Submarine Communication Cable System Market

Global Forecast 2026-2032

MRR-361AD4F95A18 | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 8
   1.1. Objectives of the Study 8
   1.2. Market Definition 8
   1.3. Market Segmentation & Coverage 9
   1.4. Years Considered for the Study 23
   1.5. Currency Considered for the Study 24
   1.6. Language Considered for the Study 24
   1.7. Key Stakeholders 24
2. Research Methodology 26
   2.1. Introduction 26
   2.2. Research Design 26
      2.2.1. Primary Research 27
      2.2.2. Secondary Research 27
   2.3. Research Framework 28
      2.3.1. Qualitative Analysis 28
      2.3.2. Quantitative Analysis 29
   2.4. Market Size Estimation 29
      2.4.1. Top-Down Approach 29
      2.4.2. Bottom-Up Approach 29
   2.5. Data Triangulation 30
   2.6. Research Outcomes 30
   2.7. Research Assumptions 31
   2.8. Research Limitations 31
3. Executive Summary 33
   3.1. Introduction 33
   3.2. CXO Perspective 33
   3.3. New Revenue Opportunities 35
   3.4. Next-Generation Business Models 36
   3.5. Industry Roadmap 37
4. Market Overview 39
   4.1. Introduction 39
   4.2. Key Growth Contribution 43
   4.3. Industry Ecosystem & Value Chain Analysis 58
      4.3.1. Supply-Side Analysis 59
      4.3.2. Demand-Side Analysis 60
      4.3.3. Stakeholder Analysis 61
   4.4. Market Dynamics 62
      4.4.1. Key Drivers 63
         4.4.1.1. Cloud Network Integration and Infrastructure Control 63
         4.4.1.2. Resilience Requirements Across the Cable Lifecycle 63
         4.4.1.3. Upgrade Purchasing on Installed Cable Assets 64

4.4.1.4. Publicly Supported Regional Connectivity 64
4.4.2. Key Restraints 64
4.4.2.1. Security-Conditioned Counterparty and Supplier Access 64
4.4.2.2. Landing and Associated-Works Authorization 65
4.4.2.3. Dependence on Local Access and Operating Institutions 65
4.4.3. Key Opportunities 65
4.4.3.1. Qualified Installed-System Equipment and Software Packages 65
4.4.3.2. Funded Owner-Side Procurement and Coordination 66
4.4.3.3. Accountable Landing Access and Facility Operations 66
4.4.3.4. Complementary Coverage for Defined Lifecycle Obligations 66
4.4.3.5. Sponsor-Funded Scientific and Monitoring Deliverables 67
4.4.4. Key Challenges 67
4.4.4.1. Securing Enforceable Marine Repair Access 67
4.4.4.2. Accountability in Multivendor Procurement 68
4.4.4.3. Resolving Shared-System Purchasing Authority 68
4.4.4.4. Allocating Sensing Funding, Data Rights, and Support 68
4.4.4.5. Qualifying Commercial Status of New Architectures 69
4.5. Porter's Five Forces Analysis 69
4.6. PESTLE Analysis 71
4.7. Market Outlook 72
4.7.1. Near-Term Market Outlook (0-2 Years) 73
4.7.2. Medium-Term Market Outlook (3-5 Years) 74
4.7.3. Long-Term Market Outlook (5-10 Years) 74
4.8. Go-to-Market Strategy 75
5. Market Insights 77
5.1. Consumer Insights & End-User Perspective 77
5.2. Consumer Experience Benchmarking 77
5.3. Opportunity Mapping 78
5.4. Distribution Channel Analysis 81
5.5. Pricing Trend Analysis 82
5.6. Regulatory Compliance & Standards Framework 83
5.7. ESG & Sustainability Analysis 84
5.8. Disruption & Risk Scenarios 85
5.9. Return on Investment & Cost-Benefit Analysis 86
6. Cumulative Impact of Artificial Intelligence 2026 89
7. Submarine Communication Cable System Market, by Product and Service Offering 91
7.1. Equipment and Components 100
7.1.1. Submarine Communications Cables 107
7.1.2. Terminal Transmission Equipment 113
7.1.3. Repeaters and Optical Amplifiers 121
7.1.4. Power-Feeding Equipment 128
7.1.5. Supervision, Monitoring, and Sensing Equipment 135
7.1.5.1. Transmission Supervision and Test Equipment 142
7.1.5.2. Fiber Sensing Equipment 148
7.1.5.3. Integrated Scientific Sensor Packages 156

7.1.6. Branching Units 163
7.1.7. Cable Joints and Passive Accessories 169
7.1.8. Submarine Optical Fiber 177
7.2. Marine Services 184
7.2.1. Cable Installation and Protection 191
7.2.2. Marine Maintenance and Repair 197
7.2.3. Vessel Charter and Marine Support 205
7.2.4. Marine Survey and Inspection 211
7.2.5. Cable Recovery and Removal 218
7.3. Operational Support Services 226
7.3.1. Cable Landing Hosting and Facility Operations 233
7.3.2. Equipment Maintenance and Repair 240
7.3.3. Network Monitoring and Technical Support 247
7.3.4. Cable Logistics and Depot Services 254
7.4. Professional and Integration Services 261
7.4.1. System Integration and Commissioning 268
7.4.2. Project Management and Owner Representation 274
7.4.3. Feasibility and System Engineering 282
7.4.4. Environmental Assessment and Permitting 288
7.4.5. Independent Quality Assurance 295
7.4.6. Procurement and Contract Advisory 303
7.5. Landing Infrastructure Works 310
7.5.1. Cable Landing Station Construction and Fitout 317
7.5.2. Landfall Civil Works 323
7.6. Software 331
7.6.1. Network Control and Management Software 338
7.6.2. Cable Planning and Marine Operations Software 344
7.6.3. Sensing Data Processing and Analytics Software 351
8. Submarine Communication Cable System Market, by Repeater Architecture 359
8.1. Repeatered Systems 364
8.2. Repeaterless Systems 371
8.2.1. Repeaterless Systems Without Submerged Amplifiers 378
8.2.2. ROPA-Assisted Repeaterless Systems 384
9. Submarine Communication Cable System Market, by Terminal Interoperability 392
9.1. Open Cable Interfaces 398
9.2. Closed Vendor-Specific Interfaces 405
10. Submarine Communication Cable System Market, by Optical Fiber Core Architecture 412
10.1. Single-Core Fiber 417
10.2. Multicore Fiber 424
11. Submarine Communication Cable System Market, by Sensing Integration 431
11.1. No Additional Sensing 437
11.2. Fiber-Based Sensing 443
11.3. Integrated Sensor Packages 451

11.4. Combined Fiber and Sensor-Package Sensing 457
12. Submarine Communication Cable System Market, by System Topology 464
12.1. Point-to-Point 471
12.2. Trunk and Branch 478
12.3. Branched Star 485
12.4. Ring 492
12.5. Branched Ring 499
12.6. Star 506
12.7. Festoon 513
13. Submarine Communication Cable System Market, by Connectivity Application 520
13.1. Cloud and Content Network Interconnection 528
13.2. Telecommunications Backbone Connectivity 535
13.3. Shared Multipurpose Connectivity 541
13.4. Enterprise and Public-Service Connectivity 548
13.5. Defense and Security Connectivity 555
13.6. Offshore Operational Connectivity 562
13.7. Research and Education Connectivity 569
14. Submarine Communication Cable System Market, by Buyer Sector 577
14.1. Cloud and Content Providers 585
14.2. Telecommunications and Cable Network Operators 592
14.3. Civil Government and Public-Service Institutions 599
14.4. Defense and Security Agencies 605
14.5. Industrial and Commercial Enterprises 612
14.6. Cable Landing and Colocation Operators 619
14.7. Research and Education Institutions 626
15. Submarine Communication Cable System Market, by Procurement Model 634
15.1. Supplier-Led Turnkey Delivery 639
15.2. Owner-Led Disaggregated Delivery 646
16. Submarine Communication Cable System Market, by Water Depth Class 653
16.1. Deep-Water Deployment 658
16.2. Shallow-Water Deployment 664
17. Submarine Communication Cable System Market, by Contracting Channel 672
17.1. Direct Asset-Owner Contracting 677
17.2. Intermediated Contracting 683
18. Submarine Communication Cable System Market, by Project Lifecycle 691
18.1. New System Development 698
18.2. Operations and Preventive Maintenance 704
18.3. System Upgrades and Life Extension 712
18.4. Fault Repair and Restoration 719
18.5. Decommissioning and Recovery 726
19. Submarine Communication Cable System Market, by Ownership Structure 733

19.1. Shared Ownership....739
19.2. Sole Ownership....746
20. Submarine Communication Cable System Market, by Cable Protection Construction....753
20.1. Lightweight Cable....759
20.2. Single-Armored Cable....766
20.3. Double-Armored Cable....773
20.4. Lightweight Protected Cable....780
20.5. Rock-Armored Cable....787
21. Submarine Communication Cable System Market, by Region....794
21.1. Asia-Pacific....802
21.2. North America....828
21.3. Europe....854
21.4. Africa....881
21.5. Middle East....906
21.6. Latin America....932
22. Submarine Communication Cable System Market, by Group....959
22.1. NATO....965
22.2. G7....994
22.3. European Union....1020
22.4. BRICS....1047
22.5. ASEAN....1072
22.6. GCC....1098
23. Submarine Communication Cable System Market, by Country....1125
23.1. United States....1135
23.2. China....1160
23.3. France....1184
23.4. Japan....1208
23.5. India....1232
23.6. Brazil....1256
23.7. United Kingdom....1280
23.8. Italy....1304
23.9. Canada....1328
23.10. Australia....1352
23.11. Spain....1376
23.12. Germany....1400
23.13. Mexico....1424
23.14. Russia....1448
23.15. South Korea....1472
24. Competitive Landscape....1497
24.1. Market Share Analysis, 2025....1497
24.2. Market Concentration Analysis, 2025....1518

24.3. Recent Developments & Impact Analysis, 2025 1520
24.4. Product Portfolio Analysis, 2025 1522
24.5. Benchmarking Analysis, 2025 1526
25. Company Profiles 1532
25.1. Alcatel Submarine Networks 1532
25.2. NEC Corporation 1533
25.3. Hexatronic 1534
25.4. Ciena 1534
25.5. Sumitomo Electric Industries, Ltd. 1535
25.6. Global Marine 1536
25.7. Fugro 1537
25.8. Pioneer Consulting 1537
25.9. Makai Ocean Engineering 1538
25.10. Mertech Marine (Pty) Ltd 1539
25.11. Spellman High Voltage Electronics Corporation 1540
25.12. Tetra Tech 1541
25.13. DC BLOX 1542
25.14. International Network Systems 1543
25.15. Tykoflex AB 1544
25.16. PT Ketrosden Triasmitra Tbk 1545
25.17. FiberSense Pty Ltd 1546
25.18. VIAVI Solutions Inc. 1547
25.19. Telxius 1548
26. Companies Covered 1550
27. Key Experts 1575

1. Preface

1.1. Objectives of the Study

- Which included equipment, software, landing works, and services does each buyer procure, and how does purchasing responsibility differ from the connectivity application served?
- What evidence establishes supplier and contractor qualification for the relevant system, buyer sector, operating context, and lifecycle stage?
- Under Open Cable Interfaces and Closed Vendor-Specific Interfaces, what compatibility, contractual, and support conditions determine whether a buyer can credibly change terminal suppliers or upgrade an existing system?
- How do Supplier-Led Turnkey Delivery and Owner-Led Disaggregated Delivery differ in the allocation of procurement, integration, acceptance, and lifecycle-support responsibilities?
- Which landing-access, environmental, ownership, and security requirements must be verified before a supplier or buyer commits to a project or contracting arrangement?
- How do procurement needs and supplier responsibilities differ across new development, upgrades, preventive maintenance, fault repair, and decommissioning?
- What documented commercial status and responsibility boundaries distinguish the included fiber-core, repeater, and sensing categories, without assuming equivalent maturity or supplier capability?
- Which commercial boundaries make standalone offerings and bundled system delivery comparable, and how should independent segmentation axes be interpreted without treating them as additive activity?

1.2. Market Definition

The Submarine Communication Cable System market covers the commercial provision of submarine optical communication systems and the included offerings that support their development, delivery, operation, upgrade, repair, and recovery. The geographic boundary is Global, with Shallow-Water Deployment and Deep-Water Deployment both included. Coverage is not limited to intercontinental systems.

The offering boundary includes Equipment and Components, Software, Landing Infrastructure Works, Professional and Integration Services, Marine Services, and Operational Support Services. Separately supplied Submarine Optical Fiber and other included components remain within scope alongside complete systems. Included sensing equipment, integrated scientific sensor packages, and sensing software retain their distinct commercial roles within the submarine communication system context.

The buyer boundary comprises Telecommunications and Cable Network Operators; Cloud and Content Providers; Cable Landing and Colocation Operators; Civil Government and

Public-Service Institutions; Defense and Security Agencies; Research and Education Institutions; and Industrial and Commercial Enterprises. Connectivity applications describe the purposes served, while buyer sectors describe the organizations responsible for purchasing.

Unrelated upstream raw materials, power-transmission cables, unrelated terrestrial networks, and activities outside the included offering categories are adjacent rather than additional covered offerings. Downstream connectivity provision informs demand analysis but is not a separate offering category. Inclusion of a supplier's relevant component or service does not extend the study to every activity in that supplier's portfolio, nor does inclusion alone establish an additive monetary boundary.

1.3. Market Segmentation & Coverage

Product and Service Offering distinguishes commercial deliverables from the system characteristics used to classify them. Equipment and Components includes Submarine Optical Fiber; Submarine Communications Cables; Cable Joints and Passive Accessories; Repeaters and Optical Amplifiers; Branching Units; Terminal Transmission Equipment; Power-Feeding Equipment; and Supervision, Monitoring, and Sensing Equipment. The latter includes Transmission Supervision and Test Equipment, Fiber Sensing Equipment, and Integrated Scientific Sensor Packages. These categories preserve separate component and equipment roles rather than treating every purchase as a complete cable system.

Software includes Cable Planning and Marine Operations Software, Network Control and Management Software, and Sensing Data Processing and Analytics Software. Landing Infrastructure Works includes Landfall Civil Works and Cable Landing Station Construction and Fitout. Professional and Integration Services includes Feasibility and System Engineering; Environmental Assessment and Permitting; Procurement and Contract Advisory; Project Management and Owner Representation; Independent Quality Assurance; and System Integration and Commissioning. These groups distinguish software, physical works, and professional responsibility within system delivery.

Marine Services includes Marine Survey and Inspection; Cable Installation and Protection; Marine Maintenance and Repair; Cable Recovery and Removal; and Vessel Charter and Marine Support. Operational Support Services includes Cable Landing Hosting and Facility Operations; Network Monitoring and Technical Support; Equipment Maintenance and Repair; and Cable Logistics and Depot Services. Their commercial roles remain distinct from equipment supply, even when several categories appear within one delivery or support arrangement.

Repeater Architecture distinguishes Repeatered Systems from Repeaterless Systems, including Repeaterless Systems Without Submerged Amplifiers and ROPA-Assisted Repeaterless Systems. Terminal Interoperability distinguishes Open Cable Interfaces from Closed Vendor-Specific Interfaces. Optical Fiber Core Architecture distinguishes Single-Core Fiber from Multicore Fiber. Sensing Integration includes No Additional Sensing, Fiber-Based Sensing, Integrated Sensor Packages, and Combined Fiber and Sensor-Package Sensing. Together these axes establish the contexts for comparing supplier eligibility, integration responsibility, and switching requirements without presuming capability equivalence.

System Topology includes Point-to-Point, Star, Branched Star, Trunk and Branch, Festoon, Ring, and Branched Ring. Connectivity Application includes Telecommunications Backbone Connectivity; Cloud and Content Network Interconnection; Enterprise and Public-Service Connectivity; Offshore Operational Connectivity; Defense and Security Connectivity; Research and Education Connectivity; and Shared Multipurpose Connectivity. Topology describes system configuration as a commercial classification; application describes the connectivity purpose, including systems serving more than one purpose.

Buyer Sector includes Telecommunications and Cable Network Operators; Cloud and Content Providers; Cable Landing and Colocation Operators; Civil Government and Public-Service Institutions; Defense and Security Agencies; Research and Education Institutions; and Industrial and Commercial Enterprises. Procurement Model distinguishes Supplier-Led Turnkey Delivery from Owner-Led Disaggregated Delivery. Water Depth Class includes Shallow-Water Deployment and Deep-Water Deployment. These axes separate purchasing identity, delivery organization, and operating context.

Contracting Channel distinguishes Direct Asset-Owner Contracting from Intermediated Contracting. Project Lifecycle includes New System Development; System Upgrades and Life Extension; Operations and Preventive Maintenance; Fault Repair and Restoration; and Decommissioning and Recovery. Ownership Structure distinguishes Sole Ownership from Shared Ownership. Cable Protection Construction includes Lightweight Cable, Lightweight Protected Cable, Single-Armored Cable, Double-Armored Cable, and Rock-Armored Cable. These classifications support comparisons of commercial responsibility and applicable offering requirements; they are independent analytical lenses, not additive market opportunities.

Table 1. Global Submarine Communication Cable System Market Segmentation & Coverage

Segmentation	Coverage
Buyer Sector	• Cloud and Content Providers • Telecommunications and Cable Network Operators • Civil Government and Public-Service Institutions • Defense and Security Agencies • Industrial and Commercial Enterprises • Cable Landing and Colocation Operators • Research and Education Institutions
Cable Protection Construction	• Lightweight Cable • Single-Armored Cable • Double-Armored Cable • Lightweight Protected Cable • Rock-Armored Cable
Connectivity Application	• Cloud and Content Network Interconnection • Telecommunications Backbone Connectivity • Shared Multipurpose Connectivity • Enterprise and Public-Service Connectivity • Defense and Security Connectivity • Offshore Operational Connectivity • Research and Education Connectivity

Table 1 - continued

Segmentation	Coverage
Contracting Channel	• Direct Asset-Owner Contracting • Intermediated Contracting
Optical Fiber Core Architecture	• Single-Core Fiber • Multicore Fiber
Ownership Structure	• Shared Ownership • Sole Ownership
Procurement Model	• Supplier-Led Turnkey Delivery • Owner-Led Disaggregated Delivery
Product and Service Offering	• Equipment and Components o Submarine Communications Cables o Terminal Transmission Equipment o Repeaters and Optical Amplifiers o Power-Feeding Equipment o Supervision, Monitoring, and Sensing Equipment ▯ Transmission Supervision and Test Equipment ▯ Fiber Sensing Equipment ▯ Integrated Scientific Sensor Packages o Branching Units o Cable Joints and Passive Accessories o Submarine Optical Fiber • Marine Services o Cable Installation and Protection o Marine Maintenance and Repair o Vessel Charter and Marine Support o Marine Survey and Inspection o Cable Recovery and Removal • Operational Support Services o Cable Landing Hosting and Facility Operations o Equipment Maintenance and Repair o Network Monitoring and Technical Support o Cable Logistics and Depot Services • Professional and Integration Services o System Integration and Commissioning o Project Management and Owner Representation o Feasibility and System Engineering o Environmental Assessment and Permitting o Independent Quality Assurance o Procurement and Contract Advisory • Landing Infrastructure Works o Cable Landing Station Construction and Fitout o Landfall Civil Works • Software o Network Control and Management Software o Cable Planning and Marine Operations Software o Sensing Data Processing and Analytics Software

Table 1 - continued

Segmentation	Coverage
Project Lifecycle	• New System Development • Operations and Preventive Maintenance • System Upgrades and Life Extension • Fault Repair and Restoration • Decommissioning and Recovery
Repeater Architecture	• Repeatered Systems • Repeaterless Systems o Repeaterless Systems Without Submerged Amplifiers o ROPA-Assisted Repeaterless Systems
Sensing Integration	• No Additional Sensing • Fiber-Based Sensing • Integrated Sensor Packages • Combined Fiber and Sensor-Package Sensing
System Topology	• Point-to-Point • Trunk and Branch • Branched Star • Ring • Branched Ring • Star • Festoon
Terminal Interoperability	• Open Cable Interfaces • Closed Vendor-Specific Interfaces
Water Depth Class	• Deep-Water Deployment • Shallow-Water Deployment

Sources & Evidence

1. Supplemental Charter Agreement dated March 21, 2012 - International Cableship Pte Ltd and Global Marine Systems Limited, Exhibit 10.9.1

· Taxonomy evidence: The executed March xx.xx 2012 supplemental agreement records separately priced charter access to the cable-maintenance vessel CS Cable Retriever through an annual hire arrangement. It supports commercial vessel access distinct from vessel capital acquisition, not current project-level expenditure or 2025 sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d778621dex1091.htm))

· Taxonomy evidence: The agreement distinguishes the vessel-owning entity from the charterer and makes hire payments a separate contractual obligation. This supports a marine-capacity work package within the retained Marine Services context, subject to attribution and single-count allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d778621dex1091.htm))

2. Submarine Cable Services - Atlantic Cable Maintenance & Repair Agreement

   · Taxonomy evidence: The cable-owner cooperative's submarine-cable service description identifies contractual depot storage of operational spares and separately listed storage rates. This establishes a commercial storage category; current renewal terms and prices are not established by the inspected description. ([acma2017.com](https://www.acma2017.com/services/submarine-cable-services/))

   · Taxonomy evidence: The description separates depot storage from maintenance-improvement work and fault repair, supporting storage as an identifiable operational-support function rather than treating every storage cost as physical cable restoration. ([acma2017.com](https://www.acma2017.com/services/submarine-cable-services/))

3. Society of American Military Engineers Awards NAVFAC EXWC 2019 Project of the Year

   · Taxonomy evidence: The Navy's May xx.xx 2019 account identifies a submarine fiber-optic project commissioned in March 2016 to connect Department of Defense information-network nodes. It establishes a defense telecommunications function, without proving exclusively military use or a current expenditure allocation. ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))

   · Taxonomy evidence: The account identifies NAVFAC coordination on behalf of the Defense Information Systems Agency across the cable project. This establishes an institutional commissioning role beyond merely carrying defense traffic, but does not disclose current agency purchasing obligations or contract-line values. ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))

   · Taxonomy evidence: The government project account expressly identifies the submarine fiber connection as a ring, providing an asset-specific example for the retained Ring topology rather than inferring topology from the agency's wider network. ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))

4. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Definitions xx.xx and xx.xx recognize marine-depot or shipboard storage of submarine repeaters, branching-unit spares, and spare cable. This supports the retained depot-service function within communications-asset support, but the standard does not establish prices or a separately awarded storage contract. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Defines distinct submerged and terminal equipment elements of optical submarine systems.
   - Taxonomy evidence: Recognizes repeatered and repeaterless submarine communications cable constructions.
   - Taxonomy evidence: Recognizes optical submarine repeaters and amplification elements.
   - Taxonomy evidence: Defines branching units, including optical add/drop variants.
   - Taxonomy evidence: Defines terminal transmission equipment as a system element.
   - Taxonomy evidence: Recognizes power-feeding equipment and cable-system power functions.
   - Taxonomy evidence: Terms xx.xx-xx.xx distinguish shallow water by a marine-activity risk limit and deep water beyond it. Approximately xx.xx meters is indicative, not a universally fixed transition. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Recognizes shallow water as depths down to the specified marine-activity risk limit. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Recognizes deep water as depths exceeding the shallow-water limit. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Defines routine maintenance as continuing monitoring and preventive supervision of the submarine system. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Separately defines deep-sea and shallow-water repair of installed submarine cable systems. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
5. ITU-T G.654 (08/2024): Characteristics of a cut-off shifted single-mode optical fibre and cable
   - Taxonomy evidence: Distinguishes optical-fiber attributes from delivered cable attributes and identifies submarine systems among the intended applications. Only dedicated submarine-use purchases fall within the proposed offering.
6. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes repeaterless submarine systems and their remotely optically pumped amplification variants.
   - Taxonomy evidence: Provides the established repeaterless-system classification, including ROPA-assisted applications.
   - Taxonomy evidence: Distinguishes repeaterless configurations without ROPA from configurations using submerged remote optical amplification.
   - Taxonomy evidence: Treats ROPA as part of repeaterless submarine systems rather than electrically powered repeatered systems.
   - Taxonomy evidence: Identifies remote optical amplifiers as recognized submarine-system components.

7. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   - Taxonomy evidence: Addresses repeatered optical submarine systems and their wet-plant and terminal interfaces.
   - Taxonomy evidence: Establishes interoperable interfaces supporting terminal equipment supplied independently of the submerged-plant vendor.
   - Taxonomy evidence: Partial transverse compatibility permits an independent terminal vendor while both terminal ends of a link may still use the same manufacturer.
8. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes maintenance controllers and submarine-system monitoring equipment.
   - Taxonomy evidence: Separates transmission-performance supervision, fault location, and electrical monitoring functions.
   - Taxonomy evidence: Describes computer-based supervision and interfaces to network management. This supports the function, not separately priced software licenses.
   - Taxonomy evidence: Establishes ongoing system supervision and remote-maintenance functions as distinct from physical cable repair.
   - Taxonomy evidence: Transmission supervision and sensing-subsystem monitoring are separately described; ordinary transmission supervision alone does not establish additional sensing.
9. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Defines a scientific sensor subsystem additional to telecommunications functions.
   - Taxonomy evidence: Recognizes sensor sets integrated with telecommunications-capable submarine assets.
   - Taxonomy evidence: Recognizes dedicated scientific sensor packages and associated terminal equipment.
   - Taxonomy evidence: Recognizes fiber-based sensing using dedicated land-station equipment.
   - Taxonomy evidence: Specifies receiving, storing, and forwarding sensor data at land stations; separately purchased analytics software is not established by the standard alone.
10. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
    - Taxonomy evidence: The current topology section explicitly lists seven submarine optical-network configurations.
    - Taxonomy evidence: Lists point-to-point as a distinct topology.
    - Taxonomy evidence: Lists star as a distinct topology.
    - Taxonomy evidence: Lists branched star separately from star.
    - Taxonomy evidence: Lists trunk and branch as a distinct topology.
    - Taxonomy evidence: Lists festoon as a distinct topology.
    - Taxonomy evidence: Lists ring as a distinct topology.
    - Taxonomy evidence: Lists branched ring separately from ring.
    - Taxonomy evidence: Lists longitudinal and transverse compatibility configurations separately. Longitudinal compatibility alone does not establish contractual vendor closure.
    - Taxonomy evidence: Recognizes cable joints as submarine-system elements.
11. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
    - Taxonomy evidence: Describes a direct link between two terminal stations.
    - Taxonomy evidence: Describes separate cable links from a main terminal station.
    - Taxonomy evidence: Distinguishes underwater fan-out from independent shore-based star spokes.
    - Taxonomy evidence: Describes terminal branches connected to a common trunk.
    - Taxonomy evidence: Describes successive links between coastal landing points.
    - Taxonomy evidence: Describes a closed arrangement of connected point-to-point links.
    - Taxonomy evidence: Distinguishes a ring with underwater branching units.

12. Table of contents - ITU-T G.971 (12/2024): General features of optical fibre submarine cable systems
    - Taxonomy evidence: Recognizes system installation as an implementation activity.
    - Taxonomy evidence: Recognizes maintenance separately from installation and commissioning.
    - Taxonomy evidence: Recognizes system commissioning as a distinct implementation activity.
13. Resolução do Conselho de Ministros n.º 18/2023, de 13 de fevereiro
    - Taxonomy evidence: Authorizes separate Atlantic CAM purchases for system construction, works supervision, transmission equipment, and landing-station rental, supporting deliverable-based allocation.
    - Taxonomy evidence: Transmission equipment is procured separately from the main construction contract.
    - Taxonomy evidence: Works supervision is authorized as a separate service contract.
    - Taxonomy evidence: Landing-station rental is an expressly identified commercial purchase, distinct from transmission-capacity resale.
14. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
    - Taxonomy evidence: Procurement descriptions separately identify landing-station foundations and beach-manhole-to-station works. Some historical entries are canceled and do not establish completed construction.
    - Taxonomy evidence: Identifies dedicated civil connections between beach manholes and landing stations.
    - Taxonomy evidence: Identifies landing-station construction and dedicated station power infrastructure.
    - Taxonomy evidence: Lists specialist optical test equipment as a cable-system purchase.
    - Taxonomy evidence: Lists submarine equipment upgrade and repair as a signed procurement activity.
    - Taxonomy evidence: Separately identifies commissioning support and terminal-equipment relocation work.
    - Taxonomy evidence: Recognizes an overall cable-project manager as a distinct consulting purchase.
15. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
    - Taxonomy evidence: Distinguishes environmental assessment from field route surveying.
    - Taxonomy evidence: Recognizes marine field surveys supporting submarine telecommunications routes.
    - Taxonomy evidence: Recognizes cable installation and protective burial as distinct cable activities.
    - Taxonomy evidence: Recognizes decommissioning through active cable removal, separately from material resale.
    - Taxonomy evidence: Distinguishes sensing using existing telecommunications fibers from purpose-built SMART sensor integration.
    - Taxonomy evidence: Recognizes SMART cables providing sensing alongside telecommunications.
16. ICPC Membership Agreement - Issue 11
    - Taxonomy evidence: Defines a maintenance authority through contracted accountability for the marine cable portion.
    - Taxonomy evidence: Defines cable recovery participation through contracted recovery work and recovery-vessel activity.
    - Taxonomy evidence: Defines a route-survey company by contracted marine survey work preceding installation.

17. Disaggregated System Supply - Pioneer Consulting
    - Taxonomy evidence: Separately describes system engineering, procurement formation, permitting oversight, project management, and implementation work.
    - Taxonomy evidence: Identifies wet-plant engineering and analytical route-engineering assignments.
    - Taxonomy evidence: Identifies permitting oversight within separately assembled submarine-system delivery.
    - Taxonomy evidence: Identifies end-to-end system implementation as a service distinct from individual equipment purchases.
    - Taxonomy evidence: Contrasts single-supplier turnkey contracting with disaggregated procurement in which system components are sourced separately. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))
    - Taxonomy evidence: Recognizes single-supplier turnkey contracting as the alternative to disaggregated system supply. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))
    - Taxonomy evidence: Describes client-supported selection and separate contracting of system components under disaggregated procurement. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))
18. Procurement - Pioneer Consulting
    - Taxonomy evidence: Describes submarine-system bid evaluation, supplier selection, commercial negotiation, and contract formation as advisory deliverables.
19. Project Management - Pioneer Consulting
    - Taxonomy evidence: Describes cable-project coordination, shipboard owner representation, schedule integration, and commercial milestone oversight.
    - Taxonomy evidence: Separately identifies product-assurance oversight, quality-plan review, and acceptance representation.
20. Inside Petal: Building the World’s First Petabit-Class Transoceanic Subsea Cable - Engineering at Meta
    - Taxonomy evidence: The buyer contrasts conventional one-core transmission fiber with the announced two-core Petal cable architecture.
    - Taxonomy evidence: Explicitly identifies one-core fiber separately from two-core fiber; core count is not fiber-pair count.
    - Taxonomy evidence: Identifies multicore fiber in a named commercial submarine-system program. This announcement does not establish 2025 sales or an operational deployment.
21. Announcing Petal, a First-of-its-Kind Transoceanic Subsea Cable - Meta
    - Taxonomy evidence: The September 2026 buyer announcement specifies multicore fiber and expected service in 2029, distinguishing announced commercial development from an operating asset.
22. Southern Cross Cables Limited - DigitalMarine deployment update at Nedonna
    - Taxonomy evidence: The asset buyer reports live deployment of a fiber-based subsea monitoring service at its Nedonna landing, establishing commercial use rather than a research-only demonstration.
    - Taxonomy evidence: The buyer describes monitoring alerts used by operating staff, supporting contracted monitoring as an operational deliverable.
23. IP e ASN assinam contrato para construção de Novo Anel CAM - Infraestruturas de Portugal
    - Taxonomy evidence: The project owner describes contracted Atlantic CAM telecommunications infrastructure with an integrated scientific-monitoring component.
    - Taxonomy evidence: The project owner explicitly specifies a ring topology for the contracted replacement cable system.
24. MakaiPlan - Makai Ocean Engineering
    - Taxonomy evidence: Markets dedicated submarine-cable route-planning software, corroborating a software deliverable distinct from engineering labor or cable equipment.
25. ORE Seminar: Makai Ocean Engineering: An update on current projects - University of Hawai‘i at Mānoa
    - Taxonomy evidence: The university’s April 2026 seminar record describes proprietary planning and cable-installation software used for telecommunications cables. The description originates with the presenting supplier and is not independent market-share evidence.

