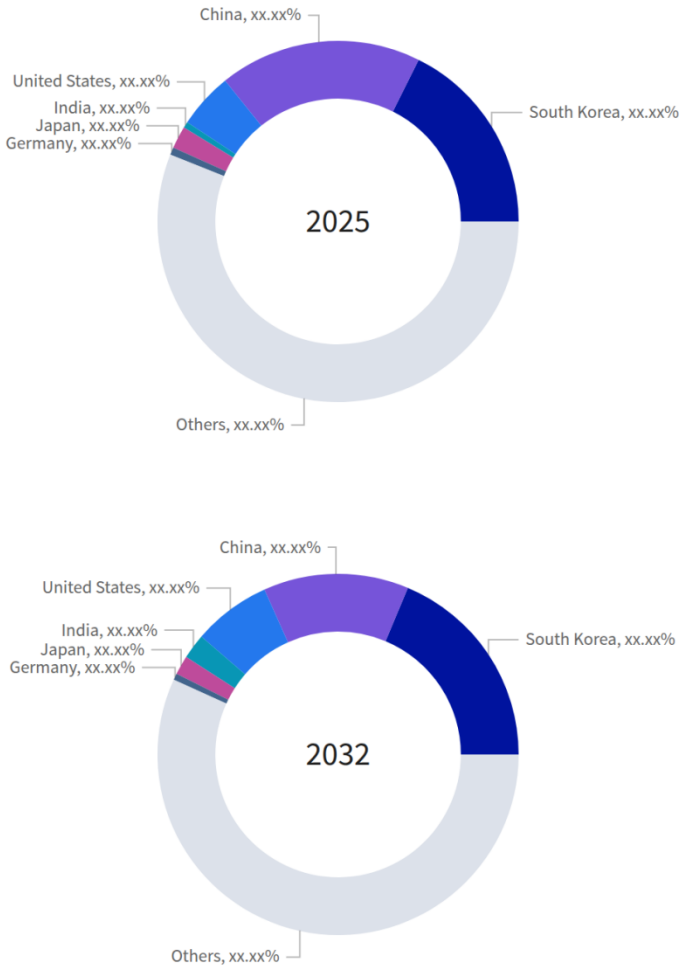

Figure 29. Global SoC & Memory Semiconductor Tester Market Size, by Country, 2025 vs 2026 vs 2032

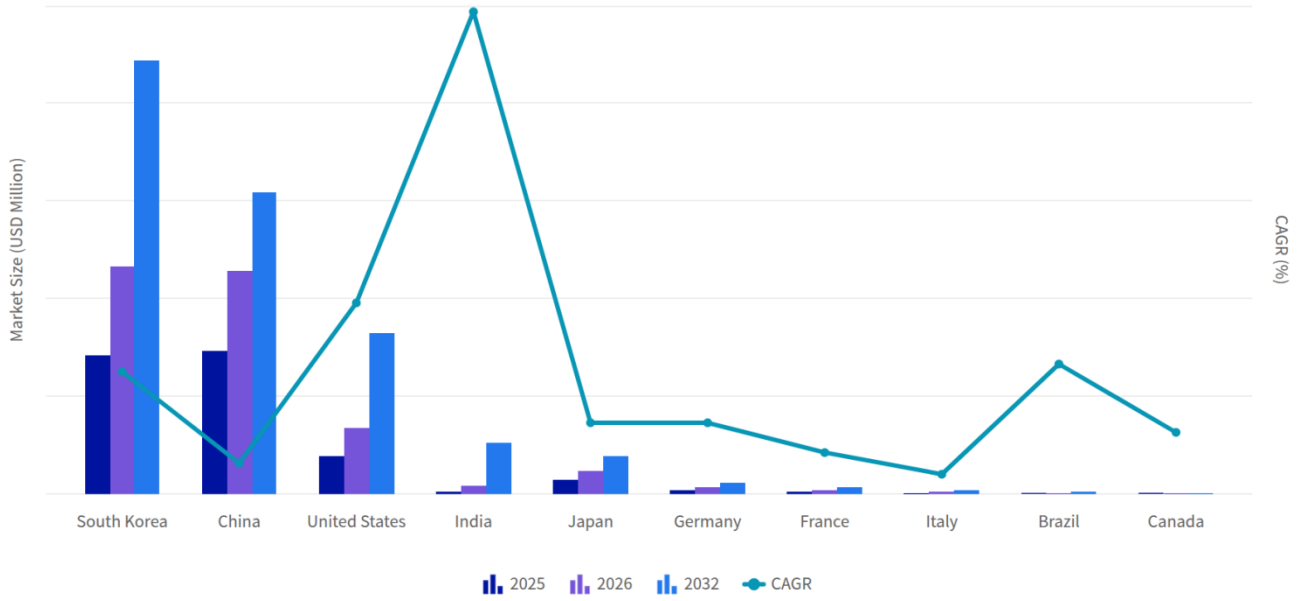

Table 258. Global SoC & Memory Semiconductor Tester Market, by Country growth contribution, 2025-2032

Sources & Evidence

1. Teradyne, Inc. Form 10-K for the Year Ended December 31, 2025

   · The filing reports export restrictions affecting transactions with certain Chinese customers; it does not determine an individual transaction's eligibility. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site geography and broader revenue disclosures support the scoped national destination bridge.

2. Amkor Technology Announces Phase 2 of Arizona Advanced Packaging and Test Campus; Expands Investment to $12 Billion

   · Phase-two construction is anticipated to begin in late 2027, with completion expected by the end of 2029; these are stated expectations, not completed events. ([ir.amkor.com](https://ir.amkor.com/news-releases/news-release-details/amkor-technology-announces-phase-xx.xx-arizona-advanced-packaging))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phase-two construction and completion expectations support delayed procurement conversion, not a 2025 equipment award.

3. Complexo Eletroeletrônico e de Semicondutores - Ministério do Desenvolvimento, Indústria, Comércio e Serviços

   · The ministry's program overview does not determine buyer, project, or imported-tester eligibility, supporting a verification conclusion rather than an assumed benefit. ([gov.br](https://www.gov.br/mdic/pt-br/composicao/sdic/dial/complexo-eletroeletronico-e-de-semicondutores))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brasil Semicon is national policy context; its overview does not establish a particular eligible tester purchase or fiscal benefit.

4. Frequently Asked Questions - Import Control - International Trade Administration Commission

   · ITAC advises equipment-specific policy confirmation because treatment differs by sector, supporting permit verification before a used-tester shipment. ([itac.org.za](https://itac.org.za/import-control/faqs/))

5. Spirox Corporation - 2024 Annual Report

   · Spirox's 2024 report identifies an NI Taiwan agreement for specified STS configurations, restricted territories and customers, and conditional renewal. The dated disclosure does not establish subsequent renewal. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2024/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

6. Teradyne Opens Office in India, Deepening Commitment to the Country's Growing Semiconductor Ecosystem

· On September xx.xx 2026, Teradyne announced its Bengaluru office for customer engagement, applications support, training, and partnerships; the announcement does not specify site-service entitlements. ([investors.teradyne.com](https://investors.teradyne.com/news-events/press-releases/detail/xx.xx/teradyne-opens-office-in-india-deepening-commitment-to-the-countrys-growing-semiconductor-ecosystem))

7. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

8. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: China deliveries constrain the base country equipment-demand proxy.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korea deliveries constrain the base country equipment-demand proxy.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan deliveries constrain the base country equipment-demand proxy.

9. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

10. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

11. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
12. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
13. YC Corporation - Business Report for the Year Ended December 31, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
14. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
15. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

16. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

17. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

18. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

19. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

20. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

21. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

22. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

23. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

24. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue.
([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit.
([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

25. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korea operating assets corroborate local packaging and test activity without equating assets to annual equipment purchases.

26. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Germany expansion constrains the forecast; no canceled-project tester increment is included.
27. Micron Technology, Inc. - Form 10-K for the Fiscal Year Ended August 28, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: India's disclosed component assembly/test location supports the base procurement pipeline, not a reported spending amount.
28. Micron - Celebrates Opening of India's First Semiconductor Assembly and Test Facility, February 28, 2026
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial commencement and aggregate shipment expectations support a post-2025 expansion premise; they do not measure tester expenditure.
29. NIST - Appendix: The CHIPS Program Office Vision for Success, Two Years Later, January 2025
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-manufacturing and packaging project locations constrain the national expansion opportunity; award ceilings are not tester spending.
30. HT Micron - Quality Management and Brazilian Operating Scope
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
31. NXP Semiconductors - 2025 Annual Report and Financial Statements
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.

17.1. China

Table 260. China SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China deliveries constrain the base country equipment-demand proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. NXP Semiconductors - 2025 Annual Report and Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed China back-end activity supports a local equipment-purchaser pool.
22. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
23. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

24. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
25. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
26. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
27. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
28. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
29. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

30. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

31. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

32. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

33. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

34. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

35. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

36. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

37. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

38. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

39. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

40. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

41. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

42. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

43. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

44. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

45. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

46. NXP Semiconductors - Product Longevity

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

47. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

48. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

49. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

50. Alchip - Advanced Testing Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

51. University of Utah Nanofab - Verigy Tester

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

52. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

53. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

54. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

55. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

56. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

57. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
58. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
59. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
60. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.2. South Korea

Table 270. South Korea SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korea deliveries constrain the base country equipment-demand proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korea operating assets corroborate local packaging and test activity without equating assets to annual equipment purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
40. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
41. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.3. United States

Table 280. United States SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site geography and broader revenue disclosures support the scoped national destination bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Amkor - Announces Phase 2 of Arizona Advanced Packaging and Test Campus, September 8, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phase-two construction and completion expectations support delayed procurement conversion, not a 2025 equipment award.
22. NIST - Appendix: The CHIPS Program Office Vision for Success, Two Years Later, January 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-manufacturing and packaging project locations constrain the national expansion opportunity; award ceilings are not tester spending.
23. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

24. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
25. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
26. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
27. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
28. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
29. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
30. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

31. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

32. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

33. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

34. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

35. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

36. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

37. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

38. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
39. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
40. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

41. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
42. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
43. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

44. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

45. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

46. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

47. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
48. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
49. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
50. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
51. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
52. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

53. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

54. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

55. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

56. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

57. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

58. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
59. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
60. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
61. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.4. Japan

Table 290. Japan SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan deliveries constrain the base country equipment-demand proxy.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
    ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
    ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
    ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

22. Advantest - T5835 Memory Test System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share.
([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share.
([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue.
([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
37. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.5. Germany

Table 300. Germany SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Intel Corporation - Form 10-K for the Year Ended December 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discontinued Germany expansion constrains the forecast; no canceled-project tester increment is included.
22. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
23. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

24. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
25. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
26. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
27. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
28. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
29. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

30. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

31. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

32. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

33. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

34. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

35. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

36. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

37. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

38. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

39. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

40. Teradyne - 2025 Annual Report to Shareholders
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

41. TSMC - 2025 Form 20-F
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

42. Micron Technology - Form 10-K for the Year Ended August 28, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

43. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

44. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

45. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

46. NXP Semiconductors - Product Longevity

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

47. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

48. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

49. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

50. Alchip - Advanced Testing Services

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

51. University of Utah Nanofab - Verigy Tester

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

52. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

53. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

54. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

55. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

56. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

57. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
58. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
59. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
60. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.6. India

Table 310. India SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Micron Technology, Inc. - Form 10-K for the Fiscal Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: India's disclosed component assembly/test location supports the base procurement pipeline, not a reported spending amount.
22. Micron - Celebrates Opening of India's First Semiconductor Assembly and Test Facility, February 28, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial commencement and aggregate shipment expectations support a post-2025 expansion premise; they do not measure tester expenditure.
23. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

24. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
25. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
26. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
27. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
28. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
29. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
30. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

31. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

32. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

33. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

34. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

35. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

36. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

37. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

38. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
39. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
40. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

41. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
42. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
43. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

44. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

45. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

46. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

47. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
48. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
49. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
50. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
51. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
52. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

53. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

54. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

55. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

56. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

57. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

58. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
59. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
60. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
61. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.7. France

Table 320. France SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

22. Advantest - T5835 Memory Test System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.8. Italy

Table 330. Italy SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

22. Advantest - T5835 Memory Test System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.9. Canada

Table 340. Canada SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

22. Advantest - T5835 Memory Test System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
40. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
41. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.10. Brazil

Table 359. Brazil SoC & Memory Semiconductor Tester Market Size, by Test Insertion, 2017-2040 (USD Million)

Test Insertion	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
In-Process Assembly Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Insertion Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Packaged-Device Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Singulated-Die Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wafer-Level Test	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
    ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
    ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
    ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. HT Micron - Quality Management and Brazilian Operating Scope
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company disclosure establishes Brazilian semiconductor encapsulation and testing activity, but not tester-only expenditure.
22. Brazil MDIC - Complexo Eletroeletrônico e de Semicondutores
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brasil Semicon is national policy context; its overview does not establish a particular eligible tester purchase or fiscal benefit.
23. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

24. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
25. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
26. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
27. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
28. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
29. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
30. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

31. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

32. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

33. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

34. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

35. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

36. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

37. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

38. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
39. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
40. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

41. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
42. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
43. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

44. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

45. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

46. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

47. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
48. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
49. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
50. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
51. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
52. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

53. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

54. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

55. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

56. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

57. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

58. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
59. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
60. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
61. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.11. United Kingdom

Table 360. United Kingdom SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
    ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
    ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
    ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
37. Efforts to Provide Value Through Business - Advantest
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))

46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))

47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.

48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.

49. Alchip - Advanced Testing Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.

50. University of Utah Nanofab - Verigy Tester

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.12. Mexico

Table 370. Mexico SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.13. Australia

Table 380. Australia SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.14. Russia

Table 390. Russia SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))

17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))

18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusines

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))

22. Advantest - T5835 Memory Test System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

40. TSMC - 2025 Form 20-F

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))

41. Micron Technology - Form 10-K for the Year Ended August 28, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

17.15. Spain

Table 400. Spain SoC & Memory Semiconductor Tester Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 401. Spain SoC & Memory Semiconductor Tester Market Size, by Tester Type, 2017-2040 (USD Million)

Tester Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Combined SoC & Memory Testers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Advantest - FY2024 Consolidated Financial Results Presentation, April 25, 2025

   • Evidence informing the 2023 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2023 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers, before modeled scope adjustments. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

   • Evidence informing the 2024 market-value input; displayed series and growth include calculations: Quarterly product-revenue disclosures support calendar-2024 totals of JPY xx.xx for SoC testers and JPY xx.xx for memory testers; handling, services and system-level testing are disclosed separately. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_250425_slide.pdf))

2. Advantest - FY2025 Third Quarter Financial Results Presentation, January 28, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed January-March 2025 quarter and April-December 2025 quarters produce calendar-2025 SoC tester revenue of JPY xx.xx and memory tester revenue of JPY xx.xx. These are supplier revenues, not a published global market total. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx, before the inherited eligible-SoC scope deduction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory revenue totals JPY xx.xx for calendar 2025, anchoring the memory equipment pool rather than a published global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: January-March memory revenue of JPY xx.xx supports the fiscal-to-calendar application-mix bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly SoC revenues of JPY xx.xx, xx.xx, xx.xx and xx.xx reconstruct calendar-2025 revenue of JPY xx.xx, the supplier revenue ceiling used for modeled eligible OPENSTAR attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported quarters support the calendar-2025 SoC revenue bridge used to estimate Computing's equipment weight. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same quarterly equipment revenues constrain the combined Computing/Communications budget before modeled separation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quarterly product table independently reproduces calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx. These constrain the inherited equipment-revenue scale but do not disclose an acquisition-model split. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly product disclosures reconstruct calendar-2025 SoC revenue of JPY xx.xx and memory revenue of JPY xx.xx, supporting the retained scoped manufacturer budget rather than an observed channel share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer equipment budget provides the economic scale against which inherited intermediary penetration is allocated; the presentation does not quantify reseller receipts. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260128_slide.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quarterly memory-system receipts reconstruct calendar-2025 revenue of JPY xx.xx, an input to the shared diversified-memory equipment budget.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory receipts constrain the parent purchasing budget from which the modeled intermediate-assembly portion is attributed; no insertion split is disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product-line receipts support the common equipment-budget bridge carried into the package-test allocation and its forecast starting weights.

3. Advantest - FY2026 First Quarter Financial Results Presentation, July 29, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The presentation reports January-March 2026 SoC/memory revenues of JPY xx.xx/xx.xx and April-June revenues of JPY xx.xx/xx.xx. July guidance forecasts fiscal-2026 SoC/memory revenues of JPY xx.xx/xx.xx and supplies the fiscal-to-calendar bridge. Guidance is not realized revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Current equipment revenue and company-specific capacity plans constrain the forecast starting point, not the assumed long-run growth rate or the 2040 result. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual quarterly SoC revenue and FY2026 product guidance constrain the inherited 2026 supplier bridge used to forecast relative category weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January-March and April-June memory revenue of JPY xx.xx/xx.xx and FY2026 guidance of JPY xx.xx constrain the calendar bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rounded fiscal DRAM mixes are xx.xx% for FY2024 and xx.xx% for FY2025; FY2026 guidance is xx.xx%. Calendar conversion and co-primary deductions are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corresponding nonvolatile mixes are xx.xx%, xx.xx% and guided xx.xx%, qualifying an exclusively DRAM-led outlook without verifying future global shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own SoC sales mix is approximately xx.xx% Computing/Communications in FY24 and xx.xx% in FY25; 2026 demand commentary constrains forecast direction, not the final share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported combined application proportions constrain the common budget; the separate Communications allocation and future mix remain modeled. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260729_slide.pdf))

4. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The revenue-disaggregation table reports 2023 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Replacement parts require a further modeled deduction. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The filing reports 2024 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx separately from over-time revenue and IST. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The filing reports 2025 point-in-time SoC revenue of USD xx.xx and memory revenue of USD xx.xx. Point-in-time recognition includes products and replacement parts and is therefore an equipment proxy rather than an exact complete-system subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time SoC revenue is USD xx.xx; equipment and eligible-device deductions remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 point-in-time memory revenue is USD xx.xx; replacement parts require the inherited equipment adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies DRAM/HBM commercial activity; it does not disclose the modeled annual DRAM configuration fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum flash-memory activity supports nonvolatile category participation, not the assumed annual sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reported specifying and purchasing customers support treating commercial roles distinctly, without adding overlapping customer percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 product revenues supply a realized-demand challenge, but do not identify engineering-only sales; the allocation retains this attribution limitation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Point-in-time SoC revenue grew approximately xx.xx% while memory declined approximately xx.xx%, qualifying uniform-growth assumptions rather than directly establishing purpose shares. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes platform specifiers from purchasing customers, supporting the requirement for an accepted joint remit rather than inferring it from platform selection.

5. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 point-in-time revenue was USD xx.xx for SoC and USD xx.xx for memory. Comparable first-half 2025 amounts were USD xx.xx and USD xx.xx independently establishing strong realized growth before the modeled second half. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time SoC revenue of USD xx.xx anchors the scoped and annualized SoC forecast input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 point-in-time memory revenue of USD xx.xx anchors the memory forecast pool; second-half realization remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains the forecast numerator to which the explicitly assumed small SRAM fraction is applied; SRAM sales are not separately disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The observed memory pool constrains modeled multi-family attribution, but does not independently establish co-primary configuration sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The scoped memory forecast pool supplies one bounded source of combined-configuration value; the co-primary fraction remains assumed.
6. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Cohu reports 2023 systems-semiconductor test and inspection revenue of USD xx.xx. Only an assumed complete-tester and eligible-device portion enters this market. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Cohu reports 2024 systems-semiconductor test and inspection revenue of USD xx.xx separately from non-systems revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Cohu reports 2025 systems-semiconductor test and inspection revenue of USD xx.xx. Automation, inspection, interfaces and recurring services prevent attribution of the whole company to SoC testers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cohu describes a primarily direct commercial model supported by targeted independent representatives, supporting direct attribution where the manufacturer remains the contractual seller. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent-representative commissions are identified in selling expenses; representation alone does not establish title-taking equipment resale or a numerical distributor share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))

7. Hangzhou Changchuan Technology Co., Ltd. - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The product table reports 2024 tester revenue of CNY xx.xx, distinct from handlers and other products. Its SoC-eligible portion remains modeled. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The product table reports 2025 tester revenue of CNY xx.xx. The filing's broader analog and digital portfolio requires a scope adjustment rather than inclusion of all tester revenue. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
8. YC Corporation - Business Report for the Year Ended December 31, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: The sales table reports KRW xx.xx for the 2023 memory-wafer-tester, semiconductor-equipment, parts, modification and related category. Complete-equipment attribution requires a deduction. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The comparable 2024 category revenue is KRW xx.xx, not an independently isolated complete-tester total. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The comparable 2025 category revenue is KRW xx.xx. Parts, modifications and other equipment remain a material scope uncertainty. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: YC reports KRW xx.xx in a broad memory-wafer-tester, parts, modification and related revenue category, constraining the inherited equipment budget.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own business description establishes DRAM equipment activity; the assumed xx.xx% allocation is not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NAND equipment participation establishes the nonvolatile commercial mapping; the assumed xx.xx% allocation is not an observed split.
9. Chroma ESG - About Chroma: 2025 Group Financial and Operating Profile
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Chroma's own disclosure states 2025 group consolidated revenue of USD xx.xx. This broad corporate amount constrains, but does not directly measure, its eligible complete-SoC-tester revenue. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/brand-en))
10. Chroma ESG - Green Revenue and Financial Performance, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Chroma reports 2025 consolidated revenue growth of xx.xx%. The model uses this company growth rate to backcast its small 2024 scoped revenue budget at a constant conversion basis, not as an observed 2024 tester subtotal. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosure distinguishes broad measurement products and SLT demand, reinforcing the need to exclude unrelated corporate revenue from the SoC/memory tester estimate. ([csr.chromaate.com](https://csr.chromaate.com/en/esg-en/green-chroma-en/green-revenue-en))

11. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The official annual-average exchange-rate release supplies the currency-conversion benchmark; the model uses JPY xx.xx per USD for its large calendar-2023 Japanese revenue anchor and an explicitly rounded KRW conversion for the smaller Korean budget. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2024; small CNY and KRW budgets use disclosed approximate conversion assumptions close to the official annual averages. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model uses JPY xx.xx per USD for calendar 2025. CNY xx.xx and KRW xx.xx per USD are rounded modeling conventions, not the release's exact observations. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXJPUS/))

12. SEMI - 2018 Global Semiconductor Equipment Sales Jump to Record USD 64.5 Billion

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's member-billings release reports xx.xx% growth in total test equipment sales in 2018. Its inverse supplies the 2017 historical proxy; it is not a direct observation of the narrower captured market. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports approximately USD xx.xx of total semiconductor-equipment sales in 2018, used only with the 2019 equipment total as a disclosed broad-cycle proxy. ([www1.semi.org](https://www1.semi.org/en/2018-global-semiconductor-equipment-sales-jump-record-xx.xx-billion))

13. SEMI - 2020 Global Semiconductor Equipment Sales Surge 19% to Industry Record USD 71.2 Billion

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The release reports 2019 total equipment billings of USD xx.xx. Relative to the published approximate 2018 total, this supplies a broad-equipment downturn proxy, not an observed SoC/memory tester growth rate. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reported 2020 total-test-equipment growth of xx.xx% supplies the inverse bridge into 2019. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The association's member-submitted billings dataset reports xx.xx% total-test-equipment growth in 2020, used as a historical demand-cycle proxy. ([semi.org](https://www.semi.org/en/news-media-press/semi-press-releases/annual-global-semiconductor-equipment-sales))

14. SEMI - 2021 Global Semiconductor Equipment Sales Surge 44% to Industry Record USD 102.6 Billion

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reported total-test-equipment sales growth of xx.xx% in 2021 supports the inverse bridge from the 2021 estimate to 2020. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The xx.xx% test-equipment increase is a member-billings observation for a broader equipment class, not the final market value returned here. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/2021-global-semiconductor-equipment-sales-surge-xx.xx%xx.xx-to-industry-record-%xx.xx-billion-semi-reports))

15. SEMI - Global Semiconductor Equipment Billings Reach Industry Record USD 107.6 Billion in 2022

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: The release reports a xx.xx% contraction in total-test-equipment billings in 2022, supporting the inverse historical bridge into 2021. ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-reach-industry-record-%xx.xx-billion-in-2022-semi-reports))

16. SEMI - Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: The xx.xx% broader test-equipment decline supplies a historical-cycle constraint and one small-supplier backcast assumption, not the target-market level.
    ([semi.org](https://www.semi.org/en/news-media-press-releases/semi-press-releases/global-semiconductor-equipment-billings-slip-to-%xx.xx-billion-in-2023-semi-reports))
17. SEMI - Global Semiconductor Equipment Billings Surged to USD 117 Billion in 2024
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Realized total-test-equipment billings increased xx.xx% in 2024. This independently checks the direction and approximate magnitude of the modeled target-market recovery without substituting the broader category for this market.
    ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-billings-surged-to-xx.xx-billion-dollars-in-2024-semi-reports))
18. SEMI - Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The association reports realized total-test-equipment billings growth of xx.xx% in 2025. The modeled target-market increase of approximately xx.xx% is directionally consistent; differing product boundaries prevent an exact reconciliation.
    ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. Advantest - Annual Securities Report and Business Report for the Year Ended March 31, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Note xx.xx identifies customer operating leases of semiconductor test systems and JPY xx.xx of future payments receivable at March xx.xx 2025. This establishes a small supplier-specific leasing activity, not annual global leasing revenue. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Future customer lease payments receivable were JPY xx.xx at March xx.xx 2026; disclosed terms were one to three years and noncancelable. These figures qualify any assumption that OEM leasing is necessarily large or offers flexible exit. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named NVIDIA-group customer receipts constrain direct fabless purchasing; fiscal/calendar and eligible-equipment attribution remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named TSMC customer receipts anchor the foundry purchasing model; other suppliers and foundries require explicit coverage assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment-revenue policy recognizes product revenue when control transfers on contractual delivery or acceptance, supporting the purchase classification rather than service-revenue attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Note xx.xx discloses customer operating leases, one-to-three-year noncancelable terms, and remaining payments of JPY xx.xx and JPY xx.xx at March xx.xx 2025 and March xx.xx 2026. These constrain contractual and adoption assumptions, not annual global leasing revenue or the final forecast share. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wholly owned regional test-system sales subsidiaries establish consolidated manufacturer selling, while customer operating leases establish an OEM leasing route; both support the contractual-role allocation premise. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Future customer lease payments of JPY xx.xx at March xx.xx 2025 and JPY xx.xx at March xx.xx 2026 are supplier-specific receivables, not annual global merchant lease revenue; they limit rather than verify the leasing assumptions. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/report/IR_SecuritiesandBusinesReport_84th_en.pdf))

20. Amkor Technology, Inc. - Form 10-K for the Year Ended December 31, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Amkor reports 2025 capital expenditures of USD xx.xx versus USD xx.xx in 2024, covering packaging, testing and facilities. The amount is a buyer-spending constraint, not tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The filing's USD xx.xx-xx.xx 2026 capital-expenditure expectation is primarily increased by Arizona construction. It cannot be treated as an equivalent tester award or annual tester-market increment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: Standardized tester investment, customer-consigned equipment and equipment-redeployment risks qualify the conversion from announced capacity projects to incremental tester purchases. No project investment is added directly to the 2028 forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The buyer's broad spending and commitment disclosures support retaining procurement-conversion and reuse uncertainty rather than equating project completion with tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The test-equipment accounting-life extension from five to seven years constrains the annualized production denominator against which engineering purchasing is compared. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven-year test-equipment accounting life anchors the selected purchasing-frequency proxy; broad capital expenditure is not treated as tester-only spending. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standardized platforms and customer-consigned testers qualify ownership and reuse attribution; these conditions do not establish accepted joint-purpose deployment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buyer reports approximately xx.xx% Computing sales and standardized tester investment, providing a representativeness and reuse check, not equipment-market weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Communications sales and customer-consigned equipment demonstrate why operator revenue and ownership cannot directly determine tester purchasing shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/amkr-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% Consumer sales provide a buyer-specific countercheck; shared-platform practices do not quantify

21. Teradyne - Magnum 2 Memory Test Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Magnum xx.xx lists SRAM applications, establishing a commercial category mapping without supplying a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM, SRAM, NOR and NAND capability overlaps support mutually exclusive configuration attribution rather than adding advertised capabilities as sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Low-end SoC and memory applications identify a candidate combined-capability pool; actual joint customer mandates and numerical fractions remain unmeasured.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies an engineering configuration, supporting purpose classification and the direction of the modeled realization difference, not its exact numerical price ratio. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies production configurations, supporting production-purpose attribution rather than classification from family-wide capability alone. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engineering programs can transfer to production versions; this supports conditional continuity but does not measure joint-purpose purchases or the forecast adoption multiplier. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
22. Advantest - T5835 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: T5835 is commercially positioned for both DRAM and NAND, supporting the cross-family classification premise but not the modeled co-primary revenue fraction.

23. Advantest - T5503HS2 Memory Test System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DRAM/HBM product positioning establishes category mapping; the documented installed-T5503 upgrade path supports retaining upgrade-substitution uncertainty rather than assuming universal replacement.
24. Advantest will Showcase Latest Memory Test Solutions at Future of Memory and Storage 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2024 announcement identifies T5835 among promoted memory offerings, establishing pre-base-year commercial positioning without proving customer acceptance or sales mix.
25. Advantest - V93000 SoC Test Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advantest classifies V93000 as a SoC Test System, supporting the commercial mapping of its reported SoC equipment pool without establishing a sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: V93000 documentation identifies reusable programs and interface hardware across generations and supplier-developed SmarTest software. These support the retained-investment condition, not a measured switching rate or forecast share. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
26. Emerson Electric Co. - Form 10-K for the Year Ended September 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported Test & Measurement sales of USD xx.xx in FY2025 and USD xx.xx in FY2024 constrain the broad NI revenue proxy, not complete SoC/memory tester revenue. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))
27. Emerson Electric Co. - Form 10-Q for the Quarter Ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: December-quarter Test & Measurement sales of USD xx.xx versus USD xx.xx supply the approximate calendar bridge. Prior-period segment presentation was reclassified, limiting level comparability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/emr-xx.xx.htm))
28. National Instruments Corporation - 2022 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor and Electronics represented approximately xx.xx% of NI's 2022 revenue, with approximately half from production test and half from R&D test. These historical mix observations calibrate, but do not verify, the 2025 scoped equipment budget. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ny20006399x3_ars.pdf))

29. Advantest - FY2025 Financial Briefing, April 27, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automotive/industrial/consumer/DDIC represented approximately xx.xx% and xx.xx% of fiscal SoC sales in FY2024 and FY2025, rounded to five-percentage-point increments. These application proportions constrain the mainstream equipment attribution. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal SoC sales increased from JPY xx.xx to JPY xx.xx, while computing/communications represented approximately xx.xx% of FY2025 SoC sales. This supports differentiated application-growth assumptions, not a directly observed proprietary share or future allocation. ([advantest.com](https://www.advantest.com/document/en/investors/ir-library/result/JE_BIZ_260427_slide.pdf))

30. Advantest - Annual Report 2005

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies T2000's OPENSTAR basis and publicly available specifications developed through the Semiconductor Test Consortium. This supports historical standards classification only; its historical market-share statements are not used. ([www3.advantest.com](https://www3.advantest.com/documents/xx.xx/xx.xx/pdf_investor_AR2005_en.pdf))

31. Advantest - What Is ATE (Automated Test Equipment)? Roles, Systems & Future Outlook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current company positioning identifies T2000 as open architecture and associates it with microcontroller and automotive applications, supporting continuity of the classification premise without measuring sales. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes V93000's supplier-specific architecture from T2000's open-architecture positioning, supporting platform-level rather than supplier-wide classification. ([advantest.com](https://www.advantest.com/en/semiconductor-basics/automated-test-equipment/))

32. NI - What Is the Semiconductor Test System (STS)?

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: STS is an integrated PXI-based ATE offering with broad RF, mixed-signal and MEMS positioning. This establishes the architecture and turnkey commercial model while requiring deductions for applications outside the captured SoC/memory boundary. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))

33. Marvin Test Solutions - PXIe Semiconductor Test System, TS-960e Series

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: TS-960e is marketed as a complete integrated PXI Express semiconductor system for SoC applications, including proprietary application elements. It establishes commercial category participation, not the modeled smaller-system shipment count or price. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))

34. Emerson Electric Co. - Form 10-Q for the Quarter Ended June 30, 2026

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine-month Test & Measurement revenue of USD xx.xx versus USD xx.xx provides the broad growth calibration for the assumed 2026 eligible-equipment increase. Semiconductor and aerospace/defense both contributed, so the disclosure does not isolate open-standard SoC/memory sales. ([ir.emerson.com](https://ir.emerson.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/emr-xx.xx.htm))

35. PXI Systems Alliance - What Is PXI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association defines PXI as an open modular standard with a multi-vendor ecosystem and distinguishes its building blocks from completed application systems. This supports the governing-architecture boundary, not sales weights. ([pxisa.org](https://pxisa.org/what-is-pxi/))

36. Test Services - UTAC Group

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx+ test engineers alongside 2,000+ testers, anchoring the engineering-station proxy used in the base model and carried into the forecast; it does not disclose purpose sales shares. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2,000+ tester fleet provides an operator-stock benchmark that is converted to annual value only through the disclosed purchasing-frequency assumptions. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises engineering services and production testing within the same business, supporting commercial coexistence but not the assumed accepted joint-purpose percentage or future adoption. ([utacgroup.com](https://utacgroup.com/test-services/))

37. Efforts to Provide Value Through Business - Advantest

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: States typical customer equipment use of xx.xx-xx.xx years, providing a longer-use sensitivity for the stock-to-purchasing-value bridge rather than a measured engineering share. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-xx.xx-year use period constrains replacement assumptions and is distinguished from the buyer accounting-life proxy used in the working model. ([advantest.com](https://www.advantest.com/en/about/sustainability/society/responding-product-liability/))

38. A New Approach for IC Test - Leveraging the Strength of the PXI Platform - NI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes scalable characterization and production configurations and the commercial constraints of traditional laboratory ATE, supporting a distinct engineering purchasing model. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Shared hardware and software support a continuity scenario, but the record provides neither accepted joint-deployment revenue nor future penetration; both remain explicit assumptions. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system/a-new-approach-for-ic-test---leveraging-the-strength-of-the-pxi-.html))

39. Teradyne - 2025 Annual Report to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Compute application weight anchors the scoped Computing allocation. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx Mobility weight and networking exposure support the modeled Communications bridge. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published application buckets constrain the budget, but the consumer carve-out is an explicit attribution assumption. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Auto-Industrial revenue supplies the pre-exclusion pool, not an observed Automotive subtotal. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared Auto-Industrial pool constrains Industrial Electronics after scope and end-use adjustments. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application budget constrains the modeled specialized tail; separate Product Test defense revenue is excluded. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
40. TSMC - 2025 Form 20-F
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 HPC revenue of NT$xx.xx anchors the adjusted logic-demand proxy; networking is separated by assumption. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Smartphone revenue of NT$xx.xx and networking within HPC constrain Communications, with an explicit equipment-intensity bridge. ([investor.tsmc.com](https://investor.tsmc.com/sites/ir/sec-filings/2025_20F%20Report.pdf))
41. Micron Technology - Form 10-K for the Year Ended August 28, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud, data-center and client business revenues constrain Computing's memory-equipment proxy, not equipment receipts directly. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mobile/client and data-center revenues provide the economic pool for modeled mobile and networking attribution. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx Automotive and Embedded revenue constrains the modeled consumer-memory tail. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business supplies a bounded activity proxy requiring scope, realization and end-use adjustments. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded business constrains Industrial Electronics memory activity; its equipment conversion is assumed. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The embedded pool bounds the specialized-memory tail; no separate defense revenue is reported. ([s25.q4cdn.com](https://s25.q4cdn.com/xx.xx/files/doc_financials/2025/ar/2025-Form-xx.xx-K.pdf))

42. Semiconductor Industry Association - 2025 Factbook

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 PC/Computer semiconductor demand of xx.xx% enters only the scope-adjusted secondary-supplier proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 Communications demand of xx.xx% is adjusted for eligible equipment scope before use. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumer semiconductor demand of xx.xx% anchors the adjusted minor-application weights. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automotive demand of xx.xx% is reduced for non-SoC exposure in the commercial proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial demand of xx.xx% anchors a scope-adjusted weight, not a tester-equipment share. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government demand of xx.xx%, including military, constrains the specialized end-use proxy. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/2025-SIA-Factbook-FINAL-xx.xx.pdf))

43. WSTS - Semiconductor Market Insights, October 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The detailed Consumer definition includes entertainment products, household white goods and personal wearables, supporting consistent end-use attribution. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial includes professional test, control and measuring equipment, distinguishing it from household consumer equipment. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government is defined as military and aerospace in the detailed end-use illustration, supporting the retained category mapping. ([semiconductors.org](https://www.semiconductors.org/wp-content/uploads/2025/xx.xx/WSTS-Presentation-Subscription-Oct2024.pdf))

44. NXP Semiconductors - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Automotive revenue of USD xx.xx, down xx.xx%, qualifies assumptions of immediate equipment-demand acceleration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial & IoT revenue of USD xx.xx increased xx.xx%, constraining the near-term recovery assumption rather than measuring tester sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/nxpi-xx.xx.htm))

45. NXP Semiconductors - Product Longevity
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Participating products have minimum xx.xx- or xx.xx-year longevity periods; these do not establish tester replacement or support periods.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed longevity condition supports retaining lifecycle uncertainty rather than inferring automatic recurring equipment purchases.
    ([nxp.com](https://www.nxp.com/products/nxp-product-information/nxp-product-programs/product-longevity%3APRDCT_LONGEVITY_HM))
46. DLA ASSIST-QuickSearch - MIL-PRF-38535 Document Details
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official record concerns covered microcircuits and manufacturer qualification, not tester-brand approval or equipment awards; no qualification-derived revenue premium is assumed.
    ([quicksearch.dla.mil](https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=xx.xx))
47. ASE Technology Holding - Fourth Quarter and Full Year 2025 Financial Results, Form 6-K, February 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASE reports USD xx.xx of 2025 testing-equipment capital expenditure, a monetary purchasing anchor before complete-tester scope deductions.
48. ChipMOS - FY2025 and Fourth Quarter 2025 Investor Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports TWD xx.xx of 2025 capital expenditure and a xx.xx% testing allocation; currency and complete-tester attribution are modeled bridges.
49. Alchip - Advanced Testing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alchip identifies an owned V93K hosted at a test house. This supports category and ownership attribution, not annual purchase quantities, prices or the forecast.
50. University of Utah Nanofab - Verigy Tester
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university lists a V93000 SoC platform and access arrangement. This establishes an institutional equipment category, not a 2025 purchase or future procurement.

51. TEAM A.T.E. - Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company describes pre-owned purchases and sales across SoC and memory ATE, supporting inclusion of eligible secondary-market purchases. Its undated offering page supplies category evidence, not 2025 transaction value. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: System rentals, rent-to-own arrangements and leases establish a third-party equipment-access route. The stated field-service limitation qualifies universal availability; neither the offering nor its category list supplies numerical leasing weights. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company distinguishes its representation activities from inventory-based equipment transactions, supporting role-specific classification rather than assigning every represented OEM transaction to resale. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchasing surplus equipment for inventory, SoC/memory equipment offerings and rental/lease arrangements establish merchant commercial routes. The absence of a worldwide field-service organization qualifies support assumptions but supplies no revenue weight. ([team-ate.com](https://www.team-ate.com/services))

52. Advantest Pre-Owned Solutions - Business

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM's pre-owned business includes equipment resale, license switching, installation and maintenance support. This supports the purchase boundary beyond new equipment, without establishing resale revenue or a future share. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: OEM-managed pre-owned transactions include license switching, installation and maintenance, supporting direct classification when the consolidated manufacturer is the seller regardless of equipment age. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM-managed resale alternative qualifies an assumption that all pre-owned equipment passes through independent resellers and provides a commercial counterforce to merchant growth, without measuring its magnitude. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))

53. IFRS Foundation - IFRIC Update March 2023: Definition of a Lease-Substitution Rights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The identified-asset, control and substantive-substitution criteria support distinguishing equipment leasing from outsourced testing services. This is a classification premise for both anchors, not evidence of market prevalence. ([ifrs.org](https://www.ifrs.org/news-and-events/updates/ifric/2023/ifric-update-march-2023/))

54. Spirox Corporation - 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidated revenue decreased from NTD xx.xx in 2024 to NTD xx.xx in 2025, providing a mixed-product intermediary countercheck to uniform channel growth rather than a global allocation weight. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Semiconductor-equipment revenue was NTD xx.xx in 2025, separately from service and maintenance. Agency/distribution, own products and adjacent equipment prevent attributing the full amount to merchant SoC/memory tester sales. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2025/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))

55. KYEC (2449) - Q4 2025 Investor Update

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KYEC reports 2025 wafer-probe revenue at xx.xx%; this is a buyer-activity input requiring the disclosed equipment-value and coverage corrections, not a directly observed tester share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported final-test revenue of xx.xx% supplies the conventional package-test proxy before the assumed exclusion of adjacent activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's xx.xx% data-processing application mix anchors the modeled addressable advanced-SoC purchasing cohort; it does not measure bare-die equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same application-mix input constrains the intermediate-assembly cohort; reported capital expenditure is a broad spending cross-check, not insertion-specific equipment revenue.

