Telecom Battery Backup System Market

Global Forecast 2026-2032

MRR-530582F9ED3B | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 29
   1.5. Currency Considered for the Study 29
   1.6. Language Considered for the Study 29
   1.7. Key Stakeholders 29
2. Research Methodology 31
   2.1. Introduction 31
   2.2. Research Design 31
      2.2.1. Primary Research 32
      2.2.2. Secondary Research 32
   2.3. Research Framework 32
      2.3.1. Qualitative Analysis 33
      2.3.2. Quantitative Analysis 33
   2.4. Market Size Estimation 34
      2.4.1. Top-Down Approach 34
      2.4.2. Bottom-Up Approach 34
   2.5. Data Triangulation 34
   2.6. Research Outcomes 35
   2.7. Research Assumptions 35
   2.8. Research Limitations 36
3. Executive Summary 37
   3.1. Introduction 37
   3.2. CXO Perspective 37
   3.3. New Revenue Opportunities 38
   3.4. Next-Generation Business Models 39
   3.5. Industry Roadmap 41
4. Market Overview 43
   4.1. Introduction 43
   4.2. Key Growth Contribution 46
   4.3. Industry Ecosystem & Value Chain Analysis 62
      4.3.1. Supply-Side Analysis 63
      4.3.2. Demand-Side Analysis 63
      4.3.3. Stakeholder Analysis 64
   4.4. Market Dynamics 65
      4.4.1. Key Drivers 65
         4.4.1.1. Jurisdiction-specific resilience obligations trigger continuity investment 65
         4.4.1.2. Digital-landline migration changes backup responsibility and budget ownership 66
         4.4.1.3. Energy-market participation creates an additional battery-use incentive 66

4.4.2. Key Restraints 66
4.4.2.1. Service-specific backup commitments limit substitution 66
4.4.2.2. Staged upgrades can defer complete-system procurement 67
4.4.2.3. Temporary requirements constrain permanent ownership commitments 67
4.4.3. Key Opportunities 67
4.4.3.1. Supported replacement without unnecessary plant-wide procurement 67
4.4.3.2. Payer-specific, provider-compatible premises backup 68
4.4.3.3. Contractually defined temporary continuity 68
4.4.3.4. Accountable managed fulfillment with explicit retained duties 68
4.4.3.5. Authorized energy flexibility around protected backup assets 68
4.4.4. Key Challenges 69
4.4.4.1. Converting service descriptions into site-specific fulfillment commitments 69
4.4.4.2. Reconciling telecom continuity contracts with energy-market rights 69
4.4.4.3. Assigning finished-battery data and lifecycle accountability 70
4.5. Porter's Five Forces Analysis 70
4.6. PESTLE Analysis 71
4.7. Market Outlook 72
4.7.1. Near-Term Market Outlook (0-2 Years) 73
4.7.2. Medium-Term Market Outlook (3-5 Years) 73
4.7.3. Long-Term Market Outlook (5-10 Years) 74
4.8. Go-to-Market Strategy 75
5. Market Insights 78
5.1. Consumer Insights & End-User Perspective 78
5.2. Consumer Experience Benchmarking 79
5.3. Opportunity Mapping 79
5.4. Distribution Channel Analysis 82
5.5. Pricing Trend Analysis 83
5.6. Regulatory Compliance & Standards Framework 84
5.7. ESG & Sustainability Analysis 85
5.8. Disruption & Risk Scenarios 86
5.9. Return on Investment & Cost-Benefit Analysis 88
6. Cumulative Impact of Artificial Intelligence 2026 90
7. Telecom Battery Backup System Market, by Offering 92
7.1. Battery Units and Assemblies 96
7.2. Complete Backup Systems 103
8. Telecom Battery Backup System Market, by Battery Technology 111
8.1. Lead-Acid 119
8.1.1. Valve-Regulated Lead-Acid 127
8.1.1.1. Absorbent Glass Mat 135
8.1.1.2. Gel 142
8.1.2. Flooded Lead-Acid 149
8.2. Lithium-Based 156
8.2.1. Lithium-Ion 164
8.2.2. Lithium-Metal 171
8.3. Nickel-Based 178