26. DigitalMarine - FiberSense
    - Taxonomy evidence: Offers recurring subsea monitoring with network-operations support, establishing a managed-service format rather than proving separately sold analytics licenses.
27. Consultation Paper No. 15/2022: Licensing Framework and Regulatory Mechanism for Submarine Cable Landing in India - TRAI
    - Taxonomy evidence: The regulator distinguishes cable installation, maintenance, repair, and landing-party activities. Its historical consultation is used for category recognition, not as a statement of current licensing requirements.
    - Taxonomy evidence: Identifies environmental and coastal clearances as separable cable-project concerns.
    - Taxonomy evidence: Identifies vessel access and equipment-import support around cable maintenance. This corroborates support functions but does not establish separately priced charter or depot contracts.
28. Celebrating the completion of the most advanced subsea cable across the Atlantic - Microsoft
    - Taxonomy evidence: The cable-system buyer describes MAREA interoperability with different networking equipment and associated upgrade flexibility.
29. Building the Caribbean digital economy bit by bit
    - Taxonomy evidence: The January xx.xx 2019 project account distinguishes public broadband, government networks, and educational connectivity within a program that included construction of a submarine cable. These are observed demand purposes, not reported application-market shares. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
    - Taxonomy evidence: The account describes submarine fiber connectivity as enabling modern telecommunications and affordable internet services for previously underserved communities. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
    - Taxonomy evidence: Governments contracted new government wide-area networks alongside the submarine cable, and the account identifies government offices and health clinics among the connectivity needs. It does not disclose dedicated submarine fiber assignments or cable-only organizational expenditure. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
    - Taxonomy evidence: The account identifies governments as contract signatories and distinguishes them from the telecommunications contractor delivering the infrastructure. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
    - Taxonomy evidence: Three governments signed infrastructure contracts that included a new submarine cable and civil government networks, establishing a public commissioning role rather than participation inferred solely from government traffic. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))

30. Announcing the Grace Hopper subsea cable, linking the U.S., U.K. and Spain

- Taxonomy evidence: The July xx.xx 2020 announcement identifies a submarine cable commissioned to strengthen the network supporting Google's consumer and enterprise digital products. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))
- Taxonomy evidence: Google states that Grace Hopper would support services including Google Cloud and integrate a cloud region into its global infrastructure, establishing a cloud/content production-network purpose. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))
- Taxonomy evidence: Google reports that a cable construction contract had been signed with a system supplier, distinguishing the commissioning digital-service business from its equipment and installation contractor. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))
- Taxonomy evidence: The announcement documents Google commissioning a private submarine cable for its own digital-service network; it is evidence of a cloud/content buyer role, not merely capacity consumption. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))

31. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

- Taxonomy evidence: The May xx.xx 2014 announcement describes construction of a subsea optical-fiber system serving offshore LNG facilities with data and voice communications throughout their operations. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))
- Taxonomy evidence: The announced system served offshore industrial communications while also providing an alternative backhaul path supporting land-based voice and data services. This documents multiple intended functions within one cable system, without establishing their expenditure allocation. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))
- Taxonomy evidence: The announcement separates industrial construction sponsors from the communications business that would build, own, and operate the cable, supporting identification of participating economic purchasing roles. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))
- Taxonomy evidence: Nextgen Group was identified as the business responsible for building, owning, and operating the commissioned subsea communications system. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))
- Taxonomy evidence: The offshore energy projects were announced as contributors to cable construction, establishing industrial infrastructure sponsorship beyond the purchase of ongoing bandwidth services. The announcement does not establish participation by every industrial or commercial sector. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

32. Scarborough switches on for start-up

- Taxonomy evidence: Woodside's April xx.xx 2026 account reports fiber connectivity between its offshore production facility and headquarters, supporting remote operations, operational data transfer, and workforce communications. Only attributable telecommunications scope is relevant; the industrial power/control umbilical is outside the frozen boundary. ([woodside.com](https://www.woodside.com/media-centre/news-stories/story/scarborough-switches-on-for-start-up))
- Taxonomy evidence: The account identifies an industrial asset owner implementing offshore communications infrastructure within its project. The reported 2026 connection is not evidence of completed 2025 delivery or a separately disclosed cable-system expenditure amount. ([woodside.com](https://www.woodside.com/media-centre/news-stories/story/scarborough-switches-on-for-start-up))

33. University of Hawai'i Notice of Sole Source - Cable Landing Station Access and Colocation Services

- Taxonomy evidence: The July xx.xx 2024 procurement notice identifies cable-landing-station access and colocation as purchases supporting a research-and-education network project, establishing an attributable institutional connectivity function within the broader landing-hosting boundary. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
- Taxonomy evidence: The notice states that landing-station colocation supports the university's NSF-funded research network and direct interconnection with research-and-education networks. This is procurement of attributable landing infrastructure services, not evidence used to include excluded capacity leases. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
- Taxonomy evidence: The university is identified as the purchasing institution, while the cable-system business is identified as the intended supplier, separating buyer mandate from contractor identity. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
- Taxonomy evidence: The public procurement notice establishes a university commissioning cable-specific landing-station access and equipment colocation for its research-and-education mission. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))

34. Meld. St. 26 (2023-2024)

- Taxonomy evidence: The government publication identifies submarine connectivity supporting residents, businesses, research, higher education, public administration, and emergency preparedness, documenting distinct purposes sharing a telecommunications asset. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
- Taxonomy evidence: The publication states that subsea fiber cables support public electronic communications alongside institutional and business requirements, providing an example of broad telecommunications-backbone demand. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
- Taxonomy evidence: Civil public-sector users and airport traffic management are identified as communications users of the submarine cable connection. Their use does not establish dedicated fiber assignments or that they bought the cable itself. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
- Taxonomy evidence: The same cable connection serves public communications, satellite-station data, public-sector functions, and airport traffic management. These observed functions support recognition of multipurpose infrastructure but do not establish a monetary allocation among applications. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
- Taxonomy evidence: The government identifies Space Norway as the owner and operator of the submarine fiber cables, establishing the cable-network operating role separately from the institutions using the connection. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

35. Meld. St. 9 (2024-2025)

· Taxonomy evidence: The government white paper states that a planned fiber-optic connection would transmit data for both civilian and military needs. It establishes an intended military communications function, not a defense-only asset, completed deployment, or agency-specific purchase allocation. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3082364/?ch=xx.xx))

· Taxonomy evidence: The planned submarine connection is expressly described as serving both civilian and military data-transmission requirements, supporting recognition of deliberately combined functions at the asset level. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3082364/?ch=xx.xx))

36. Subsea telecommunications cables: resilience and crisis preparedness

· Taxonomy evidence: The parliamentary report separately discusses secure cables used for military and intelligence communications, drawing on public testimony about those systems. This supports a distinct communications purpose without disclosing operational details or procurement expenditure. ([publications.parliament.uk](https://publications.parliament.uk/pa/jt5901/jtselect/jtnatsec/xx.xx/report.html))

· Taxonomy evidence: The report describes military and intelligence communications systems operated by the state, supporting an institutional defense/security role. It does not identify the contracting agency or establish a specific ultimate-buyer procurement transaction. ([publications.parliament.uk](https://publications.parliament.uk/pa/jt5901/jtselect/jtnatsec/xx.xx/report.html))

37. Antarctic Subsea Science and Telecommunications Cable

· Taxonomy evidence: The science agency is exploring a telecommunications-capable submarine connection linking a research station with research-and-education networks, with scientific sensing integrated into the proposed cable. The page describes feasibility and information gathering, not completed commercial system delivery. ([nsf.gov](https://www.nsf.gov/od/opp/ant/antarctic-subsea-cable))

· Taxonomy evidence: The proposed project is sponsored by science-program and cyberinfrastructure offices, illustrating the research-institution mandate distinct from general civil administration. The information request does not establish a construction award or delivered sales. ([nsf.gov](https://www.nsf.gov/od/opp/ant/antarctic-subsea-cable))

38. Globalinx Data Center to Break Ground on Subsea Cable Fiber Optic Project

· Taxonomy evidence: The February xx.xx 2025 municipal announcement describes a carrier-neutral landing/data-center business expanding dedicated subsea landing infrastructure. This establishes a commissioning infrastructure-hosting role separate from the cable tenants and their traffic users. ([virginiabeach.gov](https://virginiabeach.gov/connect/news/globalinx-data-center-to-break-ground-on-subsea-cable-fiber-optic-project))

· Taxonomy evidence: The announced expansion concerns additional subsea cable landing bores and carrier-neutral landing-station infrastructure commissioned by the hosting business. The announcement is evidence of a dedicated landing-infrastructure buyer setting, not proof that the expansion had been completed. ([virginiabeach.gov](https://virginiabeach.gov/connect/news/globalinx-data-center-to-break-ground-on-subsea-cable-fiber-optic-project))

39. Crosslake Fibre

· Taxonomy evidence: The Crosslake Fibre case documents a disaggregated contracting approach, with the owner and its consultant selecting vendors and coordinating separately purchased project components. ([pioneerconsulting.com](https://www.pioneerconsulting.com/case_studies/crosslake-fibre-a-unique-submarine-cable-beneath-lake-ontario-connecting-toronto-to-buffalo/))

40. Work to start on East Micronesia Cable following contract signing

    · Taxonomy evidence: The June xx.xx 2023 government announcement records the project's management committee signing directly with the submarine-system supplier following a competitive tender. ([dfat.gov.au](https://www.dfat.gov.au/news/media-release/work-start-east-micronesia-cable-following-contract-signing))

    · Taxonomy evidence: The commissioning project committee, rather than an independent supply intermediary, signed the East Micronesia Cable contract with NEC. ([dfat.gov.au](https://www.dfat.gov.au/news/media-release/work-start-east-micronesia-cable-following-contract-signing))

    · Taxonomy evidence: The contracted project involves developing a new communications cable connection, including route work, cable manufacture, deployment and new landing infrastructure; the announcement is not a completion record. ([dfat.gov.au](https://www.dfat.gov.au/news/media-release/work-start-east-micronesia-cable-following-contract-signing))

41. Fugro responds to media reports on subsea cable work in the Atlantic Ocean

    · Taxonomy evidence: The September xx.xx 2026 disclosure identifies SubCom, rather than a government or ultimate network owner, as the customer contracting Fugro's telecommunications-cable survey work. This is a specific intermediated transaction example. ([fugro.com](https://www.fugro.com/news/business-news/2026/fugro-responds-to-media-reports-on-subsea-cable-work-in-the-atlantic-ocean))

42. Innovative Business Models for Expanding Fiber-Optic Networks and Closing the Access Gaps

    · Taxonomy evidence: The institutional business-model study distinguishes corporate submarine projects, consortium ownership arrangements and shared project vehicles, supporting ownership as a question separate from operation and financing. ([documents1.worldbank.org](https://documents1.worldbank.org/curated/en/xx.xx/pdf/xx.xx-xx.xx-xx.xx-2018-xx.xx-xx.xx-xx.xx-InnovativeBusinessModels.pdf))

    · Taxonomy evidence: Describes consortium members' ownership agreements and participation in construction and maintenance expenditure, and jointly held vehicles involving public and private stakeholders. ([documents1.worldbank.org](https://documents1.worldbank.org/curated/en/xx.xx/pdf/xx.xx-xx.xx-xx.xx-2018-xx.xx-xx.xx-xx.xx-InnovativeBusinessModels.pdf))

43. Delivering increased connectivity with our first private trans-Atlantic subsea cable

    · Taxonomy evidence: Google's July xx.xx 2018 announcement contrasts privately developed cable projects with consortium investments. It supports single-sponsor project context but does not establish complete current title to every associated asset. ([blog.google](https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/delivering-increased-connectivity-with-our-first-private-trans-atlantic-subsea-cable/))

    · Taxonomy evidence: The same announcement explicitly describes partners forming a consortium to build a cable together, separately from purchasing transmission capacity. ([blog.google](https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/delivering-increased-connectivity-with-our-first-private-trans-atlantic-subsea-cable/))

44. SUBCO

    · Taxonomy evidence: The government export-finance case documents additional equipment purchases to upgrade capacity on existing Indigo cable segments. This supports upgrade demand, separately from the excluded purchase of network capacity also discussed in the case. ([exportfinance.gov.au](https://www.exportfinance.gov.au/customer-stories/subco/))

45. Liberty Networks Delivers Next-Gen Subsea Connectivity to Future Proof the Region
    - Taxonomy evidence: The August xx.xx 2025 operator announcement describes modernization and reconfiguration of the existing MAYA-xx.xx system with upgraded terminal equipment. Its expected completion date is not proof of completion or extension beyond original design life. ([libertynetworks.com](https://libertynetworks.com/news-and-events/liberty-networks-delivers-next-gen-subsea-connectivity-future-proof-region))
    - Taxonomy evidence: The operator separately announces removal and recovery of a retired portion of the existing trunk alongside the upgrade project, demonstrating a distinct retirement work scope. Recovered-material sales are outside the working revenue boundary. ([libertynetworks.com](https://libertynetworks.com/news-and-events/liberty-networks-delivers-next-gen-subsea-connectivity-future-proof-region))
46. Final Policy and Permit Guidance for Submarine Cable Projects
    - Taxonomy evidence: The guidance treats installation, operations, maintenance, repairs and removal as distinguishable submarine-cable project activities. Its jurisdiction is specified U.S. national marine sanctuaries, not all global deployments. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))
    - Taxonomy evidence: The guidance separately recognizes continuing cable operations, planned maintenance, routine inspections and monitoring over the project's life. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))
    - Taxonomy evidence: The guidance distinguishes emergency fault repairs from planned maintenance and routine monitoring. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))
    - Taxonomy evidence: The guidance recognizes end-of-project cable removal and associated financial responsibility, while allowing case-specific consideration of leaving cables in place. It does not establish universal recovery obligations. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))
47. Recommendation ITU-T G.978 (05/2025) - Characteristics of optical fibre submarine cables
    - Taxonomy evidence: Recognizes five submarine optical-cable protection classes: LW, LWP, SA, DA and RA. Their typical depth ranges overlap, so protection construction is not a substitute for water-depth classification. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: LW identifies the separately recognized lightweight protection class. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: LWP identifies the separately recognized lightweight protected class. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: SA identifies the separately recognized single-armored class. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: DA identifies the separately recognized double-armored class. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: RA identifies the separately recognized rock-armored class. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

1.4. Years Considered for the Study

The study covers 2024 through the forecast horizon ending in 2032. The historical year is 2024, the base year is 2025, the estimated year is 2026, and the forecast endpoint is 2032. These roles distinguish historical observations from estimated and forward-looking interpretation.

Figure 1. Global Submarine Communication Cable System Market, Years Considered for the Study

1.5. Currency Considered for the Study

The reporting currency is the United States dollar (USD). Monetary market values use an absolute-value scale.

1.6. Language Considered for the Study

The study is published in American English.

1.7. Key Stakeholders

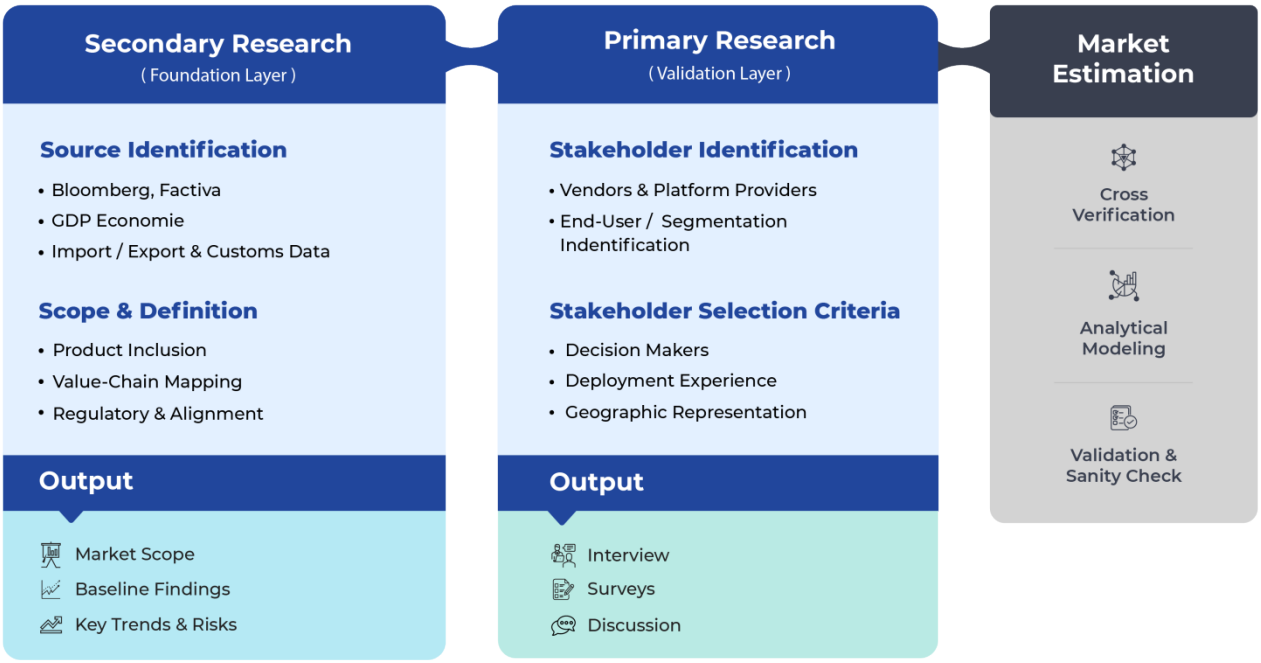
- Telecommunications and Cable Network Operators: assess system procurement, supplier qualification, terminal switching, ownership responsibilities, and lifecycle-support arrangements.
- Cloud and Content Providers: evaluate direct system participation and interconnection requirements, including delivery accountability and the relationship between ownership and purchasing authority.
- Cable Landing and Colocation Operators: evaluate landing works, station fitout, hosting, facility operations, and the contractual interfaces between system owners and facility providers.
- Civil Government and Public-Service Institutions: evaluate procurement eligibility, public-service connectivity requirements, permissions, and responsibilities associated with publicly commissioned infrastructure.

- Defense and Security Agencies: assess commercial supplier eligibility, contracting responsibilities, and support commitments for the included connectivity application.
- Research and Education Institutions: distinguish connectivity requirements from optional sensing functions and assess ownership, integration, and continuing-support obligations.
- Industrial and Commercial Enterprises: evaluate the procurement and support requirements of enterprise and offshore connectivity within the covered system contexts.
- Equipment and software suppliers: establish the relevance and commercial status of specific offerings, buyer qualification requirements, and the conditions for participation in turnkey or disaggregated delivery.
- Infrastructure, professional, marine, and operational service providers: assess package boundaries, integration interfaces, contracting access, and responsibility across system development and continuing operations.
- Permitting authorities and infrastructure-policy bodies: assess the jurisdiction-specific permissions and public-interest obligations associated with landing, deployment, ownership, and continuing operation.
- Investors, lenders, insurers, and commercial advisers: distinguish announced activity from committed and delivered projects, and evaluate ownership, contractual exposure, and the comparability of bundled commercial scopes.

2. Research Methodology

2.1. Introduction

The Submarine Communication Cable System study examines the commercial supply of systems and their included equipment, software, infrastructure works, and lifecycle services within a Global boundary. Its approach connects buyer requirements and delivery responsibilities to documented offerings and project activity, while keeping classification separate from proof of qualification or commercial success.



Qualitative interpretation explains the conditions that could affect purchasing, switching, access, and support. Quantitative interpretation must retain the same offering and project boundaries. Neither a plausible market mechanism nor a technology classification independently establishes a monetary estimate.

2.2. Research Design

The study separates offering identity, purchasing responsibility, project status, and commercial interpretation. For a submarine communication cable system, evidence that an organization offers equipment or services answers a different question from evidence that a buyer has commissioned a system, qualified a supplier, or accepted delivery.

Coverage follows the included offering categories, buyer sectors, operating contexts, and lifecycle stages. Observations should support conclusions only within their demonstrated scope. Conditional implications-such as potential switching flexibility or a viable delivery arrangement-must retain the prerequisites that distinguish them from established commercial facts.

Figure 2. Global Submarine Communication Cable System Market, Research Design

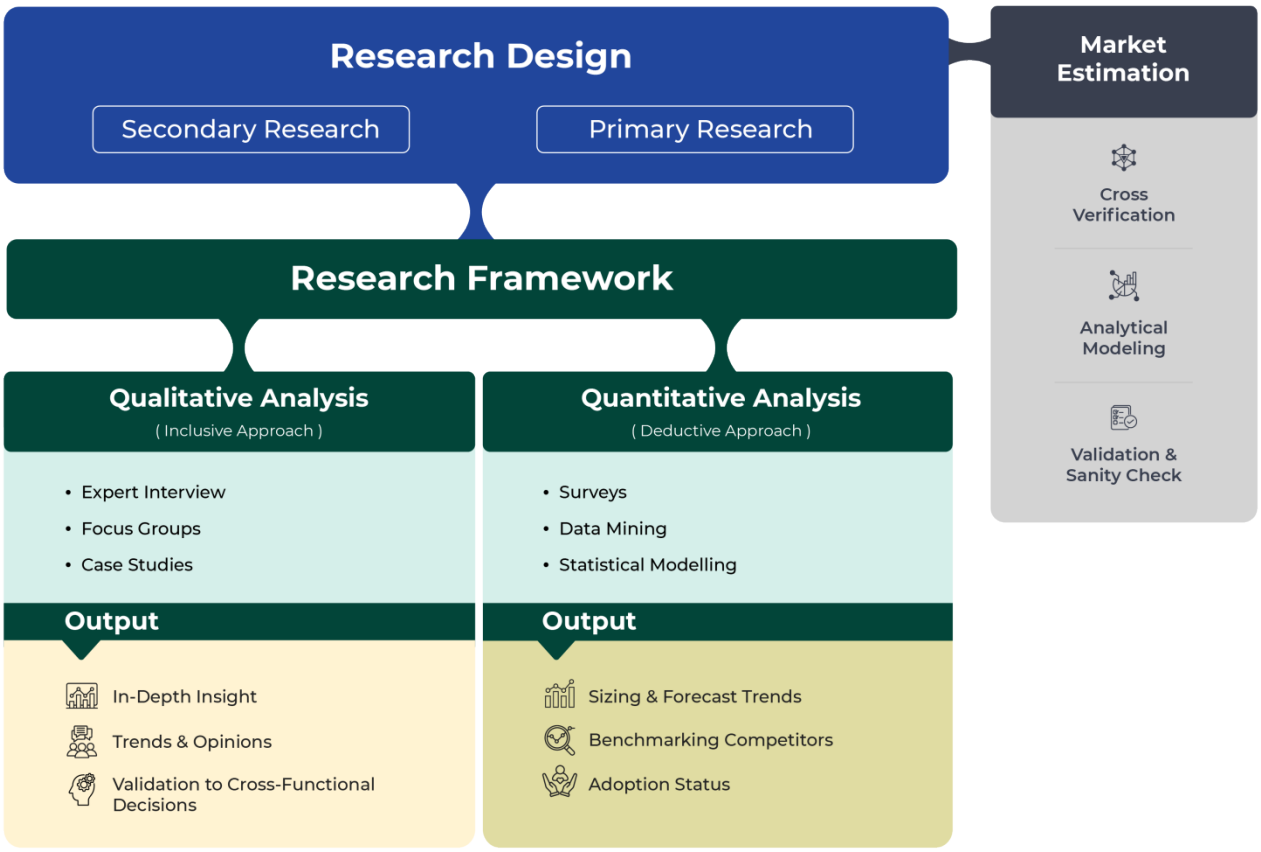
2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary evidence provides the documentary basis for separating what is offered, who purchases or owns it, what a commercial commitment includes, and what status a project has reached. Supplier descriptions can support declared offering identity, while project and ownership records address participation and responsibility. Records of permissions address the legal status of the relevant activity within their stated jurisdiction.



These evidence roles must not be substituted for one another. A product description does not establish a purchase or buyer qualification; a project announcement does not establish completed delivery; and permission for an activity does not establish its commercial viability. Interpretation must preserve the subject, scope, and status actually supported by each document.

2.3. Research Framework

The framework connects the market definition to the accepted taxonomy, then connects specific offerings to suppliers, buyers, and contractual responsibilities. Supplier relevance is assessed through participation in included offerings, not through the entirety of a corporate portfolio. Buyer relevance is distinguished from the connectivity application that a system serves.

Competitive comparisons should match the offering, operating context, and lifecycle stage before interpreting procurement alternatives. Repeater Architecture, Terminal Interoperability, Procurement Model, Contracting Channel, and Ownership Structure provide complementary lenses for examining eligibility and accountability; none alone establishes an attractive opportunity or a preferred supplier.

Figure 3. Global Submarine Communication Cable System Market, Research Framework

2.3.1. Qualitative Analysis

Qualitative analysis addresses buyer qualification, purchasing authority, terminal interoperability, integration accountability, landing access, and lifecycle support. It asks what a supplier or contractor must demonstrate for the relevant offering and buyer, rather than treating participation in a broad technology category as evidence of suitability.

Commercial comparisons examine the conditions under which a buyer could change terminal suppliers, separate delivery packages, add sensing capabilities, or extend an existing system's

life. These choices require attention to contractual responsibility, documented compatibility, approvals, and support obligations; the framework does not presume that openness, disaggregation, or a newer architecture is inherently preferable.

2.3.2. Quantitative Analysis

Quantitative interpretation must retain the study's year roles, USD reporting currency, and absolute-value scale. Comparability also requires an identifiable offering scope and a clear distinction between an announcement, a commercial commitment, delivery, and operation. These states are not interchangeable monetary observations.

The segmentation axes provide independent views of the same commercial activity, not additional totals to be added together. An observation classified by offering, buyer, architecture, ownership, and lifecycle remains subject to one consistent commercial boundary. Shared Multipurpose Connectivity and contracts spanning several offering categories require explicit attribution before comparisons can be interpreted.

2.4. Market Size Estimation

Market-size interpretation is bounded by the included equipment, software, infrastructure works, and services associated with submarine communication cable systems. Category inclusion establishes relevance to the study, but does not by itself establish that separately described commercial activity can be added without overlap.

A complete system award and the equipment or subcontracted services within it may describe nested activity. Monetary interpretation therefore requires evidence of the commercial perimeter represented by each observation. Downstream connectivity services and unrelated supplier activities must not be incorporated merely because they depend on, or share an organization with, the covered systems.

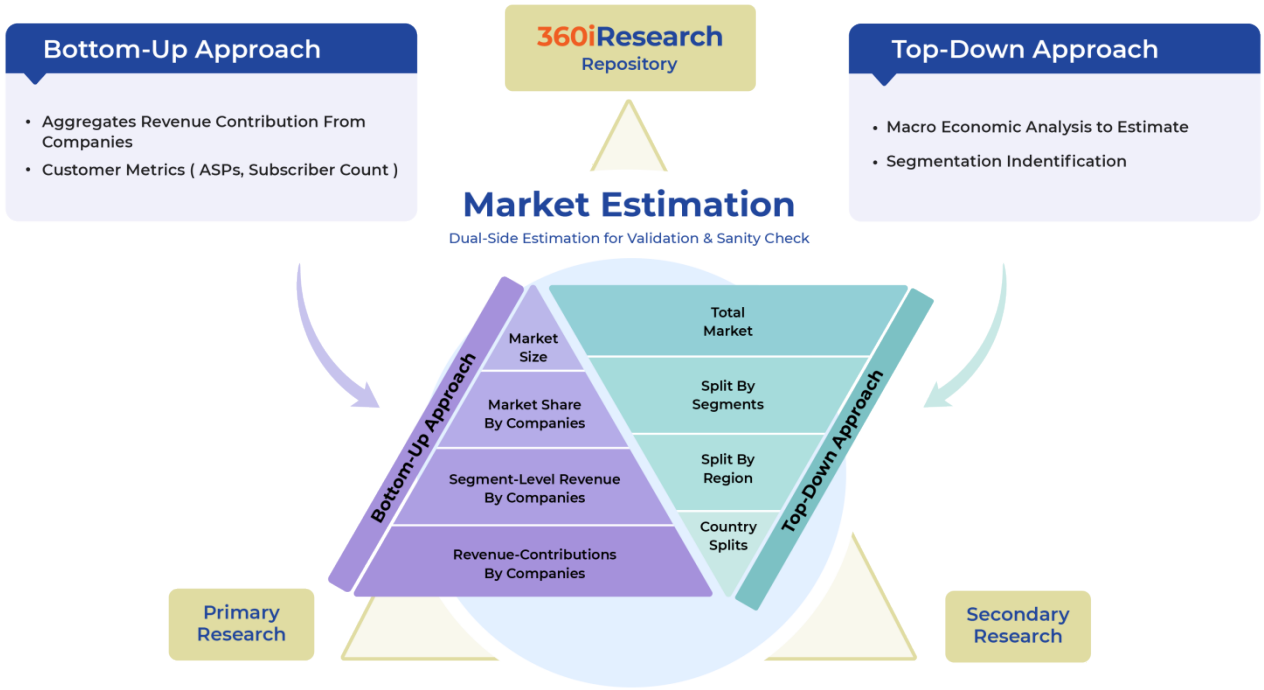
2.4.1. Top-Down Approach

A top-down perspective provides a scope check against broader descriptions of corporate or infrastructure activity. Such descriptions cannot be interpreted as the submarine communication cable system market without evidence connecting them to the included offerings and separating unrelated business activity.

Corporate totals, telecommunications service activity, and general infrastructure reporting have different boundaries from this study. Partial correspondence supports only the portion that can be defensibly attributed; it does not justify assigning an unexplained remainder to the market.

2.4.2. Bottom-Up Approach

A bottom-up perspective requires identifiable commercial activity associated with individual included offerings or systems. Separate equipment supply, software, landing works, marine services, and operational support must remain distinguishable from a complete delivery package when interpreting their contribution.



Descriptions of the same system by its owner, supplier, integrator, and marine contractor do not automatically represent independent activity. Product listings and project participation establish relevance only within their documented scope; neither is sufficient on its own to establish an additive monetary contribution.

2.5. Data Triangulation

Triangulation addresses consistency of identity, offering scope, project status, and commercial responsibility across evidence. Several documents repeating the same underlying announcement do not constitute independent confirmation. Apparent agreement must be assessed against what each document actually establishes.

Differences between an owner's system description, a supplier's package description, and a contractor's participation may reflect distinct scopes rather than contradictory facts. Interpretation must preserve those boundaries and keep unresolved differences conditional. Qualitative explanations can challenge commercial assumptions but cannot replace independent support for numerical conclusions.

Figure 4. Global Submarine Communication Cable System Market, Data Triangulation

2.6. Research Outcomes

The intended outcomes are a defensible account of which offerings buyers require, what establishes supplier eligibility, how delivery and ownership arrangements allocate responsibility, and which conditions affect procurement, switching, and lifecycle support. The analysis should distinguish a documented commercial capability from an announced offering or an unverified qualification claim.

Decision support should identify the evidence required before committing to a supplier, contracting arrangement, upgrade, or new system, together with the alternatives and remaining uncertainties. Quantitative interpretation must remain consistent with these commercial boundaries rather than substituting monetary estimates for evidence of buyer access or delivery capability.

2.7. Research Assumptions

- Offering relevance is tied to submarine communication cable systems. Separately supplied fiber, components, software, works, and services remain included, while unrelated activities in the same supplier's portfolio do not establish additional market participation.
- Buyer Sector and Connectivity Application describe different relationships. Purchasing authority must be distinguished from the beneficiaries of connectivity, particularly for Shared Multipurpose Connectivity and Shared Ownership.
- Procurement Model and Contracting Channel do not independently establish responsibility for every delivery package. Conclusions about supplier access or owner obligations depend on the documented allocation of integration, acceptance, and support responsibilities.
- Forward-looking commercial interpretation is conditional on the applicable financing, permissions, procurement commitments, and delivery obligations. An announced system or upgrade is not assumed to become operational merely because its category is included in the study.
- Architecture, sensing, and cable-construction classifications identify comparison contexts rather than interchangeable capabilities. Supplier suitability and switching conclusions require evidence specific to the relevant system and buyer requirements.