56. Advantest to Showcase Latest Test Solutions at SEMICON Southeast Asia 2025, May 20-22
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 announcement identifies a die-level handler linked with a tester for singulated dies, establishing a base-year commercial offering but not its delivered equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same dated offering includes partially assembled dies. Only attributable tester receipts, not the handler value, enter the allocation model.
57. Teradyne - Second-Quarter 2025 Earnings Call Prepared Remarks, July 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July xx.xx 2025 prepared remarks report an HBM4 post-stack win and state that the new insertion was not pervasive, qualifying the assumed intermediate-assembly uptake.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The remarks distinguish new system purchases from upgrades of existing capacity. This supports retaining reuse and incremental-receipt adjustments rather than equating every new deployment opportunity with a full new tester.
58. Teradyne Introduces Integrated Test Solution for AI and Data Center Devices in Collaboration with Tokyo Electron
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2026 coordinated singulated-device offering supports commercial availability relevant to the forecast; it does not establish 2025 sales or the modeled 2032 penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering references multiple advanced-packaging points, but this is not evidence that an individual delivery has accepted multi-insertion coverage.
59. Amkor Technology - IC Semiconductor Test Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's service description separates wafer probe, testing between assembly steps and final testing, supporting the insertion mapping rather than a sales weight or complete-tester purchase requirement.

18. Competitive Landscape

18.1. Market Share Analysis, 2025

[redacted] This creates a specific incumbent-versus-challenger choice: compare a documented retention route with a written migration commitment, including the assets and customer approvals each preserves. Neither supplier's catalog establishes universal portability.

Portfolio overlap creates bargaining leverage only when the alternatives address the same purchasing mandate. Teradyne, Inc.'s Magnum xx.xx spans several memory families and low-end SoC applications, while its engineering and production configurations differ. [redacted]

Acquisition routes can contest an equipment purchase without changing the underlying platform. [redacted] Flexibility in ownership may broaden access while increasing coordination among the owner, seller, rightsholder, and service provider.

Figure 30. Global SoC & Memory Semiconductor Tester Market Share, by Key Player, 2025

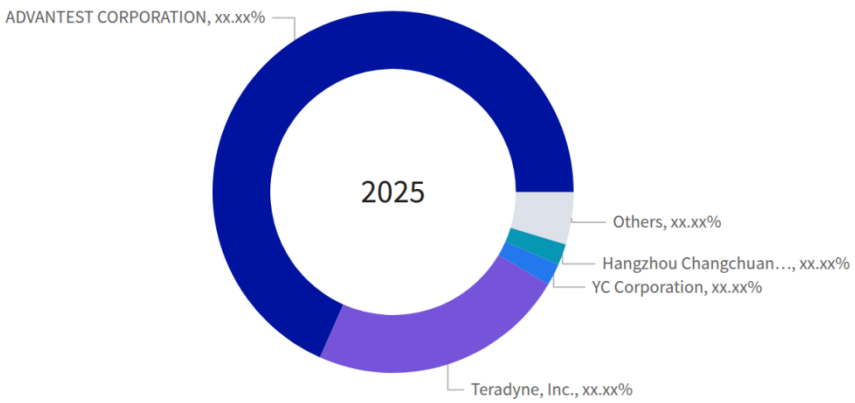

Table 410. Global SoC & Memory Semiconductor Tester Market Share, by Key Player, 2025

Key Player	Share (%)
ADVANTEST CORPORATION	xx.xx
Aemulus Corporation Sdn Bhd	xx.xx
Chroma ATE Inc.	xx.xx
Cohu, Inc.	xx.xx
Exicon Co., Ltd.	xx.xx
Hangzhou Changchuan Technology Co., Ltd.	xx.xx
Hprobe	xx.xx
INNOTECH	xx.xx
SEICHITECH	xx.xx
SPEA	xx.xx
Teradyne, Inc.	xx.xx
UniTest Co., Ltd.	xx.xx
YC Corporation	xx.xx
Others	xx.xx

Sources & Evidence

1. Magnum 2 | Memory Test Solution from Teradyne
   - Magnum xx.xx lists several memory families and low-end SoC applications and distinguishes engineering and production configurations. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
   - Evidence informing base-year company-share estimates: Magnum xx.xx supports memory/logic participation and differentiated engineering and production configurations; product breadth does not establish accepted-configuration sales weights.
2. V93000 | SoC Test Systems | ADVANTEST CORPORATION
   - Advantest describes V93000 compatibility across generations, supporting the conditional incumbent-retention comparison. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
   - Evidence informing base-year company-share estimates: V93000 establishes the SoC platform and compatibility premise relevant to the attribution and Knowledge challenge; it does not quantify retained-customer revenue.
3. Business | Advantest Pre-Owned Solutions | ADVANTEST CORPORATION
   - Advantest presents its own pre-owned equipment business, supporting comparison with intermediary acquisition routes without establishing equipment-specific availability. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
   - Evidence informing base-year company-share estimates: The OEM-managed pre-owned offering supports the existence of refurbishment, rights-transfer and continuing-support routes, not a separate measured revenue increment.
4. TEAM A.T.E. | Services
   - TEAM A.T.E. describes rental, leasing, and secondary-equipment services and states that it does not maintain a worldwide field-service organization. ([team-ate.com](https://www.team-ate.com/services))

5. Chroma 3680 Advanced SoC Test System

· Chroma advertises xx.xx program and pattern converters and acceptance of other testers' interface boards and probe cards; these are advertised migration features, not universal portability. ([chromaate.com](https://www.chromaate.com/en/product/advanced_soc_analog_test_system_3680_36))

· Evidence informing base-year company-share estimates: The xx.xx offering establishes conventional SoC tester participation and an advertised migration proposition, but supplies no observed revenue fraction or customer-migration rate.

6. UniTest - Notice of the 26th Annual General Meeting of Shareholders, March 12, 2026

· Evidence informing base-year company-share estimates: The company meeting notice presents calendar-2025 consolidated revenue of KRW xx.xx providing the annual financial anchor; it is not an eligible tester-revenue subtotal.

7. UniTest - Quarterly Report for the Period Ended March 31, 2025

· Evidence informing base-year company-share estimates: The filing separately reports the broad component/high-speed-burn-in/SSD/convergence equipment category for 2024 and 2025 Q1, distinguishes module and solar activity, and states that product receipts can include revision parts.

8. INNOTECH CORPORATION - Consolidated Financial Statements for the Fiscal Year Ended March 31, 2026

· Evidence informing base-year company-share estimates: The statement separates external Testers and STAr revenue for both March-ending fiscal periods, supplying narrower quantitative anchors than total corporate revenue.

9. テスター/プローブカード｜イノテック株式会社

· Evidence informing base-year company-share estimates: The official portfolio principally positions RETSET for NAND production and separately identifies image-sensor and other equipment, supporting a narrower eligibility bridge rather than whole-line attribution.

10. Group Companies｜INNOTECH CORPORATION

· Evidence informing base-year company-share estimates: The group disclosure identifies STAr within INNOTECH and emphasizes reliability systems and probe cards, supporting consolidated counting once and substantial exclusions from the eligible equipment numerator.

11. STAr Technologies - Automated Test Equipment

· Evidence informing base-year company-share estimates: STAr separately advertises integrated mixed-signal ATE alongside power, parametric and modular instrumentation offerings. This supports category differentiation, not the assumed eligible revenue fraction.

12. Advantest - Q3 FY2025 Financial Briefing, January 28, 2026

· Evidence informing base-year company-share estimates: Quarterly SoC and memory product revenues reproduce calendar-2025 totals of JPY xx.xx and JPY xx.xx; eligibility deductions remain modeled.

13. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026

· Evidence informing base-year company-share estimates: Official annual foreign-exchange statistics support the calendar-year currency-conversion framework used for the Japanese supplier numerator.

· Evidence informing base-year company-share estimates: Reports a 2025 average of USD xx.xx per euro; the model explicitly rounds this to USD xx.xx per euro.

· Evidence informing base-year company-share estimates: Reports a 2025 average of CNY xx.xx per USD; the model uses an explicitly rounded CNY xx.xx conversion.

14. Teradyne, Inc. - Form 10-K for the Year Ended December 31, 2025

· Evidence informing base-year company-share estimates: The filing reports 2025 point-in-time SoC and memory revenue of USD xx.xx and USD xx.xx and identifies replacement parts within point-in-time recognition.

15. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025

· Evidence informing base-year company-share estimates: Systems-Semiconductor Test & Inspection revenue was USD xx.xx in fiscal 2025, providing the financial ceiling for the scoped complete-SoC-tester estimate.

16. Chroma ESG - Green Revenue & Financial Performance
    - Evidence informing base-year company-share estimates: The company's disclosure reports 2025 consolidated revenue of NTD xx.xx and xx.xx% growth; it supports a broad financial ceiling, not the assumed conventional-ATE mix.
17. SPEA - About SPEA
    - Evidence informing base-year company-share estimates: SPEA reports more than xx.xx installed machines across its broad portfolio. This cumulative stock anchors, but does not directly observe, the modeled annual eligible-equipment receipts.
18. SPEA - Semiconductor Test Equipment: IC, MEMS, KGD & Wafer
    - Evidence informing base-year company-share estimates: The semiconductor portfolio distinguishes tester offerings from handling, probing, MEMS and power categories, supporting the model's eligibility deductions rather than full installed-stock attribution.
19. 杭州长川科技股份有限公司 2025 年年度报告全文
    - Evidence informing base-year company-share estimates: The report identifies 2025 tester revenue of CNY xx.xx, separates handlers and other products, and identifies D9000 SoC equipment; the xx.xx% eligible mix remains assumed.
20. Advantest - T5503HS2 Memory Test Systems
    - Evidence informing base-year company-share estimates: The T5503HS2 offering supports the existence of a memory-system upgrade route, not a measured upgrade-sales proportion.
21. Cohu - Diamond Series Test Platform
    - Evidence informing base-year company-share estimates: Diamond Series identifies SoC and MCU applications alongside display-driver applications, supporting the need for a device-scope adjustment.
22. Exicon Co., Ltd. - 2026 Company Presentation
    - Evidence informing base-year company-share estimates: Reports 2025 sales of KRW xx.xx and distinguishes component-memory, module, storage and burn-in offerings; supports the revenue ceiling and scope filters, not the assumed sales mix.
23. YC Corporation - Business Report for the Year Ended December 31, 2025
    - Evidence informing base-year company-share estimates: Reports KRW xx.xx of 2025 memory-wafer-tester and related equipment, parts, modification and service-category revenue; supports the modeled equipment conversion.
24. Mycronic - Global Technologies makes acquisition in France
    - Evidence informing base-year company-share estimates: Establishes EUR xx.xx of 2024 Hprobe sales, xx.xx employees and acquisition on March xx.xx 2025; provides the prior-period commercial scale anchor.
25. Hprobe - MRAM Test
    - Evidence informing base-year company-share estimates: Separates functional IBEX-WS applications from parametric IBEX-WAT applications, supporting the scope distinction but not a revenue allocation.
26. SEICHITECH - Investors: commercial operating disclosures
    - Evidence informing base-year company-share estimates: The January xx.xx 2026 investor response reports CNY xx.xx semiconductor-test revenue for the first nine months of 2025; supports annualization rather than an observed full-year subtotal.
27. SEICHITECH - Repair During Burn-In Tester
    - Evidence informing base-year company-share estimates: Identifies a memory test-and-burn-in equipment offering within a portfolio that separately includes probe cards and display equipment; supports differentiated equipment-scope treatment.
28. Aemulus Holdings Berhad - Annual Report 2025, Part 2
    - Evidence informing base-year company-share estimates: Provides fiscal-2025 company revenue by mobile/tablet, CIS, automotive/industrial, data-centre/AI and medical applications; supplies the application-weighted commercial anchors.

29. Aemulus Holdings Berhad - Annual Report 2025, Part 3
    - Evidence informing base-year company-share estimates: Reports MYR xx.xx outright sales within MYR xx.xx revenue and identifies ACSB and its operating subsidiary relationship; supports the service deduction and operating-subgroup attribution.
30. Aemulus Corporation Sdn Bhd - AMB5600
    - Evidence informing base-year company-share estimates: Identifies AMB5600 SoC, MCU, IoT and connectivity applications; establishes relevant offering scope without measuring the assumed eligible application fractions.

18.2. Market Concentration Analysis, 2025

Commercial control resides partly in the usable platform relationship rather than the equipment chassis alone. ADVANTEST CORPORATION supplies V93000 with SmarTEST software, while NI and Marvin provide integrated open-standard systems with their own software and interfaces. [redacted]

Own-brand and represented equipment create different bargaining relationships. Spirox Corporation markets SP2500 separately from NI-developed STS. [redacted]

Averna advertises semiconductor integration and SoC verification, while ATS Technology Services, Inc. describes integrating OEM equipment into turnkey test cells. An integrator can supply a commercially important acceptance and deployment relationship without owning the underlying tester platform. [redacted]

Ownership and naming relationships also limit the independence of apparent alternatives. [redacted] The precise record-level relationships remain to be reconciled before assessing independent counterparties; neither pair should be used to imply additional bargaining alternatives merely because the names differ.

[redacted] That changes the ownership of an instrument business; it does not establish a new independent complete

SoC or memory tester. Buyers and partners should identify the business retaining each product, entitlement, and support obligation rather than attribute the same instrument activity separately to both participants.

■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■ ■■■■ ■■■■ ■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ These records establish commercial relationships at different dates, not a current independent IT&T product catalog or a transferable licensing mandate. A purchaser should identify the operating seller and applicable rights before treating the parent, venture, and historical partner as interchangeable sources.

Sources & Evidence

1. V93000 | SoC Test Systems | ADVANTEST CORPORATION
   · The V93000 page identifies SmarTEST software and a flexible licensing structure, supporting the distinction between equipment and platform obligations. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
2. What Is the Semiconductor Test System (STS)? - NI
   · STS combines modular PXI hardware with STS software and standardized integration, supporting the distinction between architecture and completed-system accountability. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))
3. PXIe Semiconductor Test System | Marvin Test Solutions, Inc.
   · The integrated offering supports distinguishing open-standard hardware architecture from vendor-specific software and interface obligations. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))
4. Spirox Corporation - 2024 Annual Report
   · Spirox's 2024 annual report describes a scope-limited NI agency, service, and maintenance relationship with conditional renewal; it does not establish subsequent renewal. ([file.spirox.com.tw](https://file.spirox.com.tw/Annual%20Reports/2024/xx.xx%E5%B9%B4%E5%BA%A6%E5%B9%B4%E5%A0%B1%xx.xx%E8%8B%B1%E6%xx.xx%xx.xx%xx.xx.pdf))
5. SoC Test System-Spirox Corporation
   · The SP2500 page establishes Spirox's own-brand system proposition separately from its NI-developed STS listing. ([spirox.com.tw](https://www.spirox.com.tw/products-detail/SoC-Test-System/))
6. Semiconductor Test System-Spirox Corporation
   · Spirox separately catalogs STS as NI-developed equipment, supporting differentiation from SP2500 ownership and obligations. ([spirox.com.tw](https://www.spirox.com.tw/products-detail/Semiconductor-Test-System/))
7. 集成电路测试机-SoC 测试机-胜达克半导体/SANDTEK-东方中科
   · Dongfang Zhongke maintains a seller-side SandTek SoC-equipment catalog; this does not independently establish the OEM appointment applicable to an order. ([dfzk.com](https://www.dfzk.com/sandtek/))
8. About ATS | ATS Malaysia
   · ATS describes integrating OEM semiconductor-test equipment into turnkey test cells, establishing an integration role rather than independent platform ownership. ([ats-global.co](https://ats-global.co/company/))
9. Automated Semiconductor Test & Measurement Solutions | Averna
   · Averna advertises semiconductor integration and IC, ASIC, and SoC verification, supporting the distinction between integration and underlying OEM obligations. ([averna.com](https://www.averna.com/en/industries/semiconductors))

10. Company Profile - ELES
    - ELES's official profile uses ELES Spa and describes the semiconductor-reliability business connected to the ELES portfolio; the names do not establish separate operating alternatives. ([eles.com](https://www.eles.com/company-profile.html))
11. About RI | Roos Instruments
    - Roos's official history identifies Roos Instruments, Inc. within the Roos-branded business, supporting the naming-pair comparison without establishing a second independent supplier. ([roos.com](https://roos.com/company.html))
12. 武汉精测电子集团股份有限公司向特定对象发行 A 股股票募集说明书（申报稿）
    - Wuhan Jingce's November 2020 filing identifies IT&T Co., LTD and the Wuhan Jinghong memory-equipment venture established in 2018; this is historical relationship evidence. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2020-xx.xx-xx.xx/xx.xx.PDF))
13. 武汉精测电子集团股份有限公司关于子公司增资扩股暨关联交易的公告
    - The August 2026 disclosure identifies Wuhan Jinghong as a controlled subsidiary and describes a proposed capital expansion, not a completed independent licensing transfer. ([disc.static.szse.cn](https://disc.static.szse.cn/download/disc/disk03/finalpage/2026-xx.xx-xx.xx/b35680c5-e3fe-xx.xx-84e5-d09509688b6e.PDF))
14. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
    - Teradyne confirms control and consolidation of MLTP's contributed test-and-measurement business; instrument ownership does not establish another complete-tester competitor. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

18.3. Recent Developments & Impact Analysis, 2025

Teradyne, Inc.'s quarterly filing confirms that MultiLane Test Products was formed with MultiLane on April xx.xx 2026, with Teradyne control and consolidation of the contributed test-and-measurement business. ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Customers should confirm which entity now supplies the relevant instruments, software rights, and support; retained MultiLane activities must be distinguished from the transferred business.

Mycronic completed its acquisition of Hprobe on March xx.xx 2025. This placed a specialist MRAM and magnetic-sensor equipment business within Mycronic's Global Technologies division. ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■ ■ ■■■■■ ■■■ ■■■■■■■■■

Ownership change and brand consolidation also require different interpretations. ELES's regulated announcement confirms its residual-share acquisition procedure and delisting effective April xx.xx 2026 under the Xenon-controlled EBidCo transaction. ■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■

■■■■■■■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Global Technologies makes acquisition in France
   · Mycronic's March xx.xx 2025 announcement states that Global Technologies acquired Hprobe, establishing a completed ownership change involving MRAM and magnetic-sensor equipment. ([mycronic.com](https://www.mycronic.com/news-events/our-press-releases/global-technologies-makes-acquisition-in-france/))
2. Teradyne, Inc. - Form 10-Q for the Quarterly Period Ended June 28, 2026
   · The filing confirms that Teradyne and MultiLane formed MLTP on April xx.xx 2026 and that MultiLane contributed its test-and-measurement assets. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
3. ELES - OPA Xenon: CS delisting azioni Eles, April 24, 2026
   · The regulated April xx.xx 2026 announcement confirms the ELES residual-share acquisition procedure and delisting effective that day and identifies EBidCo as indirectly Xenon-controlled. ([emarketstorage.it](https://www.emarketstorage.it/sites/default/files/comunicati/2026-xx.xx/20260424_182769.pdf))
4. Cosmic is Born: A New Global Player for Semiconductor Test Solutions - Built on Decades of Experience
   · Cosmic's March xx.xx 2026 announcement identifies the former Microtest group's new brand and separate equipment and services divisions following Xenon's investment. ([cosmic-group.com](https://cosmic-group.com/cosmic-is-born-a-new-global-player-for-semiconductor-test-solutions-built-on-decades-of-experience/))

18.4. Product Portfolio Analysis, 2025

■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■

These are credible starting points for a signal-chain-oriented shortlist, not evidence that either configuration replaces a dedicated memory tester. The purchasing comparison should preserve the intended device application and equipment obligation rather than aggregate every product in either supplier's broader test-cell portfolio.

Hangzhou Changchuan Technology Co., Ltd.'s fiscal 2025 report identifies D9000 as production SoC equipment for wafer and packaged-device applications. ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Another customer's use does not establish acceptance for a new buyer, and group-level international relationships do not settle model-specific support.

Macrotest Semiconductor Technology Co., Ltd.'s MS8000 lists microprocessor, FPGA, and several memory-device applications. SandTek Semiconductor Technology (SHANGHAI) Co., Ltd. presents ADAPTSTAR for production SoC applications including MCU and IoT devices. ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■

■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■

AEM supplies an application-specific ATE route combining system hardware, software, and support, with named configurations and SoC, SiP, and memory applications. It offers a different commercial choice from selecting an established catalog configuration: a buyer can seek a tailored equipment obligation, but must identify the deliverables, acceptance responsibility, and continuing support attached to that customization. ■■■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■ ■■■■■■■■■■ ■■■■ ■■ ■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■

■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ Exicon Co., Ltd.'s 2026 presentation distinguishes i7000 component testers from i1000 module testers. These differences determine the realistic peer group: a wafer-memory purchase should not use a module-system proposal as negotiating leverage unless the proposed equipment satisfies the same semiconductor-device requirement.