8.3.1. Nickel-Cadmium 186
8.3.2. Nickel-Zinc 194
8.3.3. Nickel-Metal Hydride 201
8.3.4. Nickel-Iron 208
8.4. Multi-Chemistry 215
8.5. Sodium-Based 222
8.6. Aqueous Zinc-Based 229
8.7. Flow Batteries 236
8.8. Metal-Air 243
9. Telecom Battery Backup System Market, by Power Interface 251
9.1. DC Output 255
9.2. AC Output 263
9.3. Combined AC/DC Output 271
10. Telecom Battery Backup System Market, by Network Application 279
10.1. Wireless Access Networks 284
10.2. Customer-Premises Connectivity 292
10.3. Transport & Backhaul Networks 299
10.4. Core Networks & Network Control 307
10.5. Wireline Access Networks 314
10.6. Network Interconnection & Peering 321
11. Telecom Battery Backup System Market, by Buyer Type 328
11.1. Telecommunications Network Operators 334
11.2. Telecom Infrastructure & Tower Operators 341
11.3. Household Connectivity Purchasers 348
11.4. Business & Institutional Connectivity Owners 355
11.5. Telecom Energy-Service Providers 362
11.6. Equipment Leasing & Rental Providers 369
12. Telecom Battery Backup System Market, by Installation Environment 377
12.1. Weather-Protected Locations 382
12.1.1. Enclosed Locations Without Temperature Control 390
12.1.2. Temperature-Controlled Enclosed Locations 397
12.1.3. Partly Weather-Protected Locations 404
12.2. Non-Weather-Protected Locations 411
12.2.1. Sheltered Non-Weather-Protected Locations 418
12.2.2. Open-Air Locations 425
12.3. Underground Locations 432
13. Telecom Battery Backup System Market, by Powering Architecture 440
13.1. Local Powering 444
13.2. Remote Powering 451
13.2.1. Centralized Powering 459
13.2.2. Cluster Powering 466
13.2.3. Reverse Powering 473
14. Telecom Battery Backup System Market, by Commercial Delivery Model 481

14.1. Owned Equipment 485
14.2. Managed Backup Capacity 493
14.3. Leased or Rented Equipment 500
15. Telecom Battery Backup System Market, by Sales Channel 508
15.1. Direct Manufacturer Supply 512
15.2. Systems Integrator and Contractor Supply 520
15.3. Distributor and Retailer Supply 527
15.4. Telecom Service Provider Supply 534
16. Telecom Battery Backup System Market, by Grid Availability 541
16.1. Reliable Grid 545
16.2. Unreliable Grid 552
16.3. Off-Grid 559
17. Telecom Battery Backup System Market, by Backup Duty 567
17.1. Reserve-Only Backup 571
17.2. Backup with Energy Management 578
18. Telecom Battery Backup System Market, by Backup Autonomy 586
18.1. Extended-Duration Backup 592
18.2. Intermediate-Duration Backup 600
18.3. Day-Scale Backup 608
18.4. Short-Duration Backup 615
19. Telecom Battery Backup System Market, by Region 623
19.1. Asia-Pacific 630
19.2. Europe 652
19.3. North America 676
19.4. Africa 699
19.5. Latin America 722
19.6. Middle East 745
20. Telecom Battery Backup System Market, by Group 768
20.1. BRICS 773
20.2. NATO 795
20.3. G7 819
20.4. European Union 842
20.5. ASEAN 866
20.6. GCC 888
21. Telecom Battery Backup System Market, by Country 911
21.1. China 920
21.2. United States 940
21.3. India 962
21.4. Japan 983
21.5. Germany 1004
21.6. Brazil 1025
21.7. France 1046

21.8. Russia....1067
21.9. United Kingdom....1088
21.10. South Korea....1109
21.11. Italy....1130
21.12. Mexico....1151
21.13. Canada....1172
21.14. Spain....1193
21.15. Australia....1214
22. Competitive Landscape....1237
22.1. Market Share Analysis, 2025....1237
22.2. Market Concentration Analysis, 2025....1255
22.3. Recent Developments & Impact Analysis, 2025....1258
22.4. Product Portfolio Analysis, 2025....1260
22.5. Benchmarking Analysis, 2025....1268
23. Company Profiles....1273
23.1. EnerSys....1273
23.2. Vertiv....1274
23.3. Ericsson....1275
23.4. Polarium Energy Solutions AB....1276
23.5. Battery Energy Power Solutions....1277
23.6. Moura....1278
23.7. Precision Group....1279
23.8. HORIEN Salt Battery Solutions....1280
23.9. Gulf Horizon Telecom....1281
23.10. IPT PowerTech Group....1282
23.11. Phinergy....1283
23.12. Exicom Tele-Systems Limited....1284
23.13. Nokia....1285
24. Companies Covered....1287
25. Key Experts....1319