2.8. Research Limitations

- A bundled system description can encompass equipment, landing works, integration, and marine services. Where those scopes are not distinguishable, the description cannot establish directly comparable standalone category observations or independent contributions.
- Announcements, awards, delivery, and operational status support different conclusions about project realization. Evidence for one milestone cannot establish another, limiting conclusions about the timing of commercial activity.
- An Open Cable Interfaces designation or a supplier portfolio listing does not establish qualification for a particular buyer or system. Switching and sourcing conclusions remain limited to the compatibility, contractual permissions, and support responsibilities actually demonstrated.
- Cross-border systems and shared ownership can connect several jurisdictions and organizations through the same underlying asset. Country presence, landing location,

or ownership participation alone cannot establish a complete local monetary attribution.

- Inclusion of Multicore Fiber, Fiber-Based Sensing, or Integrated Sensor Packages does not establish equivalent commercial maturity across suppliers or projects. Capability comparisons must distinguish announced offerings from documented delivery and operation.

3. Executive Summary

3.1. Introduction

The Global Submarine Communication Cable System market is defined commercially by the deliverable and responsibility purchased, not by the cable asset alone. Complete systems coexist with separately supplied components, software, landing works, integration, marine services, and operational support. NEC Corporation's end-to-end proposition and Ciena's announced MONET and SACS equipment-and-software upgrade illustrate different competitive positions. Buyers should first distinguish improvement of an installed route from a requirement for a physically independent connection; the former retains the existing asset's geographic dependencies.

Cloud-network integration and cable resilience create different purchasing motives. Google's planned Sol system addresses its own cloud-network and landing requirements, while European cable-hub and repair initiatives address monitoring, coordination, and recovery readiness. Neither cloud sponsorship nor public support automatically creates an open wholesale channel or a supplier award. The principal business choice is therefore the appropriate package and accountable purchaser, with commitments tied to qualification, access, acceptance, and funded continuing obligations.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC markets end-to-end submarine-system solutions through maintenance, supporting a complete-system comparison boundary. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. Strengthening network resilience with the Sol transatlantic cable
   · Google's Sol announcement links the planned system to its cloud network, resilience, and terrestrial interconnection requirements; it is not operating confirmation. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
3. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena announced planned equipment and network-control software deployment on Angola Cables' existing MONET and SACS systems, distinct from new physical-route construction. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
4. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The Commission announced Regional Cable Hubs and a repair-capacity call addressing monitoring, detection, coordinated response, and resilience. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))

3.2. CXO Perspective

Asset-owner executives should separate control requirements from connectivity requirements when allocating capital: Sole Ownership, Shared Ownership, and purchased connectivity provide different rights and retained obligations. Procurement choice should follow coordination capability. Owner-Led Disaggregated Delivery preserves package selection but requires funded interface management, acceptance authority, and remedies; Supplier-Led

Turnkey Delivery is a defensible alternative where the owner cannot undertake those responsibilities.

Equipment incumbents can pursue approved installed-system packages, while specialist entrants must establish whether an owner or system supplier controls their package award. Open Cable Interfaces support sourcing choice without conferring system-specific approval. U.S.-connected buyers must separately verify the operative FCC provision, counterparty role, and license conditions. The framework also provides conditional processing simplification, so regulatory screening should not become an unsupported universal exclusion.

For operators, resilience investment should close a documented responsibility gap rather than duplicate existing coverage. ASN's warranty and optional support, Global Marine's maintenance exclusions, and managed-monitoring offerings demonstrate why equipment assistance, supervision, and marine-restoration entitlement require separate treatment. Additional services are defensible where coverage, escalation responsibility, and continuing purchasing obligations are explicit.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC's integrated offering establishes consolidated supply as a procurement alternative; individual retained obligations remain contract-specific. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN separates warranty coverage, optional assistance, customer responsibilities, and marine-support offerings.
   ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
3. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · The named operator's planned installed-system purchase establishes an equipment account route, not another owner's approval or completed deployment.
   ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
4. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · ITU-T G.xx.xx states a multivendor transmission-equipment objective; it does not establish individual-system commercial qualification. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
5. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Global Marine excludes shallow-water sections and beach joints unless specifically contracted, supporting agreement-specific coverage assessment.
   ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
6. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - FCC 26-42
   · The FCC's July xx.xx 2026 publication adopts terminal-owner oversight and security conditions, distinguishes delayed provisions, and provides conditional processing simplification. Transaction-specific operative requirements require verification. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2026-xx.xx-xx.xx/pdf/2026-xx.xx.pdf))
7. Disaggregated System Supply
   · Pioneer offers package selection, procurement formation, permitting oversight, implementation coordination, and project management for disaggregated systems.
   ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))

8. DigitalMarine
   · DigitalMarine is marketed with alerting and continuing network-operations assistance, distinct from a marine-maintenance agreement. ([fibersense.com](https://fibersense.com/digitalmarine/))
9. Fugro responds to media reports on subsea cable work in the Atlantic Ocean
   · Fugro identifies SubCom as its contractual customer for the disclosed Argentina telecommunications-cable survey, establishing an immediate system-supplier purchaser. ([fugro.com](https://www.fugro.com/news/business-news/2026/fugro-responds-to-media-reports-on-subsea-cable-work-in-the-atlantic-ocean))
10. Delivering increased connectivity with our first private trans-Atlantic subsea cable
    · Google distinguishes purchased connectivity, consortium participation, and private development, stating that it uses a combination to meet network requirements. ([blog.google](https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/delivering-increased-connectivity-with-our-first-private-trans-atlantic-subsea-cable/))

3.3. New Revenue Opportunities

The supported revenue themes are qualified terminal and software packages for installed-system operators; landing access and facility operations for cable sponsors; complementary monitoring and maintenance for defined lifecycle needs; owner representation where disaggregation creates a funded coordination mandate; and scientific sensing for an identified additional sponsor. Public and institutional opportunities depend on an authorized package rather than sector participation or funding alone. These routes remain conditional on the relevant approvals and contractual rights. Combined Fiber and Sensor-Package Sensing requires separate asset-level verification of both purchased scopes and operating status. The Opportunity Mapping section assesses the distinct buyers and access barriers.

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google identifies DC BLOX and Telxius as planned landing partners, supporting sponsor-specific landing demand rather than inferred outside-customer access. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
2. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · The MONET and SACS announcement supports an identifiable installed-network equipment-and-software opportunity, subject to account-specific access conditions. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
3. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The FSM program combines international connectivity with domestic distribution, open-access institutions, and regulatory reform, supporting distinct public-connectivity purchasing needs. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
4. CEF-Digital new call open: €20 million to ensure fast emergency repair of submarine cables in the Baltic Sea
   · The February 2026 Baltic repair pilot restricted applicants to public emergency-response entities, distinguishing grant access from a private supplier's purchasing relationship. ([hadea.ec.europa.eu](https://hadea.ec.europa.eu/news/cef-digital-new-call-open-eu20-million-ensure-fast-emergency-repair-submarine-cables-baltic-sea-2026-xx.xx-05_en))

5. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · The recommendation supports multivendor participation as a premise for conditional terminal opportunities, with actual buyer approval requiring separate verification. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
6. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Published maintenance exclusions support complementary purchasing for a verified obligation, not an assumed gap in every agreement. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
7. Disaggregated System Supply
   · The owner-side service offering supports a separately purchasable coordination mandate; delegated expenditure and acceptance authority require agreement. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))
8. DigitalMarine
   · The managed-monitoring offering supports a defined lifecycle supervision purchase, subject to agreed asset and responsibility boundaries. ([fibersense.com](https://fibersense.com/digitalmarine/))
9. IP e ASN assinam contrato para construção de Novo Anel CAM
   · The Atlantic CAM construction-contract announcement includes a SMART component and IPMA collaboration, establishing a named scientific constituency in contracted development. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))
10. Alcatel Submarine Networks (ASN) commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
    · ASN's March xx.xx 2023 release announces ongoing development combining SMART and other sensing technologies; it does not establish the asset-level operating reference required by the assessed combined-sensing proposal. ([asn.com](https://www.asn.com/press-release/alcatel-submarine-networks-asn-commences-development-of-climate-change-solution-by-integrating-scientific-sensors-and-sensing-technologies-into-submarine-telecom-systems/))
11. Subsea Landing Solutions - Telxius
    · Telxius markets landing-station planning, operation, maintenance, facility use, and upgrades as distinct service offerings. ([telxius.com](https://telxius.com/en/our-solutions/infraestructura/subsea-landing-solutions/))

3.4. Next-Generation Business Models

Established service offerings extend commercial relationships beyond initial system delivery: ASN separates optional and renewed support, FiberSense markets managed monitoring, and Telxius offers landing-facility operations. These are documented alternatives, not evidence of universal adoption. Owners can retain supervision or facility control, or purchase defined continuing services; outsourcing substitutes contractual dependence for selected internal duties and does not automatically confer marine-repair priority.

Specialist participation can follow Direct Asset-Owner Contracting or Intermediated Contracting. Fugro's disclosed SubCom relationship supports an integrator-led route for a defined survey package, while direct purchasing remains an alternative where the owner controls the award and can coordinate the handoff. The model should follow the actual purchaser and allocation of acceptance and support responsibility rather than presume that intermediation transfers all project liability.

Sources & Evidence

1. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN describes optional services and maintenance-contract renewal after warranty, establishing continuing support relationships beyond initial delivery. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
2. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Marine maintenance is governed by scheduled coverage, exclusions, and zone arrangements; another service purchase does not establish marine-repair priority. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
3. DigitalMarine
   · DigitalMarine combines monitoring with continuing operations support, establishing a managed-service alternative to owner-administered supervision. ([fibersense.com](https://fibersense.com/digitalmarine/))
4. Fugro responds to media reports on subsea cable work in the Atlantic Ocean
   · The disclosed SubCom relationship supports an integrator-led specialist channel for that project, not a universal contracting model or liability transfer. ([fugro.com](https://www.fugro.com/news/business-news/2026/fugro-responds-to-media-reports-on-subsea-cable-work-in-the-atlantic-ocean))
5. Subsea Landing Solutions - Telxius
   · The landing-operation offering supports a continuing outsourced facility model rather than requiring owner-operated development; customer access remains contractual. ([telxius.com](https://telxius.com/en/our-solutions/infraestructura/subsea-landing-solutions/))

3.5. Industry Roadmap

During 2026-2027, commitment gates are facility acceptance, continuing support, and identifiable procurement authority. DC BLOX expects Palm Coast to operate in the first quarter of 2027; dependent buyers should require site-specific access and acceptance. Operators should settle support entitlements at service entry or renewal, while suppliers should distinguish European resilience funding from a contracted vendor mandate.

During 2028-2029, Candle's scheduled 2028 operation and Petal's scheduled 2029 operation are monitoring milestones, not assured outcomes. Petal assigns funding and operation to Meta, system construction to NEC Corporation, and Multicore Fiber supply to Sumitomo Electric Industries, Ltd. Development-stage participation and procurement requiring operating references remain different choices; the latter should stay conditional until the relevant milestone is documented.

During 2030-2032, retirement decisions should turn on continuing need, asset rights, and jurisdiction-specific obligations rather than assumed replacement by age. Recovery contracting and asset transfer allocate control differently, and NOAA's sanctuary guidance permits case-specific consideration of retaining cable in place. Public sponsors should also address binding domestic-access and operating-institution constraints before assuming another international cable resolves the service need.

Sources & Evidence

1. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore

   · NEC's Candle announcement schedules operation for 2028 and identifies participating organizations, a management committee, and a Philippine landing-party role. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))

2. ASN End to End Services & Solutions for Submarine Cable Systems

   · ASN identifies support renewal before warranty expiry and optional services to discuss before service entry. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))

3. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System

   · Petal is scheduled to operate in 2029. Meta will fund and operate it, NEC will construct the system, and Sumitomo Electric will supply Multicore Fiber. These are announced roles and milestones, not completed operation. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))

4. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)

   · The World Bank identifies continuing domestic-network and institutional investment needs in FSM, supporting conditional attention to local complements rather than international assets alone. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))

5. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity

   · The public hub and repair initiatives establish institutional commitments, not private vendor appointments; procurement conversion remains a commercial condition. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))

6. CEF-Digital new call open: €20 million to ensure fast emergency repair of submarine cables in the Baltic Sea

   · The pilot's public-applicant restriction establishes a procurement gate; the funding call does not appoint a private vendor. ([hadea.ec.europa.eu](https://hadea.ec.europa.eu/news/cef-digital-new-call-open-eu20-million-ensure-fast-emergency-repair-submarine-cables-baltic-sea-2026-xx.xx-05_en))

7. Final Policy and Permit Guidance for Submarine Cable Projects

   · NOAA's national marine sanctuary guidance addresses removal funding and financial assurance while permitting case-specific consideration of retaining cable in place; it is not a global removal rule. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))

8. Our Services - Mertech Marine

   · Mertech markets retired-cable recovery and recycling and describes acquiring out-of-service cable from owners, supporting separate service and asset-transfer relationships. ([mertechmarine.co.za](https://mertechmarine.co.za/services/))

9. Cable Landing Stations - DC BLOX

   · DC BLOX describes Palm Coast as expected to operate in the first quarter of 2027, distinct from existing Myrtle Beach infrastructure; this is not customer acceptance. ([dcblox.com](https://www.dcblox.com/cable-landing-stations/))

4. Market Overview

4.1. Introduction

The Global Submarine Communication Cable System market is a project-based infrastructure market with distinct equipment, component, software, construction, integration, marine-service, and operational-support purchases. ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Architecture, ownership, and procurement classifications describe different commercial relationships; they do not make the included categories interchangeable or additive.

Participants occupy overlapping but distinguishable roles. ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ The market therefore combines continuing support for installed infrastructure with procurement for new systems and upgrades.

The commercially relevant comparison is the deliverable and responsibility being purchased: a complete system, a qualified component, an upgrade, a landing facility, or a lifecycle service. ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ An announced project demonstrates commercial intent or a development commitment, not completed operation, and an included category does not establish every supplier's capability within it.

Figure 5. Global Submarine Communication Cable System Market Size, 2017-2040 (USD MILLION, GROWTH %)

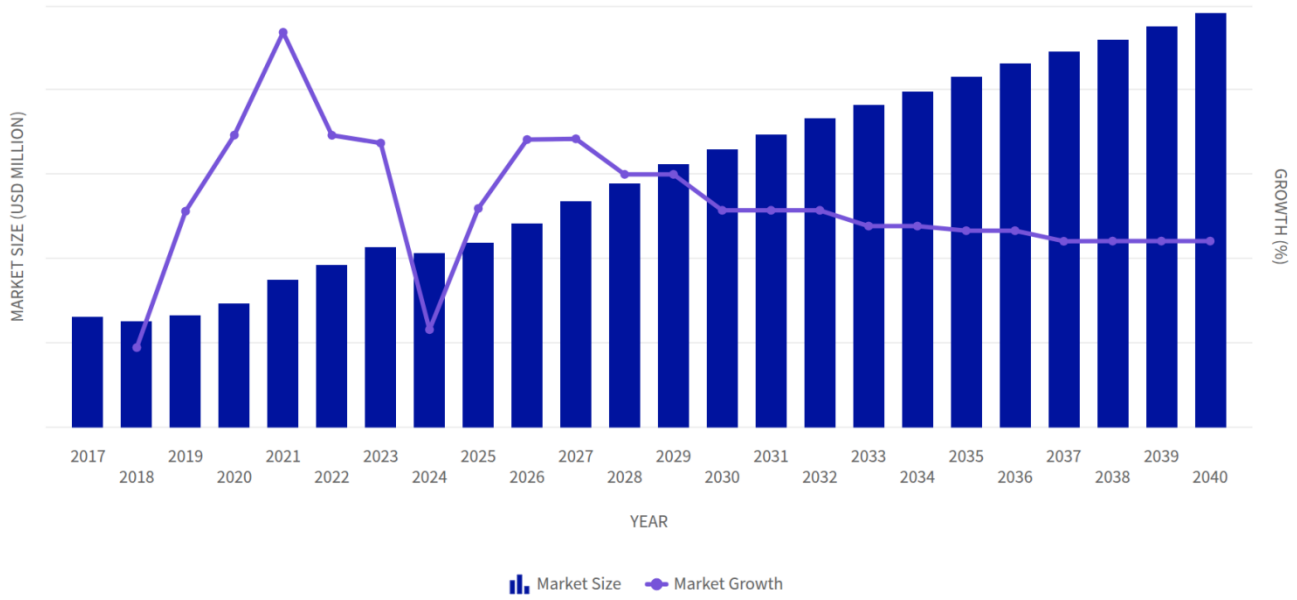


Table 2. Global Submarine Communication Cable System Market Size, 2017-2032 (USD Million)

World	2023	2024	2025	2026	2027	2032	CAGR (%)
Global	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   - NEC publicly offers end-to-end submarine-system solutions extending from development to maintenance. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   - The September xx.xx 2025 announcement identifies several participating network organizations in the planned Candle system. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))
   - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
3. ViaTunisia subsea segment reaches Ready for Service
   - Orange announced ViaTunisia's operational availability on June xx.xx 2026. ([newsroom.orange.com](https://newsroom.orange.com/viatunisia-subsea-segment-reaches-ready-for-service/?lang=eng))
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.

7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.

12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

4.2. Key Growth Contribution

Cloud-network requirements can translate into submarine-system purchasing through either a new connection or equipment and software procurement on an installed asset. Google's stated Sol rationale and Angola Cables' announced MONET and SACS upgrade illustrate these distinct routes. Serving the latter requires approved equipment participation, integration capability, and continuing support rather than complete wet-plant delivery. Its material counterforce is the owner's objective: an upgrade retains existing geographic dependencies and cannot substitute for a separately required physical route.

Figure 6. Global Submarine Communication Cable System Market, Key Growth contribution, 2025-2032

Figure 7. Global Submarine Communication Cable System Market, Forecast growth by country, 2025-2032 (CAGR %)

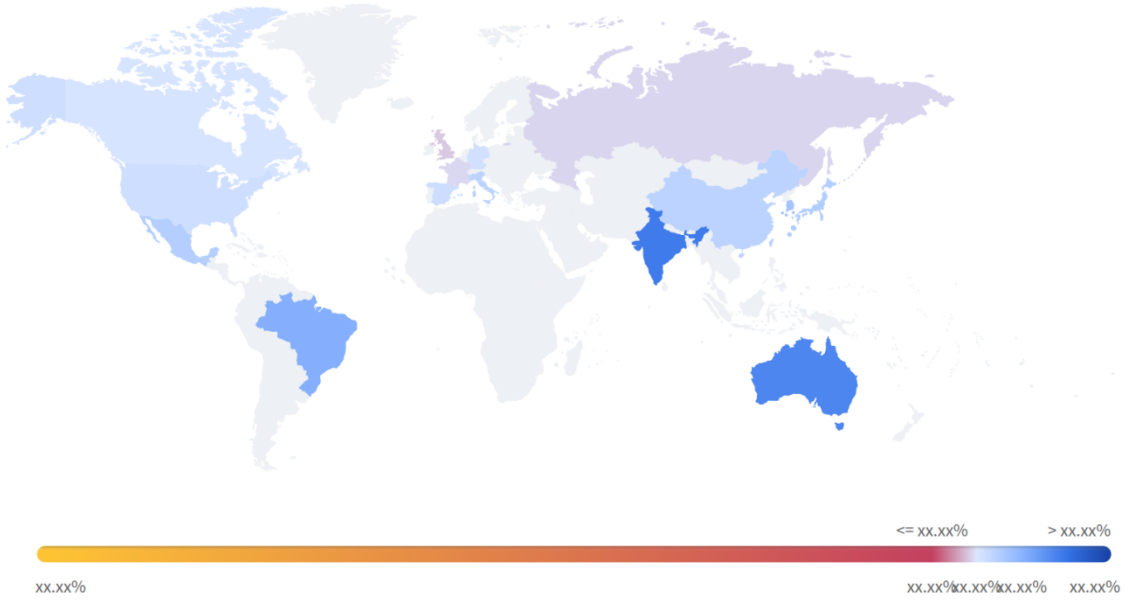

Table 3. Global Submarine Communication Cable System Market, Key Growth Contribution, 2025-2032

Scope	Leading category	Added value (USD Million)	Growth share (%)	CAGR (%)
Global - Buyer Sector	xx.xx	xx.xx	xx.xx	xx.xx
Global - Cable Protection Construction	xx.xx	xx.xx	xx.xx	xx.xx
Global - Connectivity Application	xx.xx	xx.xx	xx.xx	xx.xx
Global - Contracting Channel	xx.xx	xx.xx	xx.xx	xx.xx
Global - Country	xx.xx	xx.xx	xx.xx	xx.xx
Global - Optical Fiber Core Architecture	xx.xx	xx.xx	xx.xx	xx.xx
Global - Ownership Structure	xx.xx	xx.xx	xx.xx	xx.xx
Global - Procurement Model	xx.xx	xx.xx	xx.xx	xx.xx
Global - Product and Service Offering	xx.xx	xx.xx	xx.xx	xx.xx
Global - Project Lifecycle	xx.xx	xx.xx	xx.xx	xx.xx
Global - Region	xx.xx	xx.xx	xx.xx	xx.xx
Global - Repeater Architecture	xx.xx	xx.xx	xx.xx	xx.xx
Global - Sensing Integration	xx.xx	xx.xx	xx.xx	xx.xx
Global - System Topology	xx.xx	xx.xx	xx.xx	xx.xx
Global - Terminal Interoperability	xx.xx	xx.xx	xx.xx	xx.xx
Global - Water Depth Class	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google connects planned Sol investment with cloud and AI services, network reliability, and terrestrial interconnection, supporting an owner-specific purchasing motive. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
2. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena's September xx.xx 2026 announcement describes planned equipment and network-control software deployment on Angola Cables' existing MONET and SACS systems, establishing an installed-asset purchasing example rather than completed deployment. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
3. Nokia in 2024 - Annual Report on Form 20-F
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
5. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
6. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.

7. ICPC Media Enquiries & Frequently Asked Questions

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx-xx.xx% human-related faults and damage concentration in shallower water; supports a shallow-skewed repair proxy, not a measured global depth-value share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx-xx.xx% human-related faults and damage concentration in shallower water; supports a shallow-skewed repair proxy, not a measured global depth-value share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stable fault frequency prevents automatically scaling repair spending with every added cable kilometre in the depth and lifecycle forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stable fault frequency prevents automatically scaling repair spending with every added cable kilometre in the depth and lifecycle forecast.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx systems constrain the installed-asset pool used for upgrade spending; the upgrade interval and ticket remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx systems constrain the installed-asset pool used for upgrade spending; the upgrade interval and ticket remain assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aggregate system stock constrains continuing support and maintenance activity, not its realized price.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aggregate system stock constrains continuing support and maintenance activity, not its realized price.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-xx.xx annual faults support the xx.xx-event working repair pool and qualify growth proportional to installed length.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-xx.xx annual faults support the xx.xx-event working repair pool and qualify growth proportional to installed length.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.

8. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
9. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ciena identifies direct and indirect channels and resellers/integrators; the filing does not disclose submarine-specific channel percentages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ciena identifies direct and indirect channels and resellers/integrators; the filing does not disclose submarine-specific channel percentages.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Decreased EMEA sales to submarine operators qualify uniform upgrade-growth assumptions; overall regional revenue is not used as submarine revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Decreased EMEA sales to submarine operators qualify uniform upgrade-growth assumptions; overall regional revenue is not used as submarine revenue.

10. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.
11. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
12. Meta, SoftBank, IPS, TM, XLSmart, and NEC to build the Candle Subsea Cable System
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2025 announcement identifies an xx.xx-km system, multiple participants, a management committee and planned 2028 operation; supports shared-project context without supplying ownership-attributable annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2025 announcement identifies an xx.xx-km system, multiple participants, a management committee and planned 2028 operation; supports shared-project context without supplying ownership-attributable annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A cloud-associated multi-party project is counterevidence to automatically classifying all cloud-related purchasing as sole-owned.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A cloud-associated multi-party project is counterevidence to automatically classifying all cloud-related purchasing as sole-owned.

13. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
14. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
15. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
16. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
17. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
18. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

19. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
20. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
21. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
22. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
23. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.

24. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.
25. Resolução do Conselho de Ministros n.º 183/2025, de 26 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.
26. Tonga-Fiji Submarine Cable Project: Completion Report, December 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an international turnkey contract initially valued at USD xx.xx and subsequently USD xx.xx; supports consolidated procurement feasibility, not global frequency.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an international turnkey contract initially valued at USD xx.xx and subsequently USD xx.xx; supports consolidated procurement feasibility, not global frequency.
27. ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.

28. Liberty Networks, Gold Data, Sparkle, and SubCom Announce Execution and Enforcement of MANTA Subsea Cable System Contract
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports consolidated supplier-led delivery on an open-interface project; the announcement does not reveal annual recognized contract revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports consolidated supplier-led delivery on an open-interface project; the announcement does not reveal annual recognized contract revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies three participating cable-system partners, supporting shared commercial interests rather than equating sponsor sector with sole ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies three participating cable-system partners, supporting shared commercial interests rather than equating sponsor sector with sole ownership.
29. Crosslake Fibre - Pioneer Consulting case study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents a xx.xx-km project using separately selected suppliers and more than two dozen contractors; supports owner-led disaggregation with retained coordination requirements.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents a xx.xx-km project using separately selected suppliers and more than two dozen contractors; supports owner-led disaggregation with retained coordination requirements.
30. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.
31. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies a planned xx.xx-km system funded and operated by Meta, with expected 2029 operation; constrains single-sponsor forecast plausibility without proving title to all associated assets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Petal is an approximately xx.xx-km multicore development planned for operation in 2029, constraining conditional forecast timing rather than establishing future sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner, system contractor and fiber supplier have distinct named roles; component participation is not an additive complete-system sale.

32. Google Cloud anuncia su segundo cable submarino que conectará España con Estados Unidos
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Google's July xx.xx 2025 Sol announcement separates its cable investment from Telxius landing support; supports distinguishing sponsor identity, system ownership and associated facility responsibility.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Google's July xx.xx 2025 Sol announcement separates its cable investment from Telxius landing support; supports distinguishing sponsor identity, system ownership and associated facility responsibility.
33. Sumitomo Electric Launches World’s First Mass-produced Ultra-low Loss, Multi-core Fiber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.
34. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.

35. DigitalMarine - FiberSense
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.
36. Alcatel Submarine Networks commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.
37. Building the Caribbean digital economy bit by bit
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.
38. University of Hawai‘i Notice of Sole Source - Cable Landing Station Access and Colocation Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.
39. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.

40. Globalinx Data Center to Break Ground on Subsea Cable Fiber Optic Project
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.
41. Subsea telecommunications cables: resilience and crisis preparedness
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.
42. Meld. St. 26 (2023-2024) - Svalbard
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.
43. Work to start on East Micronesia Cable following contract signing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The management committee signed directly with NEC after tender within an estimated AUD xx.xx multi-year program; this establishes the contracting principal, not annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The management committee signed directly with NEC after tender within an estimated AUD xx.xx multi-year program; this establishes the contracting principal, not annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed program budget constrains regional public new-system purchasing equivalents.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed program budget constrains regional public new-system purchasing equivalents.
44. Fugro responds to media reports on subsea cable work in the Atlantic Ocean
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fugro's September xx.xx 2026 disclosure identifies SubCom as its survey customer; this is an upstream intermediated role, not a separately additive owner-tier sale.

45. Subsea Telecommunications Fibre Optic Cable Maintenance - Global Marine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance agreements separately provide continuing vessel and depot coverage, supporting an operations/readiness boundary without publishing global contract prices.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance agreements separately provide continuing vessel and depot coverage, supporting an operations/readiness boundary without publishing global contract prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The agreements distinguish call-out repair and other separately quoted activities, supporting separation of restoration from readiness.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agreements distinguish call-out repair and other separately quoted activities, supporting separation of restoration from readiness.
46. Liberty Networks Delivers Next-Gen Subsea Connectivity to Future Proof the Region
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2025 MAYA-xx.xx announcement identifies terminal-equipment modernization; the wider regional investment is not a cable-upgrade-only value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2025 MAYA-xx.xx announcement identifies terminal-equipment modernization; the wider regional investment is not a cable-upgrade-only value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The operator separately describes removal and recovery of a retired trunk portion; announced scope is not completed annual recovery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The operator separately describes removal and recovery of a retired trunk portion; announced scope is not completed annual recovery revenue.
47. Recommendation ITU-T G.978 (05/2025) - Characteristics of optical fibre submarine cables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes Lightweight Cable without establishing its sales or route-length share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes Lightweight Cable without establishing its sales or route-length share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Lightweight Protected Cable and its protection distinction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Lightweight Protected Cable and its protection distinction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Single-Armored Cable; typical application ranges do not measure commercial mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Single-Armored Cable; typical application ranges do not measure commercial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Double-Armored Cable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Double-Armored Cable.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Rock-Armored Cable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Rock-Armored Cable.

48. Submarine Cables and the Oceans - Connecting the World, UNEP-WCMC Biodiversity Series No. 31 (2009)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical noncommercial report places over xx.xx% of routes in deep ocean, constraining a broad lightweight-heavy purchasing profile, not a current LW sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical noncommercial report places over xx.xx% of routes in deep ocean, constraining a broad lightweight-heavy purchasing profile, not a current LW sales share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical deep-ocean faults below xx.xx% support a repair profile different from the new-build route profile; the armored-class split remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical deep-ocean faults below xx.xx% support a repair profile different from the new-build route profile; the armored-class split remains assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical coastal fault concentration constrains armored repair purchasing without establishing Double-Armored Cable expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical coastal fault concentration constrains armored repair purchasing without establishing Double-Armored Cable expenditure.
49. Experience - Xtera
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.

4.3. Industry Ecosystem & Value Chain Analysis

[redacted] Supplier-Led Turnkey Delivery can consolidate contractual responsibility, while Owner-Led Disaggregated Delivery can retain package-level choice. The latter requires the owner to resolve interfaces, acceptance responsibility, and remedies across suppliers rather than assuming those obligations disappear.

Landing facilities and interconnection are commercial control points because the submarine asset must reach the networks and facilities its buyer needs. [redacted] Buyers should identify the rights to project information and the responsibility for handoffs between software, service, and infrastructure packages.

Value capture continues after the initial delivery. ASN distinguishes warranty support from optional and renewed services, including monitoring, cybersecurity, hardware support, and marine-repair coordination. ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■

Sources & Evidence

1. ViaTunisia subsea segment reaches Ready for Service
   · ASN supplied system equipment, Orange Marine and Elettra TLC undertook marine delivery, and Orange provided onward terrestrial interconnection. ([newsroom.orange.com](https://newsroom.orange.com/viatunisia-subsea-segment-reaches-ready-for-service/?lang=eng))
2. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN distinguishes warranty support, optional services, maintenance renewal, monitoring, cybersecurity, and marine-repair coordination. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
3. MakaiPlan
   · Makai markets submarine cable-planning software supporting collaborative project information and handoffs between lifecycle software products. ([makai.com](https://www.makai.com/cable-software/makaiplan/))
4. Introducing Our New Eco-Friendly Cable Recovery Ship
   · Subsea Environmental Services describes recovery work on SEA-ME-WE-xx.xx in the Mediterranean, establishing a distinct recovery business activity. ([subsea.cc](https://subsea.cc/news/introducing-our-new-eco-friendly-cable-recovery-ship/))

4.3.1. Supply-Side Analysis

Supply eligibility is package-specific. NEC markets end-to-end system delivery, Global Marine provides installation and maintenance services, and Ciena supplies equipment and software for upgrades to installed submarine networks. ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■ That announcement supports a fleet-renewal commitment, not additional immediately available repair coverage. Vessel portfolios, regional maintenance arrangements, and permissions must therefore be assessed against the contracted service area and mobilization obligations rather than treated as a generic global resource.