■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ Neumonda GmbH's Rhinoe proposition instead combines DRAM component and module coverage with memory-array and burn-in roles. A buyer should compare the accepted die, component, or module obligation separately; broader memory terminology does not erase those differences.

Engineering-memory purchasing has its own alternatives. ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■

Open-standard architecture can be purchased as an integrated system. Marvin Test Solutions, Inc.'s TS-960e combines PXI Express hardware, a device interface, and vendor software for SoC and SiP applications. ▪▪▪▪ ▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

Combined reliability and functional roles form a distinct equipment comparison. ELES Semiconductor Equipment S.p.▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

Lifecycle and service relationships further distinguish reliability-equipment proposals. Micro Control Company presents named high-power burn-in families alongside modernization and support services. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪ Cosmic Group's DMT EVO adds a modular mixed-signal engineering proposition for characterization and pre-production work. A production buyer should distinguish that documented role from an unconfirmed production-SoC configuration.

▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ This provides a regional memory-device alternative with a named offering, unlike a generic semiconductor-equipment description. Application suitability, legal transaction access, and destination-site support remain separate purchasing conditions; the catalog alone does not establish unrestricted cross-border availability.

Sources & Evidence

1. Magnum 2 | Memory Test Solution from Teradyne
   · The family includes memory and logic coverage but does not establish one accepted configuration for every listed application. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
2. What Is the Semiconductor Test System (STS)? - NI
   · NI describes STS as turnkey PXI-based ATE for RF, mixed-signal, and MEMS devices; the inspected description does not identify the exact SoC or memory configuration. ([ni.com](https://www.ni.com/en/shop/electronic-test-instrumentation/what-is-the-semiconductor-test-system.html))
3. PXIe Semiconductor Test System | Marvin Test Solutions, Inc.
   · Marvin advertises TS-960e as an integrated PXI Express SoC and SiP system with a device interface and vendor software. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))
4. Diamond Series Test Platform - Semiconductor ATE | Cohu
   · Cohu identifies Diamond Series SoC and microcontroller applications and separately lists Diamondx, DxV, and instrumentation. ([cohu.com](https://www.cohu.com/diamond-series))
5. 杭州长川科技股份有限公司 2025 年年度报告全文
   · Changchuan's fiscal 2025 report identifies D9000 production SoC testing at wafer and packaged-device stages and separately describes STI's overseas relationships. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
6. YC Corporation - First-Quarter Report for the Period Ended March 31, 2026
   · YC's first-quarter 2026 filing identifies its DRAM and NAND wafer-test-equipment business. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
7. M5512 GDDR7 Memory Test System - Introspect Technology
   · Introspect markets M5512 for GDDR7 characterization and functional testing and advertises production screening, without establishing operator-specific acceptance. ([introspect.ca](https://introspect.ca/product/m5512-gddr7-memory-test-system/))
8. MRAM Test - Magnetoresistive random access memory - NVM
   · Hprobe distinguishes IBEX-WS functional testing and wafer sorting of SoCs with embedded MRAM from IBEX-WAT parametric wafer-acceptance equipment. ([hprobe.com](https://hprobe.com/mram-test/))
9. Universal Test Platform - ELES
   · ELES advertises SoC and memory coverage, combined reliability and functional roles, and a common environment across engineering, reliability, and production. ([eles.com](https://www.eles.com/universal-test-platform.html))
10. TESTMESH - NplusT
    · NplusT presents TESTMESH as an engineering family for established and emerging nonvolatile memories, with configurations differentiated by development stage. ([n-plus-t.com](https://www.n-plus-t.com/products/testmesh/))
11. SoC Test System-Spirox Corporation
    · Spirox advertises SP2500 for SoC applications including MCU, consumer, memory-controller, and automotive devices. ([spirox.com.tw](https://www.spirox.com.tw/products-detail/SoC-Test-System/))
12. Semiconductor Test Equipment: IC, MEMS, KGD & Wafer | SPEA
    · SPEA identifies DOT and C600MX for automotive, analog mixed-signal, and SoC applications and separately presents other equipment categories. ([spea.com](https://www.spea.com/en/semiconductor-test/))
13. STS8600 - AccoTEST
    · AccoTEST markets STS8600 as a SoC system for data-center, automotive, and IoT applications. ([accotest.com](https://www.accotest.com/sts8600/))
14. Corporate Information | HYC Appears at SEMICON China 2023
    · HYC's September 2023 announcement identifies T7600 SoC ATE and reports MCU production deployment; this is a dated supplier claim. ([hyc.com](https://www.hyc.com/en/hyc/news-and-media/news/xx.xx.html))

15. MS8000 - 南京宏泰半导体科技股份有限公司

    · Macrotest presents MS8000 as a SoC system and lists microprocessors, FPGA, EEPROM, SRAM, and Flash applications. ([macrotest.com.cn](https://www.macrotest.com.cn/products_details/xx.xx.html))

16. SandTek Semiconductor Technology (SHANGHAI) Co., Ltd. | SEMI

    · SandTek's company-supplied SEMI profile presents ADAPTSTAR as a production SoC platform for applications including MCU and IoT. ([semi.org](https://www.semi.org/en/resources/ecs-directory/sandtek-semiconductor-technology-shanghai-co-ltd))

17. AMB5600 - Aemulus Corporation Sdn Bhd

    · Aemulus advertises AMB5600 for SoC, MCU, IoT, and connectivity applications. ([aemulus.com](https://aemulus.com/product/amb5600/))

18. ATE Solutions - AEM

    · AEM advertises application-specific ATE with hardware, software, support, named configurations, and SoC, SiP, and memory applications. ([aem.com.sg](https://aem.com.sg/solutions/ate-solutions/))

19. Memory Tester - Semiconductor - UniTest

    · UniTest's component-tester catalog identifies UNI5900 for packaged memory devices and separates component, module, and burn-in categories. ([uni-test.com](https://www.uni-test.com/en/semiconductor/semiconductor_list.php?part1_idx=xx.xx&part2_idx=xx.xx))

20. Exicon Co., Ltd. - 2026 Company Presentation

    · Exicon's exchange-hosted 2026 presentation distinguishes i7000 memory-component testers from i1000 memory-module testers. ([kind.krx.co.kr](https://kind.krx.co.kr/external/dst/irReference/xx.xx/%ED%9A%8C%EC%xx.xx%AC%EC%xx.xx%8C%EA%B0%9C%EC%xx.xx%9C_%EC%xx.xx%xx.xx%EC%8B%9C%EC%BD%98_2026_IR.pdf))

21. テスター/プローブカード｜イノテック株式会社

    · INNOTECH describes its internally developed RETSET wafer and engineering tester series principally for NAND-flash production applications. ([innotech.co.jp](https://www.innotech.co.jp/products/tester/))

22. MS-100D DIE Tester

    · CST's hosted MS-100D brochure describes a DRAM-die testing and sorting offering rather than only module equipment. ([simmtester.com](https://simmtester.com/page/products/MS_100D/MS-100D_DIE_Tester.pdf))

23. 前海晶云（深圳）存储技术有限公司 | 存储芯片测试解决方案

    · Qianhai Jingyun's official catalog names Die Tester-D1001 and separately presents final-test equipment within memory-chip solutions. ([gcloud.ltd](https://www.gcloud.ltd/?page_id=xx.xx))

24. Introducing the NEUMONDA Rhinoe DRAM Tester

    · Neumonda advertises Rhinoe for DRAM components and modules with memory-array and burn-in roles; customer-specific acceptance is not established. ([neumonda.com](https://www.neumonda.com/introducing-the-neumonda-rhinoe-dram-tester/))

25. NAND Engineering Tester | JKI

    · JKI advertises JTS450F as a NAND engineering tester for verification, characterization, and failure-analysis applications. ([jkic.co.kr](https://www.jkic.co.kr/downloads-xx.xx-xx.xx-xx.xx))

26. SoC-Based eMMC Tester for eMMC & SD Protocol Validation

    · Prodigy's product page identifies eMMC and SD protocol validation; SoC-based describes the tester platform rather than general SoC-device coverage. ([prodigytechno.com](https://www.prodigytechno.com/product/soc-based-emmc-tester/))

27. Test Systems | Roos Instruments

    · Roos presents Cassini modular systems as complete production-test solutions with an RF-centered foundation. ([roos.com](https://roos.com/infrastructure.html))

28. Piattaforma di Test VBTS-M | EDA Industries
    · EDA describes VBTS-M as a configurable burn-in and reliability platform for memories, microprocessors, and digital and mixed-signal devices. ([eda-industries.net](https://www.eda-industries.net/it/prodotti-e-tecnologie/vbts-m-test-platform/))
29. Aehr Test Systems - Form 10-K for the Fiscal Year Ended May 29, 2026
    · Aehr's fiscal 2026 filing identifies FOX wafer-level test-and-burn-in systems and Sonoma, Tahoe, and Echo package-level products; FOX-CP includes functional testing during reliability screening. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/aehr_10k.htm))
30. SEMICON Korea 2026 - DI CORPORATION
    · DI's company-supplied 2026 exhibition profile describes memory IC test-and-burn-in equipment and wafer-level burn-in equipment. ([expo.semi.org](https://expo.semi.org/korea2026/Public/eBooth.aspx?BoothID=xx.xx&IndexInList=xx.xx&ListByBooth=true&Nav=False))
31. Why Choose Micro Control Company?
    · Micro Control Company's official portfolio lists named high-power burn-in families and modernization and support services; it does not settle an individual SoC or memory configuration. ([microcontrol.com](https://www.microcontrol.com/why-micro-control-company/))
32. Burn-in System - Trio-Tech International
    · Trio-Tech separately presents burn-in systems, related equipment, testing services, and maintenance services. ([triotech.com](https://www.triotech.com/our-products/burn-in-system/))
33. KES Systems in Dallas, Texas - a member of Sunright
    · KES identifies itself as a Sunright member and a semiconductor-industry equipment and services supplier, supporting parent-versus-operating-offer attribution. ([kessystemsinc.com](https://www.kessystemsinc.com/about-us/))
34. System on Chip Tester - SEICHITECH
    · SEICHITECH advertises a launched SoC tester and separately identifies memory ATE within its portfolio. ([seichitech.com](https://www.seichitech.com/en/products/system-on-chip-tester-en/))
35. 公司简介-态坦测试官网
    · Chengdu Taitan's official profile distinguishes memory-chip ATE, burn-in, system-level, and module-equipment categories. ([tytantest.com](https://www.tytantest.com/p/gongsijianjie.html))
36. DMT - Digital Mixed Signal Tester - Cosmic
    · Cosmic markets DMT EVO as modular mixed-signal characterization equipment addressing development, pre-production, and post-production roles. ([cosmic-group.com](https://cosmic-group.com/equipment/dmt-digital-mix-signal-tester/))
37. Тестер микросхем FORMULA HF3
    · FORMULA HF3 explicitly includes static and dynamic memory ICs and identifies FORM in Russia as developer and manufacturer. ([form.ru](https://form.ru/products/chip/FHF3/))

18.5. Benchmarking Analysis, 2025

[redacted] Their descriptions establish different equipment propositions, but the exact SoC or memory configuration remains a purchasing condition. A buyer should obtain that configuration before comparing any of them with an expressly documented specialist system.

[redacted] UNITES Systems a.s.'s 2025 company-supplied description identifies UNIMET 2020 as laboratory linear and mixed-signal equipment; a memory-system directory category does not establish the required memory configuration. These suppliers should be assessed against the actual engineering or reliability mandate, with functional-device acceptance stated separately where required.

Identity continuity and current manufacturer responsibility are distinct from product relevance. The KingTiger-branded catalog advertises KT-5DA device testing, but continuity to Kingtiger Technology (Canada) Inc. is not established by the KingTiger Testing name alone. [redacted]

[redacted] INNOVENTIONS, Inc.'s RAMCHECK support material similarly requires an equipment-specific proposal establishing the intended chip or module role and continuing support. None of these distinctions establishes inactivity or an absence of other offerings.

[redacted] Until those obligations are documented, engineering-to-production consolidation remains conditional rather than a demonstrated substitute for a dedicated chip-test commitment.

[redacted] Test Evolution Corp's public company description discusses open-standard SoC and protocol-test equipment but does not establish a dated current system commitment. These are reasons to obtain a manufacturer-backed offer and support scope, not reasons to infer that the companies have ceased participating.

[redacted] For 4JMSolutions (Malta) Ltd., the unresolved requirement is the named platform and contractual allocation of equipment supply, installation, upgrades, and continuing support. A local

relationship can be useful only when it connects to the actual equipment obligation; regional presence alone does not establish manufacturer-backed coverage.

Qmax Test Equipment Ltd requires confirmation of both exact legal-name continuity and a named semiconductor-device system: the inspected Qmax TestDirector9 material concerns PCB testing and repair. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Buyers should distinguish these documented business roles from an unconfirmed whole-tester obligation before including them in an equipment substitution decision.

Development claims should not receive the same commercial treatment as an order-specific offer. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ For Nanjing Pego Measurement and Control Technology Co., Ltd., the unresolved comparison is an orderable RF-SoC system tied to the exact contracting entity and support obligation.

Several Chinese equipment comparisons remain proposal-specific. For Shenzhen Suyue Xinyi Keji Youxian Gongsi, a SY3000 proposal must distinguish engineering-introduction obligations from production acceptance. ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪

Regional chip-tester comparisons retain separate attribution questions. ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Without those records, a buyer cannot defensibly compare these routes with FORM's explicitly described memory-IC offering or assume equivalent cross-border access.

Sources & Evidence

1. Тестер микросхем FORMULA HF3
   - FORM's explicit memory-device application provides a bounded contrast with regional comparisons still requiring a named memory configuration or seller attribution. ([form.ru](https://form.ru/products/chip/FHF3/))
2. Semiconductor Test Equipment (IC Tester) | MICRONICS JAPAN CO.,LTD.
   - MICRONICS JAPAN presents Testalio as complete IC-test equipment for wafer and packaged-device roles; the particular SoC or memory configuration remains unestablished. ([mjc.co.jp](https://www.mjc.co.jp/en/products_service/tester/))

3. AMIDA 3001XP Tester | AMIDA Technology

· AMIDA's 3001XP page lists MCU, FPGA, and video-processor applications, supporting bounded application screening rather than universal SoC or memory acceptance. ([amidatec.com](https://www.amidatec.com/En/product-detail.aspx?id=xx.xx))

4. S100 | IC Tester | YoungTek Electronics Corp.

· YoungTek describes S100 consumer-IC applications and configurable instrumentation without establishing the particular SoC or memory configuration. ([ytec.com.tw](https://www.ytec.com.tw/en/product/ic-tester/s100-tester/detail))

5. COMPANY - Qualitau

· QualiTau's official company material identifies its reliability-system families and the Israeli QualiTau Ltd. business; functional SoC or memory-device acceptance is not established by that description. ([qualitau.com](https://qualitau.com/company/))

6. SEMICON West 2025 - UNITES Systems a.s.

· UNITES's company-supplied 2025 profile describes UNIMET 2020 laboratory linear and mixed-signal equipment; its separate memory-system category does not identify a memory-specific configuration. ([expo.semi.org](https://expo.semi.org/west2025/Public/eBooth.aspx?BoothID=xx.xx&FromPage=Exhibitors.aspx&IndexInList=xx.xx&ListByBooth=true&ParentBoothID=))

7. Device Testers | KingTiger Technology - KingTiger Testing

· The KingTiger-branded device catalog advertises KT-5DA DDR5 device testing, establishing product relevance without resolving exact-entity continuity. ([kingtigertesting.com](https://www.kingtigertesting.com/device))

8. About | KingTiger Technology - KingTiger Testing

· KingTiger's company material uses the KingTiger Testing representation; that description alone does not establish continuity to the protected Canadian entity. ([kingtigertesting.com](https://www.kingtigertesting.com/about))

9. EPM MS5205e Test System | Premtek International Inc.

· Premtek lists EPM MS5205e under represented engineering-memory products and links to EPM; the listing does not establish present manufacturer continuity. ([premtek.com.tw](https://www.premtek.com.tw/product_d.php?id=xx.xx&lang=en&tb=xx.xx))

10. Phoenix - FPGA-Based DDR3, DDR4 & DDR5 Memory Tester for Hidden Fault Detection | Reconext

· Reconext presents Phoenix for memory-module recovery and lists deployments within its facilities; external equipment supply and chip-device coverage remain separate questions. ([reconext.com](https://www.reconext.com/test-solutions/phoenix/))

11. DDR5 SLT 高速服务器内存测试机台-深合杰

· HEROTEST's inspected DDR5 offering explicitly addresses RDIMM module-level validation, not established chip-production acceptance. ([herotest.cn](https://www.herotest.cn/product/xx.xx.html))

12. INNOVENTIONS Technical Support

· INNOVENTIONS maintains RAMCHECK support material that directs customers to configuration-specific product support; it does not establish an individual equipment proposal or current chip-testing commitment. ([memorytesters.com](https://www.memorytesters.com/techs.htm))

13. 採用（会社案内）｜半導体テストシステムの株式会社シバソク

· Shibasoku's official corporate recruiting material describes semiconductor-tester manufacturing activity without naming the required SoC or memory configuration. ([shibasoku.co.jp](https://shibasoku.co.jp/recruit/recruit.php))

14. TRI’s TR6850S Mixed-Signal IC Tester and TR6600 SOC Series on Display at SEMICON China 2011

· TRI's March xx.xx 2011 announcement advertises TR6600 SoC equipment; it is historical offering evidence rather than confirmation of a present system commitment. ([tri.com.tw](https://www.tri.com.tw/tw/news/news_detail-xx.xx-xx.xx-xx.xx-xx.xx-xx.xx-xx.xx.html))

15. Test Evolution Corp | LinkedIn

· Test Evolution's public company-authored description discusses open-standard ATE, SoC, and protocol-test activity but does not provide a dated current system commitment. ([linkedin.com](https://www.linkedin.com/company/test-evolution-corp))

16. Empresa - Four Solutions

· Four Solutions' own business history describes electronics services and equipment trading; a named SoC or memory platform appointment is not established by that description. ([4sl.com.br](https://www.4sl.com.br/pt-br/empresa))

17. TestDirector9 | Qmax Test

· Qmax describes TestDirector9 as software supporting PCB testing and electronic-assembly repair; it does not establish the required named semiconductor-device tester. ([qmaxtest.com](https://www.qmaxtest.com/modules/software.aspx))

18. SEMICON China 2026 - Shanghai Testrong Technologies Co., Ltd.

· Testrong's company-supplied 2026 profile describes IC-test development, equipment, and verification activity without identifying the complete SoC or memory system being proposed. ([expo.semi.org](https://expo.semi.org/china2026/Public/eBooth.aspx?BoothID=xx.xx&FromPage=Exhibitors.aspx&IndexInList=xx.xx&ListByBooth=true&ParentBoothID=))

19. SEMICON China 2026 - TBSTest Technologies Co., LTD.

· TBSTest's company-supplied 2026 profile describes T800 as developed and presents memory systems as future launches, not established order-specific availability. ([expo.semi.org](https://expo.semi.org/china2026/Public/eBooth.aspx?BoothID=xx.xx&FromPage=Exhibitors.aspx&IndexInList=xx.xx&ListByBooth=true&Nav=False&ParentBoothID=))

19. Company Profiles

19.1. ADVANTEST CORPORATION

[illegible] Compatibility is a supplier-stated capability, not proof that every customer configuration transfers unchanged. Continued use also preserves dependence on Advantest's platform and software.

The DRAM-focused T5503HS2 provides a separate continuity proposition: Advantest advertises upgrades from installed T5503 systems. A memory manufacturer should establish equipment-specific eligibility and the accepted target configuration before choosing upgrade over replacement. [illegible]

Advantest Pre-Owned Solutions adds an OEM-managed reuse route covering refurbishment, license switching, installation, and maintenance. [illegible] Neither upgrade eligibility nor suitable pre-owned availability follows automatically from owning an Advantest asset.

Sources & Evidence

1. V93000 | SoC Test Systems | ADVANTEST CORPORATION
   · Advantest advertises V93000 SoC systems and cross-generation reuse of test programs, probe cards, and device-interface boards. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/soc/v93000/))
2. T5503HS2 | Memory Test Systems | ADVANTEST CORPORATION
   · The T5503HS2 catalog addresses DRAM applications and expressly advertises upgrading installed T5503 testers to T5503HS2 systems. ([advantest.com](https://www.advantest.com/en/products/semiconductor-test-system/memory/t5503hs2/))
3. Business | Advantest Pre-Owned Solutions | ADVANTEST CORPORATION
   · Advantest Pre-Owned Solutions describes refurbished or reconfigured equipment, license switching, installation, and maintenance support. These are advertised service commitments, not equipment-specific availability. ([advantest.com](https://www.advantest.com/en/customer-services/apo/business/))
4. Integrated Annual Report 2026: Overview
   · Company verification: Advantest's 2026 integrated reporting establishes its semiconductor-test-equipment business and its SoC and memory test activities.
   · Company verification: The record supports portfolio-level participation, not an independently verified leadership ranking or market-share estimate.