1. Preface

1.1. Objectives of the Study

- Which documented Battery Units and Assemblies and Complete Backup Systems participate in telecom backup applications, and how do marketed, announced, and investigational offerings differ in commercial status?
- Who controls purchasing, equipment ownership, and continuity obligations across the accepted Buyer Type categories, and how do those responsibilities affect equipment purchase, leasing, rental, or managed-capacity choices?
- Which buyer qualification, regulatory, licensing, and jurisdiction-specific access conditions must a supplier satisfy before an offering can be considered for the relevant telecom application?
- What documented compatibility, warranty, service, and contractual requirements constrain supplier or technology switching, and which obligations remain with the buyer under each alternative?
- How do Network Application, Power Interface, Installation Environment, Powering Architecture, Grid Availability, Backup Duty, and Backup Autonomy distinguish commercial requirements without implying equivalent capability across technologies?
- What do Direct Manufacturer Supply, Distributor and Retailer Supply, Systems Integrator and Contractor Supply, and Telecom Service Provider Supply contribute to buyer access, local delivery, and continuing service responsibility?
- How should equipment and complete-system propositions be compared across Owned Equipment, Leased or Rented Equipment, and Managed Backup Capacity without treating overlapping offerings or obligations as separate opportunities?
- Which documented offering capabilities, business rights, partnerships, and service commitments distinguish competitive alternatives, and what must be verified before selecting a supplier or commercial partner?
- Which changes in buyer requirements, commercial availability, regulation, or contractual responsibility would alter a business commitment within the study horizon ending in 2032?

1.2. Market Definition

The Global Telecom Battery Backup System market covers the commercial provision of Battery Units and Assemblies and Complete Backup Systems for continuity of telecommunications connectivity. It encompasses Core Networks & Network Control, Transport & Backhaul Networks, Network Interconnection & Peering, Wireless Access Networks, Wireline Access Networks, and Customer-Premises Connectivity.

The buyer perimeter includes Telecommunications Network Operators, Telecom Infrastructure & Tower Operators, Telecom Energy-Service Providers, Equipment Leasing & Rental Providers,

Business & Institutional Connectivity Owners, and Household Connectivity Purchasers. Equipment ownership, leasing or rental, and managed backup capacity are included commercial delivery models. The geographic boundary is Global.

All accepted Battery Technology, Power Interface, Installation Environment, Powering Architecture, Grid Availability, Backup Duty, and Backup Autonomy categories are included. This coverage encompasses weather-protected, non-weather-protected, and underground locations; local and remote powering; Reliable Grid, Unreliable Grid, and Off-Grid contexts; and both Reserve-Only Backup and Backup with Energy Management.

The studied commercial offering is distinct from upstream raw materials, unrelated battery applications, and downstream telecommunications services. Nonbattery power sources and general connectivity equipment are adjacent activities rather than standalone battery backup offerings. Their bundled commercial role may be examined within an included Complete Backup System without expanding the study to every product or service supplied by the same business.

1.3. Market Segmentation & Coverage

Offering distinguishes Battery Units and Assemblies from Complete Backup Systems. This axis separates the commercial object being procured and supports comparison of equipment supply with a broader system proposition.

Battery Technology includes Lead-Acid, comprising Flooded Lead-Acid and Valve-Regulated Lead-Acid, with Absorbent Glass Mat and Gel within Valve-Regulated Lead-Acid; Lithium-Based, comprising Lithium-Ion and Lithium-Metal; Nickel-Based, comprising Nickel-Cadmium, Nickel-Metal Hydride, Nickel-Iron, and Nickel-Zinc; Sodium-Based; Metal-Air; Flow Batteries; Aqueous Zinc-Based; and Multi-Chemistry. These categories define the technology coverage for commercial comparison without prescribing a preferred technology.

Power Interface covers AC Output, DC Output, and Combined AC/DC Output. This lens connects offering identity to the buyer's interface requirements and the commercial responsibility for compatibility.

Network Application covers Core Networks & Network Control, Transport & Backhaul Networks, Network Interconnection & Peering, Wireless Access Networks, Wireline Access Networks, and Customer-Premises Connectivity. It distinguishes where the backup proposition supports connectivity and which purchasing context must be understood.

Buyer Type includes Telecommunications Network Operators, Telecom Infrastructure & Tower Operators, Telecom Energy-Service Providers, Equipment Leasing & Rental Providers, Business & Institutional Connectivity Owners, and Household Connectivity Purchasers. This axis identifies purchasing constituencies without presuming that the buyer, asset owner, operator, and beneficiary are the same party.

Installation Environment includes Weather-Protected Locations, comprising Temperature-Controlled Enclosed Locations, Enclosed Locations Without Temperature Control, and Partly Weather-Protected Locations; Non-Weather-Protected Locations, comprising Sheltered Non-Weather-Protected Locations and Open-Air Locations; and

Underground Locations. These categories frame questions about documented suitability, service access, and contractual responsibilities rather than technical installation instructions.

Powering Architecture covers Local Powering and Remote Powering, with Centralized Powering, Cluster Powering, and Reverse Powering within Remote Powering. This lens supports examination of the commercial allocation of asset control, purchasing responsibility, and backup obligations.

Commercial Delivery Model includes Owned Equipment, Leased or Rented Equipment, and Managed Backup Capacity. The distinction concerns what the customer contracts for and which equipment, ownership, and service obligations accompany the proposition.