■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ This establishes announced commercial roles for a particular

system, not operating equivalence across suppliers or interchangeability with Single-Core Fiber. Owners should require a delivery-status record and explicit support allocation before relying on a new architecture in procurement comparisons.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · The portfolio establishes NEC's complete-system business role, not equivalence with narrower service or component roles. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. About Global Marine
   · Global Marine publicly provides installation, maintenance, and emergency-repair services and supports regional maintenance customers. ([globalmarine.co.uk](https://globalmarine.co.uk/about-us/about-global-marine/))
3. Orange Marine modernizes its fleet of cable ships to secure digital infrastructure in Europe, Africa and the Middle East
   · Orange's November xx.xx 2025 announcement describes replacement maintenance vessels with delivery expected in 2028 and 2029. ([orange.com](https://www.orange.com/assets/document/xx.xx/download))
4. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System
   · Petal assigns funding and operation to Meta, system construction to NEC, and Multicore Fiber supply to Sumitomo Electric; operation is scheduled for 2029. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))
5. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena announced terminal-platform and network-control-software deployment on Angola Cables' existing MONET and SACS network. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))

4.3.2. Demand-Side Analysis

[redacted] Telecommunications and Cable Network Operators may instead combine ownership, shared participation, and purchased connectivity rights. The purchasing decision should distinguish network control from a need for connectivity: obtaining an indefeasible right of use or a capacity lease does not necessarily require owning the complete asset.

Shared and publicly supported systems have different decision structures. Candle involves several participating network organizations, while the East Micronesia Cable System was handed over to national operators following government-supported development. [redacted]

For smaller and dispersed economies, international connectivity is only one part of the buyer's problem. The World Bank's Micronesia program connects submarine access with competition, open-access infrastructure, and middle- and last-mile development. [redacted]

[redacted]

Sources & Evidence

1. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   · Candle's participants, management committee, and local landing-party role establish a multi-party purchasing context. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))
2. Strengthening network resilience with the Sol transatlantic cable
   · Google connects planned Sol investment with cloud and AI services, network reliability, terrestrial interconnection, and landing-hub development. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
3. NEC completes construction of approximately 2,250 km EMCS submarine cable linking Pacific island nations
   · NEC reported completion and handover to national operators in May 2026, with development supported through government grant funding. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260515_02.html))
4. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The program combines international connectivity, competition, open-access institutions, and domestic network development; satellite serves remote locations where fiber is not viable. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
5. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - Final Rule, 2025
   · The FCC order recognizes capacity leases and indefeasible rights of use, including arrangements involving terminal ownership or control. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2025-xx.xx-xx.xx/pdf/2025-xx.xx.pdf))

4.3.3. Stakeholder Analysis

Asset owners, landing operators, equipment suppliers, marine providers, and regulators control different commitments. An owner may select a system supplier without controlling the landing facility or the permissions governing marine work. [redacted] Private suppliers could not infer direct grant eligibility from the existence of the program. Their potential role would depend on a qualifying public buyer's procurement, while the asset owner would still need to establish how publicly supported emergency capacity relates to its own service arrangements.

Sensing introduces another constituency: Research and Education Institutions and public monitoring organizations may value data that a telecommunications owner does not

purchase for its core connectivity purpose. ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Scientific usefulness alone does not determine who bears those obligations.

Sources & Evidence

1. 10th Workshop on SMART Cables
   · The ITU-led SMART initiative connects telecommunications participants and scientific communities around monitoring and disaster-risk-reduction purposes. ([itu.int](https://www.itu.int/en/ITU-T/Workshops-and-Seminars/2025/xx.xx/Pages/default.aspx))
2. Fiber sensing (DAS)
   · ASN markets fiber-sensing equipment, associated processing software, and support services for submarine monitoring applications. ([asn.com](https://www.asn.com/fiber-sensing/))
3. L'Etat acquiert 80% du capital d'ASN (Alcatel Submarine Networks)
   · France explicitly links its acquisition of control over ASN with strategic activity and digital sovereignty. ([presse.economie.gouv.fr](https://presse.economie.gouv.fr/letat-acquiert-xx.xx-du-capital-dasn-alcatel-submarine-networks/))
4. CEF-Digital new call open: €20 million to ensure fast emergency repair of submarine cables in the Baltic Sea
   · The February 2026 Baltic repair pilot restricted applicants to public entities with an emergency-response mandate. ([hadea.ec.europa.eu](https://hadea.ec.europa.eu/news/cef-digital-new-call-open-eu20-million-ensure-fast-emergency-repair-submarine-cables-baltic-sea-2026-xx.xx-05_en))

4.4. Market Dynamics

New-system development, installed-system upgrades, and lifecycle support respond to different purchasing triggers. ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ Buyers should separate those objectives before choosing the procurement package.

▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ The resulting commercial pattern is milestone-dependent rather than uniform across offerings. A funded project, an equipment award, an available landing, and an enforceable maintenance arrangement support different conclusions about fulfillment.

Sources & Evidence

1. Orange Marine modernizes its fleet of cable ships to secure digital infrastructure in Europe, Africa and the Middle East
   · Expected future vessel deliveries distinguish fleet-renewal investment from immediately available service capability. ([orange.com](https://www.orange.com/assets/document/xx.xx/download))
2. Strengthening network resilience with the Sol transatlantic cable
   · Sol is a planned new connection, supporting a distinction from procurement on an installed route. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))

3. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · The announcement establishes an installed-network upgrade purchasing path distinct from new cable construction.
   ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
4. Joint Communication to strengthen the security and resilience of submarine cables
   · The plan establishes resilience objectives across stages of the cable lifecycle.
   ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/library/joint-communication-strengthen-security-and-resilience-submarine-cables))
5. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The announced funding actions demonstrate attention to coordination and repair readiness rather than evidence of an individual commercial award.
   ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))

4.4.1. Key Drivers

4.4.1.1. Cloud Network Integration and Infrastructure Control

Cloud and content providers can justify submarine investment through the needs of their own distributed networks rather than wholesale connectivity sales alone. ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■ ■■■ ■■■■■■■■■■■■ ■■■■ This creates demand for coordinated cable and landing deliverables, but an announcement does not establish operational availability or access for other buyers.

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · The owner's stated network objectives support internal cloud-network integration as a purchasing motive.
   ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))

4.4.1.2. Resilience Requirements Across the Cable Lifecycle

Resilience policy creates purchasing requirements beyond new cable construction. ■■■ ■■ ■■■■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ Its counterforce is procurement specificity: public policy support does not establish an award, an accessible supplier channel, or a buyer's contractual repair priority.

Sources & Evidence

1. Joint Communication to strengthen the security and resilience of submarine cables
   · The EU's February 2025 action plan addresses prevention, detection, coordinated response, and recovery.
   ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/library/joint-communication-strengthen-security-and-resilience-submarine-cables))
2. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The Commission's June xx.xx 2026 announcement supports regional cable hubs and launches a repair-capacity funding call.
   ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))

4.4.1.3. Upgrade Purchasing on Installed Cable Assets

Installed cables create a separate procurement path for terminal equipment, network-control software, and integration services. Ciena's announced upgrade for Angola Cables on MONET and SACS illustrates purchasing intended to improve an existing network rather than replace its submarine asset. ■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■ ■■■ ■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · The disclosed equipment and software upgrade supports purchasing on installed assets; it does not establish a new geographically independent route. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))

4.4.1.4. Publicly Supported Regional Connectivity

Public funding can enable regional submarine connections whose benefits extend across public services and the wider economy. NEC reported completion and handover of the East Micronesia Cable System in May 2026, supported through government grant funding. ■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. NEC completes construction of approximately 2,250 km EMCS submarine cable linking Pacific island nations
   · EMCS establishes an observed government-supported regional-system delivery mechanism. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260515_02.html))

4.4.2. Key Restraints

4.4.2.1. Security-Conditioned Counterparty and Supplier Access

National-security requirements can restrict eligible owners, equipment providers, service providers, and terminal-control arrangements on U.S.-connected systems. The FCC's 2025 and 2026 orders extend oversight beyond the identity of the complete-system owner. ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■

Sources & Evidence

1. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - Final Rule, 2025
   · The 2025 order adopts security-related eligibility and oversight provisions and distinguishes provisions with delayed effectiveness. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2025-xx.xx-xx.xx/pdf/2025-xx.xx.pdf))

2. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - FCC 26-42 Final Rule
   · The Second Report and Order, adopted June xx.xx 2026, establishes terminal-owner oversight and additional equipment and service-provider restrictions; specified implementing provisions have delayed effectiveness. ([public-inspection.federalregister.gov](https://public-inspection.federalregister.gov/2026-xx.xx.pdf))

4.4.2.2. Landing and Associated-Works Authorization

[illegible] The obligation to grant a license for an international cable can reduce one approval barrier, but conditions and additional authorizations still matter. Owners should establish the relevant permission boundary before making delivery commitments.

Sources & Evidence

1. Apply to lay cables
   · UK guidance requires marine licensing for territorial-water cable laying, allows conditions for international cables, and distinguishes associated works requiring authorization. ([gov.uk](https://www.gov.uk/guidance/marine-licensing-cables))

4.4.2.3. Dependence on Local Access and Operating Institutions

International connectivity does not by itself resolve local distribution or institutional constraints. [illegible] Funding a cable without identifying the operating institution and distribution commitments can leave the original connectivity problem only partly addressed.

Sources & Evidence

1. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The complementary institutional and domestic-network work supports the conclusion that international access alone does not address every local constraint. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))

4.4.3. Key Opportunities

4.4.3.1. Qualified Installed-System Equipment and Software Packages

Installed systems support separately purchased terminal, software, and integration packages. [illegible] Capture requires owner authority, system-specific approval, and continuing support; a requirement for geographic independence favors a different purchase.

Sources & Evidence

1. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · ITU-T G.xx.xx expressly supports multivendor transmission equipment; that objective does not establish an individual supplier's system-specific approval.
   ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
2. How GeoMesh Extreme Works
   · Ciena markets selectable transmission equipment, network management, and professional services for submarine operators, establishing a narrower purchasing route than complete-system construction.
   ([ciena.com](https://www.ciena.com/insights/how/How-GeoMesh-Extreme-Works.html))

4.4.3.2. Funded Owner-Side Procurement and Coordination

Disaggregating owners can purchase coordination rather than assume complete internal capability. Pioneer Consulting's procurement and implementation offering addresses this need. ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Disaggregated System Supply
   · Pioneer Consulting offers procurement formation, permitting oversight, implementation coordination, and project management for disaggregated systems, including package-specific supplier and timing choices.
   ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))

4.4.3.3. Accountable Landing Access and Facility Operations

Landing services can meet an owner's facility requirement without owner-operated station development. Telxius markets planning, operation, and maintenance for this role. ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■

Sources & Evidence

1. Subsea Landing Solutions - Telxius
   · Telxius explicitly markets planning, operation, and maintenance of cable landing stations, establishing an outsourced facility-services role.
   ([telxius.com](https://telxius.com/en/our-solutions/infraestructura/subsea-landing-solutions/))

4.4.3.4. Complementary Coverage for Defined Lifecycle Obligations

Documented coverage boundaries create opportunities for complementary lifecycle contracts. ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ Providers should target an identified obligation or exclusion, not presume every owner has a gap or treat monitoring as restoration entitlement.

Sources & Evidence

1. Joint Communication to strengthen the security and resilience of submarine cables
   · The policy's separate detection and repair objectives support distinguishing monitoring purchases from restoration commitments. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/library/joint-communication-strengthen-security-and-resilience-submarine-cables))
2. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Global Marine's maintenance scope excludes shallow-water sections and beach joints unless specifically contracted, establishing an identifiable coverage boundary rather than universal restoration entitlement. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))

4.4.3.5. Sponsor-Funded Scientific and Monitoring Deliverables

Atlantic CAM's contracted SMART component and IPMA collaboration establish sponsor-specific scientific demand. ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ Ordinary connectivity procurement is not automatic sponsorship, and combined-sensing readiness requires separate asset-level evidence.

Sources & Evidence

1. IP e ASN assinam contrato para construção de Novo Anel CAM
   · The Atlantic CAM construction-contract announcement includes a SMART component and collaboration with IPMA, establishing a named scientific constituency within contracted development. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))

4.4.4. Key Challenges

4.4.4.1. Securing Enforceable Marine Repair Access

Repair readiness requires coordination among maintenance coverage, vessel mobilization, permissions, and available support resources. ICPC guidance explains that operators pool resources through regional arrangements and that cabotage and crewing restrictions can delay repairs. ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Orange Marine modernizes its fleet of cable ships to secure digital infrastructure in Europe, Africa and the Middle East
   · The announcement supports future fleet renewal, not an owner's present repair entitlement. ([orange.com](https://www.orange.com/assets/document/xx.xx/download))
2. Government Best Practices for Protecting and Promoting Resilience of Submarine Telecommunications Cables, Version 1.2
   · ICPC guidance describes resource pooling through regional maintenance arrangements and repair delays associated with cabotage and crewing restrictions. ([iscpc.org](https://www.iscpc.org/documents/?id=xx.xx))

4.4.4.2. Accountability in Multivendor Procurement

[redacted] The execution challenge is to establish who accepts the combined deliverable and remains accountable when suppliers differ. Buyers should obtain documented compatibility, approval, and support commitments before switching; retaining an integrated supplier can reduce interface coordination at the cost of sourcing flexibility.

Sources & Evidence

1. ASN End to End Services & Solutions for Submarine Cable Systems
   - Separate support and network-evolution offerings support identifying lifecycle accountability when procurement involves different suppliers. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
2. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   - ITU-T G.xx.xx identifies enabling multiple transmission-equipment vendors as its primary purpose. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))

4.4.4.3. Resolving Shared-System Purchasing Authority

Shared Ownership creates an authorization question that is distinct from technical delivery. [redacted] Shared participation can combine network interests, but it does not establish unilateral purchasing authority for each member or prove that governance will delay delivery.

Sources & Evidence

1. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   - The project structure supports verifying approval authority; the announcement does not establish unilateral authority or governance delay. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))

4.4.4.4. Allocating Sensing Funding, Data Rights, and Support

[redacted] Commercial execution requires a named sponsor, data-access rights, software and support responsibilities, and allocation of ongoing obligations. A sensing portfolio or scientific roadmap does not establish a funded requirement, universal project compatibility, or a guaranteed monitoring outcome.

Sources & Evidence

1. 10th Workshop on SMART Cables
   · The scientific-sensor roadmap establishes distinct constituencies and intended purposes, not funded requirements or universal project suitability. ([itu.int](https://www.itu.int/en/ITU-T/Workshops-and-Seminars/2025/xx.xx/Pages/default.aspx))
2. Fiber sensing (DAS)
   · The distinct equipment, software, and support offering supports allocating commercial responsibilities without assuming a funded customer requirement. ([asn.com](https://www.asn.com/fiber-sensing/))

4.4.4.5. Qualifying Commercial Status of New Architectures

Architecture announcements must be distinguished from completed commercial operation. Petal identifies a Multicore Fiber supplier and system-delivery roles, but its stated operating date is in the future. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System
   · The announced collaboration establishes planned commercial roles rather than completed operating status. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))

4.5. Porter’s Five Forces Analysis

■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ NEC's end-to-end offering and the division of responsibilities on ViaTunisia demonstrate these different commercial positions. Comparing their participants as interchangeable complete-system suppliers would misstate the competitive boundary.

Entry into complete-system delivery requires more than a relevant product listing. The entrant must establish responsibility for integration and fulfillment across the packages it undertakes. ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■

■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ Buyers should assess maintenance coverage and access conditions independently of the new-system supply award. A supplier with an appropriate vessel portfolio does not automatically provide enforceable priority during concurrent incidents.

RESEARCH SAMPLE REPORT

[illegible] A sole owner can align purchases with its own network objectives; shared systems introduce multiple participating organizations and local landing responsibilities. Disaggregated purchasing may broaden package-level choice, but it also requires an owner capable of managing interfaces and obtaining the necessary participant approvals.

Commercial substitutes operate at different levels. Equipment upgrades can address requirements on existing routes, and capacity leases or indefeasible rights of use can substitute for owning an entire cable asset without replacing the underlying cable system. [illegible]

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC's end-to-end offering supports distinguishing complete-system rivalry from package-level competition. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   · Multiple participating organizations and landing responsibilities support differentiating shared-system governance from sole-owner purchasing. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))
3. ViaTunisia subsea segment reaches Ready for Service
   · The disclosed delivery roles support package-specific competition and accountability analysis. ([newsroom.orange.com](https://newsroom.orange.com/viatunisia-subsea-segment-reaches-ready-for-service/?lang=eng))
4. About Global Marine
   · Its specialist marine-service role supports distinguishing marine fulfillment from complete-system equipment supply. ([globalmarine.co.uk](https://globalmarine.co.uk/about-us/about-global-marine/))
5. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · Satellite use where fiber is not viable supports a location-specific substitute rather than universal cable equivalence. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
6. Government Best Practices for Protecting and Promoting Resilience of Submarine Telecommunications Cables, Version 1.2
   · Regional resource arrangements and cross-border vessel restrictions support marine-access dependency analysis; the document is guidance, not universal law. ([iscpc.org](https://www.iscpc.org/documents/?id=xx.xx))
7. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - Final Rule, 2025
   · Recognized lease and rights arrangements support distinguishing purchased connectivity control from complete-asset ownership. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2025-xx.xx-xx.xx/pdf/2025-xx.xx.pdf))
8. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · The multivendor objective supports broader participation but does not establish qualification for a particular installed system. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))

4.6. PESTLE Analysis

[illegible] The European Union has also directed support toward cable resilience and repair readiness. These actions can influence funding priorities and supplier-governance scrutiny, but they do not establish universal preferences for domestic suppliers or guarantee an individual project's financing.

Trade and macroeconomic exposure must be evaluated by delivery package. Ciena's 2025 annual filing identifies tariffs, changing exemptions, customer spending reactions, and foreign-exchange exposure in its international equipment business. [illegible]

Environmental permissions remain location-specific. UK guidance distinguishes international cable laying from associated works that may require additional authorization. [illegible]

Standards support commercial coordination without eliminating intellectual-property obligations. ITU-T G.xx.xx seeks to enable multiple transmission-equipment vendors, while the ITU patent framework accommodates patented technology under licensing commitments. [illegible]

Sources & Evidence

1. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · Open access and domestic distribution accompany international connectivity in the documented development program.
   ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
2. L'Etat acquiert 80% du capital d'ASN (Alcatel Submarine Networks)
   · The government's stated rationale establishes a political-industrial ownership interest, not preferential treatment for individual projects.
   ([presse.economie.gouv.fr](https://presse.economie.gouv.fr/letat-acquiert-xx.xx-du-capital-dasn-alcatel-submarine-networks/))

3. Joint Communication to strengthen the security and resilience of submarine cables
   · European policy attention to cable resilience supports analysis of public priorities without establishing individual project financing. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/library/joint-communication-strengthen-security-and-resilience-submarine-cables))
4. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The initiative establishes public support for European cable-security and repair priorities. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))
5. Apply to lay cables
   · The distinction between cable laying and associated works supports a location- and scope-specific environmental-permission assessment. ([gov.uk](https://www.gov.uk/guidance/marine-licensing-cables))
6. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · The standard's multivendor objective is distinct from intellectual-property permissions. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
7. What is ITU-T's IPR policy?
   · The ITU patent framework supports incorporation of patented technology in standards under reasonable and non-discriminatory licensing commitments. ([itu.int](https://www.itu.int/net/ITU-T/info/answers.aspx?Fp=faqs.aspx&Qn=xx.xx&ewm=False))
8. Ciena Corporation Annual Report on Form 10-K for the Fiscal Year Ended November 1, 2025
   · Ciena's 2025 filing identifies tariff and exemption uncertainty, possible customer spending reactions, international supply exposure, and foreign-currency risks. ([d18rn0p25nwr6d.cloudfront.net](https://d18rn0p25nwr6d.cloudfront.net/CIK-xx.xx/c178fc6c-a28c-421e-9a83-351bbaebaf3e.html))

4.7. Market Outlook

The outlook through 2032 is conditional on conversion of network objectives into accountable purchases, rather than on a uniform construction cycle. ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ The commercial turning points are an authorized award, an accepted deliverable, and funded continuing obligations; policy attention alone is insufficient.

Ownership choice is a separate source of scenario sensitivity. Google's use of private development, consortium participation, and purchased connectivity demonstrates that even one cloud provider can employ different routes. ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC Corporation markets end-to-end submarine-system solutions extending through maintenance, establishing consolidated delivery as an available commercial alternative. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))

2. Joint Communication to strengthen the security and resilience of submarine cables
   · The EU's February 2025 communication addresses prevention, detection, response, repair, and deterrence, supporting lifecycle readiness as a distinct purchasing objective from new-system delivery. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/library/joint-communication-strengthen-security-and-resilience-submarine-cables))
3. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The Commission's June xx.xx 2026 announcement identifies proposed funding for Baltic and Mediterranean Regional Cable Hubs and a repair-capacity call, demonstrating institutional commitments rather than individual supplier awards. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))
4. Delivering increased connectivity with our first private trans-Atlantic subsea cable
   · Google distinguishes purchased connectivity, consortium participation, and private cable development and states that it uses all three, supporting requirement-specific ownership choices rather than universal preference for private construction. ([blog.google](https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/delivering-increased-connectivity-with-our-first-private-trans-atlantic-subsea-cable/))

4.7.1. Near-Term Market Outlook (0-2 Years)

During 2026-2027, prospective facility acceptance and continuing-service commitments are actionable monitoring points. DC BLOX describes Palm Coast as expected to operate in the first quarter of 2027. ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■ ■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■

European resilience initiatives should be assessed at the transition from public commitments to identified purchasing authority. The announced Regional Cable Hubs and repair-capacity call establish institutional attention, not supplier appointments. ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN distinguishes warranty coverage, optional extended support, and post-warranty contract renewal, supporting service-entry and renewal decisions separate from construction. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
2. Commission funds first Regional Cable Hubs and launches €40 million call for cable repair capacity
   · The hub and repair initiatives support monitoring the transition from public programs to identified procurement authorities and commercial contracts during 2026-2027. This transition is an analytical condition, not an announced vendor award. ([digital-strategy.ec.europa.eu](https://digital-strategy.ec.europa.eu/en/news/commission-funds-first-regional-cable-hubs-and-launches-eu40-million-call-cable-repair-capacity))
3. Cable Landing Stations - DC BLOX
   · DC BLOX describes Palm Coast as expected to become operational in the first quarter of 2027, distinct from existing Myrtle Beach infrastructure. ([dcblox.com](https://www.dcblox.com/cable-landing-stations/))

4.7.2. Medium-Term Market Outlook (3-5 Years)

During 2028-2029, announced system milestones provide decision gates rather than assured outcomes. ■■■■■■ ■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■ ■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■ Buyers requiring an operating reference should wait for evidence matching that prerequisite; development-stage participation is a different commercial choice.

■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ Component participants should establish the purchasing tier and delivery undertaking. An owner can engage earlier for a documented development objective, but procurement requiring demonstrated operation should remain conditional until the relevant milestone is observed.

Sources & Evidence

1. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   - Candle's September xx.xx 2025 announcement identifies a management committee, participating network organizations, local landing responsibility, and operation scheduled for 2028. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))
2. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System
   - Petal assigns funding and operation to Meta, system construction to NEC Corporation, and Multicore Fiber supply to Sumitomo Electric Industries, Ltd., with operation scheduled for 2029. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))

4.7.3. Long-Term Market Outlook (5-10 Years)

■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ Owners should establish title, recovered-material rights, permitted removal scope, and residual responsibility before selecting a route. NOAA's sanctuary guidance permits case-specific consideration of leaving cable in place, so recovery should not be assumed a universal requirement or inevitable outcome within this horizon.

Public-connectivity programs also depend on the durability of operating institutions and domestic access. ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ This broadens responsibility beyond asset delivery, while an additional connection remains appropriate where a documented international-access requirement persists.

Sources & Evidence

1. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The World Bank's FSM account combines international connectivity with domestic distribution and open-access institutions and identifies continuing institutional investment needs. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
2. Final Policy and Permit Guidance for Submarine Cable Projects
   · NOAA's national marine sanctuary guidance addresses removal funding and financial assurance while allowing case-specific consideration of leaving cable in place. This is jurisdiction-specific guidance, not a global retirement requirement. ([sanctuaries.noaa.gov](https://sanctuaries.noaa.gov/library/national/cable_guidelines.pdf))
3. Our Services - Mertech Marine
   · Mertech Marine markets retired-cable recovery, recycling, logistics, and depot services and describes acquiring out-of-service cable from owners. These establish distinct service and asset-transfer relationships. ([mertechmarine.co.za](https://mertechmarine.co.za/services/))

4.8. Go-to-Market Strategy

A specialist entrant should first identify the immediate package purchaser. Fugro's disclosed SubCom relationship illustrates entry through a system supplier rather than an assumed ultimate beneficiary. ■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■

A monitoring provider lacking operator relationships can use a defined commercial-engagement partner rather than build every introduction independently. ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Direct engagement is preferable where the provider already reaches the authorized buyer.

■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■ Suppliers should define permitted users, information handoffs, support, and renewal responsibility before commitment. A connected suite can simplify continuity, while independently selected applications remain an alternative where exchange and access rights are documented.

Public-procurement entrants should select their bidding role only after reviewing the governing documents. Under World Bank regulations, affiliate credentials are not automatically the named bidder's qualifications, and specialist-subcontractor contributions

require permission. ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■

Commercial proposals should use USD and price against defined package responsibilities and service entitlements. ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ Do not conceal owner-retained work or recurring obligations inside an apparently equivalent scope.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC's complete-system undertaking supports distinguishing specialist package entry from assuming consolidated system responsibility. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN's separately described optional services and renewals support scope-based commercial proposals that distinguish initial commitments from continuing support. The recommendation does not assert prevailing market terms.
   ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
3. MakaiPlan
   · Makai markets connected planning and marine software, project-information exchange, training, and a software helpdesk. These offerings do not establish customer-specific continuing access or license-transfer rights. ([makai.com](https://www.makai.com/cable-software/makaiplan/))
4. Procurement Regulations for IPF Borrowers, Seventh Edition, September 2025
   · World Bank procurement regulations assess the named applicant's qualifications and do not automatically attribute affiliate credentials. Specialist-subcontractor contributions require documentary permission; prequalification is optional.
   ([thedocs.worldbank.org](https://thedocs.worldbank.org/en/doc/c84273d1b230aeb2b0b8134de5dc8cd7-xx.xx/original/Procurement-Regulations-7th-Edition-Sep-2025.pdf))
5. Fugro responds to media reports on subsea cable work in the Atlantic Ocean
   · Fugro's September xx.xx 2026 disclosure identifies SubCom as its contractual customer for the reported Argentina telecommunications-cable survey, establishing a system-supplier channel for that specialist package.
   ([fugro.com](https://www.fugro.com/news/business-news/2026/fugro-responds-to-media-reports-on-subsea-cable-work-in-the-atlantic-ocean))
6. FiberSense engages APTelecom for accelerated commercial distribution of its groundbreaking DigitalMarine service
   · FiberSense's September xx.xx 2024 announcement appoints APTelecom LLC to engage prospective customers, supporting an outreach contribution without establishing service-contract authority or operating responsibility.
   ([fibersense.com](https://fibersense.com/wp-content/uploads/2024/xx.xx/Press-release_APT_FS_Subsea.pdf))
7. APTelecom and FiberSense Advance Subsea Cable Monitoring Capabilities Through Strategic Collaboration
   · The firms' April 2026 statement describes continuing operator engagement, stakeholder access, and international commercial development. These are reported channel contributions, not assured procurement access.
   ([aptelecom.com](https://aptelecom.com/aptelecom-and-fibersense-advance-subsea-cable-monitoring-capabilities-through-strategic-collaboration/))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

Purchasing begins with the network requirement and the entity authorized to commit expenditure. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ Suppliers should establish the contracting entity, authorized decision-maker, and acceptance responsibility before treating a participant's stated interest as an actionable purchase.

▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ Entrants should verify the named bidding entity's qualifications and any expressly permitted specialist-subcontractor contribution. A narrower commercial role may be feasible where direct participation is not, but it does not remove the qualification conditions applying to that role.

Sources & Evidence

1. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System, Intra Asia, 24-Fiber Pair Optical Submarine Cable, Connecting Japan to Singapore
   · Candle's announcement identifies participating network organizations, a management committee, and a local landing-party role; these establish distinct commercial constituencies rather than unilateral purchasing authority. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20250922_01.html))
2. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena announced Angola Cables' planned equipment and network-control software deployment on MONET and SACS, supporting an installed-system purchasing example rather than evidence of a newly constructed route.
   ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
3. Procurement Regulations for IPF Borrowers, Seventh Edition, September 2025
   · World Bank procurement regulations make prequalification optional according to procurement circumstances and identify eligibility, experience, capability, and financial resources as criteria.
   · Qualifications of affiliated firms or subcontractors are not automatically attributable to the applicant; permitted specialized-subcontractor exceptions depend on the procurement documents.
   ([thedocs.worldbank.org](https://thedocs.worldbank.org/en/doc/c84273d1b230aeb2b0b8134de5dc8cd7-xx.xx/original/Procurement-Regulations-7th-Edition-Sep-2025.pdf))

5.2. Consumer Experience Benchmarking

▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

[redacted] Buyers should compare documented supplier eligibility, acceptance responsibility, and continuing support for the same installed system. Broader vendor choice is useful only when the owner can manage the additional contractual interfaces; a standard does not establish system-specific qualification.

Service experience requires a separate comparison. ASN distinguishes included remote-support coverage from optional around-the-clock assistance and accelerated replacement. [redacted]

Sources & Evidence

1. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN distinguishes included remote-support coverage from optional around-the-clock support and accelerated replacement services. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
2. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · ITU-T G.xx.xx states a multivendor transmission-equipment objective; it does not establish qualification for an individual installed system. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
3. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Global Marine describes dedicated call-out coverage and depot services under ACMA; these are marine-service commitments, not equipment-support equivalents. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))

5.3. Opportunity Mapping

[redacted] Multivendor standards support choice, but incumbent qualification, acceptance authority, and continuing support remain account-access gates. A new-system route is preferable when the requirement is an independent physical connection rather than improvement of an existing one.

[redacted] Capture depends on site-use rights, onward interconnection, provider access, and equipment-supplier handoffs. Owner-controlled construction remains an alternative where control requirements outweigh the benefit of outsourcing.

[redacted] In Europe, the February 2026 Baltic pilot restricted grant applicants to public emergency-response entities. Private providers need an identified public purchasing relationship; the historical call is not a current vendor appointment.

Owner representation is accessible where disaggregation creates a funded coordination need. [redacted] An owner with adequate internal capability may keep this work in-house; an owner unwilling to fund coordination should compare consolidated delivery instead.

Scientific sensing merits pursuit when a sponsor purchases a defined additional deliverable. [redacted] Asset-specific contractual and operating evidence is required before committing on that basis.