5. ADVANTEST CORPORATION - Securities Report, Fiscal Year Ended March 31, 2025
   - Company verification: Advantest's fiscal 2025 securities report records the April xx.xx 2024 acquisition of all outstanding shares of Salland through its European group structure.
   - Company verification: The acquired Dutch business is described as supplying ATE measurement instruments and semiconductor testing services, supporting consolidation rather than a separate competitor row.
6. Semiconductor Testing - iTest ISRAEL
   - Company verification: iTest Israel's official semiconductor-testing page identifies Advantest V93000 EXA Scale and other V93000 systems among its test equipment.
   - Company verification: The page establishes a named equipment-user relationship and advertises production and SoC-related test services; it does not give equipment purchase or installation dates.

19.2. Teradyne, Inc.

Teradyne, Inc.'s Magnum xx.xx family lists NOR flash, NAND flash, SRAM, DRAM, microcontroller, and low-end SoC applications. Engineering and production configurations differ, with the SV configuration advertised for wafer sort and final test. ■■■ ■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■

A buyer seeking shared equipment for memory and low-end SoC work should require one quoted configuration with explicit application coverage and acceptance obligations before consolidating purchases. Separate application-specific systems remain the alternative when that overlap is unconfirmed. ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■ ■■■ ■ ■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■

Sources & Evidence

1. Magnum 2 | Memory Test Solution from Teradyne
   - Magnum xx.xx lists several memory families and low-end SoC applications, distinguishes engineering and production configurations, and advertises SV for wafer sort and final test. ([teradyne.com](https://www.teradyne.com/products/magnum-xx.xx/))
   - Company verification: Teradyne publicly offers the Magnum xx.xx test system for memory and logic devices.
   - Company verification: The product page identifies memory applications and low-end SoC applications, with engineering and production configurations covering wafer sort and final test.
2. Teradyne Customer Care Center | Contact Us by Country
   - Teradyne provides country-based Customer Care Center contact routes for parts, technical services, and training information; the directory does not specify Magnum xx.xx contractual coverage. ([teradyne.com](https://www.teradyne.com/customer-care-center-contact-by-country/))
   - Company verification: Provides customer-care contact routes for Algeria, Egypt, Morocco and South Africa.
   - Company verification: Describes access for parts, technical services and training; it does not identify country-specific tester sales, installed systems or local manufacturing.
3. 10-K - 02/19/2026 - Teradyne, Inc.
   - Company verification: Exhibit xx.xx of the filing dated February xx.xx 2026 lists Teradyne de Costa Rica S.R.L., incorporated in Costa Rica, as xx.xx% owned. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))

4. Examining the domestic semiconductor ecosystem: Promoting the Development of the Semiconductor Ecosystem in Costa Rica | OECD
   · Company verification: The OECD publication dated April xx.xx 2026 identifies Teradyne as a chip-testing-equipment supplier in its table of Costa Rican semiconductor ecosystem businesses for 2025. This corroborates a regional equipment-supplier role, not local product sales or market share. ([oecd.org](https://www.oecd.org/en/publications/promoting-the-development-of-the-semiconductor-ecosystem-in-costa-rica_35fe6797-en/full-report/examining-the-domestic-semiconductor-ecosystem_cc2a95c7.html))
5. Teradyne and MultiLane Announce Formation of Joint Venture, MultiLane Test Products
   · Company verification: Teradyne announced an agreement on January xx.xx 2026 for a majority-owned MLTP joint venture involving MultiLane's test-and-measurement assets.
6. MultiLane Test Products: A Joint Venture Between MultiLane and Teradyne | ECOC
   · Company verification: The exhibitor statement identifies Teradyne as the venture partner.
7. Teradyne, Inc. - Form 10-Q for the quarterly period ended June 28, 2026
   · Company verification: Teradyne's second-quarter 2026 filing confirms formation of MLTP on April xx.xx 2026, Teradyne's controlling xx.xx% interest, and consolidation in its Product Test segment.

19.3. Cohu, Inc.

Cohu, Inc. presents Diamondx within its Diamond Series for SoC and microcontroller applications. ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ This supports an application-specific alternative for buyers whose facility constraints make liquid cooling unattractive; it does not establish superior operating economics or equivalence to a dedicated memory tester.

The facility proposition must be confirmed for the delivered configuration rather than inferred from an older product sheet. Cohu's fiscal 2025 filing describes application services, spare parts, board repair, service agreements, and virtual and on-site support. ■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Diamond Series Test Platform - Semiconductor ATE | Cohu
   · Cohu's Diamond Series catalog lists Diamondx and identifies SoC and microcontroller applications. ([cohu.com](https://www.cohu.com/diamond-series))
   · Company verification: Cohu offers the Diamond Series test platform, including Diamondx and DxV systems.
   · Company verification: The official portfolio identifies SoC and microcontroller applications and describes deployment at IDMs and OSATs.
2. Diamondx Test System - Flexible, Cost Optimized Test Solutions
   · The Diamondx product sheet, revision June xx.xx 2020, describes digital, analog, RF, and power instrumentation, Unison software, and air cooling without heat-exchanger plumbing. ([cohu.com](https://www.cohu.com/wp-content/uploads/2019/xx.xx/Diamondx-Product-Sheet_STG_20200611.pdf))

3. Cohu, Inc. - Form 10-K for the Fiscal Year Ended December 27, 2025
   - Cohu's fiscal 2025 filing describes application services, spares, board repair, service agreements, and virtual and on-site support. Its warranty disclosure states that coverage periods differ by product. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/cohu20251227_10k.htm))
   - Company verification: The fiscal 2025 Form xx.xx-K establishes Cohu, Inc.'s continuing semiconductor-equipment operations and consolidated reporting identity.
   - Company verification: The filing distinguishes semiconductor test equipment from automation, inspection, interfaces and services, supporting equipment-level assessment without attributing all corporate revenue to SoC testers.

19.4. Chroma ATE Inc.

[redacted] Its migration proposition includes program and pattern converters and advertised acceptance of other testers' interface boards and probe cards. These are supplier-stated features, not demonstrated universal portability.

[redacted] Selected RF, direct-probing, and other options require availability confirmation. Compare the migration commitment with staying on the incumbent platform: converters may preserve particular assets but do not settle software rights, customer acceptance, or local support.

Sources & Evidence

1. Chroma 3680 Advanced SoC Test System
   - Chroma advertises xx.xx migration converters and reuse of other testers' interface boards and probe cards; selected options explicitly require availability confirmation. ([chromaate.com](https://www.chromaate.com/en/product/advanced_soc_analog_test_system_3680_36))
   - Company verification: Chroma ATE publicly offers the xx.xx Advanced SoC Test System.
   - Company verification: The product is presented as a complete semiconductor-test-system offering rather than a standalone handler or general-purpose instrument.
2. About Chroma | Chroma ATE Inc. | Global
   - Company verification: The official corporate profile identifies Chroma ATE Inc. and its semiconductor-test business.
   - Company verification: The company describes international offices and manufacturing operations; this supports corporate identity and geographic presence, not product-specific sales or market share.
3. Chroma ATE to Showcase Semiconductor Validation Ecosystem at SEMICON Taiwan 2026
   - Company verification: Chroma's August xx.xx 2026 announcement establishes continuing commercial activity in semiconductor test and validation equipment.
   - Company verification: The announcement covers IC testing and engineering-to-volume-manufacturing applications, supplementing the captured xx.xx SoC-system offering.
4. Africa | Chroma ATE Inc. | Europe
   - Company verification: Lists African channel contacts in Egypt, Kenya, South Africa and Tunisia.
   - Company verification: Names Delta Sigma, Giza Systems Distribution, Amotech Africa, Intercal (Pty) Ltd. and ATD Electronic.
   - Company verification: The directory does not establish authorization or actual sales for a specific SoC or memory tester.

19.5. Hangzhou Changchuan Technology Co., Ltd.

[illegible] It separately describes handlers, automation, and optical inspection, supporting evaluation of the named tester rather than attributing the entire portfolio to SoC equipment.

STI's overseas sales and service relationships provide group-level access context, not proof of D9000-specific acceptance or support. [illegible] Retain the incumbent option where those commitments cannot be established.

Sources & Evidence

1. 杭州长川科技股份有限公司 2025 年年度报告全文
   - Changchuan's fiscal 2025 report identifies D9000 SoC production testing at wafer and packaged-device stages, distinguishes adjacent equipment, and separately describes STI's overseas sales and service relationships. ([static.cninfo.com.cn](https://static.cninfo.com.cn/finalpage/2026-xx.xx-xx.xx/xx.xx.PDF))
   - Company verification: Changchuan's fiscal 2025 annual report identifies the D9000 SoC tester series among its current principal products.
   - Company verification: The filing describes D9000 production-testing applications for SoCs, microprocessors and other digital devices at wafer and packaged-device stages.
   - Company verification: The current filing supersedes reliance on the older product-link mismatch as an unresolved participation question.
2. Hangzhou Changchuan Technology Co., Ltd.
   - Company verification: Hangzhou Changchuan Technology's official wafer-test application catalog lists D9000 and D9016 product leads.
   - Company verification: The catalog places these listings within a broader portfolio containing different equipment roles, so it does not alone resolve tester-specific scope.
3. Hangzhou Changchuan Technology Co., Ltd.
   - Company verification: The page reached through the catalog's D9000-labeled link displays an S2000 product description.
   - Company verification: That description concerns wafer-probing applications, so it cannot substantiate D9000 tester functionality.
4. 杭州长川科技股份有限公司 2023 年年度报告
   - Company verification: Changchuan's 2023 annual report identifies D9000 as a production tester addressing SoC devices at wafer and packaged-device stages.

19.6. YC Corporation

YC Corporation's first-quarter 2026 filing describes a DRAM and NAND wafer-tester business, identifies Samsung Electronics and SK hynix as equipment customers, and lists MT8311 as commercialized. [illegible]

Direct, customer-specific selling can align the offer with a manufacturer's wafer-memory program, but another customer's relationship does not confer acceptance. [illegible] The specialist route is unsuitable when broader application coverage is essential.

Sources & Evidence

1. YC Corporation - First-Quarter Report for the Period Ended March 31, 2026
   - YC's first-quarter 2026 filing describes DRAM and NAND wafer testers, Samsung Electronics and SK hynix customer relationships, direct customer-specific selling, and commercialized MT8311 equipment. ([kind.krx.co.kr](https://kind.krx.co.kr/external/2026/xx.xx/xx.xx/xx.xx/xx.xx/xx.xx.htm))
   - Company verification: The 2026 filing confirms continuing memory-test-equipment manufacture and sales.
   - Company verification: It records the first MT8311 shipment in November 2024 and identifies MT8311 as commercialized.
2. YIK Corporation - Quarterly Report for the period ended September 30, 2023
   - Company verification: The November xx.xx 2023 exchange-hosted quarterly filing identifies the company as YIK Corporation.
   - Company verification: The filing states that its principal business includes manufacturing and selling automatic test equipment for DRAM and NAND devices at wafer stage.
   - Company verification: This historical filing does not establish the subsequent YC name transition or current portfolio.
3. YC Corporation - 2024 First-Quarter Report
   - Company verification: The exchange-hosted report records the English-name change from YIK Corporation to YC Corporation effective March xx.xx 2024.

19.7. Marvin Test Solutions, Inc.

[illegible] The package includes a device interface and Marvin's ATEasy and ICEasy software. Its open-standard core therefore provides a turnkey purchasing route rather than requiring buyer assembly of an instrument collection.

[illegible] Obtain a TS-960e-specific offer naming the acceptance party, software rights, and destination-site support before relying on that channel. The integrated route suits buyers seeking a named system supplier; custom integration remains an alternative when the offered configuration does not fit.

Sources & Evidence

1. PXIe Semiconductor Test System | Marvin Test Solutions, Inc.
   - Marvin advertises TS-960e as an integrated PXI Express SoC/SiP system with benchtop and manipulator configurations, a device interface, and ATEasy and ICEasy software. ([marvintest.com](https://www.marvintest.com/Product/TS-960e-Series))
   - Company verification: Marvin's TS-960e catalog explicitly identifies the integrated semiconductor test system as suitable for device, SoC and SiP applications.
   - Company verification: The page offers production-test configurations and identifies semiconductor OEMs, fabless vendors and packaging/test companies as intended customers.

2. Semiconductor Test System TS-900 | DCT | Test and Measurement
   - DCT catalogs the TS-xx.xx and advertises technical and continuing support in Israel. This is a related-model channel example, not a TS-960e-specific appointment. ([dct.co.il](https://dct.co.il/product/ts-xx.xx/))
   - Company verification: DCT publicly catalogs Marvin's GENASYS Semi TS-xx.xx for device, SoC and SiP testing and offers local commercial support in Israel.
   - Company verification: The listing establishes an advertised regional channel, not a completed order, installed base or Israeli manufacturing.
3. Contact Us | Marvin Test Solutions, Inc.
   - Company verification: Marvin's official contact page identifies Marvin Test Solutions, Inc. and its Irvine, California business location.
   - Company verification: The page expressly identifies the Marvin Group as its parent, resolving the principal ownership and reporting-level gap without adding a separate parent representation.
4. Semiconductor | Marvin Test Solutions, Inc.
   - Company verification: Marvin Test Solutions advertises GENASYS semiconductor test platforms and named TS-900e and TS-960e product families.
   - Company verification: The official portfolio addresses digital, mixed-signal and RF semiconductor production testing, including wafer and packaged-device interfaces.
   - Company verification: The inspected page does not expressly establish a SoC or memory product application.

19.8. Introspect Technology

Introspect Technology offers M5512 for GDDR7 memory-IC characterization and functional testing with Pinetree software. ■■■ ■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ This provides a graphics-memory engineering purchasing route, not automatic equivalence to a wafer-memory production platform.

■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ A design-side buyer can assess the integrated GDDR7 offering; a production operator should first secure application acceptance and continuing support. A dedicated production-system route remains the alternative when those conditions are unmet.

■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ Procurement should match the quotation's contracting party and obligations to that entity or a named authorized seller. The mapping does not establish controlling ownership or a reseller's authority.

Sources & Evidence

1. M5512 GDDR7 Memory Test System - Introspect Technology
   - Introspect markets M5512 for GDDR7 memory-IC characterization and functional testing with Pinetree software, and advertises production-screening capability. ([introspect.ca](https://introspect.ca/product/m5512-gddr7-memory-test-system/))
   - Company verification: The official M5512 catalog advertises an ATE-on-Bench system for characterization and functional testing of GDDR7 memory integrated circuits, including advertised production-screening capability. The listing does not independently establish production adoption or sales scale. ([introspect.ca](https://introspect.ca/product/m5512-gddr7-memory-test-system/))

2. Introspect Technology Ships World’s First GDDR7 Memory Test System - Introspect Technology
   · Introspect's March xx.xx 2024 announcement describes M5512 as a benchtop system and reports immediate commercial availability through direct and sales-partner channels. ([introspect.ca](https://introspect.ca/2024/xx.xx/xx.xx/introspect-technology-ships-worlds-first-gddr7-memory-test-system/))
   · Company verification: Introspect Technology's Montreal-datelined March xx.xx 2024 announcement reports shipment and immediate commercial availability of the M5512 GDDR7 Memory Test System through direct and sales-partner channels. This is a company-reported commercial event, not independent shipment-volume evidence. ([introspect.ca](https://introspect.ca/2024/xx.xx/xx.xx/introspect-technology-ships-worlds-first-gddr7-memory-test-system/))
3. Privacy Notice - Introspect Technology
   · The privacy notice identifies Introspect Test Technology Inc. as providing hardware, software, and services under the Introspect Technology brand. It does not establish controlling ownership. ([introspect.ca](https://introspect.ca/privacy-policy/privacy-notice/))
   · Company verification: The official privacy notice identifies Introspect Test Technology Inc. as the company providing hardware, software and services under the Introspect Technology brand.
4. News - Introspect Technology
   · Company verification: Introspect's official news archive contains an October xx.xx 2026 commercial announcement under the Introspect Technology identity and a Montreal dateline.
   · Company verification: This establishes recent operating activity but does not independently resolve the legal contracting entity or ownership behind the protected market-facing title.
5. Website Terms Of Use - Introspect Technology
   · Company verification: The official website terms connect Introspect Technology to Introspect Test Technology Inc. / Technologie Introspect Test Inc., corroborating the market-facing name's legal-entity mapping.

19.9. Hprobe

[redacted] These are different equipment roles: a general magnetic-memory capability statement does not establish suitability for the buyer's intended insertion. Hprobe also advertises compatibility with commercial ATE and automated wafer probers, making responsibility for the combined equipment configuration an important purchasing condition.

[redacted] Separately, Fraunhofer IPMS lists an Hprobe IBEX xx.xx in its Dresden cleanroom infrastructure. That provides customer-side evidence of equipment presence in a research setting, but does not establish IBEX-WS acceptance for a particular production SoC.

A foundry or device manufacturer considering embedded-MRAM wafer sorting should request an IBEX-WS-specific commercial scope identifying the accepted application, equipment interfaces, responsible supplier, and installation support. [redacted] The decision should turn on the documented equipment obligation rather than adjacent magnetic-sensor offerings or research-site references.

Sources & Evidence

1. MRAM Test - Magnetoresistive random access memory - NVM
   - Hprobe advertises IBEX-WS for functional testing of memory arrays and wafer sorting of SoCs with embedded MRAM, and distinguishes it from IBEX-WAT parametric wafer-acceptance equipment.
   - The page advertises compatibility with commercial ATE and automated wafer probers; transaction-specific responsibility is a commercial inference, not a disclosed universal commitment.
   - Company verification: Hprobe advertises IBEX-WS for functional testing of memory bit arrays and wafer sorting of SoCs with embedded MRAM.
   - Company verification: The portfolio separately identifies IBEX-WAT for a different magnetic-memory testing role.
2. Global Technologies makes acquisition in France
   - Mycronic's March xx.xx 2025 announcement states that its Global Technologies division acquired Hprobe, establishing a completed acquisition.
   - Company verification: Mycronic's March xx.xx 2025 announcement states that its Global Technologies division acquired Hprobe, establishing a completed acquisition rather than a pending agreement.
   - Company verification: The announcement identifies Hprobe's equipment business for MRAM and magnetic-sensor testing and its placement as a Mycronic business line.
3. Magnetic Test
   - Mycronic presents Hprobe as its Magnetic Test business line within Global Technologies, covering MRAM and magnetic-sensor equipment.
   - The portfolio presentation does not specify transaction-level service obligations for a particular Hprobe installation.
4. Cleanroom Infrastructure - Fraunhofer IPMS
   - Fraunhofer IPMS lists an Hprobe IBEX xx.xx in its Dresden cleanroom infrastructure, providing customer-side equipment-presence evidence.
   - The listing concerns research infrastructure and does not establish IBEX-WS acceptance for a particular production SoC.
5. Hprobe Joins Mycronic to Strengthen Leadership in Magnetic Device Testing
   - Company verification: Hprobe announced its acquisition by Swedish Mycronic on March xx.xx 2025.
   - Company verification: The announcement identifies Hprobe's French business and its automated-test-equipment role for MRAM and magnetic sensors.
6. Company - Hprobe
   - Company verification: Hprobe's current company page identifies its Grenoble headquarters and its position within Mycronic's Global Technologies division.

19.10. ELES Semiconductor Equipment S.p.A.

ELES Semiconductor Equipment S.p.A. presents a combined reliability-stress-and-test proposition for SoCs and memories. ■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■

ELES separately offers test systems, test applications, and test and data-analysis services. ■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■

RESEARCH SAMPLE REPORT

■■■■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■ The trade-off is concentrating responsibility for several roles in the same supplier relationship; separate equipment commitments remain appropriate where the production mandate requires capabilities not documented in the proposed ELES scope.

■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ Before consolidating purchases, the buyer should obtain separate acceptance responsibilities for the intended engineering and production uses, identify the contracting and supporting entities, and specify continuing service obligations. The commercially relevant strength is the advertised continuity across reliability-related roles, while device-specific functional coverage and site-level support remain purchasing conditions.