Sales Channel covers Direct Manufacturer Supply, Distributor and Retailer Supply, Systems Integrator and Contractor Supply, and Telecom Service Provider Supply. Channel analysis concerns the contracting relationship, authorized access to an offering, delivery responsibilities, and continuing support.

Grid Availability includes Reliable Grid, Unreliable Grid, and Off-Grid. These categories distinguish the power-supply context relevant to the commercial backup requirement without assuming that one context creates a superior opportunity.

Backup Duty separates Reserve-Only Backup from Backup with Energy Management. Both are included, while their different commercial purposes require clear treatment of the telecom backup role and any adjacent contracted activity.

Backup Autonomy includes Short-Duration Backup, Intermediate-Duration Backup, Extended-Duration Backup, and Day-Scale Backup. This lens distinguishes continuity propositions without asserting numerical thresholds or equivalent buyer acceptance. All segmentation axes are independent views of the accepted market and are not separate additive markets.

Table 1. Global Telecom Battery Backup System Market Segmentation & Coverage

Segmentation	Coverage
Backup Autonomy	• Extended-Duration Backup • Intermediate-Duration Backup • Day-Scale Backup • Short-Duration Backup
Backup Duty	• Reserve-Only Backup • Backup with Energy Management

Table 1 - continued

Segmentation	Coverage

Battery Technology	• Lead-Acid
	  o Valve-Regulated Lead-Acid
	  Absorbent Glass Mat
	  Gel
	  o Flooded Lead-Acid
	• Lithium-Based
	  o Lithium-Ion
	  o Lithium-Metal
	• Nickel-Based
	  o Nickel-Cadmium
	  o Nickel-Zinc
	  o Nickel-Metal Hydride
	  o Nickel-Iron
	• Multi-Chemistry
	• Sodium-Based
	• Aqueous Zinc-Based
	• Flow Batteries
	• Metal-Air

Buyer Type	• Telecommunications Network Operators • Telecom Infrastructure & Tower Operators • Household Connectivity Purchasers • Business & Institutional Connectivity Owners • Telecom Energy-Service Providers • Equipment Leasing & Rental Providers
Commercial Delivery Model	• Owned Equipment • Managed Backup Capacity • Leased or Rented Equipment
Grid Availability	• Reliable Grid • Unreliable Grid • Off-Grid

Installation Environment	• Weather-Protected Locations
	  o Enclosed Locations Without Temperature Control
	  o Temperature-Controlled Enclosed Locations
	  o Partly Weather-Protected Locations
	• Non-Weather-Protected Locations
	  o Sheltered Non-Weather-Protected Locations
	  o Open-Air Locations
	• Underground Locations

Network Application	• Wireless Access Networks • Customer-Premises Connectivity • Transport & Backhaul Networks • Core Networks & Network Control • Wireline Access Networks • Network Interconnection & Peering

Table 1 - continued

Segmentation	Coverage
Offering	• Battery Units and Assemblies • Complete Backup Systems
Power Interface	• DC Output • AC Output • Combined AC/DC Output

Powering Architecture	• Local Powering
	• Remote Powering
	  o Centralized Powering
	  o Cluster Powering
	  o Reverse Powering

Sales Channel	• Direct Manufacturer Supply • Systems Integrator and Contractor Supply • Distributor and Retailer Supply • Telecom Service Provider Supply

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: The provider separately offers purchased backup devices and replacement batteries, supporting distinct finished-hardware deliverables. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The connectivity provider identifies purchased backup equipment and separately purchasable replacement batteries, corroborating distinct finished-hardware deliverables. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Replacement batteries are separately purchasable. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Replacement batteries are separately offered for purchase rather than treated solely as inseparable elements of a new system. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: A purchased backup device protects the provider's ONT and gateway. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The provider offers a purchased battery-backup device protecting its optical network terminal and connectivity equipment. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The protected equipment is subscriber-premises connectivity equipment. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The customer record describes purchased battery-backup equipment protecting an ONT and residential gateway, establishing a customer-premises connectivity application. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The customer purchases the product and is responsible for replacement batteries. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The provider explicitly describes the backup device as a purchased product and assigns battery acquisition and replacement responsibility to the customer. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The disclosed arrangement is equipment purchase, not temporary equipment access. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The telecom customer disclosure describes a purchased backup product with customer responsibility for replacement batteries. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Customers may obtain devices and batteries directly through the named manufacturer. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Customers may purchase backup units and replacement batteries directly from the named equipment supplier. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The connectivity provider also sells them through local offices. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The cooperative also offers those backup products through its own local offices. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Disclosed duration changes with the protected service and connected load. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The same unit has different disclosed endurance for voice-only and combined voice-and-internet protection. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Combined voice-and-Internet protection is described as approximately five hours. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Combined ONT and gateway protection is described as approximately five hours, an illustrative duration within the modeled band. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Voice-only ONT protection is described as xx.xx hours. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Voice-only ONT protection is described as xx.xx hours, a commercial anchor for the modeled day-scale category. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Outage continuity is the stated purpose; exclusive reserve duty is not expressly established. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The advertised purpose is outage continuity; exclusivity of reserve duty is not expressly established. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