Public and institutional demand should be screened by procurement stage and package. EMCS handover provides a delivered public-connectivity reference; the FSM experience separately demonstrates the importance of operating institutions and domestic access. [redacted]

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google identifies DC BLOX and Telxius as planned landing partners for Sol. These customer-confirmed roles support landing-service opportunity assessment, not completed facility acceptance or outside-customer connectivity access.
   ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
2. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · The announced MONET and SACS purchase supports targeting an identified operator's installed-network requirement; access to another operator remains conditional on its approvals and contract.
   ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))

3. NEC completes construction of approximately 2,250 km EMCS submarine cable linking Pacific island nations
   · NEC reported EMCS completion and handover to receiving operators on May xx.xx 2026, establishing a delivered public-connectivity reference rather than merely proposed construction. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260515_02.html))
4. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The FSM example supports assessing operating and domestic-access commitments alongside a public connectivity purchase; it does not establish identical constraints in every island jurisdiction. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))
5. CEF-Digital new call open: €20 million to ensure fast emergency repair of submarine cables in the Baltic Sea
   · The February xx.xx 2026 Baltic repair pilot restricted applicants to public entities with an emergency-response mandate. Its application deadline was May xx.xx 2026; the call does not establish a private vendor appointment. ([hadea.ec.europa.eu](https://hadea.ec.europa.eu/news/cef-digital-new-call-open-eu20-million-ensure-fast-emergency-repair-submarine-cables-baltic-sea-2026-xx.xx-05_en))
6. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · The multivendor objective supplies a premise for conditional terminal-account access, while leaving actual purchasing rights and acceptance responsibilities to verification. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
7. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Published maintenance-zone scope and additional-work conditions support checking the scheduled asset, excluded sections, and approval arrangements before purchasing complementary coverage. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
8. Project Management
   · Pioneer's project-management offering includes coordination among partners, schedule integration across contracts, contract review, and separately identified representation services; a portfolio does not establish delegated owner authority. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/project-management/))
9. DigitalMarine
   · DigitalMarine is marketed with alerting, vessel-identification integration, and continuing network-operations support, supporting a managed-monitoring purchasing format. No advertised investment-return claim is used. ([fibersense.com](https://fibersense.com/digitalmarine/))
10. IP e ASN assinam contrato para construção de Novo Anel CAM
    · The contracted SMART component supports sponsor-specific scientific procurement, not automatic funding or completed operation for another sensing proposal. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))
11. Alcatel Submarine Networks (ASN) commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
    · ASN's March xx.xx 2023 release describes development combining SMART and other sensing technologies; it does not identify a completed operating asset with both purchased sensing scopes. ([asn.com](https://www.asn.com/press-release/alcatel-submarine-networks-asn-commences-development-of-climate-change-solution-by-integrating-scientific-sensors-and-sensing-technologies-into-submarine-telecom-systems/))
12. University of Hawai‘i Notice of Sole Source - Cable Landing Station Access and Colocation Services
    · The University of Hawai‘i's July xx.xx 2024 notice identifies a grant-linked requirement for Hawaiki landing-station access and colocation, demonstrating an institutional package distinct from complete cable construction. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))

13. FiberSense and Southern Cross announce deployment of shore-end monitoring on New Zealand subsea network portion
    · FiberSense reports implementation on Southern Cross Cable Network's New Zealand shore-end infrastructure and associated terrestrial connections; further rollout is described separately as planned. ([fibersense.com](https://fibersense.com/news/fibersense-and-southern-cross-cable-networks/))
14. Submarine Cable Networks | VIAVI Solutions Inc.
    · VIAVI Solutions Inc. markets monitoring equipment and software and describes bounded submarine applications, including the first segment of amplified links. ([viavisolutions.com](https://www.viavisolutions.com/en-us/products/submarine-cable-networks))
15. Subsea Landing Solutions - Telxius
    · The landing-services portfolio supports comparing purchased facility operation with owner-developed infrastructure; it does not establish an individual customer's site-use or provider-access rights. ([telxius.com](https://telxius.com/en/our-solutions/infraestructura/subsea-landing-solutions/))

5.4. Distribution Channel Analysis

[illegible] An integrator can consolidate interfaces; direct specialist purchasing preserves package-level choice but requires owner coordination. A landing host can address facilities and onward interconnection, but its participation does not confer authority to approve the system purchase or establish the equipment supplier's support obligations.

Marine maintenance has distinct regional channels. [illegible] Cooperative participation provides an established shared arrangement; private contracting requires separately negotiated obligations and should not be assumed to provide superior priority.

[illegible] Private providers therefore needed a separate commercial purchasing relationship rather than direct grant eligibility. Suppliers evaluating comparable initiatives should first identify the eligible public customer and its procurement authority; program funding alone does not establish a vendor award or an asset owner's repair entitlement.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · NEC markets end-to-end submarine-system solutions extending through maintenance, establishing a consolidated delivery offering rather than universal rights to every landing or subcontracted package. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. CEF-Digital new call open: €20 million to ensure fast emergency repair of submarine cables in the Baltic Sea
   · The February 2026 Baltic emergency-repair call restricted applicants to public entities with an emergency-response mandate; this does not establish direct grant eligibility or appointment of private suppliers. ([hadea.ec.europa.eu](https://hadea.ec.europa.eu/news/cef-digital-new-call-open-eu20-million-ensure-fast-emergency-repair-submarine-cables-baltic-sea-2026-xx-xx-05_en))

3. Subsea Telecommunications Fibre Optic Cable Maintenance
   · ACMA is described as a member-run cooperative, with specified coverage and management approval for certain additional activities.
   ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
4. Monet Submarine Cable Selects Equinix for Landing Station and Next-Generation Digital Gateway to Latin America
   · Equinix's September xx.xx 2016 announcement identifies selection by MONET investors to provide U.S. landing facilities and services, alongside its interconnection platform; the event illustrates a separately contracted landing-host role.
   ([investor.equinix.com](https://investor.equinix.com/news-events/press-releases/detail/xx.xx/monet-submarine-cable-selects-equinix-for-landing-station))
5. Telecoms
   · Global Marine offers maintenance through cable-maintenance zones or private maintenance agreements, establishing alternative contracting routes without establishing equivalent priority or remedies.
   ([globalmarine.co.uk](https://globalmarine.co.uk/our-markets/telecoms/))

5.5. Pricing Trend Analysis

Commercial comparisons depend on what the submarine-system agreement includes. Ciena's filing describes bundled product-and-service purchasing, while ASN distinguishes optional services and post-warranty support renewal. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■

Equipment negotiations also face opposing pressures. Ciena discloses competitive pricing pressure alongside tariff exposure, possible pass-through, and foreign-currency risks. ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■

Sources & Evidence

1. ASN End to End Services & Solutions for Submarine Cable Systems
   · ASN identifies optional services and support-contract renewal following warranty, supporting separate commercial treatment of initial delivery and continuing support.
   ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))
2. Ciena Corporation Annual Report on Form 10-K for the Fiscal Year Ended November 1, 2025
   · Ciena's mandatory filing describes bundled product-and-service purchasing, competitive pricing pressure, potential tariff pass-through, customer-order deferral risks, and foreign-currency exposure. These disclosures concern Ciena's business, not uniform submarine-market contract terms.
   ([d18rn0p25nwr6d.cloudfront.net](https://d18rn0p25nwr6d.cloudfront.net/CIK-xx.xx/c178fc6c-a28c-421e-9a83-351bbaebaf3e.html))

5.6. Regulatory Compliance & Standards Framework

[redacted] The July xx.xx 2026 publication specifies September xx.xx 2026 for nondelayed provisions while listing amendments awaiting separate effective-date announcements. Buyers should verify the operative section, counterparty role, and license conditions before committing; neither global availability nor rule adoption establishes transaction eligibility.

[redacted] The obligation to grant an international-cable license does not remove applicable conditions or authorize the entire landing project. Owners should connect delivery commitments to the permissions governing the purchased works, without extending this jurisdictional example worldwide.

ITU-T G.xx.xx is an interoperability recommendation, not market-access authorization. ITU's patent policy accommodates patented standards under reasonable and nondiscriminatory licensing commitments. [redacted]

Sources & Evidence

1. Apply to lay cables
   · Marine Management Organisation guidance distinguishes international cable laying, license conditions, and associated works that may require authorization. Its stated licensing distinction is not a worldwide landing exemption. ([gov.uk](https://www.gov.uk/guidance/marine-licensing-cables))
2. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - Final Rule, 2025
   · The FCC's 2025 final rule adopts security-related submarine licensing changes, including equipment and service eligibility provisions, while distinguishing delayed implementation. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2025-xx.xx-xx.xx/pdf/2025-xx.xx.pdf))
3. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · The recommendation addresses interoperability, supporting its distinction from regulatory authorization and separate intellectual-property permissions. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
4. What is ITU-T's IPR policy?
   · ITU's patent policy allows patented technology in standards under reasonable and nondiscriminatory licensing commitments and provides declaration resources; it does not establish clearance for an individual product. ([itu.int](https://www.itu.int/net/ITU-T/info/answers.aspx?Fp=faqs.aspx&Qn=xx.xx&ewm=False))
5. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - FCC 26-42
   · The July xx.xx 2026 publication adopts terminal-owner oversight and additional security conditions. It specifies September xx.xx 2026 for nondelayed provisions and separately lists amendments awaiting effective-date announcements. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2026-xx.xx-xx.xx/pdf/2026-xx.xx.pdf))

5.7. ESG & Sustainability Analysis

Environmental differentiation spans the cable lifecycle and the marine-service package. ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ Vessel renewal also requires investment and does not itself establish contractual availability.

■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ A prepared plan does not establish completed consultation, community consent, financing approval, or construction completion. Sponsors should separately assign and fund implementation and confirm authority and funder requirements before treating development readiness as achieved.

■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ Public sponsors should link connectivity investment to domestic-access and operating commitments. This broadens the program beyond asset delivery, but it addresses the risk that international access fails to translate into usable services for intended beneficiaries.

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google describes Sol as a planned transatlantic cable connected with its network-resilience and interconnection objectives. Together with the installed-system example, this supports the analytical distinction between improving an existing asset and purchasing a new geographic connection. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology?utm_source=openai))
2. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena's September xx.xx 2026 announcement describes planned equipment and network-control software deployment on existing MONET and SACS systems. It supports distinguishing installed-asset improvement from procuring a new physical connection; it does not establish asset-life extension. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
3. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The FSM program combines connectivity, domestic networks, and institutional reform. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))

4. Orange Wholesale: a full-service, sustainable subsea operator
   · Orange Wholesale identifies installed-system improvements, cable repair, recovery of phased-out systems, and vessel replacement within its own environmental approach. This supports lifecycle-specific purchasing analysis, not a demonstrated whole-project environmental outcome. ([wholesale.orange.com](https://wholesale.orange.com/wholesale/en/news/orange-wholesale-a-full-service-subsea-operator.html))
5. Orange's new cable strengthens global connectivity
   · Orange describes Sophie Germain's shore-power connection capability and Cleanship certification. These are vessel-specific credentials, not evidence of an individual cable project's lifecycle result. ([orange.com](https://www.orange.com/en/our-news/oranges-newest-jewel-fleet-strengthen-global-connectivity))
   · Orange distinguishes investment in a newly built cable ship from conversion of an existing vessel, supporting a commercial investment trade-off without establishing customer-specific availability. ([orange.com](https://www.orange.com/en/our-news/oranges-newest-jewel-fleet-strengthen-global-connectivity))
6. Preliminary Environmental and Social Impact Assessment for the Bangladesh International (Bagha-1) Submarine Cable System
   · Hatfield describes safeguards-gap analysis, socioeconomic assessment, and preparation of an engagement and consultation plan for proposed Bagha-xx.xx landings in India and Bangladesh. ([hatfieldgroup.com](https://hatfieldgroup.com/projects/preliminary-environmental-and-social-impact-assessment-for-the-bangladesh-international-bagha-xx.xx-submarine-cable-system/))

5.8. Disruption & Risk Scenarios

[illegible] Exposed owners and suppliers should confirm transaction-specific applicability before award and allocate responsibility for required changes. The indicators are effective-date notices, license conditions, and counterparty-role changes; a universal geography-based exclusion is not supported.

A landing-delay scenario arises if a prospective facility or associated permission misses the milestone on which another package depends. [illegible] Delay is hypothetical, and an alternative station cannot be presumed available.

[illegible] Private coverage is an alternative to zone participation, but its label does not guarantee better priority. Monitoring and public security coordination remain complements, not substitutes for restoration entitlement.

A sponsor-withdrawal or data-permission scenario could leave additional sensing obligations unfunded or commercially unusable. ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ A clearly separated connectivity-only purchase remains an alternative where no funded additional requirement exists; this does not exclude sensing categories from the market.

Sources & Evidence

1. Government Best Practices for Protecting and Promoting Resilience of Submarine Telecommunications Cables, Version 1.2
   · ICPC guidance identifies regional pooling of maintenance resources and repair delays associated with vessel, cabotage, and crewing restrictions. It also discusses common-event exposure where routes and landings cluster. ([iscpc.org](https://www.iscpc.org/documents/?id=xx.xx))
2. Apply to lay cables
   · Within the MMO remit, UK guidance distinguishes international cable laying, license conditions, and associated works requiring authorization; it does not establish unconditional landing-project permission. ([gov.uk](https://www.gov.uk/guidance/marine-licensing-cables))
3. Telecoms
   · Global Marine offers maintenance-zone participation and private maintenance agreements, establishing alternative contracting routes without demonstrating inherently superior incident priority. ([globalmarine.co.uk](https://globalmarine.co.uk/our-markets/telecoms/))
4. Review of Submarine Cable Landing License Rules and Procedures To Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks - FCC 26-42
   · The FCC's July xx.xx 2026 publication addresses terminal-owner oversight and security conditions, specifies September xx.xx 2026 for nondelayed provisions, and lists amendments awaiting separate effective-date announcements. It also provides conditional processing simplification. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2026-xx.xx-xx.xx/pdf/2026-xx.xx.pdf))
5. IP e ASN assinam contrato para construção de Novo Anel CAM
   · The connectivity owner and scientific collaborator have identifiable distinct roles, supporting explicit funding and continuing-responsibility allocation in a hypothetical sponsor-withdrawal scenario. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))
6. Alcatel Submarine Networks (ASN) commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
   · The development announcement supports separating additional scientific and monitoring purposes from ordinary connectivity obligations; funding withdrawal remains a hypothetical scenario. ([asn.com](https://www.asn.com/press-release/alcatel-submarine-networks-asn-commences-development-of-climate-change-solution-by-integrating-scientific-sensors-and-sensing-technologies-into-submarine-telecom-systems/))
7. Cable Landing Stations - DC BLOX
   · The prospective Palm Coast milestone supports a conditional facility-delay scenario and milestone-linked commitments, not a conclusion that delay has occurred. ([dcblox.com](https://www.dcblox.com/cable-landing-stations/))

5.9. Return on Investment & Cost-Benefit Analysis

For an asset owner, the upgrade case is strongest when a qualified equipment-and-software purchase satisfies the actual installed-route requirement. ■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■ ■■■

RESEARCH SAMPLE REPORT

[illegible] An equipment renewal should not be treated as an asset-life extension without an explicit continuing-service commitment.

For procurement-model selection, package choice must justify the coordination obligations it creates. [illegible] The investment case should compare equivalent undertakings, retained responsibilities, change controls, and acceptance remedies rather than assume that fewer contracts or greater supplier choice is inherently more economical.

For monitoring, value depends on whether purchased information supports an authorized response over the contracted asset boundary. [illegible] Retaining existing supervision remains an alternative if the additional service does not close a documented decision or coverage gap.

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions
   · The end-to-end offering provides a consolidated alternative to independently purchased packages; individual retained responsibilities still require contractual definition. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))
2. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   · Standard-supported vendor choice is distinct from an owner's approved equipment undertaking, supporting a qualification condition in the upgrade investment comparison. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))
3. DigitalMarine
   · The marketed monitoring-service format supports evaluating externally assisted supervision, but does not establish customer-specific protection outcomes or marine-restoration rights. ([fibersense.com](https://fibersense.com/digitalmarine/))
4. Crosslake Fibre
   · Pioneer's Crosslake Fibre case describes independently selected contractors, interdependent deadlines, and consolidation of project-management oversight across marine, terrestrial, and operating interfaces. ([pioneerconsulting.com](https://www.pioneerconsulting.com/case_studies/crosslake-fibre-a-unique-submarine-cable-beneath-lake-ontario-connecting-toronto-to-buffalo/))
5. How GeoMesh Extreme Works
   · The selectable equipment-and-services portfolio supports comparing an installed-asset purchase with broader construction obligations; it does not establish customer-specific savings or eliminate marine dependencies. ([ciena.com](https://www.ciena.com/insights/how/How-GeoMesh-Extreme-Works.html))

6. FiberSense and Southern Cross announce deployment of shore-end monitoring on New Zealand subsea network portion
   · The reported implementation has a defined shore-end scope and cannot establish whole-route protection or another customer's avoided losses.
   ([fibersense.com](https://fibersense.com/news/fibersense-and-southern-cross-cable-networks/))
7. Submarine Cable Networks | VIAVI Solutions Inc.
   · The separately marketed monitoring portfolio supports an internally administered alternative to managed assistance, subject to the stated application boundary and customer-specific integration obligations.
   ([viavisolutions.com](https://www.viavisolutions.com/en-us/products/submarine-cable-networks))

6. Cumulative Impact of Artificial Intelligence 2026

AI affects submarine investment both as a connectivity demand source and as a software purchasing consideration. ■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■ ■■■ ■ ■■■■■■■■■ ■■ ■■■■■■■ Buyers should distinguish an installed-network requirement from geographic diversity before choosing upgrades or new-system procurement.

■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ The commercial role is decision support within an existing operator environment; it does not replace marine repair entitlement. Ciena separately markets AI capabilities in Navigator, but portfolio availability should not be treated as evidence that every cable operator has deployed them.

Implementation shifts purchasing attention toward integration, data permissions, accountability, and workforce readiness. NIST's voluntary governance guidance addresses human involvement, organizational responsibilities, staff competencies, and third-party risk. ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google links planned Sol investment to cloud and AI services, reliability, and terrestrial interconnection; the announcement does not establish completed operation or an exclusively AI-specific purchasing requirement. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
2. An industry first in subsea cable protection
   · On April xx.xx 2026, Starboard reported completed integration of its AI-driven vessel-risk alerts into Ciena Navigator at Southern Cross's Network Operations Centre. This supports a reported deployment, not general efficacy or autonomous repair. ([starboardintelligence.com](https://www.starboardintelligence.com/articles/an-industry-first-in-subsea-cable-protection))
3. Navigator Network Control Suite
   · Ciena markets AI and agentic capabilities in Navigator Network Control Suite for network assurance and related operator activities; portfolio availability does not establish every customer's deployment. ([ciena.com](https://www.ciena.com/products/navigator-ncs))

4. AI Risk Management Framework
   - NIST identifies its AI Risk Management Framework as voluntary guidance for incorporating trustworthiness considerations; it is not a regulatory approval. ([nist.gov](https://www.nist.gov/itl/ai-risk-management-framework))
5. NIST AI RMF Playbook: Govern
   - NIST's governance guidance addresses organizational responsibilities, human involvement, staff competencies, legal considerations, and third-party risks, supporting conditional procurement safeguards for cable-network AI software. ([airc.nist.gov](https://airc.nist.gov/airmf-resources/playbook/govern/))

7. Submarine Communication Cable System Market, by Product and Service Offering

Product and Service Offering separates purchases with different customers and accountability boundaries. [redacted] Component entrants should establish whether the relevant procurement authority is the system supplier or the asset owner before pursuing an award; a component portfolio does not establish eligibility for complete-system delivery.

[redacted] Buyers should distinguish software-use rights, project-data access, support, and equipment responsibility rather than assume that every software function is licensed independently. FiberSense's managed monitoring offering provides an alternative service format, but it does not establish equivalent customer control over the underlying software.

Landing Infrastructure Works and continuing facility access solve different purchasing problems. [redacted] Owners should decide whether they need construction, continuing access, or both, and compare the resulting responsibilities rather than presume that separate categories require separate contracts.

Professional and Integration Services can provide owner-side capabilities when equipment and marine packages are purchased separately. Pioneer Consulting offers Feasibility and System Engineering, Environmental Assessment and Permitting oversight, Procurement and Contract Advisory, Project Management and Owner Representation, quality-assurance oversight, and implementation support relevant to System Integration and Commissioning.

[redacted] Vessel Charter and Marine Support is a further access relationship: the disclosed 2012 Cable Retriever agreement distinguishes vessel ownership from chartered use, without establishing present availability. Owners should verify the work covered, authorization requirements, and enforceable vessel access rather than treat a charter, an installation award, and a maintenance entitlement as equivalent.

Operational Support Services connects facilities, equipment, and marine coverage without making them substitutes. Cable Landing Hosting and Facility Operations provides the facility relationship; Network Monitoring and Technical Support addresses continuing oversight and assistance; Equipment Maintenance and Repair covers equipment obligations; Cable Logistics and Depot Services provides storage and logistics support. [redacted]

Sources & Evidence

1. Submarine Cable Systems: Products & Solutions

   · NEC publicly offers end-to-end submarine-system delivery extending through maintenance, establishing a consolidated offering distinct from a component-only role. ([nec.com](https://www.nec.com/en/global/prod/nw/submarine/))

2. ASN End to End Services & Solutions for Submarine Cable Systems

   · ASN distinguishes warranty support, optional support and replacement services, post-warranty renewal, marine coordination, and other lifecycle offerings. These distinctions support checking exclusions rather than equating equipment support with marine entitlement. ([asn.com](https://www.asn.com/wp-content/uploads/2024/xx.xx/Plaquette-Long-Term-Support-HD.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.

3. MakaiPlan

   · Makai markets submarine cable-planning software and describes collaborative project-data access and handoffs to its marine software products. This establishes a software offering, not customer-specific licensing terms. ([makai.com](https://www.makai.com/cable-software/makaiplan/))

4. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System

   · Petal's announcement assigns funding and operation to Meta, system construction to NEC, and multicore fiber supply to Sumitomo Electric, establishing distinct purchasing and supply roles. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))

   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

5. Angola Cables Boosts Capacity Across MONET and SACS Submarine Cable Systems with Ciena Technology
   · Ciena's September xx.xx 2026 announcement describes Angola Cables' planned equipment and Navigator software deployment on existing MONET and SACS infrastructure. This supports operator equipment-and-software procurement, not completed implementation. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/angola-cables-boosts-capacity-across-monet-and-sacs-submarine-cable-systems-with-ciena-technology))
6. Fiber sensing (DAS)
   · ASN offers fiber-sensing equipment with processing software and customer support, supporting distinct equipment, software, and service responsibilities. ([asn.com](https://www.asn.com/fiber-sensing/))
7. Introducing Our New Eco-Friendly Cable Recovery Ship
   · Subsea Environmental Services reports SEA-ME-WE-xx.xx recovery work, establishing a retirement-related marine business activity distinct from initial cable installation. ([subsea.cc](https://subsea.cc/news/introducing-our-new-eco-friendly-cable-recovery-ship/))
8. Subsea Telecommunications Fibre Optic Cable Maintenance
   · Global Marine describes maintenance agreements, depot support, and associated survey and improvement services, with additional activities subject to agreement authority. Portfolio descriptions do not establish an individual owner's repair priority. ([globalmarine.co.uk](https://globalmarine.co.uk/services/subsea-cable-maintenance/))
9. Monet Submarine Cable Selects Equinix for Landing Station and Next-Generation Digital Gateway to Latin America
   · Equinix's September xx.xx 2016 announcement records MONET investors' selection of its U.S. landing facilities and services, illustrating a facility-access purchase separate from cable equipment supply. ([investor.equinix.com](https://investor.equinix.com/news-events/press-releases/detail/xx.xx/monet-submarine-cable-selects-equinix-for-landing-station))
10. Recommendation ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems
    · ITU-T G.xx.xx distinguishes terminal transmission, power-feeding, supervisory, cable, repeater, branching-unit, and joint equipment within submarine systems. This supports equipment-scope distinctions, not supplier eligibility. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.
11. Federated States of Micronesia Connectivity Project (P130592) - Procurement Plan
    · The Micronesia procurement plan identifies landing-station foundations and connections from beach manholes to stations, with canceled entries that cannot establish completion. It separately lists submarine-equipment upgrade and repair. ([documents1.worldbank.org](https://documents1.worldbank.org/curated/en/xx.xx/pdf/P130592-8dfba0cd-1a41-xx.xx-b846-ee06aa972975.pdf))
12. Disaggregated System Supply
    · Pioneer Consulting offers engineering, survey coordination, permitting oversight, procurement formation, implementation, and project management for disaggregated submarine-system purchases. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/disaggregated-systems/))
13. Procurement
    · Pioneer describes supplier evaluation, bidder interaction, preferred-bidder recommendation, negotiation, and contract formation as procurement advisory services. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/procurement/))

14. Project Management
    - Pioneer offers coordination across contracts, owner representation, quality-plan oversight, integration oversight, and commissioning and acceptance representation. These offerings do not themselves establish delegated owner authority. ([pioneerconsulting.com](https://www.pioneerconsulting.com/services/project-management/))
15. Supplemental Charter Agreement - International Cableship Pte Ltd and Global Marine Systems Limited, Exhibit 10.9.1
    - The disclosed Cable Retriever charter distinguishes International Cableship's vessel ownership from Global Marine Systems' chartered use. The historical agreement supports a vessel-access category, not present availability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d778621dex1091.htm))
16. Submarine Cable Services
    - ACMA describes contractual depot storage separately from repair and maintenance-improvement services, with approval requirements for improvement work. This supports distinct service entitlements. ([acma2017.com](https://www.acma2017.com/services/submarine-cable-services/))
17. Resolução do Conselho de Ministros n.º 183/2025, de 26 de novembro
    - Portugal's November xx.xx 2025 resolution retains distinct construction, supervision, and transmission-equipment purchases while directing concentration of station rental, operation, and maintenance in the same contract and operator. ([diariodarepublica.pt](https://diariodarepublica.pt/dr/detalhe/resolucao-conselho-ministros/xx.xx-2025-xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.
18. DigitalMarine
    - FiberSense markets a submarine monitoring service with network-operations support, establishing a managed-service format without proving equivalent software-control rights. ([fibersense.com](https://fibersense.com/digitalmarine/))
19. Recommendation ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
    - ITU-T G.xx.xx recognizes communication-capable submarine systems equipped with scientific monitoring sensors, supporting the distinct role of integrated scientific sensor packages. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
20. Resolução do Conselho de Ministros n.º 18/2023, de 13 de fevereiro
    - Taxonomy evidence: Authorizes separate Atlantic CAM purchases for system construction, works supervision, transmission equipment, and landing-station rental, supporting deliverable-based allocation.
21. Nokia in 2024 - Annual Report on Form 20-F
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

22. Nokia Annual Report on Form 20-F 2021
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.

23. TE Connectivity Ltd. 2018 Annual Report
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.

24. NEC Financial Results for the First Quarter Ended June 30, 2025
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.

25. NEC Financial Results for the Fiscal Year Ended March 31, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

26. SubCom of Newington plans multi-million-dollar expansion
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

27. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
28. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
29. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
30. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
31. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

32. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
33. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
34. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
35. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
36. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.
37. Tonga-Fiji Submarine Cable Project: Completion Report, December 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.

7.1. Equipment and Components

Table 6. Global Submarine Communication Cable System Market, by Equipment and Components growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Branching Units	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cable Joints and Passive Accessories	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Power-Feeding Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Repeaters and Optical Amplifiers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Submarine Communications Cables	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Submarine Optical Fiber	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Supervision, Monitoring, and Sensing Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Terminal Transmission Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 7. Global Submarine Communication Cable System Market Size, by Equipment and Components, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems

   · Taxonomy evidence: Defines distinct submerged and terminal equipment elements of optical submarine systems.

2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 announcement assigns fiber provision to Sumitomo Electric and system construction to NEC; supports distinct component roles but does not verify direct asset-owner fiber invoices.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes EUR xx.xx of separate transmission-equipment purchasing within a EUR xx.xx multi-year program; calibrates terminal scope, not annual global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes EUR xx.xx of separate transmission-equipment purchasing within a EUR xx.xx multi-year program; calibrates terminal scope, not annual global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies construction including SMART, transmission purchasing and station rental as separate commercial obligations; supports the offering-allocation boundary.

31. ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes distinct submerged and terminal equipment elements; supports the modeled equipment partition but supplies no sales or price weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes submarine cable joints and coupling elements, supporting the passive-accessory commercial scope.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes submarine cable joints and coupling elements, supporting the passive-accessory commercial scope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes repeaters, branching units and associated system equipment; supports category attribution, not revenue proportions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes repeaters, branching units and associated system equipment; supports category attribution, not revenue proportions.

7.1.1. Submarine Communications Cables

Table 10. Global Submarine Communication Cable System Market Size, by Submarine Communications Cables, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes repeatered and repeaterless submarine communications cable constructions.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.1.2. Terminal Transmission Equipment

Table 13. Global Submarine Communication Cable System Market Size, by Terminal Transmission Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 14. Global Submarine Communication Cable System Market Size, by Terminal Transmission Equipment, by Group, 2017-2032 (USD Million)

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Defines terminal transmission equipment as a system element.
2. Resolução do Conselho de Ministros n.º 18/2023, de 13 de fevereiro
   - Taxonomy evidence: Transmission equipment is procured separately from the main construction contract.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes EUR xx.xx of separate transmission-equipment purchasing within a EUR xx.xx multi-year program; calibrates terminal scope, not annual global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes EUR xx.xx of separate transmission-equipment purchasing within a EUR xx.xx multi-year program; calibrates terminal scope, not annual global sales.

7.1.3. Repeaters and Optical Amplifiers

Table 16. Global Submarine Communication Cable System Market Size, by Repeaters and Optical Amplifiers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 17. Global Submarine Communication Cable System Market Size, by Repeaters and Optical Amplifiers, by Group, 2017-2032 (USD Million)

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes optical submarine repeaters and amplification elements.
2. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Identifies remote optical amplifiers as recognized submarine-system components.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.

15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.

16. IP e ASN assinam contrato para construção de Novo Anel CAM
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.

17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.

18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
- Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

19. Keppel's Singapore-US subsea cable system receives US regulatory approval
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes repeaters, branching units and associated system equipment; supports category attribution, not revenue proportions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes repeaters, branching units and associated system equipment; supports category attribution, not revenue proportions.

7.1.4. Power-Feeding Equipment

Table 19. Global Submarine Communication Cable System Market Size, by Power-Feeding Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 20. Global Submarine Communication Cable System Market Size, by Power-Feeding Equipment, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes power-feeding equipment and cable-system power functions.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.1.5. Supervision, Monitoring, and Sensing Equipment

Table 22. Global Submarine Communication Cable System Market, by Supervision, Monitoring, and Sensing Equipment growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Fiber Sensing Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Integrated Scientific Sensor Packages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Transmission Supervision and Test Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 23. Global Submarine Communication Cable System Market Size, by Supervision, Monitoring, and Sensing Equipment, by Region, 2017-2032 (USD Million)

Sources & Evidence

1. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes maintenance controllers and submarine-system monitoring equipment.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SMART component establishes funded project scope but discloses no separable sensor-package value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SMART component establishes funded project scope but discloses no separable sensor-package value.
31. Fiber sensing (DAS) - Alcatel Submarine Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers commercial fiber-sensing equipment in submarine-system contexts; establishes scope but not global equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers commercial fiber-sensing equipment in submarine-system contexts; establishes scope but not global equipment sales.

7.1.5.1. Transmission Supervision and Test Equipment

Table 26. Global Submarine Communication Cable System Market Size, by Transmission Supervision and Test Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   - Taxonomy evidence: Separates transmission-performance supervision, fault location, and electrical monitoring functions.
2. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Lists specialist optical test equipment as a cable-system purchase.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.1.5.2. Fiber Sensing Equipment

Table 29. Global Submarine Communication Cable System Market Size, by Fiber Sensing Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Recognizes fiber-based sensing using dedicated land-station equipment.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Fiber sensing (DAS) - Alcatel Submarine Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers commercial fiber-sensing equipment in submarine-system contexts; establishes scope but not global equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers commercial fiber-sensing equipment in submarine-system contexts; establishes scope but not global equipment sales.

7.1.5.3. Integrated Scientific Sensor Packages

Table 32. Global Submarine Communication Cable System Market Size, by Integrated Scientific Sensor Packages, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 33. Global Submarine Communication Cable System Market Size, by Integrated Scientific Sensor Packages, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Recognizes dedicated scientific sensor packages and associated terminal equipment.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SMART component establishes funded project scope but discloses no separable sensor-package value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SMART component establishes funded project scope but discloses no separable sensor-package value.

7.1.6. Branching Units

Table 35. Global Submarine Communication Cable System Market Size, by Branching Units, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems
   - Taxonomy evidence: Defines branching units, including optical add/drop variants.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.1.7. Cable Joints and Passive Accessories

Table 38. Global Submarine Communication Cable System Market Size, by Cable Joints and Passive Accessories, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes cable joints as submarine-system elements.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

30. ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes submarine cable joints and coupling elements, supporting the passive-accessory commercial scope.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes submarine cable joints and coupling elements, supporting the passive-accessory commercial scope.