Sources & Evidence

1. ELES Semiconductor Equipment S.P.A. - Code of Ethics
   - The corporate document identifies ELES Semiconductor Equipment S.P.A., supporting attribution to the assigned full-form company identity.
2. Universal Test Platform - ELES
   - ELES advertises SoC and memory support, combined stress and test in the same insertion, and engineering, reliability, and production roles using the same platform and development environment.
   - The procurement rationale for coordinating purchases is conditional on application acceptance; the page does not establish universal functional production-ATE equivalence.
   - Company verification: ELES's Universal Test Platform portfolio explicitly addresses SoCs and memories.
   - Company verification: The company describes a reliability-testing role spanning engineering and production, which requires boundary qualification against conventional ATE.
3. Art Gp Up To 5w - ELES
   - ELES markets ARTgp as a Universal Reliability Test System for low-power SoCs and memory ICs.
   - Company verification: ELES advertises ARTgp as a named reliability-test system for low-power SoCs and memory ICs.
4. Eles Offer - ELES
   - ELES separately lists test systems, test applications, test services, and test-data-analysis services.
   - Separating equipment acceptance from service deliverables is an analytical implication of these distinct advertised offerings.
5. Global Footprint - ELES
   - ELES lists Italian locations, ELES North America Inc. in the United States, and ELES Singapore Pte Ltd in Singapore.
   - The location listing does not specify a service-level commitment for a particular equipment installation.
6. Avviso n. 19509 del 16 Aprile 2026 - ELES: Sospensione e revoca dalle negoziazioni
   - Company verification: The April xx.xx 2026 announcement identifies Eles Semiconductor Equipment S.p.A. as the takeover target and EBidCo as indirectly controlled by a Xenon private-equity vehicle.
   - Company verification: The announcement records final sell-out results and an April xx.xx 2026 delisting timetable; later completion was not separately corroborated.
7. Company Profile - ELES
   - Company verification: The current profile identifies ELES Spa and its semiconductor-reliability equipment business.

8. ELES - OPA Xenon: CS delisting azioni Eles, April 24, 2026
   - Company verification: The April xx.xx 2026 regulated announcement confirms the residual-share acquisition procedure and ELES delisting effective that day.
   - Company verification: It identifies EBidCo as indirectly controlled by the specified Xenon private-equity vehicle.

19.11. NplusT Srl

NplusT Srl, headquartered in Montecastrilli, Italy, markets TESTMESH as an all-in-one engineering family for emerging and established nonvolatile-memory technologies. TMA-xx.xx is positioned for memory cells and small arrays, while the broader portfolio also lists production-monitoring applications and TMY-xx.xx for IP macros and final products. ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■

A February xx.xx 2024 NplusT announcement identifies Weebit Nano as a TESTMESH TMA-xx.xx user and includes an attributed customer statement describing collaboration and supplier support. ■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ The useful commercial reference is a supported engineering engagement, not automatic transferability of that engagement to another buyer.

■■■ ■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ NplusT describes a worldwide support organization and partnership network, but that description does not establish a response commitment for an individual site. A dedicated engineering purchase can be appropriate when technology evaluation is the purchasing mandate; buyers requiring a common engineering-and-production commitment should obtain explicit application acceptance instead of relying on memory-family breadth or the named user reference.

Sources & Evidence

1. TESTMESH - NplusT
   - NplusT markets TESTMESH as an all-in-one engineering family for emerging and established nonvolatile memories.
   - The catalog distinguishes TMA-xx.xx for cells and small arrays from TMY-xx.xx for IP macros and final products, and also lists production-monitoring applications.
2. MOCCA 2023 awarded to Weebit Nano - NplusT
   - NplusT's February xx.xx 2024 announcement identifies Weebit Nano as a TESTMESH TMA-xx.xx user and includes an attributed customer statement describing collaboration and supplier support.
   - This is supplier-published user evidence, not independent proof of comparative productivity, deployment location, or production-operator acceptance.
   - Company verification: The February xx.xx 2024 announcement identifies Weebit Nano as a user of NplusT TESTMESH TMA-xx.xx nonvolatile-memory characterization equipment.
   - Company verification: This supplier-published customer relationship does not identify the contracting jurisdiction or physical installation location.

3. Company - NplusT
   - NplusT identifies Montecastrilli, Italy, as its headquarters and describes an organization and partnership network supporting customers worldwide.
   - Its general support description does not define the response obligation for an individual buyer site.
   - Company verification: The official company page identifies NplusT as an Italian semiconductor equipment and engineering business, headquartered in Montecastrilli, with the legal footer NplusT Srl.
   - Company verification: Its stated commercial expertise includes nonvolatile-memory testing and characterization, NAND characterization, reliability testing and burn-in.

19.12. Spirox Corporation

Spirox Corporation combines an own-brand SoC tester proposition with represented-equipment offerings. ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Memory-controller coverage should not be read as proof of a dedicated memory-device tester or universal combined SoC-and-memory coverage.

▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ Its 2024 annual report disclosed a nonexclusive NI Taiwan agency, service, and maintenance agreement for specified RF STS configurations, restricted to China, Hong Kong, and designated customers in Taiwan, with renewal dependent on sales conditions. Continued catalog promotion does not establish subsequent renewal or broaden the disclosed appointment to every STS configuration or customer.

Purchasers should distinguish the product obligation for an SP2500 proposal from the manufacturer's appointment and entitlement arrangements governing a represented NI system. Before committing to the latter, obtain current written confirmation of the applicable configuration, customer and territory, together with the allocation of warranty and continuing service responsibilities. ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Spirox Corporation - 2024 Annual Report
   - The 2024 annual report discloses a nonexclusive NI Taiwan agency, service, and maintenance agreement for specified RF STS configurations, restricted to China, Hong Kong, and designated customers in Taiwan.
   - Renewal depends on sales conditions; the dated disclosure does not establish subsequent renewal.
2. SoC Test System-Spirox Corporation
   - Spirox advertises SP2500 as its SoC tester family for applications including microcontrollers, memory controllers, consumer devices, and automotive ICs.
   - The catalog offers alternative production configurations; memory-controller application coverage does not itself establish dedicated memory-device tester equivalence.
   - Company verification: Spirox advertises the SP2500 complete SoC test-system family for applications including MCU, memory-controller and automotive ICs.
   - Company verification: The catalog presents configurations for small-batch and production use.

3. Semiconductor Test System-Spirox Corporation

- Spirox separately advertises STS and identifies NI as its developer, supporting the distinction from Spirox's SP2500 offering.
- A product listing does not establish renewal of the separately disclosed agency appointment or transaction-specific entitlement.

Sources & Evidence

1. Cohu, Inc. - Form 10-K for the fiscal year ended December 27, 2025
   - Company verification: The fiscal 2025 Form xx.xx-K establishes Cohu, Inc.'s continuing semiconductor-equipment operations and consolidated reporting identity.
   - Company verification: The filing distinguishes semiconductor test equipment from automation, inspection, interfaces and services, supporting equipment-level assessment without attributing all corporate revenue to SoC testers.
2. About Chroma | Chroma ATE Inc. | Global
   - Company verification: The official corporate profile identifies Chroma ATE Inc. and its semiconductor-test business.
   - Company verification: The company describes international offices and manufacturing operations; this supports corporate identity and geographic presence, not product-specific sales or market share.
3. Chroma ATE to Showcase Semiconductor Validation Ecosystem at SEMICON Taiwan 2026
   - Company verification: Chroma's August xx.xx 2026 announcement establishes continuing commercial activity in semiconductor test and validation equipment.
   - Company verification: The announcement covers IC testing and engineering-to-volume-manufacturing applications, supplementing the captured xx.xx SoC-system offering.
4. SPEA | Contact us
   - Company verification: SPEA's official contact page identifies the Italian headquarters as SPEA S.P.A. and provides its fiscal and company-registration identifiers.
   - Company verification: The page distinguishes headquarters, subsidiaries and representatives, supporting one reportable SPEA supplier identity rather than separate competitor rows for its offices.
   - Company verification: SPEA's contact page lists Macon Ventas as its Argentine representative and Plottec Eletrônica Comércio e Serviços as its Brazilian representative. These listings establish public channel relationships but not product-specific local sales. ([spea.com](https://www.spea.com/en/contact-us/))

5. SEMICON West 2026 - SPEA
   - Company verification: SPEA's company-supplied SEMICON West 2026 profile advertises semiconductor test equipment and identifies SoC/mixed-signal test systems within its product categories.
   - Company verification: This dated commercial exhibition presence supplements its currently advertised DOT and C600MX portfolio.
6. 杭州长川科技股份有限公司 2025 年年度报告全文
   - Company verification: Changchuan's fiscal 2025 annual report identifies the D9000 SoC tester series among its current principal products.
   - Company verification: The filing describes D9000 production-testing applications for SoCs, microprocessors and other digital devices at wafer and packaged-device stages.
   - Company verification: The current filing supersedes reliance on the older product-link mismatch as an unresolved participation question.
7. Corporate - AccoTEST
   - Company verification: AccoTEST's official corporate page expressly identifies it as a business unit of Beijing Huafeng Test & Control Technology Co., Ltd.
   - Company verification: The page links the market-facing AccoTEST identity to the listed company identified by stock code xx.xx resolving the principal reporting-level gap.
8. STS8600 - AccoTEST
   - Company verification: AccoTEST publicly catalogs STS8600 as a SoC test system addressing data-center, automotive and IoT applications.
   - Company verification: The marketed product page supplements the captured March 2026 exhibition announcement; neither record establishes shipment volumes or installed-base scale.
9. Semiconductor(SEMI)-苏州华兴源创科技股份有限公司
   - Company verification: HYC's current semiconductor catalog advertises the T7600 series as SoC Digital ATE, including named T7600S, T7600M and T7600H configurations.
   - Company verification: The catalog is published under the native legal identity 苏州华兴源创科技股份有限公司, connecting the protected HYC market-facing name to the offering.
   - Company verification: The catalog establishes continued advertising, not dated shipment or customer-acceptance confirmation.
10. Exicon Co., Ltd. - 2026 Company Presentation
    - Company verification: Exicon's exchange-hosted 2026 company presentation identifies Exicon Co., Ltd. and its semiconductor-test-equipment business.
    - Company verification: The presentation distinguishes i7000 memory-component testers from i1000 memory-module testers and identifies Samsung Electronics and SSPC as customers for the component-tester series.
    - Company verification: The disclosed YC holding is a minority interest; the presentation does not describe Exicon as a YC operating subsidiary.
11. Global Technologies makes acquisition in France
    - Company verification: Mycronic's March xx.xx 2025 announcement states that its Global Technologies division acquired Hprobe, establishing a completed acquisition rather than a pending agreement.
    - Company verification: The announcement identifies Hprobe's equipment business for MRAM and magnetic-sensor testing and its placement as a Mycronic business line.
12. Contact Us | Marvin Test Solutions, Inc.
    - Company verification: Marvin's official contact page identifies Marvin Test Solutions, Inc. and its Irvine, California business location.
    - Company verification: The page expressly identifies the Marvin Group as its parent, resolving the principal ownership and reporting-level gap without adding a separate parent representation.

13. Group Companies | INNOTECH CORPORATION
    - Company verification: INNOTECH's official group-company page identifies the INNOTECH corporate group and currently includes STAr Technologies, Inc. among its group businesses.
    - Company verification: The page describes STAr's semiconductor-test-equipment activities and international subsidiaries, strengthening the current consolidation basis beyond the captured historical acquisition-agreement statement.
14. News - Introspect Technology
    - Company verification: Introspect's official news archive contains an October xx.xx 2026 commercial announcement under the Introspect Technology identity and a Montreal dateline.
    - Company verification: This establishes recent operating activity but does not independently resolve the legal contracting entity or ownership behind the protected market-facing title.
15. Phoenix - FPGA-Based DDR3, DDR4 & DDR5 Memory Tester for Hidden Fault Detection | Reconext
    - Company verification: Reconext's Phoenix page explicitly classifies the offering as memory-module testing for recovery and return-to-service applications.
    - Company verification: The page identifies deployments in Reconext facilities in Bydgoszcz, Poland, Penang, Malaysia, and Hayward, California.
    - Company verification: These facts resolve the previously unsupported Polish operating link but do not establish external equipment sales or semiconductor-chip production ATE participation.
    - Company verification: Reconext's official Phoenix page identifies Phoenix as a parallel DDR tester.
    - Company verification: The inspected material does not establish external equipment sales, a Polish seller or semiconductor-chip production testing.
16. 产品中心_产品中心_珠海芯业测控有限公司
    - Company verification: The inspected Zhuhai Xinye catalog identifies 珠海芯业测控有限公司 and advertises XT2200P for multicore, MCU, AI-controller and memory-controller chip applications.
    - Company verification: The catalog also lists XT2100-xx.xx with SoC final-test applications, improving the previous uninspected-offering gap.
    - Company verification: The undated catalog does not establish current shipment volumes, ownership or a registry-confirmed reporting identity.
17. Qmax Test Equipments Ltd. at productronica 2025
    - Company verification: The company-supplied productronica 2025 profile identifies Qmax Test Equipments Ltd. and advertises semiconductor testers within its broader automated-test portfolio.
    - Company verification: The profile does not identify a named SoC or memory tester and does not resolve the wording difference from the protected Qmax Test Equipment Ltd title.
18. SEMICON China 2026 - Shanghai Testrong Technologies Co., Ltd.
    - Company verification: The company-supplied SEMICON China 2026 profile identifies Shanghai Testrong Technologies Co., Ltd. and its semiconductor-test equipment, hardware, software and services activity.
    - Company verification: The profile establishes current business participation at that broader level but does not name a complete SoC or memory tester sold by the company.
19. About SEICHITECH - SEICHITECH
    - Company verification: SEICHITECH's official English corporate page identifies the company as Shenzhen SEICHI Technologies Co., Ltd.
    - Company verification: The page links the market-facing SEICHITECH name to the company listed on the SSE STAR Market under stock code xx.xx improving the protected brand's legal-identity mapping.
    - Company verification: The official company-profile page identifies the business under the SEICHITECH English market-facing name.
20. Integrated Annual Report 2026: Overview
    - Company verification: Advantest's 2026 integrated reporting establishes its semiconductor-test-equipment business and its SoC and memory test activities.
    - Company verification: The record supports portfolio-level participation, not an independently verified leadership ranking or market-share estimate.

21. Magnum 2 | Memory Test Solution from Teradyne
    - Company verification: Teradyne publicly offers the Magnum xx.xx test system for memory and logic devices.
    - Company verification: The product page identifies memory applications and low-end SoC applications, with engineering and production configurations covering wafer sort and final test.
22. Diamond Series Test Platform - Semiconductor ATE | Cohu
    - Company verification: Cohu offers the Diamond Series test platform, including Diamondx and DxV systems.
    - Company verification: The official portfolio identifies SoC and microcontroller applications and describes deployment at IDMs and OSATs.
23. Chroma 3680 Advanced SoC Test System
    - Company verification: Chroma ATE publicly offers the xx.xx Advanced SoC Test System.
    - Company verification: The product is presented as a complete semiconductor-test-system offering rather than a standalone handler or general-purpose instrument.
24. Semiconductor Test Equipment: IC, MEMS, KGD & Wafer | SPEA
    - Company verification: SPEA publicly supplies semiconductor test equipment addressing SoC and analog mixed-signal devices.
    - Company verification: Its official portfolio names the DOT platform and C600MX systems and identifies IDMs and OSATs as customer categories.
25. Hangzhou Changchuan Technology Co., Ltd.
    - Company verification: Hangzhou Changchuan Technology's official wafer-test application catalog lists D9000 and D9016 product leads.
    - Company verification: The catalog places these listings within a broader portfolio containing different equipment roles, so it does not alone resolve tester-specific scope.
26. Hangzhou Changchuan Technology Co., Ltd.
    - Company verification: The page reached through the catalog's D9000-labeled link displays an S2000 product description.
    - Company verification: That description concerns wafer-probing applications, so it cannot substantiate D9000 tester functionality.
27. AccoTEST Showcased All-in-One Test Systems at SEMICON China 2026
    - Company verification: AccoTEST publicly promoted its STS8600 SoC Test Platform at SEMICON China held March xx.xx-xx.xx 2026.
    - Company verification: The announcement identifies SoC testing as part of its commercial platform portfolio, separately from its power-device test systems.
28. Corporate Information | HYC Appears at SEMICON China 2023
    - Company verification: HYC's September xx.xx 2023 business announcement identifies its T7600 SoC ATE platform.
    - Company verification: The company states that the platform had been deployed for MCU mass-production testing, establishing a dated commercial claim rather than only a research collaboration.
29. Memory Tester - Semiconductor - 유니테스트
    - Company verification: UniTest Co., Ltd.'s official Memory Tester portfolio includes a dedicated Component Tester category.
    - Company verification: The page identifies the supplier under its English company name and South Korean business address.
30. Memory Tester - Semiconductor - 유니테스트
    - Company verification: UniTest lists UNI940A for DRAM and UNI940FL for NAND Flash in its memory burn-in tester portfolio.
    - Company verification: These products establish an additional test-and-burn-in role that must be distinguished from component and module tester categories.

31. SEMICON Korea 2026 - EXICON
    - Company verification: Exicon Co., Ltd.'s SEMICON Korea 2026 exhibitor profile states that it supplies memory testers, storage testers and MBT systems.
    - Company verification: The profile describes expansion into SoC and DDI testers; that expansion statement is not treated as proof that every such platform is already commercially deployed.
32. YIK Corporation - Quarterly Report for the period ended September 30, 2023
    - Company verification: The November xx.xx 2023 exchange-hosted quarterly filing identifies the company as YIK Corporation.
    - Company verification: The filing states that its principal business includes manufacturing and selling automatic test equipment for DRAM and NAND devices at wafer stage.
    - Company verification: This historical filing does not establish the subsequent YC name transition or current portfolio.
33. SEMICON Korea 2024 - DI Corporation
    - Company verification: DI Corporation's SEMICON Korea 2024 exhibitor profile describes memory IC test-and-burn-in equipment.
    - Company verification: It also describes wafer-level burn-in equipment, establishing a supplier role adjacent to conventional memory ATE.
34. Aehr Test Systems - Form 10-K for the fiscal year ended May 29, 2026
    - Company verification: Aehr's fiscal 2026 Form xx.xx-K describes FOX-XP, FOX-NP and FOX-CP test-and-burn-in offerings addressing devices including memories, processors and SoCs.
    - Company verification: The filing describes the acquired Incal Sonoma, Tahoe and Echo package-level product lines within Aehr's portfolio.
    - Company verification: The company reports equipment-sales and associated service activities; this does not isolate revenue within a conventional SoC/memory ATE boundary.
35. AEM Expands System Level Test on AMPS Platform
    - Company verification: AEM's September xx.xx 2024 announcement describes the AMPS platform for system-level test and burn-in from engineering through high-volume manufacturing.
    - Company verification: The announcement identifies IC manufacturers and advanced computing applications as commercial targets.
    - Company verification: This establishes an SLT supplier role, not automatic inclusion in conventional SoC/memory ATE.
36. High-Volume Semiconductor Production Test - NI
    - Company verification: NI publicly offers the Semiconductor Test System, or STS, as a turnkey production-test solution.
    - Company verification: The inspected page expressly targets RF devices and mixed-signal ICs and describes integration into semiconductor production test cells.
    - Company verification: The page does not independently establish the exact SoC or memory portion of that business.
37. NEOSEM - DRAM Module Test
    - Company verification: NEOSEM's official DRAM Module Test page describes its DIMM-module tester and automated production-test role.
    - Company verification: The page describes DDR4 production testing and a DDR5 development target of the third quarter of 2021, so it does not establish a current DDR5 release.
    - Company verification: The inspected offering is module-level rather than demonstrated semiconductor-chip ATE.