2. IEC 60896-22:2004 | IEC
   - Taxonomy evidence: The scope identifies stationary lead-acid cells and monobloc batteries for telecom applications, supporting finished battery deliverables. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The scope separately identifies stationary lead-acid cells and monobloc batteries used in telecom and UPS applications, supporting finished battery deliverables rather than only complete systems. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: Stationary lead-acid is explicitly recognized for telecom and UPS applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The standard establishes a stationary lead-acid battery category with explicit telecom applicability. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The publication specifically covers valve-regulated stationary lead-acid construction. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: Its scope is specifically valve-regulated stationary lead-acid batteries, distinguishing this construction category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
3. IEC 60896-11:2002 | IEC
   - Taxonomy evidence: The stationary lead-acid classification separately identifies vented construction, supporting separation from valve-regulated products. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The publication's scope is restricted to vented stationary lead-acid batteries; it does not establish telecom sales volumes. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The stationary lead-acid classification separately covers vented types, providing the category basis for flooded stationary batteries. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
4. IEC 62619:2022 | IEC
   - Taxonomy evidence: The industrial secondary-lithium scope expressly includes stationary telecom and UPS applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The international industrial secondary-lithium classification explicitly includes telecom and UPS stationary applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The secondary-lithium category supports telecom applicability, not worldwide sales or electrode-subtype allocation. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The scope establishes industrial secondary lithium batteries as relevant to stationary telecom backup; it does not establish worldwide sales or subtype shares. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

5. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   - Taxonomy evidence: The stationary-battery overview recognizes lead, nickel, lithium, sodium, metal-air, and flow technologies; it is not a census of commercial telecom sales. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The stationary technology overview distinguishes lead, nickel, lithium-ion, sodium, metal-air, and flow technologies; it does not establish an exhaustive commercial market partition. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The telecom/ICT implementation examples identify AGM valve-regulated backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The telecom implementation examples explicitly identify AGM VRLA backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The implementation examples separately identify gel backup batteries at telecom/ICT sites. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The telecom implementation examples separately identify gel stationary backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Nickel-cadmium, nickel-metal-hydride, nickel-iron, and nickel-zinc are grouped under nickel-based batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The overview groups nickel-iron, nickel-cadmium, nickel-zinc, and nickel-metal-hydride technologies under nickel-based batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Nickel-cadmium is a named stationary-battery chemistry; this does not establish current telecom purchases. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Nickel-iron is separately named, without proof of current telecom commercialization. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Nickel-zinc is explicitly placed in the nickel-based family. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Metal-air is recognized as a stationary technology grouping rather than merely a constituent-metal label. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: Flow batteries are separately recognized; qualifying telecom transactions remain unestablished by this classification. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
6. IEC 63115-1:2020+AMD1:2022 CSV | IEC
   - Taxonomy evidence: The industrial nickel-metal-hydride scope expressly lists telecom and UPS stationary applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The industrial nickel-metal-hydride classification expressly includes telecom, UPS, and emergency-power stationary applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
7. IEC 60623:2026 | IEC
   - Taxonomy evidence: The August xx.xx 2026 publication recognizes vented nickel-cadmium industrial cells and battery systems. It establishes construction/category identity, not 2025 telecom adoption. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The August xx.xx 2026 publication identifies vented nickel-cadmium industrial cells and battery systems as a distinct category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