7.1.8. Submarine Optical Fiber

Table 41. Global Submarine Communication Cable System Market Size, by Submarine Optical Fiber, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 42. Global Submarine Communication Cable System Market Size, by Submarine Optical Fiber, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 43. Global Submarine Communication Cable System Market Size, by Submarine Optical Fiber, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T G.654 (08/2024): Characteristics of a cut-off shifted single-mode optical fibre and cable
   - Taxonomy evidence: Distinguishes optical-fiber attributes from delivered cable attributes and identifies submarine systems among the intended applications. Only dedicated submarine-use purchases fall within the proposed offering.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 announcement assigns fiber provision to Sumitomo Electric and system construction to NEC; supports distinct component roles but does not verify direct asset-owner fiber invoices.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.2. Marine Services

Table 44. Global Submarine Communication Cable System Market, by Marine Services growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cable Installation and Protection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cable Recovery and Removal	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Marine Maintenance and Repair	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Marine Survey and Inspection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vessel Charter and Marine Support	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 45. Global Submarine Communication Cable System Market Size, by Marine Services, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Supplemental Charter Agreement dated March 21, 2012 - International Cableship Pte Ltd and Global Marine Systems Limited, Exhibit 10.9.1

   · Taxonomy evidence: The agreement distinguishes the vessel-owning entity from the charterer and makes hire payments a separate contractual obligation. This supports a marine-capacity work package within the retained Marine Services context, subject to attribution and single-count allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d778621dex1091.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filed 2012 agreement records separately paid annual vessel hire and distinct owner/charterer roles; it supports commercial access classification, not current availability or 2025 market revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filed 2012 agreement records separately paid annual vessel hire and distinct owner/charterer roles; it supports commercial access classification, not current availability or 2025 market revenue.

2. Consultation Paper No. 15/2022: Licensing Framework and Regulatory Mechanism for Submarine Cable Landing in India - TRAI

   · Taxonomy evidence: The regulator distinguishes cable installation, maintenance, repair, and landing-party activities. Its historical consultation is used for category recognition, not as a statement of current licensing requirements.

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx-xx.xx annual telecommunications-cable faults and stable incident counts despite network expansion; constrains restoration activity rather than observed spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx-xx.xx annual telecommunications-cable faults and stable incident counts despite network expansion; constrains restoration activity rather than observed spending.
14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies out-of-service equipment recovery as a lifecycle offering, supporting category existence without establishing removal frequency or material-resale inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies out-of-service equipment recovery as a lifecycle offering, supporting category existence without establishing removal frequency or material-resale inclusion.

32. Submarine Cable Services - Atlantic Cable Maintenance & Repair Agreement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes maintenance-improvement work, fault repair and storage obligations; commercial entitlement is not interchangeable with depot access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes maintenance-improvement work, fault repair and storage obligations; commercial entitlement is not interchangeable with depot access.

7.2.1. Cable Installation and Protection

Table 48. Global Submarine Communication Cable System Market Size, by Cable Installation and Protection, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G.971 (12/2024): General features of optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes system installation as an implementation activity.
2. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Recognizes cable installation and protective burial as distinct cable activities.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.2.2. Marine Maintenance and Repair

Table 51. Global Submarine Communication Cable System Market Size, by Marine Maintenance and Repair, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 52. Global Submarine Communication Cable System Market Size, by Marine Maintenance and Repair, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Table of contents - ITU-T G.971 (12/2024): General features of optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes maintenance separately from installation and commissioning.
2. ICPC Membership Agreement - Issue 11
   - Taxonomy evidence: Defines a maintenance authority through contracted accountability for the marine cable portion.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx-xx.xx annual telecommunications-cable faults and stable incident counts despite network expansion; constrains restoration activity rather than observed spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx-xx.xx annual telecommunications-cable faults and stable incident counts despite network expansion; constrains restoration activity rather than observed spending.
14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Submarine Cable Services - Atlantic Cable Maintenance & Repair Agreement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes maintenance-improvement work, fault repair and storage obligations; commercial entitlement is not interchangeable with depot access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes maintenance-improvement work, fault repair and storage obligations; commercial entitlement is not interchangeable with depot access.

7.2.3. Vessel Charter and Marine Support

Table 54. Global Submarine Communication Cable System Market Size, by Vessel Charter and Marine Support, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 55. Global Submarine Communication Cable System Market Size, by Vessel Charter and Marine Support, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Supplemental Charter Agreement dated March 21, 2012 - International Cableship Pte Ltd and Global Marine Systems Limited, Exhibit 10.9.1

   · Taxonomy evidence: The executed March xx.xx 2012 supplemental agreement records separately priced charter access to the cable-maintenance vessel CS Cable Retriever through an annual hire arrangement. It supports commercial vessel access distinct from vessel capital acquisition, not current project-level expenditure or 2025 sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d778621dex1091.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filed 2012 agreement records separately paid annual vessel hire and distinct owner/charterer roles; it supports commercial access classification, not current availability or 2025 market revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filed 2012 agreement records separately paid annual vessel hire and distinct owner/charterer roles; it supports commercial access classification, not current availability or 2025 market revenue.

2. Consultation Paper No. 15/2022: Licensing Framework and Regulatory Mechanism for Submarine Cable Landing in India - TRAI

   · Taxonomy evidence: Identifies vessel access and equipment-import support around cable maintenance. This corroborates support functions but does not establish separately priced charter or depot contracts.

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.2.4. Marine Survey and Inspection

Table 57. Global Submarine Communication Cable System Market Size, by Marine Survey and Inspection, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Recognizes marine field surveys supporting submarine telecommunications routes.
2. ICPC Membership Agreement - Issue 11
   - Taxonomy evidence: Defines a route-survey company by contracted marine survey work preceding installation.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.2.5. Cable Recovery and Removal

Table 60. Global Submarine Communication Cable System Market Size, by Cable Recovery and Removal, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 61. Global Submarine Communication Cable System Market Size, by Cable Recovery and Removal, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Recognizes decommissioning through active cable removal, separately from material resale.
2. ICPC Membership Agreement - Issue 11
   - Taxonomy evidence: Defines cable recovery participation through contracted recovery work and recovery-vessel activity.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies out-of-service equipment recovery as a lifecycle offering, supporting category existence without establishing removal frequency or material-resale inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies out-of-service equipment recovery as a lifecycle offering, supporting category existence without establishing removal frequency or material-resale inclusion.

7.3. Operational Support Services

Table 63. Global Submarine Communication Cable System Market, by Operational Support Services growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cable Landing Hosting and Facility Operations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cable Logistics and Depot Services	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Equipment Maintenance and Repair	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Network Monitoring and Technical Support	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Submarine Cable Services - Atlantic Cable Maintenance & Repair Agreement

   · Taxonomy evidence: The description separates depot storage from maintenance-improvement work and fault repair, supporting storage as an identifiable operational-support function rather than treating every storage cost as physical cable restoration. ([acma2017.com](https://www.acma2017.com/services/submarine-cable-services/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contractual spare-storage facilities and separately listed depot rates, supporting logistics/storage attribution rather than automatic inclusion in physical repair.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contractual spare-storage facilities and separately listed depot rates, supporting logistics/storage attribution rather than automatic inclusion in physical repair.

2. Nokia in 2024 - Annual Report on Form 20-F

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 183/2025, de 26 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November 2025 amendment authorizes EUR xx.xx of mixed access and associated operating/maintenance services; it is multi-year consideration, not an annual hosting price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November 2025 amendment authorizes EUR xx.xx of mixed access and associated operating/maintenance services; it is multi-year consideration, not an annual hosting price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bundled station access, storage and maintenance qualify the assumption that operational categories are always invoiced separately.

31. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates warranty support, optional services and post-warranty contract renewal; supports non-additive treatment of initial and recurring support.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists hardware repair and replacement obligations separately from optional monitoring and marine coordination, supporting the equipment-maintenance numerator boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists hardware repair and replacement obligations separately from optional monitoring and marine coordination, supporting the equipment-maintenance numerator boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers NOC and technical-support services as identifiable commercial functions; the brochure supplies no global annual receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers NOC and technical-support services as identifiable commercial functions; the brochure supplies no global annual receipts.
32. Google Cloud anuncia su segundo cable submarino que conectará España con Estados Unidos
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Names separately supplied landing infrastructure, supporting hosting/access purchasing rather than assuming all facility assets are owned by the cable sponsor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Names separately supplied landing infrastructure, supporting hosting/access purchasing rather than assuming all facility assets are owned by the cable sponsor.

7.3.1. Cable Landing Hosting and Facility Operations

Table 67. Global Submarine Communication Cable System Market Size, by Cable Landing Hosting and Facility Operations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Resolução do Conselho de Ministros n.º 18/2023, de 13 de fevereiro
   - Taxonomy evidence: Landing-station rental is an expressly identified commercial purchase, distinct from transmission-capacity resale.

2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 183/2025, de 26 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November 2025 amendment authorizes EUR xx.xx of mixed access and associated operating/maintenance services; it is multi-year consideration, not an annual hosting price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November 2025 amendment authorizes EUR xx.xx of mixed access and associated operating/maintenance services; it is multi-year consideration, not an annual hosting price.

31. Google Cloud anuncia su segundo cable submarino que conectará España con Estados Unidos
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Names separately supplied landing infrastructure, supporting hosting/access purchasing rather than assuming all facility assets are owned by the cable sponsor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Names separately supplied landing infrastructure, supporting hosting/access purchasing rather than assuming all facility assets are owned by the cable sponsor.

7.3.2. Equipment Maintenance and Repair

Table 70. Global Submarine Communication Cable System Market Size, by Equipment Maintenance and Repair, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Lists submarine equipment upgrade and repair as a signed procurement activity.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists hardware repair and replacement obligations separately from optional monitoring and marine coordination, supporting the equipment-maintenance numerator boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists hardware repair and replacement obligations separately from optional monitoring and marine coordination, supporting the equipment-maintenance numerator boundary.

7.3.3. Network Monitoring and Technical Support

Table 73. Global Submarine Communication Cable System Market Size, by Network Monitoring and Technical Support, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   - Taxonomy evidence: Establishes ongoing system supervision and remote-maintenance functions as distinct from physical cable repair.
2. Southern Cross Cables Limited - DigitalMarine deployment update at Nedonna
   - Taxonomy evidence: The buyer describes monitoring alerts used by operating staff, supporting contracted monitoring as an operational deliverable.
3. DigitalMarine - FiberSense
   - Taxonomy evidence: Offers recurring subsea monitoring with network-operations support, establishing a managed-service format rather than proving separately sold analytics licenses.
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

10. NEC IR Day 2022 - Global Business
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.

11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.

12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

14. ICPC Media Enquiries & Frequently Asked Questions
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
20. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
32. ASN End to End Services & Solutions for Submarine Cable Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers NOC and technical-support services as identifiable commercial functions; the brochure supplies no global annual receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers NOC and technical-support services as identifiable commercial functions; the brochure supplies no global annual receipts.

7.3.4. Cable Logistics and Depot Services

Table 76. Global Submarine Communication Cable System Market Size, by Cable Logistics and Depot Services, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 77. Global Submarine Communication Cable System Market Size, by Cable Logistics and Depot Services, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Submarine Cable Services - Atlantic Cable Maintenance & Repair Agreement

   · Taxonomy evidence: The cable-owner cooperative's submarine-cable service description identifies contractual depot storage of operational spares and separately listed storage rates. This establishes a commercial storage category; current renewal terms and prices are not established by the inspected description. ([acma2017.com](https://www.acma2017.com/services/submarine-cable-services/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contractual spare-storage facilities and separately listed depot rates, supporting logistics/storage attribution rather than automatic inclusion in physical repair.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contractual spare-storage facilities and separately listed depot rates, supporting logistics/storage attribution rather than automatic inclusion in physical repair.

2. Recommendation ITU-T G.972 (08/2024) - Definition of terms relevant to optical fibre submarine cable systems

   · Taxonomy evidence: Definitions xx.xx and xx.xx recognize marine-depot or shipboard storage of submarine repeaters, branching-unit spares, and spare cable. This supports the retained depot-service function within communications-asset support, but the standard does not establish prices or a separately awarded storage contract.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items)
)

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.4. Professional and Integration Services

Table 79. Global Submarine Communication Cable System Market, by Professional and Integration Services growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Environmental Assessment and Permitting	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Feasibility and System Engineering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent Quality Assurance	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Procurement and Contract Advisory	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Project Management and Owner Representation	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
System Integration and Commissioning	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Disaggregated System Supply - Pioneer Consulting
   - Taxonomy evidence: Separately describes system engineering, procurement formation, permitting oversight, project management, and implementation work.

2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Broad implementation and maintenance/support reporting supports separating purchased integration and continuing support; company-wide figures are not submarine category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Broad implementation and maintenance/support reporting supports separating purchased integration and continuing support; company-wide figures are not submarine category revenue.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately authorizes EUR xx.xx of works supervision, supporting a purchased assurance function and fee calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately authorizes EUR xx.xx of works supervision, supporting a purchased assurance function and fee calibration.
31. Tonga-Fiji Submarine Cable Project: Completion Report, December 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The appraisal allocates USD xx.xx to consulting; actual consulting costs are not disclosed, so the amount is a budget proxy.

32. Crosslake Fibre - Pioneer Consulting case study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes consolidation of project-management oversight across separately contracted responsibilities; supports purchased owner representation, not observed global fee shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes consolidation of project-management oversight across separately contracted responsibilities; supports purchased owner representation, not observed global fee shares.

7.4.1. System Integration and Commissioning

Table 83. Global Submarine Communication Cable System Market Size, by System Integration and Commissioning, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G.971 (12/2024): General features of optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes system commissioning as a distinct implementation activity.
2. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Separately identifies commissioning support and terminal-equipment relocation work.
3. Disaggregated System Supply - Pioneer Consulting
   - Taxonomy evidence: Identifies end-to-end system implementation as a service distinct from individual equipment purchases.
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Broad implementation and maintenance/support reporting supports separating purchased integration and continuing support; company-wide figures are not submarine category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Broad implementation and maintenance/support reporting supports separating purchased integration and continuing support; company-wide figures are not submarine category revenue.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
20. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.4.2. Project Management and Owner Representation

Table 86. Global Submarine Communication Cable System Market Size, by Project Management and Owner Representation, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Recognizes an overall cable-project manager as a distinct consulting purchase.
2. Project Management - Pioneer Consulting
   - Taxonomy evidence: Describes cable-project coordination, shipboard owner representation, schedule integration, and commercial milestone oversight.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Crosslake Fibre - Pioneer Consulting case study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes consolidation of project-management oversight across separately contracted responsibilities; supports purchased owner representation, not observed global fee shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes consolidation of project-management oversight across separately contracted responsibilities; supports purchased owner representation, not observed global fee shares.

7.4.3. Feasibility and System Engineering

Table 89. Global Submarine Communication Cable System Market Size, by Feasibility and System Engineering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 90. Global Submarine Communication Cable System Market Size, by Feasibility and System Engineering, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Disaggregated System Supply - Pioneer Consulting
   - Taxonomy evidence: Identifies wet-plant engineering and analytical route-engineering assignments.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.4.4. Environmental Assessment and Permitting

Table 92. Global Submarine Communication Cable System Market Size, by Environmental Assessment and Permitting, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Distinguishes environmental assessment from field route surveying.
2. Disaggregated System Supply - Pioneer Consulting
   - Taxonomy evidence: Identifies permitting oversight within separately assembled submarine-system delivery.
3. Consultation Paper No. 15/2022: Licensing Framework and Regulatory Mechanism for Submarine Cable Landing in India - TRAI
   - Taxonomy evidence: Identifies environmental and coastal clearances as separable cable-project concerns.
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
20. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.4.5. Independent Quality Assurance

Table 95. Global Submarine Communication Cable System Market Size, by Independent Quality Assurance, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Resolução do Conselho de Ministros n.º 18/2023, de 13 de fevereiro
   - Taxonomy evidence: Works supervision is authorized as a separate service contract.
2. Project Management - Pioneer Consulting
   - Taxonomy evidence: Separately identifies product-assurance oversight, quality-plan review, and acceptance representation.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Resolução do Conselho de Ministros n.º 104/2022, de 2 de novembro
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately authorizes EUR xx.xx of works supervision, supporting a purchased assurance function and fee calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately authorizes EUR xx.xx of works supervision, supporting a purchased assurance function and fee calibration.

7.4.6. Procurement and Contract Advisory

Table 98. Global Submarine Communication Cable System Market Size, by Procurement and Contract Advisory, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Procurement - Pioneer Consulting
   - Taxonomy evidence: Describes submarine-system bid evaluation, supplier selection, commercial negotiation, and contract formation as advisory deliverables.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.5. Landing Infrastructure Works

Table 101. Global Submarine Communication Cable System Market, by Landing Infrastructure Works growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cable Landing Station Construction and Fitout	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Landfall Civil Works	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Procurement descriptions separately identify landing-station foundations and beach-manhole-to-station works. Some historical entries are canceled and do not establish completed construction.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Tonga-Fiji Submarine Cable Project: Completion Report, December 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of civil works and USD xx.xx of cable-system investment; provides a regional fixed-site cost calibration, with incomplete government-cost reporting.

7.5.1. Cable Landing Station Construction and Fitout

Table 105. Global Submarine Communication Cable System Market Size, by Cable Landing Station Construction and Fitout, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Identifies landing-station construction and dedicated station power infrastructure.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.5.2. Landfall Civil Works

Table 108. Global Submarine Communication Cable System Market Size, by Landfall Civil Works, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. World Bank procurement plan - Federated States of Micronesia Connectivity Project, P130592
   - Taxonomy evidence: Identifies dedicated civil connections between beach manholes and landing stations.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.6. Software

Table 111. Global Submarine Communication Cable System Market, by Software growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cable Planning and Marine Operations Software	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Nokia in 2024 - Annual Report on Form 20-F

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

2. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
3. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
4. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
5. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
6. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

7. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
8. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

12. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
13. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 Optical Networking revenue of USD xx.xx and software/services revenues of USD xx.xx and USD xx.xx constrain a scope-adjusted software-to-equipment proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The EMEA discussion reports decreased sales to submarine operators, qualifying uninterrupted network-upgrade and software-adoption assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The EMEA discussion reports decreased sales to submarine operators, qualifying uninterrupted network-upgrade and software-adoption assumptions.
14. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
15. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
16. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

17. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
18. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
19. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
20. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
21. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
22. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
23. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

24. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
25. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
26. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
27. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
28. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
29. Fiber sensing (DAS) - Alcatel Submarine Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment offering includes processing software, qualifying assumptions that every analytics function is independently licensed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment offering includes processing software, qualifying assumptions that every analytics function is independently licensed.

30. MakaiPlan - Makai Ocean Engineering
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets dedicated submarine cable-planning software; supports a software entitlement category distinct from engineering labor, without establishing realized license value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets dedicated submarine cable-planning software; supports a software entitlement category distinct from engineering labor, without establishing realized license value.

7.6.1. Network Control and Management Software

Table 115. Global Submarine Communication Cable System Market Size, by Network Control and Management Software, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   - Taxonomy evidence: Describes computer-based supervision and interfaces to network management. This supports the function, not separately priced software licenses.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The EMEA discussion reports decreased sales to submarine operators, qualifying uninterrupted network-upgrade and software-adoption assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The EMEA discussion reports decreased sales to submarine operators, qualifying uninterrupted network-upgrade and software-adoption assumptions.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.6.2. Cable Planning and Marine Operations Software

Table 118. Global Submarine Communication Cable System Market Size, by Cable Planning and Marine Operations Software, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. MakaiPlan - Makai Ocean Engineering
   - Taxonomy evidence: Markets dedicated submarine-cable route-planning software, corroborating a software deliverable distinct from engineering labor or cable equipment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets dedicated submarine cable-planning software; supports a software entitlement category distinct from engineering labor, without establishing realized license value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets dedicated submarine cable-planning software; supports a software entitlement category distinct from engineering labor, without establishing realized license value.
2. ORE Seminar: Makai Ocean Engineering: An update on current projects - University of Hawai'i at Mānoa
   - Taxonomy evidence: The university's April 2026 seminar record describes proprietary planning and cable-installation software used for telecommunications cables. The description originates with the presenting supplier and is not independent market-share evidence.

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

7.6.3. Sensing Data Processing and Analytics Software

Table 121. Global Submarine Communication Cable System Market Size, by Sensing Data Processing and Analytics Software, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Specifies receiving, storing, and forwarding sensor data at land stations; separately purchased analytics software is not established by the standard alone.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Fiber sensing (DAS) - Alcatel Submarine Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment offering includes processing software, qualifying assumptions that every analytics function is independently licensed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment offering includes processing software, qualifying assumptions that every analytics function is independently licensed.

8. Submarine Communication Cable System Market, by Repeater Architecture

Repeater Architecture changes the equipment and support boundary that a buyer must procure. Repeatered Systems include submerged repeaters and associated power-feeding equipment. ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■

The architecture label is not a complete supplier-eligibility or operating-context decision. Xtera publicly offers both repeatered and unrepeatered systems, including turnkey delivery, redeployment, and upgrades. ■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■

Figure 10. Global Submarine Communication Cable System Market Size, by Repeater Architecture, 2025 (%)

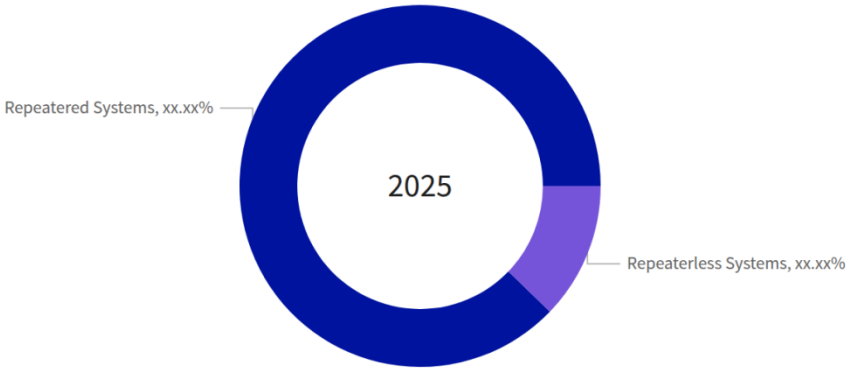

Figure 11. Global Submarine Communication Cable System Market, by Repeater Architecture, 2032 (USD Million)

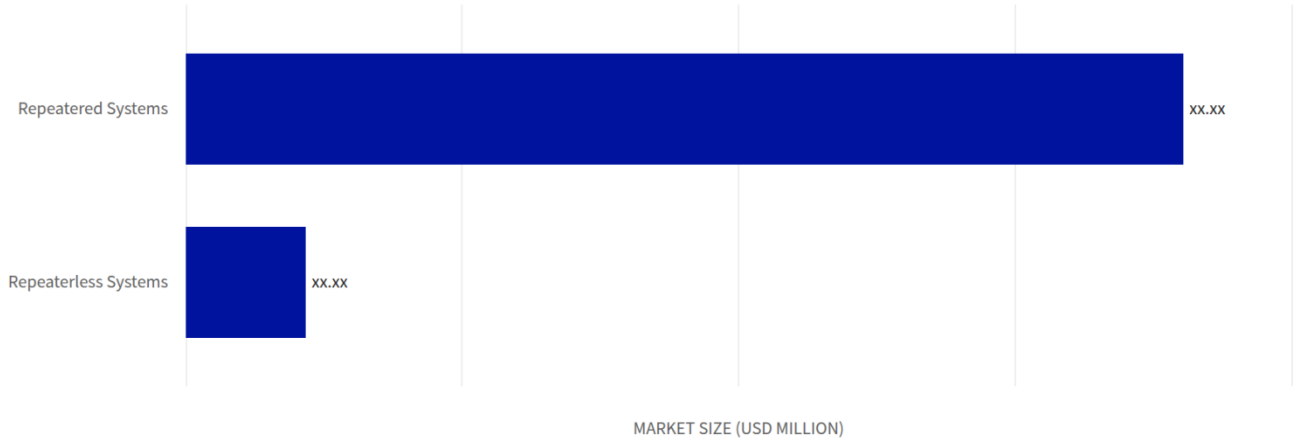

Table 124. Global Submarine Communication Cable System Market, by Repeater Architecture growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Repeatered Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Repeaterless Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 125. Global Submarine Communication Cable System Market Size, by Repeater Architecture, 2017-2032 (USD Million)

Repeater Architecture	2023	2024	2025	2026	2027	2032	CAGR (%)
Repeatered Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Repeaterless Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Recommendation ITU-T G.972 (08/2024): Definition of terms relevant to optical fibre submarine cable systems

   · The terminology recognizes repeatered and repeaterless cable constructions for shallow and deep water, supporting separation of architecture from water-depth classification. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. Recommendation ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems

   · ITU-T G.xx.xx recognizes repeaterless systems and remotely optically pumped amplifier applications within that classification. It supports distinguishing repeaterless configurations with and without submerged amplification. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. Experience
   - Xtera publicly offers repeatered and unrepeatered systems and describes turnkey, redeployment, and upgrade roles. This is evidence of overlapping supplier offerings, not universal system qualification. ([xtera.com](https://xtera.com/experience/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.
4. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Recognizes repeaterless submarine systems and their remotely optically pumped amplification variants.
5. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
6. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
7. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.

8. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
9. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
10. SubCom of Newington plans multi-million-dollar expansion
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
11. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.

13. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
15. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
16. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
17. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
18. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.

19. **Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System**
    · Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
20. **Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System**
    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

8.1. Repeatered Systems

Table 126. Global Submarine Communication Cable System Market Size, by Repeatered Systems, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   - Taxonomy evidence: Addresses repeatered optical submarine systems and their wet-plant and terminal interfaces.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The approximately USD xx.xx, xx.xx-km SEA-US program constrains large-system purchasing-ticket scale; it is not one year's realized revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Experience - Xtera
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The overlapping supplier portfolio qualifies any assumption that architecture uniquely determines the supplier pool.

8.2. Repeaterless Systems

Table 129. Global Submarine Communication Cable System Market, by Repeaterless Systems growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Repeaterless Systems Without Submerged Amplifiers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
ROPA-Assisted Repeaterless Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 130. Global Submarine Communication Cable System Market Size, by Repeaterless Systems, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 131. Global Submarine Communication Cable System Market Size, by Repeaterless Systems, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Provides the established repeaterless-system classification, including ROPA-assisted applications.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Experience - Xtera
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Xtera offers repeatered and unrepeatered supply within one portfolio and identifies xx.xx historical turnkey delivery/redeployment projects; portfolio references are not annual value weights.

8.2.1. Repeaterless Systems Without Submerged Amplifiers

Table 133. Global Submarine Communication Cable System Market Size, by Repeaterless Systems Without Submerged Amplifiers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Distinguishes repeaterless configurations without ROPA from configurations using submerged remote optical amplification.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

8.2.2. ROPA-Assisted Repeaterless Systems

Table 136. Global Submarine Communication Cable System Market Size, by ROPA-Assisted Repeaterless Systems, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. ITU-T G.973 (11/2016): Characteristics of repeaterless optical fibre submarine cable systems
   - Taxonomy evidence: Treats ROPA as part of repeaterless submarine systems rather than electrically powered repeatered systems.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

9. Submarine Communication Cable System Market, by Terminal Interoperability

[redacted] Owners should translate that potential into an approved vendor set, documented acceptance responsibility, and continuing support for the particular system. A terminal supplier should establish those conditions before treating an open designation as an accessible replacement opportunity.

[redacted] Buyers seeking sourcing flexibility without managing every supplier interface can evaluate a consolidated offer, provided the present proposal documents equipment eligibility and end-to-end accountability. Independent purchasing preserves package-level choice but leaves more coordination with the owner.

[redacted] Retaining the incumbent may consolidate support, but that option should be compared with an explicitly qualified alternative rather than presumed mandatory. Public evidence does not settle the restrictions of an identified closed-interface contract, so system-specific switching conclusions remain unresolved.

Figure 12. Global Submarine Communication Cable System Market Size, by Terminal Interoperability, 2025 (%)

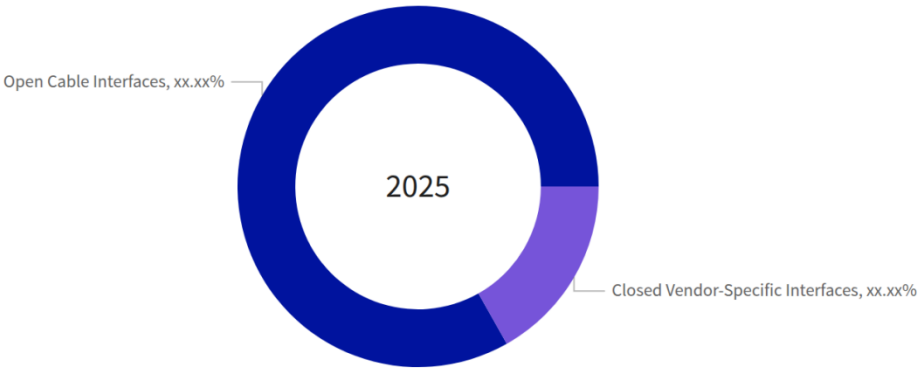

Figure 13. Global Submarine Communication Cable System Market, by Terminal Interoperability, 2032 (USD Million)

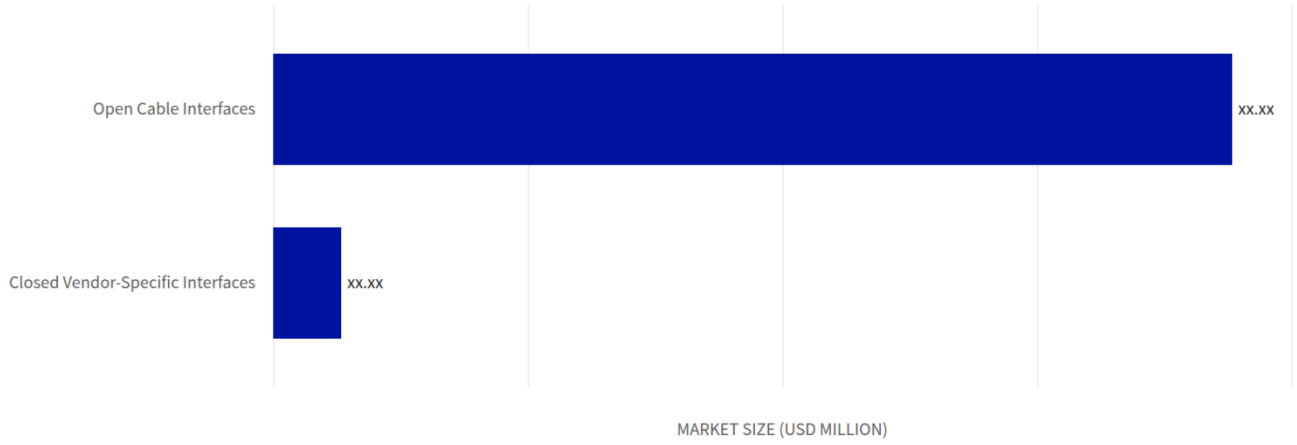

Table 139. Global Submarine Communication Cable System Market, by Terminal Interoperability growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Closed Vendor-Specific Interfaces	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Cable Interfaces	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 140. Global Submarine Communication Cable System Market Size, by Terminal Interoperability, 2017-2032 (USD Million)

Terminal Interoperability	2023	2024	2025	2026	2027	2032	CAGR (%)
Closed Vendor-Specific Interfaces	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Cable Interfaces	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems

   · ITU-T G.xx.xx identifies multivendor transmission equipment as its primary purpose. This supports open-interface participation but does not establish system-specific qualification or contractual restrictions. ([itu.int](https://www.itu.int/ITU-T/recommendations/rec.aspx?lang=en&rec=xx.xx))

2. Celebrating the completion of the most advanced subsea cable across the Atlantic

   · Microsoft's MAREA account describes interoperability with different networking equipment as supporting equipment upgrades. This is an asset-owner example rather than general switching authorization. ([blogs.microsoft.com](https://blogs.microsoft.com/blog/2017/xx.xx/xx.xx/celebrating-completion-advanced-subsea-cable-across-atlantic/))

3. TE SubCom and Ciena Partner to Deliver Enhanced Open Submarine Cable Networks

   · The November xx.xx 2016 alliance offered qualified Ciena equipment through either a consolidated TE SubCom turnkey purchase or independent supplier contracts. This historical counterexample separates interface openness from contract consolidation. ([ciena.com](https://www.ciena.com/about/newsroom/press-releases/TE-SubCom-and-Ciena-Partner-to-Deliver-Enhanced-Open-Submarine-Cable-Networks-.html))

4. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems

   · Taxonomy evidence: Establishes interoperable interfaces supporting terminal equipment supplied independently of the submerged-plant vendor.