38. Testmetrix - Engineering, Compliance & Production testers for CF/MMC/SD/MS/USB cards and hosts
    - Company verification: Testmetrix's product catalog advertises VTE-xx.xx and VTE-xx.xx engineering/compliance testers covering memory products including eMMC and NAND devices.
    - Company verification: The catalog advertises AVTE production testers using those test channels and identifies additional UFS-chip and storage-device applications.
    - Company verification: The catalog spans semiconductor devices and storage products, requiring product-level boundary allocation.
39. VBTS-M Test Platform | Eda Industries
    - Company verification: EDA Industries offers the VBTS-M Universal and Modular Burn-in & Reliability Test Platform.
    - Company verification: Its official product classification includes microprocessors, digital and mixed-signal devices and memories.
    - Company verification: The named offering establishes a test-and-burn-in role whose inclusion in the core tester market remains conditional.
40. Why Choose Micro Control Company?
    - Company verification: Micro Control Company describes commercial burn-in-with-test systems for advanced semiconductor devices including SoCs.
    - Company verification: Its official business page also identifies specialized memory and mixed-signal testing solutions and states that the company is based in the United States.
    - Company verification: The page supports a conditional test-and-burn-in supplier role rather than conventional ATE market share.
41. Semiconductor | Marvin Test Solutions, Inc.
    - Company verification: Marvin Test Solutions advertises GENASYS semiconductor test platforms and named TS-900e and TS-960e product families.
    - Company verification: The official portfolio addresses digital, mixed-signal and RF semiconductor production testing, including wafer and packaged-device interfaces.
    - Company verification: The inspected page does not expressly establish a SoC or memory product application.
42. DDR4, DDR3, SDRAM Computer Memory Tester
    - Company verification: INNOVENTIONS advertises the RAMCHECK LX memory tester for memory-module diagnostics.
    - Company verification: The product description mentions optional chip-testing support, but does not establish semiconductor-chip high-volume production use.
    - Company verification: The page does not provide dated confirmation of current commercial availability.
43. 採用（会社案内）｜半導体テストシステムの株式会社シバソク
    - Company verification: Shibasoku's official corporate recruiting material describes its semiconductor-test-equipment manufacturing business.
    - Company verification: The material does not identify a named SoC or memory tester, so it supports supplier identity and general activity only.
44. Introspect Technology Ships World’s First GDDR7 Memory Test System - Introspect Technology
    - Company verification: Introspect Technology's Montreal-datelined March xx.xx 2024 announcement reports shipment and immediate commercial availability of the M5512 GDDR7 Memory Test System through direct and sales-partner channels. This is a company-reported commercial event, not independent shipment-volume evidence. ([introspect.ca](https://introspect.ca/2024/xx.xx/xx.xx/introspect-technology-ships-worlds-first-gddr7-memory-test-system/))
45. M5512 GDDR7 Memory Test System - Introspect Technology
    - Company verification: The official M5512 catalog advertises an ATE-on-Bench system for characterization and functional testing of GDDR7 memory integrated circuits, including advertised production-screening capability. The listing does not independently establish production adoption or sales scale. ([introspect.ca](https://introspect.ca/product/m5512-gddr7-memory-test-system/))

46. Test Systems | Roos Instruments

· Company verification: Roos Instruments advertises Cassini xx.xx and Cassini Spyder as complete semiconductor production-test solutions. Its catalog distinguishes Cassini ARIA integration with Advantest's V93000 platform from those standalone system offerings. ([roos.com](https://www.roos.com/infrastructure.html))

47. New RF, High Speed Digital, and Infrastructure Options for Roos Instrument's CASSINI Introduced at Semicon West - Press Release | Roos Instruments

· Company verification: Roos's SEMICON West 2009 announcement explicitly identifies Cassini coverage of SoC communications devices and describes the business as based in Santa Clara, California. This establishes historical explicit SoC participation, not a current installation or shipment. ([roos.com](https://roos.com/roos/documentation.nsf/0c32be87a150d6a988256915007beaf9/bcf623d75d8dc1a9882575ec0073ab84%21OpenDocument))

48. EPM MS5205e Test System | Premtek International Inc.

· Company verification: Premtek's own represented-products catalog lists the EPM MS5205e General Purpose Memory Test System for engineering memory analysis and links to EPM's website. It supports an advertised channel offering, but does not establish EPM's current Canadian legal identity or a completed sale. ([premtek.com.tw](https://www.premtek.com.tw/product_d.php?id=xx.xx&lang=en&tb=xx.xx))

49. Burn-in System - Trio-Tech International | Semiconductor & Industrial Solutions

· Company verification: Trio-Tech's official product page advertises COBIS-II dynamic burn-in systems for memory and logic devices and lists Trio-Tech International's California corporate office separately from its Singapore executive office. Conventional semiconductor-ATE equivalence is not established. ([triotech.com](https://www.triotech.com/our-products/burn-in-system/))

50. Automated Semiconductor Test & Measurement Solutions | EFEM

· Company verification: Averna advertises modular automated semiconductor production-test integration and explicitly includes SoC verification. The named equipment examples on this page do not independently establish a complete named SoC or memory semiconductor tester. ([averna.com](https://www.averna.com/en/industries/semiconductors))

51. Contact Us | Averna - Testing & Quality Assurance Solutions

· Company verification: Averna's official contact page lists operations in Montreal, the United States and the Guadalajara area of Mexico. These listings establish advertised regional business presence, not product-specific local sales or manufacturing. ([averna.com](https://www.averna.com/en/company/contacts))

52. Test Evolution Corp | LinkedIn

· Company verification: The public Test Evolution Corp company profile presents a Massachusetts business addressing semiconductor production and protocol testing. It does not provide dated confirmation of continuing operations or establish a current named SoC/memory tester. ([linkedin.com](https://www.linkedin.com/company/test-evolution-corp))

53. Device Testers | KingTiger Technology - KingTiger Testing

· Company verification: The KingTiger-branded catalog advertises KT-5DA DDR5 device testing and KT-4DG DDR4 DRAM chip testing; KT-5DP is explicitly marked coming soon. These are brand-level product facts and do not resolve the protected Canadian entity's legal continuity. ([kingtigertesting.com](https://www.kingtigertesting.com/device))

54. About | KingTiger Technology - KingTiger Testing

· Company verification: KingTiger's corporate page states that the business was founded in Ontario and designs, manufactures and supports memory-testing equipment. Its copyright uses KingTiger Testing Inc., which does not itself establish continuity to Kingtiger Technology (Canada) Inc. ([kingtigertesting.com](https://www.kingtigertesting.com/about))

55. Contact KingTiger Technology | Connect with Us - KingTiger Testing

· Company verification: KingTiger's official contact page lists offices in North York, Ontario, and Cedar Park, Texas. These are advertised business locations, not evidence of local manufacturing or current country-specific equipment sales. ([kingtigertesting.com](https://www.kingtigertesting.com/contact))

56. TRI’s TR6850S Mixed-Signal IC Tester and TR6600 SOC Series on Display at SEMICON China 2011 - Compli
    · Company verification: TRI's March xx.xx 2011 announcement identifies Test Research Inc. and advertises the TR6600 SoC Series for an exhibition. This establishes a historical advertised SoC tester, not current availability or Latin American shipments. ([tri.com.tw](https://www.tri.com.tw/tw/news/news_detail-xx.xx-xx.xx-xx.xx-xx.xx-xx.xx.html))
57. Pegada 7 | ETS
    · Company verification: ETS's corporate history states that it began representing TRI's PCBA test machines around 2005. This supports a historical Brazilian board-test channel connection only, not SoC tester distribution. ([ets.com.br](https://www.ets.com.br/pegada7))
58. Empresa - Four Solutions
    · Company verification: The company page identifies Four Solutions Service Ltda.-ME and describes its 2018 expansion into trading machines and general testers for PCB assembly/inspection and front-end/back-end applications. It does not identify a named SoC or memory tester. ([4sl.com.br](https://www.4sl.com.br/pt-br/empresa))
59. 10-K - 02/19/2026 - Teradyne, Inc.
    · Company verification: Exhibit xx.xx of the filing dated February xx.xx 2026 lists Teradyne de Costa Rica S.R.L., incorporated in Costa Rica, as xx.xx% owned. ([investors.teradyne.com](https://investors.teradyne.com/sec-filings/all-sec-filings/content/xx.xx-xx.xx-xx.xx/xx.xx-xx.xx-xx.xx.pdf))
60. Examining the domestic semiconductor ecosystem: Promoting the Development of the Semiconductor Ecosystem in Costa Rica | OECD
    · Company verification: The OECD publication dated April xx.xx 2026 identifies Teradyne as a chip-testing-equipment supplier in its table of Costa Rican semiconductor ecosystem businesses for 2025. This corroborates a regional equipment-supplier role, not local product sales or market share. ([oecd.org](https://www.oecd.org/en/publications/promoting-the-development-of-the-semiconductor-ecosystem-in-costa-rica_35fe6797-en/full-report/examining-the-domestic-semiconductor-ecosystem_cc2a95c7.html))
61. Cosmic is Born: A New Global Player for Semiconductor Test Solutions - Built on Decades of Experience
    · Company verification: The March xx.xx 2026 announcement identifies Cosmic as the new name of the Italian Microtest group following Xenon's investment and subsequent acquisitions.
    · Company verification: The group distinguishes equipment manufacturing from semiconductor testing services and identifies acquired businesses in the Netherlands and United Kingdom.
62. DMT - Digital Mixed Signal Tester - Cosmic
    · Company verification: Cosmic currently advertises DMT EVO as digital and mixed-signal automatic test equipment for IC characterization and validation.
    · Company verification: The product page identifies an operational headquarters in Altopascio, Italy; it does not by itself establish a current named SoC production configuration.
63. Microtest Appoints Micon Global as its Representative
    · Company verification: Micon Global's representative announcement describes Microtest's portfolio as including logic and mixed-signal SoC ATE.
    · Company verification: The undated announcement establishes a publicly described representative relationship, not current shipments or market share.
64. Impressum - Legal Disclaimer
    · Company verification: The official legal disclaimer identifies Neumonda GmbH and its business address in Bad Homburg, Germany.
65. Neumonda Technology
    · Company verification: Neumonda identifies its Technology business as the group's IP and innovation arm and presents Rhinoe and Octopus memory-test offerings.
66. Introducing the NEUMONDA Rhinoe DRAM Tester
    · Company verification: Neumonda publicly describes Rhinoe as semiconductor-memory test equipment covering DRAM components as well as modules.
    · Company verification: The advertised role combines memory-array testing with burn-in; the page does not independently establish customer installations.

67. Introducing the NEUMONDA Octopus DRAM Tester
    - Company verification: Neumonda advertises Octopus as a DRAM tester addressing components and DIMM modules, with application-oriented and reliability-test functions.
68. MRAM Test - Magnetoresistive random access memory - NVM
    - Company verification: Hprobe advertises IBEX-WS for functional testing of memory bit arrays and wafer sorting of SoCs with embedded MRAM.
    - Company verification: The portfolio separately identifies IBEX-WAT for a different magnetic-memory testing role.
69. Hprobe Joins Mycronic to Strengthen Leadership in Magnetic Device Testing
    - Company verification: Hprobe announced its acquisition by Swedish Mycronic on March xx.xx 2025.
    - Company verification: The announcement identifies Hprobe's French business and its automated-test-equipment role for MRAM and magnetic sensors.
70. Company - Hprobe
    - Company verification: Hprobe's current company page identifies its Grenoble headquarters and its position within Mycronic's Global Technologies division.
71. Universal Test Platform - ELES
    - Company verification: ELES's Universal Test Platform portfolio explicitly addresses SoCs and memories.
    - Company verification: The company describes a reliability-testing role spanning engineering and production, which requires boundary qualification against conventional ATE.
72. Art Gp Up To 5w - ELES
    - Company verification: ELES advertises ARTgp as a named reliability-test system for low-power SoCs and memory ICs.
73. Avviso n. 19509 del 16 Aprile 2026 - ELES: Sospensione e revoca dalle negoziazioni
    - Company verification: The April xx.xx 2026 announcement identifies Eles Semiconductor Equipment S.p.A. as the takeover target and EBidCo as indirectly controlled by a Xenon private-equity vehicle.
    - Company verification: The announcement records final sell-out results and an April xx.xx 2026 delisting timetable; later completion was not separately corroborated.
74. Тестер микросхем FORMULA HF3
    - Company verification: The official FORMULA HF3 product page identifies ООО «ФОРМ» in Russia as the developer and manufacturer.
    - Company verification: The advertised tester applications explicitly include static and dynamic memory ICs, supporting a complete memory-device tester role.
75. Тестеры микросхем производства Совтест-Микро
    - Company verification: The dedicated Sovtest tester portfolio lists FT-xx.xx models and includes memory devices among the semiconductor applications described.
    - Company verification: The site supplies a Kursk business address and presents Sovtest ATE as the equipment and support provider.
76. Тестер микросхем МЅТ14
    - Company verification: Informtest's official catalog contains an MST14 chip-tester product page and provides a Zelenograd business address.
    - Company verification: This establishes a named chip-test-equipment lead, but not the exact SoC or memory application subset.
77. ТОВ "ДМТ ТРЕЙДИНГ"
    - Company verification: The government entry identifies an entity named ДМТ ТРЕЙДИНГ in Belarus.
    - Company verification: The entry supports the identity lead only and does not establish any tester offering.
78. ADVANTEST CORPORATION - Securities Report, Fiscal Year Ended March 31, 2025
    - Company verification: Advantest's fiscal 2025 securities report records the April xx.xx 2024 acquisition of all outstanding shares of Salland through its European group structure.
    - Company verification: The acquired Dutch business is described as supplying ATE measurement instruments and semiconductor testing services, supporting consolidation rather than a separate competitor row.

79. ATS Engineering (Reliability Lab in Israel) ... Signs Agreement with iNPACK
    - Company verification: The April xx.xx 2024 release identifies ELES Semiconductor Equipment S.p.A. and describes its semiconductor test systems for SoCs and memories.
    - Company verification: It identifies ATS Engineering as an Israeli reliability laboratory and ELES investee since 2019, connects the laboratory to ELES ART solutions, and announces an iNPACK joint venture.
80. Company Profile - ELES
    - Company verification: The current profile uses ELES S.p.A. and describes its semiconductor testing, qualification and reliability business.
    - Company verification: The company reports investment by Xenon Private Equity and subsequent delisting in 2026, with founder and management equity participation.
    - Company verification: The second protected ELES title references the same observed business, requiring reporting-level reconciliation.
    - Company verification: The current profile identifies ELES Spa and its semiconductor-reliability equipment business.
81. About RI | Roos Instruments
    - Company verification: The official company history identifies Roos Instruments, Inc. as a California corporation supplying Cassini modular ATE.
    - Company verification: Roos describes itself as employee-owned and internally funded.
82. Test Systems | Roos Instruments
    - Company verification: Roos publicly offers Cassini xx.xx and Cassini Spyder as integrated modular production-test systems.
    - Company verification: Its current portfolio also describes Cassini ARIA integration with Advantest V93000 for RF, mmWave and mixed-signal device testing; this does not by itself establish the exact SoC subset.
83. Contact Us | Roos Instruments
    - Company verification: Roos's official contact page names Doron Berger Solutions as its Israeli representative and provides an Israeli business address.
84. Semiconductor Testing - Doron Berger Solutions
    - Company verification: Doron Berger Solutions states that it represents Roos Instruments in Israel and offers tester sales and support services.
    - Company verification: The page describes the represented products as RF IC testers; it does not document completed local sales or exact SoC deployments.
85. Company - NplusT
    - Company verification: The official company page identifies NplusT as an Italian semiconductor equipment and engineering business, headquartered in Montecastrilli, with the legal footer NplusT Srl.
    - Company verification: Its stated commercial expertise includes nonvolatile-memory testing and characterization, NAND characterization, reliability testing and burn-in.
86. MOCCA 2023 awarded to Weebit Nano - NplusT
    - Company verification: The February xx.xx 2024 announcement identifies Weebit Nano as a user of NplusT TESTMESH TMA-xx.xx nonvolatile-memory characterization equipment.
    - Company verification: This supplier-published customer relationship does not identify the contracting jurisdiction or physical installation location.
87. COMPANY - Qualitau
    - Company verification: The official history states that QualiTau Ltd. was established in Israel to develop and manufacture equipment and support overseas markets.
    - Company verification: The company describes semiconductor reliability test systems and lists MIRA, Infinity and ACE product families; the inspected page does not establish a named functional SoC or memory-chip tester.

88. PXIe Semiconductor Test System | Marvin Test Solutions, Inc.
    - Company verification: Marvin's TS-960e catalog explicitly identifies the integrated semiconductor test system as suitable for device, SoC and SiP applications.
    - Company verification: The page offers production-test configurations and identifies semiconductor OEMs, fabless vendors and packaging/test companies as intended customers.
89. Semiconductor Test System TS-900 | DCT | Test and Measurement
    - Company verification: DCT publicly catalogs Marvin's GENASYS Semi TS-xx.xx for device, SoC and SiP testing and offers local commercial support in Israel.
    - Company verification: The listing establishes an advertised regional channel, not a completed order, installed base or Israeli manufacturing.
90. Semiconductor Testing - iTest ISRAEL
    - Company verification: iTest Israel's official semiconductor-testing page identifies Advantest V93000 EXA Scale and other V93000 systems among its test equipment.
    - Company verification: The page establishes a named equipment-user relationship and advertises production and SoC-related test services; it does not give equipment purchase or installation dates.
91. Company Profile - 4JMSolutions
    - Company verification: Identifies the company as 4JMSolutions (Malta) Ltd., founded in 2008.
    - Company verification: Identifies a Morocco office serving North Africa and Western Europe.
    - Company verification: Advertises ATE-system solutions, machine installation, test-program services and equipment upgrades; the page does not establish a named SoC or memory tester offering.
92. Contacts | Eda Industries
    - Company verification: Lists EDA INDUSTRIE Maroc Sarl as a service center in Bouskoura, Casablanca, Morocco.
    - Company verification: Establishes a Moroccan group support presence, without describing the Moroccan location as a production facility.
93. About Us | Eda Industries
    - Company verification: Identifies Eda Industries S.p.A. as the Italian headquarters and production entity.
    - Company verification: States that Eda Industries S.p.A. is a single-shareholder company subject to the direction and coordination of Eda Holding S.r.l.; this is a company disclosure rather than independent ultimate-ownership verification.
94. Africa | Chroma ATE Inc. | Europe
    - Company verification: Lists African channel contacts in Egypt, Kenya, South Africa and Tunisia.
    - Company verification: Names Delta Sigma, Giza Systems Distribution, Amotech Africa, Intercal (Pty) Ltd. and ATD Electronic.
    - Company verification: The directory does not establish authorization or actual sales for a specific SoC or memory tester.
95. Teradyne Customer Care Center | Contact Us by Country
    - Company verification: Provides customer-care contact routes for Algeria, Egypt, Morocco and South Africa.
    - Company verification: Describes access for parts, technical services and training; it does not identify country-specific tester sales, installed systems or local manufacturing.
96. About Hongtai-Macrotest Semiconductor Technology Co.,Ltd.,
    - Company verification: The official English company profile identifies Macrotest Semiconductor Technology Co., Ltd. and describes its semiconductor-test-equipment business, including SoC testers.
97. MS8000 - 南京宏泰半导体科技股份有限公司
    - Company verification: The official MS8000 product record belongs to Macrotest's IC ATE portfolio and describes a software platform shared by its SoC and analog testers.

98. テスター/プローブカード｜イノテック株式会社
    - Company verification: INNOTECH advertises internally developed RETSET wafer and engineering testers for NAND-flash production-test applications.
    - Company verification: The page distinguishes these memory testers from the company's probe cards, reliability equipment and other test products.
99. Company Profile / Organization / Officers｜MICRONICS JAPAN CO.,LTD.
    - Company verification: The official corporate profile gives the company name MICRONICS JAPAN CO.,LTD. and identifies its headquarters in Tokyo, Japan.
100. Semiconductor Test Equipment (IC Tester)｜MICRONICS JAPAN CO.,LTD.
    - Company verification: MICRONICS JAPAN advertises the Testalio complete semiconductor tester for wafer and packaged-device testing, including engineering and mass-production configurations.
    - Company verification: The inspected page does not establish a specific marketed SoC or memory-device configuration.
101. Domestic and International Locations｜MICRONICS JAPAN CO.,LTD.
    - Company verification: The official group network identifies Taiwan MJC as a sales, repair and maintenance operation for semiconductor test equipment, supporting group-level representation rather than an additional tester-manufacturer identity.
102. AMIDA Technology - Company Profile
    - Company verification: The official company profile identifies AMIDA Technology, Inc. and describes its semiconductor test-instrument and system business.
103. AMIDA 3001XP Tester | AMIDA Technology
    - Company verification: AMIDA advertises the complete AMIDA 3001XP tester and lists MCU, FPGA and video-processor applications alongside analog, digital and mixed-signal devices.
104. Company Profile ｜ YoungTek Electronics Corp.
    - Company verification: The official company-profile page is published under the YoungTek Electronics Corp. identity.
105. S100 ｜ IC Tester ｜ Semiconductor ｜ YoungTek Electronics Corp.
    - Company verification: YoungTek's official equipment catalog advertises the S100 complete IC tester for consumer-IC applications and identifies digital and mixed-signal device categories.
    - Company verification: The inspected product page does not explicitly establish SoC or memory-device coverage.
106. Company | JKI
    - Company verification: JKI's official company page describes a high-speed memory test and measurement business covering testers, analyzers, software and custom test systems.
107. NAND Engineering Tester | JKI
    - Company verification: JKI advertises the JTS450F NAND Engineering Tester for verification, characterization and failure-analysis applications.
    - Company verification: This establishes an advertised engineering-memory tester, not independently verified production-scale installations.
108. NAND Burn-In Tester | JKI
    - Company verification: JKI maintains a separate official NAND Burn-In Tester product page, distinguishing that offering from its NAND engineering tester.
109. System on Chip Tester - SEICHITECH
    - Company verification: SEICHITECH advertises a launched System on Chip Tester covering advanced computing, SoC, logic and mixed-signal devices, with a production-deployment interface.
110. Repair During Burn-In Tester - SEICHITECH
    - Company verification: SEICHITECH advertises the S9620 integrated DRAM tester for DDR and LPDDR devices, combining burn-in and core-test roles.
    - Company verification: This offering requires separate boundary treatment from conventional ATE.