8. IEC 60622:2026 | IEC
   - Taxonomy evidence: The September xx.xx 2026 publication separately recognizes sealed nickel-cadmium industrial construction; sealed and vented products remain within the retained chemistry category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The September xx.xx 2026 publication separately recognizes sealed nickel-cadmium industrial cells and battery systems, supporting construction breadth within the same chemistry category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
9. IEC 62984-3:2020 | IEC
   - Taxonomy evidence: The official publication identifies sodium-based stationary batteries as a distinct classification. Its scope does not establish attributable telecom-backup sales. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The international sodium-based stationary-battery classification includes sodium-sulfur and sodium-nickel chloride; application-specific telecom sales are not established by this scope. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
10. ITU-T L.1397 (10/2025) - Battery system with integrated control and monitoring information model
    - Taxonomy evidence: The October 2025 telecom recommendation expressly names hybrid lithium-lead, lithium-sodium, and sodium-lead battery modes. It does not establish inseparable transaction pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: The recommendation expressly identifies lithium-lead, lithium-sodium, and sodium-lead battery combinations. It does not establish their global prevalence or transaction pricing. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Taxonomy evidence: The telecom recommendation recognizes battery cells, modules, strings, packs, and battery systems, including integrated control, without equating every battery assembly with a complete UPS. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
11. ITU-T Work Programme - Aqueous Zinc-Based Battery Systems for Base Station Applications
    - Taxonomy evidence: The inspected official work item names Aqueous Zinc-Based Battery Systems for Base Station Applications, lists its status as Under study, and gives December 2027 timing. Approval and commercial deployment are not established. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))
    - Taxonomy evidence: The official work programme names aqueous zinc-based battery systems for base-station applications. Its status is under study, with a December 2027 target; neither approval nor marketed deployment is established. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))
12. IEC 62040-3:2021 | IEC
    - Taxonomy evidence: The publication distinguishes complete UPS equipment from individual functional units and identifies continuity of load power as its principal function. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
    - Taxonomy evidence: The standard identifies complete electronic UPS equipment whose principal function is continuity of load power. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
    - Taxonomy evidence: The classified UPS equipment delivers AC output, supporting output-form classification independently of battery chemistry. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
    - Taxonomy evidence: The classified UPS equipment delivers AC output, establishing an output-interface distinction rather than a battery-chemistry distinction. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
13. ETSI EN 300 132-2 V2.8.1 (2024-10) - ICT power supply interface: Direct Current
    - Taxonomy evidence: The ICT interface standard identifies the established DC equipment-input interface. For this taxonomy, backup output follows the documented protected-load interface rather than battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_EN/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
    - Taxonomy evidence: The October 2024 ICT interface standard separately identifies the established telecom DC equipment interface; it does not classify the equipment by battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_EN/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))

14. ETSI EN 300 132-1 V2.2.1 (2022-11) - ICT power supply interface: Alternating Current
    - Taxonomy evidence: The ICT standards series separately identifies AC equipment-input compatibility, supporting current-form classification at the protected-load boundary. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
    - Taxonomy evidence: The ICT interface classification explicitly covers AC power interfaces, including worldwide nominal-voltage compatibility and customer-premises and network-site applications. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
    - Taxonomy evidence: The AC interface classification is distinct from the separately published DC interface category; neither determines battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
    - Taxonomy evidence: The standards series distinguishes AC and DC equipment interfaces, corroborating classification by load-side electrical compatibility rather than battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
15. Telecommunication Engineering Centre - Standards/Specifications, TEC 66160:2024 entry
    - Taxonomy evidence: The official catalog lists Hybrid (AC+DC) Uninterrupted Power Supply System as TEC xx.xx:2024, dated June xx.xx 2024. This establishes the named category, not transaction-specific backed outputs. ([tec.gov.in](https://tec.gov.in/standards-specifications))
    - Taxonomy evidence: The telecom catalog recognizes a hybrid AC/DC continuity-equipment category alongside single-current interface classifications; its national listing is not a worldwide mandate. ([tec.gov.in](https://tec.gov.in/standards-specifications))

16. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

- Taxonomy evidence: The June xx.xx 2026 guidance distinguishes access, aggregation/backhaul, core, and interconnection domains; management is cross-cutting. This supports functional rather than facility-based classification.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: The June xx.xx 2026 guidance differentiates access, aggregation/backhaul, core, and interconnection domains and recognizes management as cross-cutting.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Core sites contain key control/service functions, and the guidance expressly includes battery backup in their electrical provision.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Aggregation/backhaul is distinguished from core and last-mile access and has explicit power-resilience expectations.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Internet peering and non-Internet interconnection are separately identified network functions, not disclosed battery transactions.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: The guidance distinguishes Internet peering from non-Internet interconnection. It establishes a separate function but not an attributable battery-backup transaction.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Wireless radio access is an explicit access-domain application.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Access-domain examples include cellular RAN, fixed wireless access, and non-terrestrial access networks.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Fixed access is distinguished from aggregation/backhaul and core functions.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Fixed access examples include DSL, hybrid fiber-coax, and fiber-to-premises networks. These are network applications, not global battery-adoption estimates.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: Approximately four hours of backup is described as UK good practice for active fixed-access cabinets; this is not a Global battery-only duration rule.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: The June 2026 guidance regards approximately four hours of backup as good practice for active fixed-access equipment in cabinets at installation. This is UK guidance, not a worldwide minimum.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

17. ENISA - Power Supply Dependencies in the Electronic Communications Sector, December 2013
- Taxonomy evidence: The 2013 provider accounts describe battery protection at transmission and aggregation sites. This is historical application evidence, not current Global adoption. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))
- Taxonomy evidence: The report separately identifies battery protection at critical transmission and aggregation sites. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))
- Taxonomy evidence: The provider accounts discuss the cost of procuring and maintaining batteries, supporting a communications-operator purchaser role. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))
- Taxonomy evidence: The interviewed communications providers describe procuring and maintaining batteries as part of network-continuity protection, supporting the operator purchaser role. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))
- Taxonomy evidence: Provider interviews in the December 2013 report describe core sites protected by UPS systems and batteries, alongside generators. This establishes historical core-backup use, not current global adoption. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))
- Taxonomy evidence: Provider examples describe batteries protecting individual access-network base stations during power interruptions. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