5. Nokia in 2024 - Annual Report on Form 20-F

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

6. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
7. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
8. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
9. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
10. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

11. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
15. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

16. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
17. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
18. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
19. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
20. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
21. Liberty Networks, Gold Data, Sparkle, and SubCom Announce Execution and Enforcement of MANTA Subsea Cable System Contract
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.

9.1. Open Cable Interfaces

Table 141. Global Submarine Communication Cable System Market Size, by Open Cable Interfaces, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.977.1 (10/2020): Transverse compatible dense wavelength division multiplexing applications for repeatered optical fibre submarine cable systems
   - Taxonomy evidence: Partial transverse compatibility permits an independent terminal vendor while both terminal ends of a link may still use the same manufacturer.
2. Celebrating the completion of the most advanced subsea cable across the Atlantic - Microsoft
   - Taxonomy evidence: The cable-system buyer describes MAREA interoperability with different networking equipment and associated upgrade flexibility.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Liberty Networks, Gold Data, Sparkle, and SubCom Announce Execution and Enforcement of MANTA Subsea Cable System Contract
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2025 announcement identifies a xx.xx-km Open Cable system with a consolidated design, manufacture and installation award; openness and contracting organization are distinct.

9.2. Closed Vendor-Specific Interfaces

Table 144. Global Submarine Communication Cable System Market Size, by Closed Vendor-Specific Interfaces, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists longitudinal and transverse compatibility configurations separately. Longitudinal compatibility alone does not establish contractual vendor closure.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Liberty Networks, Gold Data, Sparkle, and SubCom Announce Execution and Enforcement of MANTA Subsea Cable System Contract
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The open-system consolidated award is counterevidence to classifying a system as closed merely because one lead supplier delivers it.

10. Submarine Communication Cable System Market, by Optical Fiber Core Architecture

[illegible] The commercial distinction is also visible in the announced supply allocation: Meta will fund and operate Petal, NEC will undertake system construction, and Sumitomo Electric will supply the multicore fiber. A fiber supplier's participation consequently establishes a component role, not independent complete-system responsibility.

Petal's announced service milestone is 2029, so the collaboration establishes a named commercial development path rather than completed operating evidence. Buyers requiring an operating reference should keep a Multicore Fiber proposal conditional on that prerequisite and documented delivery and support commitments. [illegible]

Figure 14. Global Submarine Communication Cable System Market Size, by Optical Fiber Core Architecture, 2025 (%)

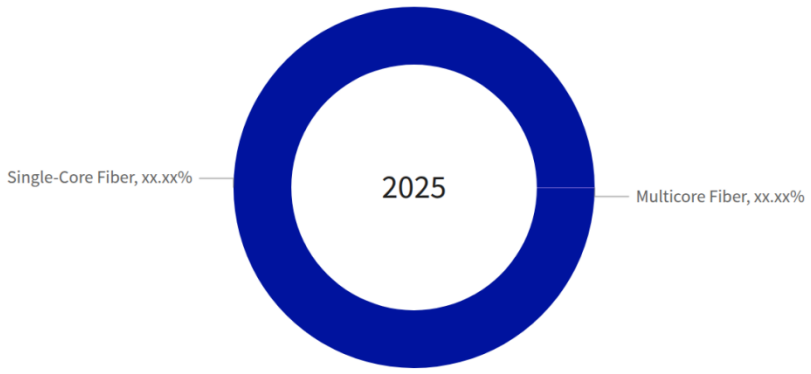

Figure 15. Global Submarine Communication Cable System Market, by Optical Fiber Core Architecture, 2032 (USD Million)

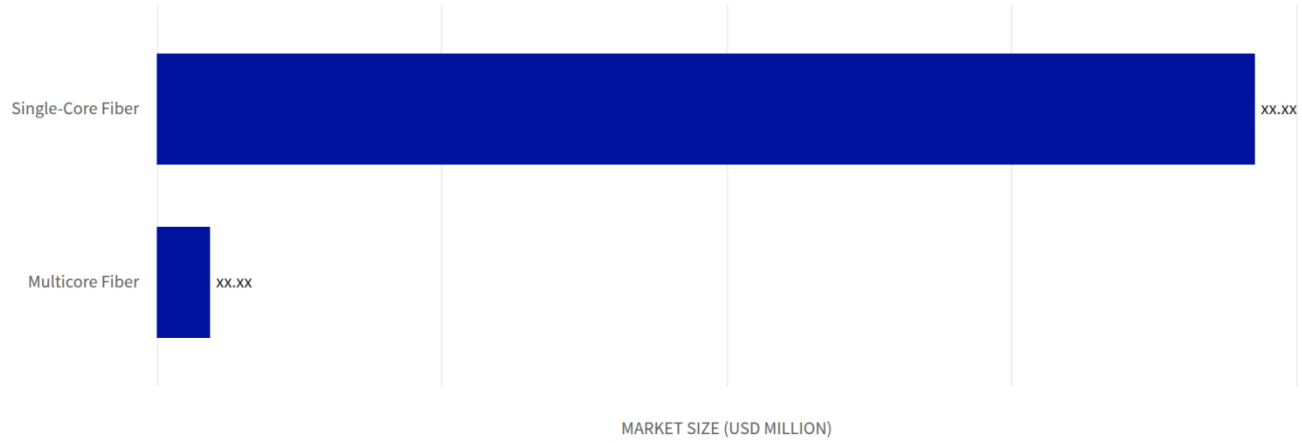

Table 147. Global Submarine Communication Cable System Market, by Optical Fiber Core Architecture growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Multicore Fiber	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Single-Core Fiber	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 148. Global Submarine Communication Cable System Market Size, by Optical Fiber Core Architecture, 2017-2032 (USD Million)

Optical Fiber Core Architecture	2023	2024	2025	2026	2027	2032	CAGR (%)
Multicore Fiber	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Single-Core Fiber	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Meta, NEC, and Sumitomo Electric to Collaborate on “Petal,” the World’s First Petabit Transoceanic Submarine Cable System

   · The September xx.xx 2026 announcement identifies Petal's multicore architecture and named supply roles, with operation scheduled for 2029. It establishes planned development rather than completed operation. ([nec.com](https://www.nec.com/en/press/xx.xx/global_20260922_01.html))

   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Petal is an approximately xx.xx-km multicore development planned for operation in 2029, constraining conditional forecast timing rather than establishing future sales.

2. Inside Petal: Building the World’s First Petabit-Class Transoceanic Subsea Cable
   · Meta distinguishes conventional single-core fiber from Petal's planned multicore fiber and identifies NEC's system role and Sumitomo Electric's fiber-supply role. Only classification and commercial allocation are used. ([engineering.fb.com](https://engineering.fb.com/2026/xx.xx/xx.xx/connectivity/petal-petabit-transoceanic-subsea-cable/))
   · Taxonomy evidence: The buyer contrasts conventional one-core transmission fiber with the announced two-core Petal cable architecture.
3. Nokia in 2024 - Annual Report on Form 20-F
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
18. Sumitomo Electric Launches World's First Mass-produced Ultra-low Loss, Multi-core Fiber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.

10.1. Single-Core Fiber

Table 149. Global Submarine Communication Cable System Market Size, by Single-Core Fiber, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 150. Global Submarine Communication Cable System Market Size, by Single-Core Fiber, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 151. Global Submarine Communication Cable System Market Size, by Single-Core Fiber, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Inside Petal: Building the World's First Petabit-Class Transoceanic Subsea Cable - Engineering at Meta
   - Taxonomy evidence: Explicitly identifies one-core fiber separately from two-core fiber; core count is not fiber-pair count.
2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
30. Sumitomo Electric Launches World's First Mass-produced Ultra-low Loss, Multi-core Fiber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The product description distinguishes multiple cores within a fiber from conventional single-core fiber, supporting the economic classification.

10.2. Multicore Fiber

Table 152. Global Submarine Communication Cable System Market Size, by Multicore Fiber, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 153. Global Submarine Communication Cable System Market Size, by Multicore Fiber, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 154. Global Submarine Communication Cable System Market Size, by Multicore Fiber, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Inside Petal: Building the World's First Petabit-Class Transoceanic Subsea Cable - Engineering at Meta
   - Taxonomy evidence: Identifies multicore fiber in a named commercial submarine-system program. This announcement does not establish 2025 sales or an operational deployment.
2. Announcing Petal, a First-of-its-Kind Transoceanic Subsea Cable - Meta
   - Taxonomy evidence: The September 2026 buyer announcement specifies multicore fiber and expected service in 2029, distinguishing announced commercial development from an operating asset.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Petal is an approximately xx.xx-km multicore development planned for operation in 2029, constraining conditional forecast timing rather than establishing future sales.
19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Sumitomo Electric Launches World's First Mass-produced Ultra-low Loss, Multi-core Fiber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 announcement scheduled multicore-fiber sales from October 2023 and included submarine applications; it supports commercial availability, not observed 2025 submarine sales.

11. Submarine Communication Cable System Market, by Sensing Integration

Sensing Integration separates an ordinary communication purchase from additional monitoring deliverables. ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ A buyer should therefore identify whether it is purchasing communication-system supervision, Fiber-Based Sensing, Integrated Sensor Packages, or Combined Fiber and Sensor-Package Sensing before assigning budgets and service responsibilities.

Fiber-Based Sensing has equipment, software, and managed-service purchasing routes. ASN offers sensing equipment with processing software and support, while FiberSense markets a monitoring service with network-operations support. ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■

■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ A combined proposal should consequently require documentation of both deliverables, their funding, data rights, and continuing support rather than infer readiness from separate portfolios. Adding scientific monitoring can broaden the project's beneficiaries and obligations; where no funded additional requirement is established, connectivity procurement should not silently assume those commitments.

Figure 16. Global Submarine Communication Cable System Market Size, by Sensing Integration, 2025 (%)

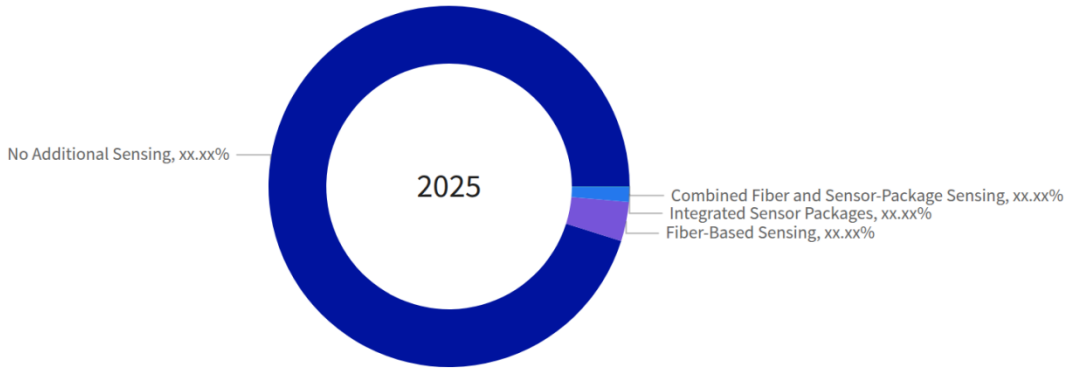

Figure 17. Global Submarine Communication Cable System Market, by Sensing Integration, 2032 (USD Million)

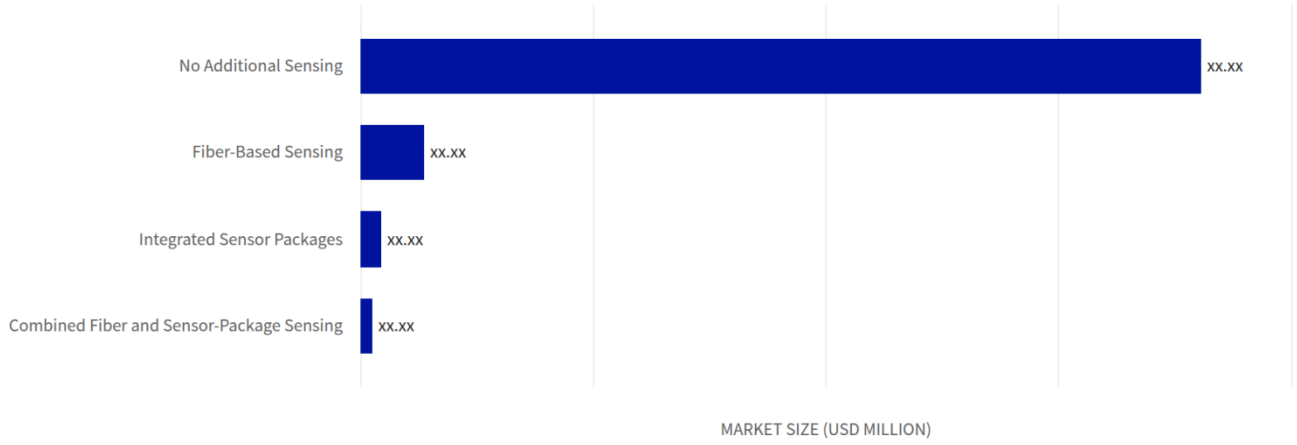

Table 155. Global Submarine Communication Cable System Market, by Sensing Integration growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Combined Fiber and Sensor-Package Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fiber-Based Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Integrated Sensor Packages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Additional Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 156. Global Submarine Communication Cable System Market Size, by Sensing Integration, 2017-2032 (USD Million)

Sensing Integration	2023	2024	2025	2026	2027	2032	CAGR (%)
Combined Fiber and Sensor-Package Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fiber-Based Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Integrated Sensor Packages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Additional Sensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Fiber sensing (DAS)

   · The sensing portfolio includes equipment, software, and maintenance support. These are observed offerings; funding, customer data rights, and asset-specific suitability require separate verification. ([asn.com](https://www.asn.com/fiber-sensing/))

2. Recommendation ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems

   · ITU-T G.xx.xx separately identifies transmission-related and sensing-related monitoring functions, supporting distinction between ordinary communication supervision and additional sensing scope. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. DigitalMarine

   · The DigitalMarine offering supports a managed fiber-based monitoring route distinct from purchasing sensing equipment and associated software. Customer-specific data and support obligations remain contractual questions. ([fibersense.com](https://fibersense.com/digitalmarine/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.

4. Recommendation ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems

   · The recommendation distinguishes scientific sensing and telecommunications functions within SMART communication systems. It establishes a recognized category, not a named funded or operating combined-sensing asset. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

5. IP e ASN assinam contrato para construção de Novo Anel CAM
   - The owner's March xx.xx 2024 contract announcement specifies an Atlantic CAM SMART component and collaboration with IPMA for scientific monitoring purposes. This is contracted development, not operating evidence. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.
6. Alcatel Submarine Networks (ASN) commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
   - ASN's March xx.xx 2023 release describes ongoing development combining SMART with other sensing technologies. It supports announced intent, not a named operating asset with both purchased sensing scopes. ([asn.com](https://www.asn.com/press-release/alcatel-submarine-networks-asn-commences-development-of-climate-change-solution-by-integrating-scientific-sensors-and-sensing-technologies-into-submarine-telecom-systems/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.
7. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Defines a scientific sensor subsystem additional to telecommunications functions.
8. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

9. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
10. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
11. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
12. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
13. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

14. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
15. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
16. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
17. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
18. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

19. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
20. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
21. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
22. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

11.1. No Additional Sensing

Table 157. Global Submarine Communication Cable System Market Size, by No Additional Sensing, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T G.979 (11/2025): Characteristics of monitoring systems for optical fibre submarine cable systems
   · Taxonomy evidence: Transmission supervision and sensing-subsystem monitoring are separately described; ordinary transmission supervision alone does not establish additional sensing.

2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

27. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

28. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

29. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

11.2. Fiber-Based Sensing

Table 160. Global Submarine Communication Cable System Market Size, by Fiber-Based Sensing, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 161. Global Submarine Communication Cable System Market Size, by Fiber-Based Sensing, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Distinguishes sensing using existing telecommunications fibers from purpose-built SMART sensor integration.
2. Southern Cross Cables Limited - DigitalMarine deployment update at Nedonna
   - Taxonomy evidence: The asset buyer reports live deployment of a fiber-based subsea monitoring service at its Nedonna landing, establishing commercial use rather than a research-only demonstration.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. DigitalMarine - FiberSense
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The managed-service page lists USD xx.xx xx.xx and xx.xx per month per landing, excluding installation and based on a five-year term; these are price proxies, not realized global sales.

11.3. Integrated Sensor Packages

Table 163. Global Submarine Communication Cable System Market Size, by Integrated Sensor Packages, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 164. Global Submarine Communication Cable System Market Size, by Integrated Sensor Packages, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T G.9730.2 (08/2024): Scientific monitoring and reliable telecommunication submarine cable systems
   - Taxonomy evidence: Recognizes sensor sets integrated with telecommunications-capable submarine assets.
2. Submarine cables and marine biodiversity - UNEP-WCMC and International Cable Protection Committee, April 2025
   - Taxonomy evidence: Recognizes SMART cables providing sensing alongside telecommunications.
3. IP e ASN assinam contrato para construção de Novo Anel CAM - Infraestruturas de Portugal
   - Taxonomy evidence: The project owner describes contracted Atlantic CAM telecommunications infrastructure with an integrated scientific-monitoring component.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner discloses EUR xx.xx planned CAM investment and a SMART component; the model assumes an annual recognition fraction, not a separately observed sensor price.

4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.

22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

11.4. Combined Fiber and Sensor-Package Sensing

Table 166. Global Submarine Communication Cable System Market Size, by Combined Fiber and Sensor-Package Sensing, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Nokia in 2024 - Annual Report on Form 20-F

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

2. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
3. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
4. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
5. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
6. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

7. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
8. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

12. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
13. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
14. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
15. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
16. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
17. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

18. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
19. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
20. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
21. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
22. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
23. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

24. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
25. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
26. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
27. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
28. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
29. Alcatel Submarine Networks commences development of Climate Change Solution by integrating scientific sensors and sensing technologies into submarine telecom systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2023 release describes ongoing combined SMART and other sensing development; it does not verify a named paid or operating combined-sensing asset.

12. Submarine Communication Cable System Market, by System Topology

System Topology changes the commercial dependency a buyer must examine. ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■ ■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■ Separate spokes do not remove that shared access dependency.

■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■■ Shared infrastructure can avoid duplicating a complete connection, but additional participants create permission and governance interfaces. A diagram alone cannot establish purchasing authority or determine the contracted distinction between a branched configuration and a trunk-and-branch system.

■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■ ■■ ■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ A Branched Ring also requires confirmation of what continuity commitment reaches each branch. If the requirement is geographic independence rather than access around one system, a ring designation alone is insufficient.

Figure 18. Global Submarine Communication Cable System Market Size, by System Topology, 2025 (%)

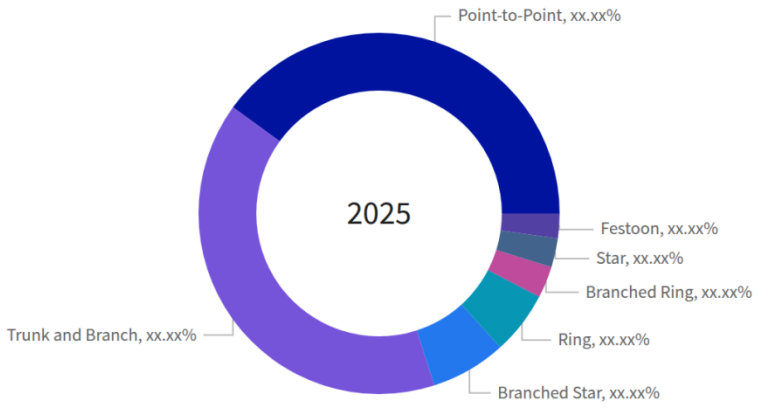

Figure 19. Global Submarine Communication Cable System Market, by System Topology, 2032 (USD Million)

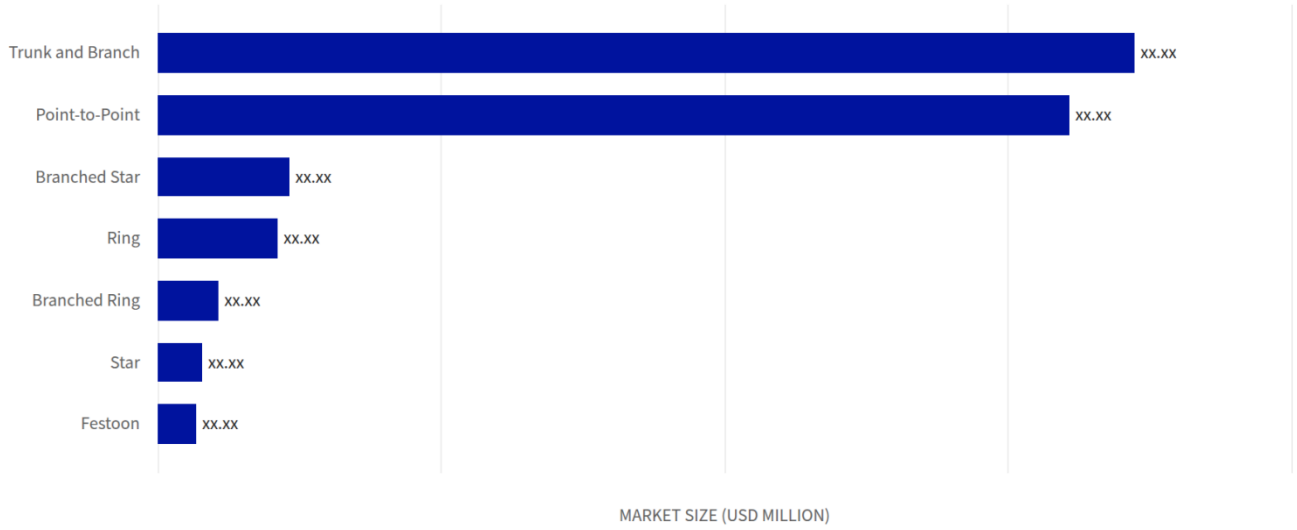

Table 169. Global Submarine Communication Cable System Market, by System Topology growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. ViaTunisia subsea segment reaches Ready for Service

   · Orange's June xx.xx 2026 announcement identifies ViaTunisia as an operational point-to-point segment of Medusa. It supports a defined segment purchase within a wider program. ([newsroom.orange.com](https://newsroom.orange.com/viatunisia-subsea-segment-reaches-ready-for-service/?lang=eng))

2. Celebrating the completion of the most advanced subsea cable across the Atlantic

   · Microsoft identifies physical separation from other transatlantic cables as part of MAREA's resilience rationale, supporting distinction between route diversity and topology. ([blogs.microsoft.com](https://blogs.microsoft.com/blog/2017/xx.xx/xx.xx/celebrating-completion-advanced-subsea-cable-across-atlantic/))

3. IP e ASN assinam contrato para construção de Novo Anel CAM
   - The contracted Atlantic CAM announcement expressly identifies ring topology and resilience objectives, supporting an asset-specific development example rather than a universal continuity entitlement. ([infraestruturasdeportugal.pt](https://www.infraestruturasdeportugal.pt/pt-pt/ip-e-asn-assinam-contrato-para-construcao-de-novo-anel-cam))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
4. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - The July 2024 table of contents separately recognizes Point-to-Point, Star, Branched Star, Trunk and Branch, Festoon, Ring, and Branched Ring. This supports the exact accepted topology categories. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/g/T-REC-G.Sup41-xx.xx-I%xx.xx%21TOC-HTM-E.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.

5. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   · The topology descriptions distinguish direct links, a common shore terminal, submarine branching and shared trunks, successive coastal links, rings, and branched rings. These classifications support commercial dependency analysis without establishing contract rights. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-G.Sup41-xx.xx-S%xx.xx%21PDF-E&lang=e&type=items))
6. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   · Taxonomy evidence: The current topology section explicitly lists seven submarine optical-network configurations.
7. Nokia in 2024 - Annual Report on Form 20-F
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
8. Nokia Annual Report on Form 20-F 2021
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
9. TE Connectivity Ltd. 2018 Annual Report
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
10. NEC Financial Results for the First Quarter Ended June 30, 2025
    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
11. NEC Financial Results for the Fiscal Year Ended March 31, 2026
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

12. SubCom of Newington plans multi-million-dollar expansion
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
13. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
14. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
15. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
16. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

17. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
18. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
19. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
20. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
21. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

12.1. Point-to-Point

Table 171. Global Submarine Communication Cable System Market Size, by Point-to-Point, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 172. Global Submarine Communication Cable System Market Size, by Point-to-Point, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists point-to-point as a distinct topology.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Describes a direct link between two terminal stations.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The system-stock constraint is a common input to the modeled installed-asset topology pool, not an observed Point-to-Point mix.
14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists Point-to-Point as a separate topology; classification does not disclose a purchasing share.

12.2. Trunk and Branch

Table 174. Global Submarine Communication Cable System Market Size, by Trunk and Branch, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 175. Global Submarine Communication Cable System Market Size, by Trunk and Branch, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists trunk and branch as a distinct topology.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Describes terminal branches connected to a common trunk.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The five-area system and full-project budget constrain multi-landing backbone purchasing scale without measuring the global topology mix.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Trunk and Branch.

12.3. Branched Star

Table 177. Global Submarine Communication Cable System Market Size, by Branched Star, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 178. Global Submarine Communication Cable System Market Size, by Branched Star, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 179. Global Submarine Communication Cable System Market Size, by Branched Star, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists branched star separately from star.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Distinguishes underwater fan-out from independent shore-based star spokes.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Star, rather than merging it with Star.

12.4. Ring

Table 180. Global Submarine Communication Cable System Market Size, by Ring, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 181. Global Submarine Communication Cable System Market Size, by Ring, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Society of American Military Engineers Awards NAVFAC EXWC 2019 Project of the Year
   - Taxonomy evidence: The government project account expressly identifies the submarine fiber connection as a ring, providing an asset-specific example for the retained Ring topology rather than inferring topology from the agency's wider network.
   ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))
2. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists ring as a distinct topology.
3. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Describes a closed arrangement of connected point-to-point links.

4. IP e ASN assinam contrato para construção de Novo Anel CAM - Infraestruturas de Portugal
   - Taxonomy evidence: The project owner explicitly specifies a ring topology for the contracted replacement cable system.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The contracted xx.xx-km program expressly has ring topology, providing an asset-specific funded ring anchor.
5. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
6. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
7. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
8. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.

9. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
10. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
11. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
14. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

15. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
16. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
17. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
20. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
32. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Ring.

12.5. Branched Ring

Table 183. Global Submarine Communication Cable System Market Size, by Branched Ring, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 184. Global Submarine Communication Cable System Market Size, by Branched Ring, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 185. Global Submarine Communication Cable System Market Size, by Branched Ring, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists branched ring separately from ring.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Distinguishes a ring with underwater branching units.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Branched Ring.

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists star as a distinct topology.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Describes separate cable links from a main terminal station.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Star, supporting the modeled category boundary.

12.7. Festoon

Table 189. Global Submarine Communication Cable System Market Size, by Festoon, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Table of contents - ITU-T G-series Supplement 41 (07/2024): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Lists festoon as a distinct topology.
2. ITU-T G-series Supplement 41 (06/2007): Design guidelines for optical fibre submarine cable systems
   - Taxonomy evidence: Describes successive links between coastal landing points.
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
31. Table of Contents - ITU-T G-series Supplement 41 (07/2024)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes Festoon.

13. Submarine Communication Cable System Market, by Connectivity Application

Telecommunications Backbone Connectivity and Cloud and Content Network Interconnection create different purchasing requirements. ■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Neither application establishes that an announced system is available to outside customers.

Enterprise and Public-Service Connectivity links international access to institutional services, whereas Offshore Operational Connectivity can be anchored by continuing industrial operations. CARCIP included government networks, schools, and health clinics; INPEX and Shell's announced Nextgen partnership tied communications to offshore facilities over their operating lives. ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■

Defense and Security Connectivity need not mean a defense-only asset: Norway's preparedness white paper describes a proposed fiber connection serving civilian and military needs. Research and Education Connectivity can make a particular interconnection location decisive. ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■

■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ Shared infrastructure may serve several purposes, but conflicting access priorities can favor separately contracted packages. Multiple uses of one cable are not separate complete-system opportunities.

Figure 20. Global Submarine Communication Cable System Market Size, by Connectivity Application, 2025 (%)

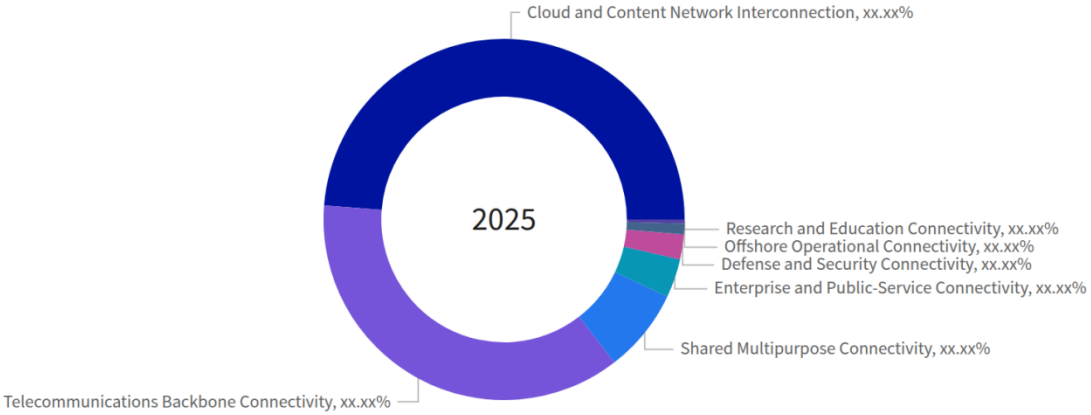

Figure 21. Global Submarine Communication Cable System Market, by Connectivity Application, 2032 (USD Million)

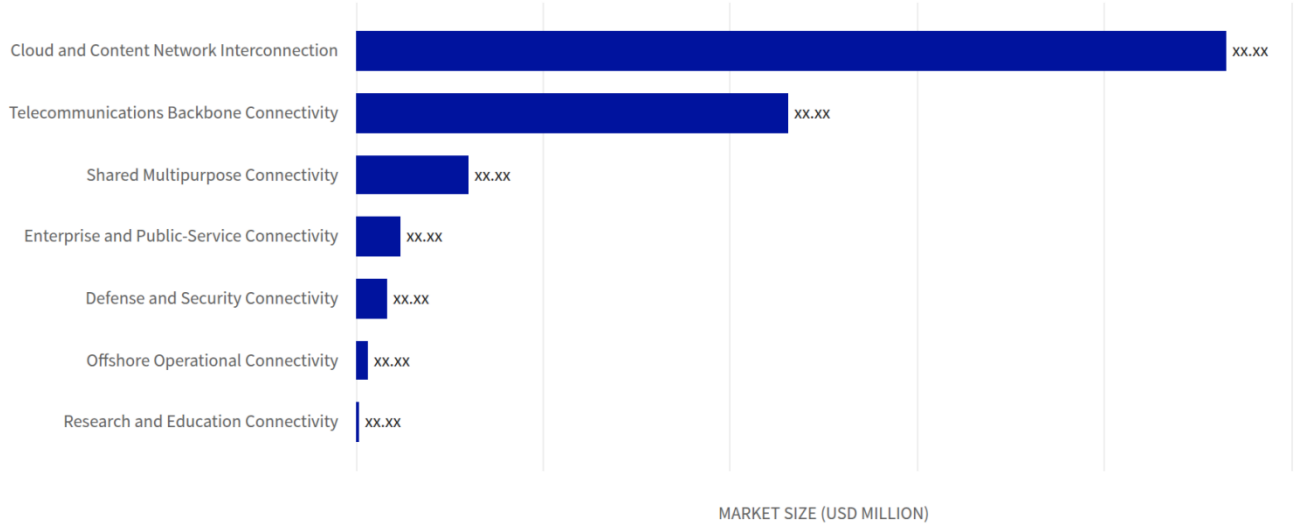

Table 192. Global Submarine Communication Cable System Market, by Connectivity Application growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cloud and Content Network Interconnection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Defense and Security Connectivity	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable
   · Google's Sol announcement links the proposed system to its cloud network, landing partners, and terrestrial interconnections; it does not establish outside-customer availability. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))
2. Connecting Islands, Creating Opportunity: Digital Transformation Expands Jobs in the Federated States of Micronesia (FSM)
   · The FSM program combines international connectivity, domestic-network development, open-access arrangements, and institutional reform, supporting the conditional requirement to assess domestic-access complements. ([worldbank.org](https://www.worldbank.org/en/results/2026/xx.xx/xx.xx/connecting-islands-creating-opportunity-digital-transformation-expands-jobs-in-the))

3. Building the Caribbean digital economy bit by bit
   - CARCIP's infrastructure contracts combined submarine connectivity with government and educational networks, including service needs at health clinics. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
   - Taxonomy evidence: The January xx.xx 2019 project account distinguishes public broadband, government networks, and educational connectivity within a program that included construction of a submarine cable. These are observed demand purposes, not reported application-market shares. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.
4. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable
   - The announcement ties communications to offshore facilities over their operating lives and identifies construction sponsorship separately from cable operation. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.
5. University of Hawai‘i Notice of Sole Source - Cable Landing Station Access and Colocation Services
   - The July xx.xx 2024 notice specifies Hawaiki landing-station access and colocation for the university's NSF-funded research-network interconnection requirement. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
   - Taxonomy evidence: The July xx.xx 2024 procurement notice identifies cable-landing-station access and colocation as purchases supporting a research-and-education network project, establishing an attributable institutional connectivity function within the broader landing-hosting boundary. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.
6. Meld. St. 9 (2024-2025) - Total preparedness
   - Norway's white paper describes a proposed fiber connection serving civilian and military data-transmission needs, not an exclusively defense-purpose asset. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3082364/?ch=xx.xx))

7. Meld. St. 26 (2023-2024) - Svalbard

· The Svalbard connection supports businesses, public institutions, research, and airport traffic management through common infrastructure. Separate contractual priorities are not disclosed. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

· Taxonomy evidence: The government publication identifies submarine connectivity supporting residents, businesses, research, higher education, public administration, and emergency preparedness, documenting distinct purposes sharing a telecommunications asset. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.