111. 公司简介-态坦测试官网

- Company verification: The official profile identifies 成都态坦测试科技有限公司 and its Chengdu business address.
- Company verification: The company describes memory/SoC test-equipment offerings spanning memory-chip ATE, burn-in, SLT and module equipment, and reports production deliveries to domestic customers.

112. 前海晶云（深圳）存储技术有限公司 | 存储芯片测试解决方案

- Company verification: The official memory-chip testing-solutions catalog is published under 前海晶云（深圳）存储技术有限公司.
- Company verification: The inspected business catalog identifies DRAM die-testing and one-stop final-test equipment categories, distinct from sorting-only offerings.

113. DDR5 SLT 高速服务器内存测试机台-深合杰

- Company verification: The official Shenhejie/HEROTEST catalog advertises a DDR5 SLT server-memory tester.
- Company verification: The product is a conditional memory-module/system-level role rather than established conventional semiconductor-chip ATE.

114. LPDDR 测试设备-深合杰

- Company verification: The official Shenhejie/HEROTEST site maintains a separate LPDDR test-equipment catalog category.
- Company verification: That category alone does not establish a chip-production application or current shipments.

115. 武汉精测电子集团股份有限公司向特定对象发行 A 股股票募集说明书（申报稿）

- Company verification: The November 2020 statutory financing document identifies Wuhan Jingce as the issuer and Wuhan Jinghong as its memory-test-equipment venture with Korean IT&T.
- Company verification: The issuer reports completion of batch memory-equipment deliveries to a domestic customer in 2019.
- Company verification: The filing expressly identifies Korean IT&T as IT&T Co., LTD and records its participation in the Wuhan Jinghong memory-test-equipment joint venture established in 2018.
- Company verification: This is historical commercial-participation evidence, not a current independent-product catalog.

116. 武汉精测电子集团股份有限公司关于子公司增资扩股暨关联交易的公告

- Company verification: The August 2026 exchange filing identifies Wuhan Jinghong Electronic Technology Co., Ltd. as a controlled subsidiary of Wuhan Jingce and describes a proposed capital expansion.
- Company verification: The record supports the continuing operating-company relationship, not a current named SoC or memory-tester model.

117. SoC-Based eMMC Tester for eMMC & SD Protocol Validation

- Company verification: Prodigy Technovations advertises an eMMC/SD protocol-test platform for memory-device validation.
- Company verification: SoC-based in the product title describes the tester architecture and does not establish general SoC-device testing.

118. Industry-first AC/DC electrical validation solution for SD Card and eMMC Devices - Prodigy Technovations

- Company verification: The official announcement identifies Prodigy Technovations Pvt Ltd as a Bangalore-based company.
- Company verification: It describes the PGY-SSM-EV-Tester for eMMC/SD electrical characterization as orderable at the time of the undated announcement.

119. About ATS | ATS Malaysia

- Company verification: The official company page identifies ATS Technology Services, Inc., established in 2025, as a US-based company registered in California.
- Company verification: It describes the business as integrating OEM semiconductor-test equipment into turnkey test cells, establishing an integration/distribution role rather than independent tester manufacturing.

120. SoC Test System-Spirox Corporation
    - Company verification: Spirox advertises the SP2500 complete SoC test-system family for applications including MCU, memory-controller and automotive ICs.
    - Company verification: The catalog presents configurations for small-batch and production use.
121. SandTek Semiconductor Technology (SHANGHAI) Co., Ltd. | SEMI
    - Company verification: The company-supplied SEMI profile identifies the Shanghai supplier and its ADAPTSTAR SoC production-test platform.
122. 集成电路测试机-SoC 测试机-胜达克半导体/SANDTEK-东方中科
    - Company verification: Dongfang Zhongke's own catalog labels it an authorized SandTek reseller and lists AdaptStar ST20, ST20H and ST20Q systems.
    - Company verification: A product-specific channel catalog advertises named AdaptStar SoC-system models.
123. Sunright Limited Annual Report 2025
    - Company verification: The audited group filing identifies wholly owned KES equipment subsidiaries in Singapore and the United States and a Philippine product-development subsidiary.
124. KES KX5 - The flexible, cost effective burn-in system
    - Company verification: KES advertises KX5 as a test-and-burn-in system addressing SoCs and microcontrollers with embedded memory.
125. KES Systems in Dallas, Texas - a member of Sunright
    - Company verification: KES's own company profile identifies it as a member of Sunright and an equipment and services supplier.
126. SY3000 集成电路测试系统 - 深圳速跃芯仪科技有限公司
    - Company verification: The catalog identifies 深圳速跃芯仪科技有限公司 and advertises SY3000 as a SoC test system with commercial quotation and delivery-support routes.
127. YC Corporation - 2024 First-Quarter Report
    - Company verification: The exchange-hosted report records the English-name change from YIK Corporation to YC Corporation effective March xx.xx 2024.
128. YC Corporation - 2026 First-Quarter Report
    - Company verification: The 2026 filing confirms continuing memory-test-equipment manufacture and sales.
    - Company verification: It records the first MT8311 shipment in November 2024 and identifies MT8311 as commercialized.
129. PGT-X118 射频收发器芯片测试机 - PGTEC|南京派格测控科技有限公司
    - Company verification: The official PGT-X118 catalog explicitly classifies the offering as RF SoC automated test equipment for engineering and production applications.
130. AMB5600 - Aemulus Corporation Sdn Bhd
    - Company verification: Aemulus's official AMB5600 catalog explicitly includes SoC, MCU, IoT and connectivity applications.
131. SEMICON China 2026 - TBSTest Technologies Co., LTD.
    - Company verification: TBSTest's company-supplied 2026 exhibitor profile identifies T800 as a developed SoC tester.
    - Company verification: The same profile describes memory-test systems as future launches, not established current commercial products.
132. MS-100D DIE Tester
    - Company verification: CST's hosted MS-100D brochure advertises a tester for DRAM die rather than only memory modules.
133. M&A Program - AEM Investor Relations
    - Company verification: AEM's current acquisition history states that the Mu-TEST acquisition completed in the first quarter of 2020 and the team now sits under AEM ATE.

134. AEM adds customized tester development capabilities as it acquires 100% stake in Automated Test Equipment (ATE) company Mu-TEST
    - Company verification: AEM's acquisition announcement identifies Mu-TEST full IC-test systems and SoC and memory applications.
135. 杭州长川科技股份有限公司 2023 年年度报告
    - Company verification: Changchuan's 2023 annual report identifies D9000 as a production tester addressing SoC devices at wafer and packaged-device stages.
136. COMPANY PROFILE - STAr Technologies
    - Company verification: STAr's company profile reports a May 2014 agreement for Innotech Corporation to acquire a majority stake.
    - Company verification: This supports an ownership-related consolidation lead, not independent confirmation of present ownership.
137. About RI | Roos Instruments
    - Company verification: Roos's company page advertises Cassini modular ATE and describes employee ownership.
    - Company verification: The official company history identifies Roos Instruments, Inc. and its Cassini modular-ATE business.
    - Company verification: The protected Roos Instruments title represents this same observed business.
    - Company verification: The protected Inc.-suffixed row references the same observed Roos/Cassini business, creating an apparent duplicate-representation issue.
    - Company verification: The official history supports the Inc.-suffixed identity and describes employee ownership; it does not establish a second business distinct from Roos Instruments.
138. Teradyne and MultiLane Announce Formation of Joint Venture, MultiLane Test Products
    - Company verification: Teradyne announced an agreement on January xx.xx 2026 for a majority-owned MLTP joint venture involving MultiLane's test-and-measurement assets.
    - Company verification: The announcement establishes MultiLane as the named commercial partner and describes retained businesses outside the proposed asset contribution.
139. MultiLane Test Products: A Joint Venture Between MultiLane and Teradyne | ECOC
    - Company verification: A July xx.xx 2026 exhibitor statement describes MLTP as established and advertises its instrument portfolio; it is not a definitive closing record.
    - Company verification: The exhibitor statement identifies Teradyne as the venture partner.
140. Teradyne, Inc. - Form 10-Q for the quarterly period ended June 28, 2026
    - Company verification: Teradyne's second-quarter 2026 filing confirms formation of MLTP on April xx.xx 2026, Teradyne's controlling xx.xx% interest, and consolidation in its Product Test segment.
    - Company verification: The filing identifies HTP Holding SAL as MultiLane and confirms contribution of its test-and-measurement assets to MLTP.
141. Aemulus Holdings Berhad - Annual Report 2025, Part 3
    - Company verification: Note xx.xx of Aemulus Holdings Berhad's fiscal 2025 financial statements identifies Aemulus Corporation Sdn. Bhd. as a wholly owned Malaysian subsidiary.
    - Company verification: The subsidiary's disclosed activities include automated test equipment, measurement instruments and related services.
142. Privacy Notice - Introspect Technology
    - Company verification: The official privacy notice identifies Introspect Test Technology Inc. as the company providing hardware, software and services under the Introspect Technology brand.
143. Website Terms Of Use - Introspect Technology
    - Company verification: The official website terms connect Introspect Technology to Introspect Test Technology Inc. / Technologie Introspect Test Inc., corroborating the market-facing name's legal-entity mapping.

144. Emerson Completes Acquisition of NI, Advancing Global Automation Leadership
    - Company verification: Emerson announced completion of its acquisition of NI on October xx.xx 2023.
    - Company verification: The announcement places NI within Emerson's Test & Measurement business rather than establishing a separate additional competitor.
145. Emerson Electric Co. - Form 10-Q for the quarterly period ended June 30, 2026
    - Company verification: Emerson's June xx.xx 2026 quarterly filing identifies NI as a brand of its Test & Measurement segment.
    - Company verification: The filing places that segment within the Software & Systems group; its broad segment revenue is not SoC/memory-tester revenue.
146. ELES - OPA Xenon: CS delisting azioni Eles, April 24, 2026
    - Company verification: The April xx.xx 2026 regulated announcement confirms the residual-share acquisition procedure and ELES delisting effective that day.
    - Company verification: It identifies EBidCo as indirectly controlled by the specified Xenon private-equity vehicle.
    - Company verification: The completed transaction concerns the same ELES issuer represented by this protected short-form identity, not an additional independent equipment supplier.
147. SEMICON West 2025 - UNITES Systems a.s.
    - Company verification: UNITES's company-supplied SEMICON West 2025 profile identifies UNITES Systems a.s. in the Czech Republic and advertises UNIMET 2020 laboratory mixed-signal testers.
    - Company verification: Memory Test Systems appears among the profile's categories, but the inspected product description does not establish a named memory-specific configuration or deployment.

21. Key Experts

Every expert listed below was interviewed for this report. ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■

Table 412 - continued

Name	Professional Role	Organization	Country
Chen Kok Sing	Corporate Vice President and Country Manager, Malaysia	Micron Technology	Malaysia
Cheng-Wen Wu	Minister	National Science and Technology Council	Taiwan

Hassan H. Amer	Professor of Electronics and Communications Engineering	The American University in Cairo	Egypt
Hiroshi Kawamura	President, SEMI Japan	SEMI	Japan
Ileana Rojas	Vice President, Design Engineering; Former General Manager, Intel Costa Rica	Intel	Costa Rica
Ilia Polian	Professor of Hardware-Oriented Computer Science	University of Stuttgart	Germany
Ilker Hamzaoglu	Professor, Faculty of Engineering and Natural Sciences	Sabanci University	Turkey
Indranil Sengupta	Professor, Computer Science and Engineering	Indian Institute of Technology Kharagpur	India
Ira Leventhal	Vice President, Applied Research and Technology	Advantest America	United States
Jaan Raik	Professor of Digital Systems	Tallinn University of Technology	Estonia
Jacob A. Abraham	Professor, Electrical and Computer Engineering	The University of Texas at Austin	United States
Jean-Christophe Eloy	President and Chief Executive Officer	Yole Group	France
Jean-Pierre Raskin	Co-Founder and Chief Technology Officer	Incize	Belgium

Table 412 - continued

Name	Professional Role	Organization	Country
Jerzy Tyszer	Professor of Computer Engineering	Poznan University of Technology	Poland
Jia-Yu Hung	President	Powertech Technology	Taiwan
Jim Feldhan	President	Semico Research	United States
Jim Handy	General Director	Objective Analysis	United States
Jin-Fu Li	Professor, Electrical Engineering	National Central University	Taiwan
Jing-Jia Liou	Professor, Electrical Engineering	National Tsing Hua University	Taiwan
Joanne Chiao	Semiconductor Research Analyst	TrendForce	Taiwan
John Chia Sin Tet	Executive Chairman and Group Managing Director	Unisem	Malaysia
John Kibarian	Co-Founder, President and Chief Executive Officer	PDF Solutions	United States
John West	Senior Director, Semiconductor Subsystems	TechInsights	United Kingdom
José Pineda de Gyvez	Fellow, Design Technology	NXP Semiconductors	Netherlands
Keith Schaub	Vice President, Technology and Strategy	Advantest America	United States
Kenji Tsuda	Editor-in-Chief	Semiconductor Portal	Japan
Krishnendu Chakrabarty	Fulton Professor of Microelectronics	Arizona State University	United States
Lee Harrison	Director of Product Marketing, Tessent	Siemens EDA	United Kingdom
Leo Huang	Chairman and Chief Executive Officer	Chroma ATE	Taiwan
Li-C. Wang	Professor, Electrical and Computer Engineering	University of California, Santa Barbara	United States
Linsheng Cai	General Manager	Beijing Huafeng Test & Control Technology	China
Loke Wai San	Executive Chairman	AEM Holdings	Singapore
Luciano Bonaria	Founder and President	SPEA	Italy
Luis A. Müller	President and Chief Executive Officer	Cohu	United States
Marcelo Soares Lubaszewski	Professor of Electrical Engineering	Federal University of Rio Grande do Sul	Brazil

Table 412 - continued

Name	Professional Role	Organization	Country
Mario Morales	Group Vice President, Enabling Technologies and Semiconductors	IDC	United States
Martin Keim	Engineering Director, Tessent	Siemens EDA	United States
Masayuki Suzuki	Executive Vice President, SoC Test Business Group	Advantest	Japan
Matteo Sonza Reorda	Professor of Computer Engineering	Politecnico di Torino	Italy
Michael Schuldenfrei	Corporate Technology Fellow	NI, an Emerson company	Israel
Michail Maniatakos	Associate Professor of Electrical and Computer Engineering; Director, Modern Microprocessor Architectures Laboratory	New York University Abu Dhabi	United Arab Emirates
Michiko Inoue	Professor, Information Science	Nara Institute of Science and Technology	Japan
Mike Slessor	President and Chief Executive Officer	FormFactor	United States
Mohamed Masmoudi	Professor of Electrical Engineering	National Engineering School of Sfax, University of Sfax	Tunisia
Mostafa Emam	Co-Founder and Chief Executive Officer	Incize	Belgium
Mottaqiallah Taouil	Assistant Professor, Quantum and Computer Engineering	Delft University of Technology	Netherlands
Nur A. Touba	Professor, Electrical and Computer Engineering	The University of Texas at Austin	United States
Ozgur Sinanoglu	Professor of Electrical and Computer Engineering; Director, Design for Excellence Laboratory	New York University Abu Dhabi	United Arab Emirates
Paolo Bernardi	Professor of Computer Engineering	Politecnico di Torino	Italy
Patrick Girard	Research Director, LIRMM	CNRS	France
Paul van Ulsen	Chief Executive Officer	Salland Engineering	Netherlands
Peter Cockburn	Semiconductor Test Product Marketing Director	Cohu	United Kingdom
Rached Tourki	Professor of Microelectronics	University of Monastir	Tunisia
Raimund Ubar	Professor Emeritus of Computer Engineering	Tallinn University of Technology	Estonia
Rainer Plieninger	Chief Technology Officer	Advantest	Germany

Table 412 - continued

Name	Professional Role	Organization	Country
Rick Burns	President, Semiconductor Test	Teradyne	United States
Risto Puhakka	General Manager, Semiconductor Market Research	TechInsights	United States
Ritu Favre	President, Test and Measurement	Emerson	United States
Rob Aitken	Distinguished Architect	Synopsys	United States
Ron Press	Technology Enablement Director, Tessent	Siemens EDA	United States
Said Hamdioui	Professor of Dependable and Emerging Computer Technologies	Delft University of Technology	Netherlands
Salvador Mir	Research Director, TIMA Laboratory	CNRS	France
Sandip Kundu	Professor, Electrical and Computer Engineering	University of Massachusetts Amherst	United States
Santanu Chattopadhyay	Director	Indian Institute of Information Technology Kalyani	India
Scott Huang	President	Chunghwa Precision Test Tech	Taiwan
Seiji Kajihara	Professor, Computer Science and Systems Engineering	Kyushu Institute of Technology	Japan
Shai Cohen	Co-founder and Chief Executive Officer	proteanTecs	Israel
Shih-Jye Cheng	Chairman and President	ChipMOS Technologies	Taiwan
Stephen Sunter	Director of Engineering, Mixed-Signal Design for Test	Siemens EDA	Canada
Subhasish Mitra	Professor, Electrical Engineering and Computer Science	Stanford University	United States
Teresa McLaurin	Fellow and Director, Design for Test	Arm	United States
Tien Wu	Chief Executive Officer	Advanced Semiconductor Engineering	Taiwan
Tomokazu Yoneda	Professor, Computer Science and Electrical Engineering	Kumamoto University	Japan
Tomoo Inoue	Professor, Information Sciences	Hiroshima City University	Japan
V. Veerappan	Co-Founder and President	Tessolve	India
Vernon Rogers	Executive Vice President, Sales and Marketing	Aehr Test Systems	United States

Table 412 - continued

Name	Professional Role	Organization	Country
Virendra Singh	Professor, Electrical Engineering	Indian Institute of Technology Bombay	India
Vishwani D. Agrawal	Professor Emeritus, Electrical and Computer Engineering	Auburn University	United States
Wang Jiang Chau	Professor, Department of Electronic Systems Engineering	University of São Paulo	Brazil
Xiaoqing Wen	Professor, Computer Science and Systems Engineering	Kyushu Institute of Technology	Japan
Yasuo Mihashi	Executive Vice President and Co-Chief Operating Officer	Advantest	Japan
Yervant Zorian	Fellow and Chief Architect	Synopsys	United States
Yiorgos Makris	Professor, Electrical and Computer Engineering	The University of Texas at Dallas	United States
Zebo Peng	Professor of Computer Systems	Linköping University	Sweden
Zhao Yi	Chairman and General Manager	Hangzhou Changchuan Technology	China

Contributors

Shikha Sachan

Chief Executive Officer

A transformational leader with a strong focus on integrating new technology frameworks into market research. She focuses on reshaping business models in line with evolving technologies and geopolitical shifts, while actively engaging with decision-makers and experts to deliver trustworthy insights, strategic clarity, and lasting business value.

Shraddha Bhirud

Research Manager

With extensive experience in market intelligence, leads complex client engagements by overseeing multiple research projects from initiation to delivery. Strengthens research operations timely through standardized methods, process optimization, and cross-functional collaboration while supporting sales initiatives. Her commitment to quality, and client success ensures the delivery of actionable insights.

Vivek Paymode

Research Lead

Oversees end-to-end research engagements by mentoring analysts and delivering reliable market intelligence. Specializes in industry analysis, company profiling, trend evaluation, opportunity assessment, and quality assurance. Collaborates closely with clients and internal teams to ensure actionable insights that support informed strategic business decisions.

Shailesh Sachan

Research Lead

Leads market intelligence projects by guiding research analysts and ensuring accurate, insight-driven deliverables. Specializes in competitive benchmarking, market assessment, research planning, data validation, and project execution. Delivers high-quality outcomes through effective client coordination, structured workflows, and consistent adherence to project timelines and quality standards.

360iResearch

Founded in 2017, 360iResearch is a market research and business consulting company headquartered in India, with clients and focus markets spanning the globe.

We are a dynamic, nimble company that believes in carving ambitious, purposeful goals and achieving them with the backing of our greatest asset - our people.

Quick on our feet, we have our ear to the ground when it comes to market intelligence and volatility. Our market intelligence is diligent, real-time and tailored to your needs, and arms you with all the insight that empowers strategic decision-making.

Our clientele encompasses about 80% of the Fortune Global 500, and leading consulting and research companies and academic institutions that rely on our expertise in compiling data in niche markets. Our meta-insights are intelligent, impactful and infinite, and translate into actionable data that support your quest for enhanced profitability, tapping into niche markets, and exploring new revenue opportunities.