18. Oregon Department of Transportation - Bid S-73000-00006485, Battery Backup Power Systems for Wireless Communication Sites
- Taxonomy evidence: The May 2023 public solicitation seeks battery-backup power systems for two-way communications sites, establishing institutional radio-network demand rather than completed delivery. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))
- Taxonomy evidence: The solicitation also includes wireless microwave communications sites; their application allocation depends on the protected network function. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))
- Taxonomy evidence: The transportation department is the procuring organization, supporting an institutional own-use purchaser role. The notice does not establish final installed hardware values. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))

19. Internet Society - The Internet Exchange Point Toolkit & Best Practices Guide
- Taxonomy evidence: The historical Tanzania Internet Exchange case describes an online UPS with external batteries protecting an exchange site. It establishes battery-backed interconnection use, not current purchases or attributable hardware revenue. ([internetsociety.org](https://www.internetsociety.org/wp-content/uploads/2021/xx.xx/Global-IXPToolkit_Collaborative-Draft_Feb-xx.xx.pdf))

20. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021

- Taxonomy evidence: The IFC-led framework separates energy-service asset ownership, equipment supply, maintenance, tower-company power provision, and asset leasing/financing. Only qualitative role definitions are used. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: The September 2021 framework distinguishes telecom energy-service firms, network operators, tower companies, equipment supply, and asset leasing/financing. Only qualitative role definitions are used; attributed market estimates and rankings are excluded. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: Telecom energy-service firms are defined through power-asset ownership and contracted supply to telecom sites; equipment-only and maintenance-only firms are excluded from that definition. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: The definitions identify telecom energy-service firms through power-asset ownership and telecom-site supply, distinguishing them from supply-only and maintenance-only businesses and tower-company power offerings. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: Asset leasing/financing is recognized in the value chain, but standalone lessor purchases of qualifying battery-backup hardware are not established. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: The value-chain framework recognizes asset leasing/financing. This supports recognition of the role, but not qualifying purchases or materiality for standalone backup-equipment lessors. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: The framework distinguishes off-grid, bad-grid, and good-grid contexts using study-specific definitions. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: Good-grid is defined using the study's daily-outage cutoff, not a universally comparable reliability benchmark. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: Bad-grid denotes connected sites with prolonged daily supply outages under the study's definition. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
- Taxonomy evidence: Off-grid sites are defined as not connected to the national grid. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

21. GSMA - Renewable Energy for Mobile Towers: Opportunities for Low- and Middle-Income Countries, September 2020

- Taxonomy evidence: The association's September 2020 definitions separate sites disconnected from or receiving no grid electricity from connected sites with prolonged outages. Its six-hour daily-outage cutoff differs from the inspected IFC framework's eight-hour cutoff; neither is adopted as a Global rule. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: The association's 2020 report distinguishes good-grid, bad-grid, and off-grid telecom contexts. Only category distinctions are used; embedded commercial research estimates are excluded. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: Bad-grid refers to connected telecom sites with prolonged electricity outages, not all grid-connected sites. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: Bad-grid identifies connected sites with unreliable supply; the report's historical outage cutoff is not adopted as a universal rule. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: The off-grid definition includes sites disconnected from the grid or receiving no grid electricity, supporting the usable-connection qualification. No market estimates are used. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: Off-grid identifies telecom sites without a national-grid connection, separately from connected sites receiving unreliable electricity. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))
- Taxonomy evidence: Good-grid is an explicit context in the report's telecom energy-management classification. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