8. Announcing the Grace Hopper subsea cable, linking the U.S., U.K. and Spain

· Taxonomy evidence: The July xx.xx 2020 announcement identifies a submarine cable commissioned to strengthen the network supporting Google's consumer and enterprise digital products. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))

9. Nokia in 2024 - Annual Report on Form 20-F

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

10. Nokia Annual Report on Form 20-F 2021

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.

11. TE Connectivity Ltd. 2018 Annual Report

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.

12. NEC Financial Results for the First Quarter Ended June 30, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
13. NEC Financial Results for the Fiscal Year Ended March 31, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
14. SubCom of Newington plans multi-million-dollar expansion
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
15. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
16. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.

17. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
18. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
19. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
20. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
21. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
22. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
23. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.

24. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
25. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.
26. Subsea telecommunications cables: resilience and crisis preparedness
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.

13.1. Cloud and Content Network Interconnection

Table 194. Global Submarine Communication Cable System Market Size, by Cloud and Content Network Interconnection, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Announcing the Grace Hopper subsea cable, linking the U.S., U.K. and Spain

   · Taxonomy evidence: Google states that Grace Hopper would support services including Google Cloud and integrate a cloud region into its global infrastructure, establishing a cloud/content production-network purpose.
   ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))

2. Nokia in 2024 - Annual Report on Form 20-F

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced roughly xx.xx-km program identifies a cloud/content infrastructure purpose and supports a conditional larger-program purchasing premise.

13.2. Telecommunications Backbone Connectivity

Table 197. Global Submarine Communication Cable System Market Size, by Telecommunications Backbone Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Building the Caribbean digital economy bit by bit
   - Taxonomy evidence: The account describes submarine fiber connectivity as enabling modern telecommunications and affordable internet services for previously underserved communities. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))
2. Meld. St. 26 (2023-2024)
   - Taxonomy evidence: The publication states that subsea fiber cables support public electronic communications alongside institutional and business requirements, providing an example of broad telecommunications-backbone demand. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

13.3. Shared Multipurpose Connectivity

Table 200. Global Submarine Communication Cable System Market Size, by Shared Multipurpose Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

   · Taxonomy evidence: The announced system served offshore industrial communications while also providing an alternative backhaul path supporting land-based voice and data services. This documents multiple intended functions within one cable system, without establishing their expenditure allocation. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

2. Meld. St. 26 (2023-2024)

   · Taxonomy evidence: The same cable connection serves public communications, satellite-station data, public-sector functions, and airport traffic management. These observed functions support recognition of multipurpose infrastructure but do not establish a monetary allocation among applications. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The government identifies two Svalbard cables supporting businesses, public institutions, research and airport management; multiple beneficiaries do not establish multiple system sales.

3. Meld. St. 9 (2024-2025)
   - Taxonomy evidence: The planned submarine connection is expressly described as serving both civilian and military data-transmission requirements, supporting recognition of deliberately combined functions at the asset level. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3082364/?ch=xx.xx))
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

20. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

13.4. Enterprise and Public-Service Connectivity

Table 203. Global Submarine Communication Cable System Market Size, by Enterprise and Public-Service Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Building the Caribbean digital economy bit by bit

   · Taxonomy evidence: Governments contracted new government wide-area networks alongside the submarine cable, and the account identifies government offices and health clinics among the connectivity needs. It does not disclose dedicated submarine fiber assignments or cable-only organizational expenditure. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CARCIP combined submarine connectivity, government networks and institutional services within an approximately USD xx.xx mixed program; its whole budget is not cable-only spending.

2. Meld. St. 26 (2023-2024)

   · Taxonomy evidence: Civil public-sector users and airport traffic management are identified as communications users of the submarine cable connection. Their use does not establish dedicated fiber assignments or that they bought the cable itself. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

13.5. Defense and Security Connectivity

Table 206. Global Submarine Communication Cable System Market Size, by Defense and Security Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Society of American Military Engineers Awards NAVFAC EXWC 2019 Project of the Year

   · Taxonomy evidence: The Navy's May xx.xx 2019 account identifies a submarine fiber-optic project commissioned in March 2016 to connect Department of Defense information-network nodes. It establishes a defense telecommunications function, without proving exclusively military use or a current expenditure allocation.
   ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))

2. Meld. St. 9 (2024-2025)

   · Taxonomy evidence: The government white paper states that a planned fiber-optic connection would transmit data for both civilian and military needs. It establishes an intended military communications function, not a defense-only asset, completed deployment, or agency-specific purchase allocation.
   ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3082364/?ch=xx.xx))

3. Subsea telecommunications cables: resilience and crisis preparedness
   - Taxonomy evidence: The parliamentary report separately discusses secure cables used for military and intelligence communications, drawing on public testimony about those systems. This supports a distinct communications purpose without disclosing operational details or procurement expenditure. ([publications.parliament.uk](https://publications.parliament.uk/pa/jt5901/jtselect/jtnatsec/xx.xx/report.html))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report distinguishes military communications from ordinary commercial uses, supporting the application boundary without a monetary split.
4. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
5. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
6. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
7. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
8. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

9. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
10. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

14. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
15. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
16. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
17. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
18. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
19. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.

20. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
21. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
22. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
23. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
24. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
25. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
26. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

27. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
28. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
29. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
30. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
31. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

13.6. Offshore Operational Connectivity

Table 209. Global Submarine Communication Cable System Market Size, by Offshore Operational Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 210. Global Submarine Communication Cable System Market Size, by Offshore Operational Connectivity, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

   · Taxonomy evidence: The May xx.xx 2014 announcement describes construction of a subsea optical-fiber system serving offshore LNG facilities with data and voice communications throughout their operations. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced connection served offshore facilities over their operations, supporting an offshore communications application rather than power-cable inclusion.

2. Scarborough switches on for start-up

   · Taxonomy evidence: Woodside's April xx.xx 2026 account reports fiber connectivity between its offshore production facility and headquarters, supporting remote operations, operational data transfer, and workforce communications. Only attributable telecommunications scope is relevant; the industrial power/control umbilical is outside the frozen boundary. ([woodside.com](https://www.woodside.com/media-centre/news-stories/story/scarborough-switches-on-for-start-up))

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

13.7. Research and Education Connectivity

Table 212. Global Submarine Communication Cable System Market Size, by Research and Education Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 213. Global Submarine Communication Cable System Market Size, by Research and Education Connectivity, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. University of Hawai'i Notice of Sole Source - Cable Landing Station Access and Colocation Services

   · Taxonomy evidence: The notice states that landing-station colocation supports the university's NSF-funded research network and direct interconnection with research-and-education networks. This is procurement of attributable landing infrastructure services, not evidence used to include excluded capacity leases. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specific landing-access requirement supports a Research and Education Connectivity purchasing purpose without disclosing its value.

2. Antarctic Subsea Science and Telecommunications Cable

   · Taxonomy evidence: The science agency is exploring a telecommunications-capable submarine connection linking a research station with research-and-education networks, with scientific sensing integrated into the proposed cable. The page describes feasibility and information gathering, not completed commercial system delivery. ([nsf.gov](https://www.nsf.gov/od/opp/ant/antarctic-subsea-cable))

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14. Submarine Communication Cable System Market, by Buyer Sector

Telecommunications and Cable Network Operators are identifiable asset-operating counterparties, while Cloud and Content Providers can commission infrastructure for internal service networks. ■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ Traffic from a named sector does not establish purchasing authority within that sector.

■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ Landing suppliers should identify the facility investor, while public-program suppliers should establish the authorized procurement body and funded deliverable. An expansion announcement does not demonstrate completed construction or an award for every associated package.

Defense and Security Agencies are a distinct buyer constituency, but military use does not identify a current contracting agency. The UK Parliament discusses reported state-operated secure communications cables without specifying the buyer for a particular purchase. ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■ Industrial and Commercial Enterprises can sponsor construction while delegating ownership and operation, as INPEX and Shell proposed with Nextgen. A funded institutional purchase, a concept-stage sponsor, and an industrial funding participant therefore require different sales qualification and contracting decisions.

For procurement governed by World Bank regulations, qualification depends on the named bidding firm's credentials. Affiliate experience is not automatically transferable, and specialist-subcontractor contributions require express permission in the procurement documents. ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■

Figure 22. Global Submarine Communication Cable System Market Size, by Buyer Sector, 2025 (%)

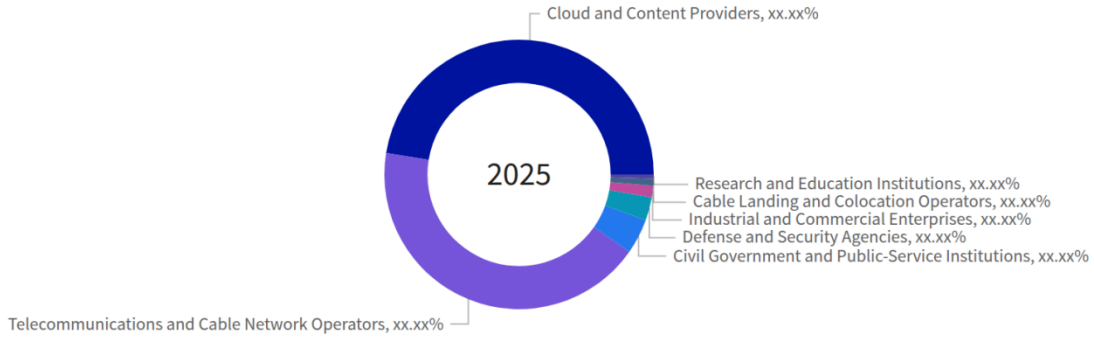

Figure 23. Global Submarine Communication Cable System Market, by Buyer Sector, 2032 (USD Million)

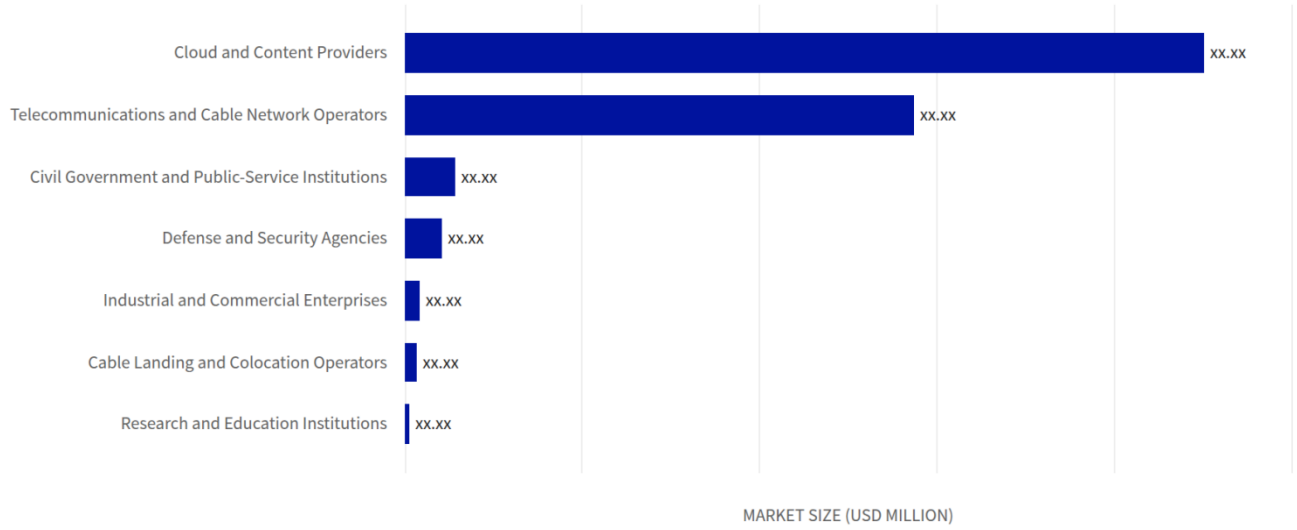

Table 215. Global Submarine Communication Cable System Market, by Buyer Sector growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cable Landing and Colocation Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Strengthening network resilience with the Sol transatlantic cable

   · Google identifies its own cloud infrastructure as the investment constituency and separately names landing partners.
   ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-sol-transatlantic-cable))

2. Procurement Regulations for IPF Borrowers, Seventh Edition, September 2025

   · World Bank regulations assess the bidding firm's qualifications, disallow automatic attribution of affiliate credentials, and permit specialist-subcontractor contributions only when procurement documents allow them. Prequalification is optional.
   ([thedocs.worldbank.org](https://thedocs.worldbank.org/en/doc/c84273d1b230aeb2b0b8134de5dc8cd7-xx.xx/original/Procurement-Regulations-7th-Edition-Sep-2025.pdf))

3. Building the Caribbean digital economy bit by bit

   · The participating governments signed infrastructure contracts with Digicel, establishing public commissioning separately from contractor identity.
   ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))

   · Taxonomy evidence: The account identifies governments as contract signatories and distinguishes them from the telecommunications contractor delivering the infrastructure.
   ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.

4. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

   · INPEX and Shell proposed contributing to construction while Nextgen would build, own, and operate the cable.
   ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

   · Taxonomy evidence: The announcement separates industrial construction sponsors from the communications business that would build, own, and operate the cable, supporting identification of participating economic purchasing roles.
   ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.

5. University of Hawai'i Notice of Sole Source - Cable Landing Station Access and Colocation Services
   - The notice identifies the university as purchaser and Hawaiki Submarine Cable USA Limited as intended supplier for landing access and colocation. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
   - Taxonomy evidence: The university is identified as the purchasing institution, while the cable-system business is identified as the intended supplier, separating buyer mandate from contractor identity. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.
6. Meld. St. 26 (2023-2024) - Svalbard
   - The government identifies Space Norway as cable owner and operator, separately from organizations using the connection. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.
7. Globalinx Data Center to Break Ground on Subsea Cable Fiber Optic Project
   - The February xx.xx 2025 municipal announcement describes Globalinx's proposed carrier-neutral landing-infrastructure expansion, not completed delivery. ([virginiabeach.gov](https://virginiabeach.gov/connect/news/globalinx-data-center-to-break-ground-on-subsea-cable-fiber-optic-project))
   - Taxonomy evidence: The February xx.xx 2025 municipal announcement describes a carrier-neutral landing/data-center business expanding dedicated subsea landing infrastructure. This establishes a commissioning infrastructure-hosting role separate from the cable tenants and their traffic users. ([virginiabeach.gov](https://virginiabeach.gov/connect/news/globalinx-data-center-to-break-ground-on-subsea-cable-fiber-optic-project))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.
8. Subsea telecommunications cables: resilience and crisis preparedness
   - The parliamentary report discusses reportedly state-operated military and intelligence communications cables without identifying a contracting agency for a specific purchase. ([publications.parliament.uk](https://publications.parliament.uk/pa/jt5901/jtselect/jtnatsec/xx.xx/report.html))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.
9. Antarctic Subsea Science and Telecommunications Cable
   - NSF describes exploration of an Antarctic telecommunications and science cable concept and an information request, not a construction award. ([nsf.gov](https://www.nsf.gov/od/opp/ant/antarctic-subsea-cable))

10. Announcing the Grace Hopper subsea cable, linking the U.S., U.K. and Spain

· Taxonomy evidence: Google reports that a cable construction contract had been signed with a system supplier, distinguishing the commissioning digital-service business from its equipment and installation contractor.
([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))

11. Nokia in 2024 - Annual Report on Form 20-F

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

12. Nokia Annual Report on Form 20-F 2021

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.

13. TE Connectivity Ltd. 2018 Annual Report

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.

14. NEC Financial Results for the First Quarter Ended June 30, 2025

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.

15. NEC Financial Results for the Fiscal Year Ended March 31, 2026

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.

16. SubCom of Newington plans multi-million-dollar expansion
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.
17. NEC IR Day 2022 - Global Business
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
18. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
19. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
20. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

21. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.
22. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
23. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
24. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.

25. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
26. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner, system contractor and fiber supplier have distinct named roles; component participation is not an additive complete-system sale.
27. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.

14.1. Cloud and Content Providers

Table 217. Global Submarine Communication Cable System Market Size, by Cloud and Content Providers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Announcing the Grace Hopper subsea cable, linking the U.S., U.K. and Spain

   · Taxonomy evidence: The announcement documents Google commissioning a private submarine cable for its own digital-service network; it is evidence of a cloud/content buyer role, not merely capacity consumption. ([cloud.google.com](https://cloud.google.com/blog/products/infrastructure/announcing-googles-grace-hopper-subsea-cable-system/))

2. Nokia in 2024 - Annual Report on Form 20-F

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The owner, system contractor and fiber supplier have distinct named roles; component participation is not an additive complete-system sale.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Meta identifies a multi-billion-dollar, multi-year Waterworth commitment and participation in more than xx.xx subsea cables; these constrain cloud purchasing scale, not annual recognized spending.

14.2. Telecommunications and Cable Network Operators

Table 220. Global Submarine Communication Cable System Market Size, by Telecommunications and Cable Network Operators, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 221. Global Submarine Communication Cable System Market Size, by Telecommunications and Cable Network Operators, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

   · Taxonomy evidence: Nextgen Group was identified as the business responsible for building, owning, and operating the commissioned subsea communications system. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

2. Meld. St. 26 (2023-2024)

   · Taxonomy evidence: The government identifies Space Norway as the owner and operator of the submarine fiber cables, establishing the cable-network operating role separately from the institutions using the connection. ([regjeringen.no](https://www.regjeringen.no/en/documents/meld.-st.xx.xx-xx.xx/id3041130/?ch=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Space Norway is separately identified as owner and operator, supporting purchaser-versus-user attribution.

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.

13. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aggregate installed pool constrains buyer spending equivalents; operator counts and purchasing intensity remain modeled.
14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed consortium system budget is a commercial price anchor for annualized telecommunications-operator delivery equivalents.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.

18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.

25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14.3. Civil Government and Public-Service Institutions

Table 223. Global Submarine Communication Cable System Market Size, by Civil Government and Public-Service Institutions, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Building the Caribbean digital economy bit by bit

   · Taxonomy evidence: Three governments signed infrastructure contracts that included a new submarine cable and civil government networks, establishing a public commissioning role rather than participation inferred solely from government traffic. ([blogs.worldbank.org](https://blogs.worldbank.org/en/latinamerica/building-caribbean-digital-economy-bit-bit))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Government contract signatories establish a civil public purchasing role distinct from Digicel's contractor role.

2. Nokia in 2024 - Annual Report on Form 20-F

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.

3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public commissioning mandate and multi-year budget constrain civil-government purchasing equivalents, without establishing global sector share.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14.4. Defense and Security Agencies

Table 226. Global Submarine Communication Cable System Market Size, by Defense and Security Agencies, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 227. Global Submarine Communication Cable System Market Size, by Defense and Security Agencies, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 228. Global Submarine Communication Cable System Market Size, by Defense and Security Agencies, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Society of American Military Engineers Awards NAVFAC EXWC 2019 Project of the Year

   · Taxonomy evidence: The account identifies NAVFAC coordination on behalf of the Defense Information Systems Agency across the cable project. This establishes an institutional commissioning role beyond merely carrying defense traffic, but does not disclose current agency purchasing obligations or contract-line values. ([navy.mil](https://www.navy.mil/DesktopModules/ArticleCS/Print.aspx?Article=xx.xx&ModuleId=xx.xx&PortalId=xx.xx))

2. Subsea telecommunications cables: resilience and crisis preparedness

   · Taxonomy evidence: The report describes military and intelligence communications systems operated by the state, supporting an institutional defense/security role. It does not identify the contracting agency or establish a specific ultimate-buyer procurement transaction. ([publications.parliament.uk](https://publications.parliament.uk/pa/jt5901/jtselect/jtnatsec/xx.xx/report.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parliamentary report discusses reportedly state-operated secure military and intelligence cables; it establishes a constituency, not the modeled agency expenditure.

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.

27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.

28. GBI Wholesale Product Portfolio 2019
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.

29. Protection of Undersea Telecommunication Cables: Issues for Congress
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.

30. Unlocking global AI potential with next-generation subsea infrastructure
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14.5. Industrial and Commercial Enterprises

Table 229. Global Submarine Communication Cable System Market Size, by Industrial and Commercial Enterprises, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. INPEX and Shell to partner with Nextgen Group to build subsea fibre optic cable

   · Taxonomy evidence: The offshore energy projects were announced as contributors to cable construction, establishing industrial infrastructure sponsorship beyond the purchase of ongoing bandwidth services. The announcement does not establish participation by every industrial or commercial sector. ([inpex.com.au](https://www.inpex.com.au/news-and-updates/media-centre/media-releases/inpex-and-shell-to-partner-with-nextgen-group-to-build-subsea-fibre-optic-cable/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial sponsors proposed equal contributions to a roughly 2,000-km system, while Nextgen would build, own and operate it; this separates sponsor funding from operator identity.

2. Scarborough switches on for start-up

   · Taxonomy evidence: The account identifies an industrial asset owner implementing offshore communications infrastructure within its project. The reported 2026 connection is not evidence of completed 2025 delivery or a separately disclosed cable-system expenditure amount. ([woodside.com](https://www.woodside.com/media-centre/news-stories/story/scarborough-switches-on-for-start-up))

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
24. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
25. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

26. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
27. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
28. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
29. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
30. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14.6. Cable Landing and Colocation Operators

Table 232. Global Submarine Communication Cable System Market Size, by Cable Landing and Colocation Operators, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Globalinx Data Center to Break Ground on Subsea Cable Fiber Optic Project

   • Taxonomy evidence: The announced expansion concerns additional subsea cable landing bores and carrier-neutral landing-station infrastructure commissioned by the hosting business. The announcement is evidence of a dedicated landing-infrastructure buyer setting, not proof that the expansion had been completed.
   ([virginiabeach.gov](https://virginiabeach.gov/connect/news/globalinx-data-center-to-break-ground-on-subsea-cable-fiber-optic-project))

   • Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.

   • Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February 2025 municipal announcement identifies four additional landing bores commissioned by a carrier-neutral hosting business; it does not disclose completed spending.

2. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
3. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
4. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
5. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
6. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
7. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

8. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
9. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. ICPC Media Enquiries & Frequently Asked Questions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

13. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
14. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
15. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
16. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
17. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
18. Keppel’s Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

19. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
20. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
21. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
22. Piano "Isole Minori"
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed twenty-one-island programme exceeding EUR xx.xx demonstrates domestic submarine purchasing context; terrestrial spending is excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Domestic island purchases qualify a Europe model restricted to intercontinental systems.
23. Seconda Consultazione Piano Isole Minori
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx second island programme is a funded planning context, not a verified submarine-only annual amount.
24. Global Gateway preliminary monitoring report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official Blue Raman estimate of EUR xx.xx and xx.xx km provides interregional purchase-scale calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Europe-India corridor supports Indian interregional participation assumptions, not annual national spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named intermediate Middle Eastern route context supports shared, non-additive attribution.

25. Telxius' international network - Colocation Fact Sheet
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary landing/colocation inventory constrains commercial-owner geography; it is not a spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four listed Brazilian landing locations constrain relative operating-footprint exposure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Florida and Virginia facilities support U.S. landing-owner purchasing premises.
26. The North Shore submarine cable sets sail: TELUS kicks off deployment work
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TELUS reports a xx.xx-km domestic submarine project and greater-than-CAD-xx.xx-million joint investment, not annual recognized expenditure.
27. GBI Wholesale Product Portfolio 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical xx.xx-plus-km integrated network supports channel/endpoint distinctions; terrestrial kilometres and connectivity sales are excluded.
28. Protection of Undersea Telecommunication Cables: Issues for Congress
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FCC-advisory-derived historical landing clusters support coastal gateway premises, not observed state spending.
29. Unlocking global AI potential with next-generation subsea infrastructure
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named India destination supports a conditional interregional pipeline premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Brazilian destination supports a conditional interregional pipeline premise.

14.7. Research and Education Institutions

Table 235. Global Submarine Communication Cable System Market Size, by Research and Education Institutions, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. University of Hawai'i Notice of Sole Source - Cable Landing Station Access and Colocation Services

   · Taxonomy evidence: The public procurement notice establishes a university commissioning cable-specific landing-station access and equipment colocation for its research-and-education mission. ([hawaii.edu](https://www.hawaii.edu/procurement/wp-content/uploads/2024/xx.xx/Notice-of-SS-Hawaiki-ITS.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2024 notice identifies university procurement of cable-landing access and colocation for a research-network requirement, not system construction or an included bandwidth lease.

2. Antarctic Subsea Science and Telecommunications Cable

   · Taxonomy evidence: The proposed project is sponsored by science-program and cyberinfrastructure offices, illustrating the research-institution mandate distinct from general civil administration. The information request does not establish a construction award or delivered sales. ([nsf.gov](https://www.nsf.gov/od/opp/ant/antarctic-subsea-cable))

3. Nokia in 2024 - Annual Report on Form 20-F
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2022, supporting the historical supplier-revenue anchor.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2023.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2024.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 supplier revenue anchors the explicitly modeled xx.xx% native-currency recovery for 2025; the filing does not report 2025 ASN revenue.
4. Nokia Annual Report on Form 20-F 2021
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2017 backcast, rather than establishing an observed 2017 market total.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The disclosed 2019 ASN revenue anchors the assumption-led 2018 backcast.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports Submarine Networks net sales of EUR xx.xx for 2021 and attributes growth to large submarine telecommunications projects.
5. TE Connectivity Ltd. 2018 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2017 net sales of USD xx.xx; its percentage-of-completion accounting informs the annual revenue measurement.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports SubCom fiscal-2018 net sales of USD xx.xx and identifies production delays, supporting a historical delivery-cycle downturn rather than uninterrupted growth.
6. NEC Financial Results for the First Quarter Ended June 30, 2025
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: FY2024/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields a JPY xx.xx submarine-business proxy.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: FY2025/xx.xx ANS revenue of JPY xx.xx less Aerospace/Defense revenue of JPY xx.xx yields JPY xx.xx; these fiscal-year anchors support the modeled calendar-2024 bridge.
7. NEC Financial Results for the Fiscal Year Ended March 31, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Calendar-2025 submarine revenue is derived from January-March JPY xx.xx plus April-December JPY xx.xx, using the reported ANS and Aerospace/Defense quarterly-period differences.
8. SubCom of Newington plans multi-million-dollar expansion
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The January 2026 company-attributed report identifies current production of xx.xx cable kilometres annually; this is a production-to-revenue proxy, not disclosed 2025 sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The expansion announcement targets approximately xx.xx kilometres of annual production by the end of 2026, supporting a phased supply-expansion assumption.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The announced year-end expansion supports a possible subsequent full-year supply contribution, conditional on completion and commercial utilization.

9. NEC IR Day 2022 - Global Business
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: NEC's own historical submarine-revenue growth profile constrains the modeled early-period supplier trajectory; the selected absolute starting level remains an assumption.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The company presentation supplies a historical submarine-revenue CAGR of xx.xx% for FY2018-FY2021, used as a growth proxy rather than a global market estimate.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: The historical company growth profile supports the modeled submarine supplier-revenue bridge.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: The company's xx.xx% forward revenue-growth target informs a bounded 2022 bridge; it is not treated as realized growth.
10. Federal Reserve Foreign Exchange Rates - G.5A, January 5, 2026
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Provides the 2022 annual-average USD-per-EUR rate of xx.xx.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Provides 2023 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Provides 2024 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 annual-average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD.
11. Federal Reserve Foreign Exchange Rates - G.5A, January 3, 2022
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the evidence-limited historical calculation.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Provides the annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
12. Federal Reserve Foreign Exchange Rates - G.5A, January 2, 2020
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Provides the 2017 annual-average USD-per-EUR rate of xx.xx, represented as xx.xx in the historical calculation.
13. ICPC Media Enquiries & Frequently Asked Questions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Association reporting provides approximate network-stock and annual-fault bounds, supporting the installed-base and xx.xx-repair-event working assumptions; it does not establish spending.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reported annual faults of approximately xx.xx-xx.xx constrain the maintenance model and argue against automatically increasing repair frequency with every kilometre added.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The distinction between expanding network stock and relatively stable annual faults supports separate upgrade, readiness, and fault-repair assumptions.

14. SEA-US: Global Consortium to Build Cable System Connecting Indonesia, the Philippines, and the United States
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The supplier announcement identifies an approximately USD xx.xx, xx.xx-kilometre SEA-US project, providing a historical full-system purchasing-price anchor rather than annual revenue.
15. Ciena Corporation Form 10-K for the Fiscal Year Ended November 1, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The mandatory filing reports decreased sales to submarine network operators within the EMEA revenue discussion, providing counterevidence to uniform upgrade-growth assumptions.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Disaggregated purchasing and competitive pressure qualify the upgrade-growth assumption; total optical-network revenue is not substituted for submarine revenue.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The filing supports purchasing-route and price-pressure premises, but does not independently verify the modeled submarine-upgrade amount.
16. IP e ASN assinam contrato para construção de Novo Anel CAM
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The project owner identifies approximately EUR xx.xx of planned Atlantic CAM investment, illustrating funded regional-system purchasing without establishing annual realized spending.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The replacement initiative concerns an existing system operating since 1999 and a planned 2026 implementation milestone, qualifying a universal xx.xx-year replacement assumption.
17. Meta, SoftBank Corp., IPS, TM, XLSmart, and NEC to build the Candle Submarine Cable System
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The Candle announcement supplies a planned 2028 operating milestone, supporting a conditional delivery-pipeline premise rather than realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx-km Candle corridor and planned 2028 operation constrain conditional Asian pipeline timing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named Japanese consortium and landing role supports forecast purchasing exposure, not completed operation.
18. Meta, NEC, and Sumitomo Electric to Collaborate on Petal, the World's First Petabit Transoceanic Submarine Cable System
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The Petal announcement identifies a planned 2029 operating milestone and named system and component roles; no operating-status or automatic architecture premium is assumed.
19. Keppel's Singapore-US subsea cable system receives US regulatory approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bifrost's Asian/U.S. owner participation supports a geographically shared purchase model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named U.S. partner and landing approval support U.S.-connected purchasing attribution.

20. NEC Completes new Asia Pacific submarine cable
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed approximately xx.xx-km ADC provides dated multi-country deployment calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Guangdong landing and named Chinese owners support mainland Chinese asset exposure.
21. AFR-IX MEDUSA SUBMARINE CABLE SYSTEM
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Medusa's nine-country, twelve-landing and xx.xx-km scope constrains interregional project attribution.
22. C(2025)7293: CEF Digital selected projects, 3 November 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected CEF grants constrain differentiated European delivery and upgrade premises, not annual realized spending.
23. Piano "Isole Minori"