22. IFC Summary of Investment Information - IPT PowerTech, Project 49095
    - Taxonomy evidence: The project disclosure separates long-term telecom energy-service contracts from turnkey telecom and power-equipment activities. Its original disclosure date is January xx.xx 2025, with a June xx.xx 2026 update. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The investment disclosure distinguishes long-term telecom energy-service contracts from equipment supply and turnkey telecom activities. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The financed project modernizes, maintains, and operates mobile-network clients' energy systems under long-term contracts and anticipates increased battery use. This supports a managed-performance arrangement, not attributed backup-hardware revenue. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: Telecom energy systems are modernized, maintained, and operated under long-term service contracts; the project includes increased use of solar panels and batteries. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: Contracted energy services are supplied to mobile operators or tower companies; those beneficiaries are not automatically the provider's hardware purchasers. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The disclosed energy-service business provides contracted energy to mobile network operators or independent tower companies. These beneficiaries are not automatically the purchasers of the provider's backup assets. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The independent investment record describes turnkey telecom and energy-system integration activities alongside battery-system supply. It corroborates an integration/contractor role, not an exhaustive channel partition. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The disclosure identifies systems integration, turnkey telecom delivery, and battery-system supply as distinct public business activities. This supports the intermediary role, not an exhaustive channel partition. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
    - Taxonomy evidence: The project record distinguishes telecom energy services, telecom contracting services, and equipment-power activities, demonstrating why customer, contractor, and asset-service roles are not interchangeable. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
23. IFC Environmental & Social Review Summary - Western Balkan Towers, Project 48526
    - Taxonomy evidence: The investment record distinguishes tower-owning entities from telecom-operator anchor tenants, supporting separate infrastructure and connectivity-provider roles. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))
    - Taxonomy evidence: The investment disclosure distinguishes tower-owning companies from their telecommunications-operator anchor tenants, supporting separate infrastructure and connectivity-provider buyer roles. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))
    - Taxonomy evidence: The tower-business record states that outage backup will predominantly use batteries. This establishes an infrastructure-owner setting, not ownership or purchase value for each individual battery. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))
    - Taxonomy evidence: The disclosed tower-asset business includes battery backup for outages. This supports an infrastructure-owner backup setting, without proving ownership of every individual battery or purchase. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))

24. GSA - Leasing of New Electronic Equipment

- Taxonomy evidence: The government procurement scope recognizes leasing and lease-with-option-to-own arrangements for telecommunications hardware. It does not specifically establish qualifying battery-backup leases.
([gsa.gov](https://www.gsa.gov/technology/it-contract-vehicles-and-purchasing-programs/multiple-award-schedule-it/electronic-equipment-leasing))

- Taxonomy evidence: The listing corroborates a telecommunications equipment-leasing role but supplies no record of a standalone lessor acquiring eligible backup batteries.
([gsa.gov](https://www.gsa.gov/technology/it-contract-vehicles-and-purchasing-programs/multiple-award-schedule-it/electronic-equipment-leasing))

25. U.S. Census Bureau - 2022 Economic Census Form WH-42361

- Taxonomy evidence: The Economic Census form recognizes nonautomotive batteries and communications equipment within merchant-wholesale activities and distinguishes own-account distributors from agents. It supports the distribution role, not telecom-backup channel shares.
([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_WH-42361_su.pdf))

- Taxonomy evidence: The government business-classification questionnaire recognizes nonautomotive batteries and communications equipment within merchant-wholesale activities. It supports the distribution role, not telecom-backup channel shares.
([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_WH-42361_su.pdf))

26. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

- Taxonomy evidence: The February 2025 regulator report considers battery options of xx.xx minutes, one hour, two hours, and four hours. These are planning alternatives, not a worldwide band standard or completed-purchase record. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: The February 2025 regulator report evaluates battery-backup alternatives lasting xx.xx minutes, one hour, two hours, and four hours. These are studied options, not evidence of completed purchases or global duration bands. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: The considered xx.xx-minute battery option supplies a public planning anchor for subhour autonomy. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: The evaluated xx.xx-minute battery option supplies a public commercial-planning anchor for subhour autonomy. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: The one-hour and two-hour options supply anchors within the modeled intermediate band. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: Evaluated one-hour and two-hour alternatives supply anchors within the modeled intermediate band. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
- Taxonomy evidence: The report discusses battery backup at mobile radio-access sites, establishing an application context rather than Global adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

27. ETSI EN 300 019-1-3 V3.1.1 (2026-05) - Stationary Use at Weatherprotected Locations
    - Taxonomy evidence: The May 2026 stationary-location classification distinguishes enclosure and environmental control; it informs category design rather than worldwide obligations or 2025 adoption. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: The May 2026 standard classifies stationary telecom-equipment locations by enclosure and environmental control; it supplies category terminology, not worldwide compliance obligations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: The weather-protected regime includes totally enclosed and partly protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Weather-protected locations include enclosed and partly protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx identifies temperature-controlled enclosed locations, including telecommunications centers. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx identifies enclosed locations with maintained temperature control, including telecom centers. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx identifies enclosed locations without temperature or humidity control. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx identifies enclosed locations without temperature or humidity control, including unattended equipment stations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx permits openings to outside air and partial weather protection; the category cannot be equated with every outdoor shelter. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
    - Taxonomy evidence: Class xx.xx recognizes partially weather-protected locations with openings to outside air. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
28. ETSI EN 300 019-1-4 V3.1.1 (2026-05) - Stationary Use at Non-Weatherprotected Locations
    - Taxonomy evidence: The May 2026 classification distinguishes sheltered and open-air non-weather-protected stationary locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
    - Taxonomy evidence: The May 2026 classification distinguishes sheltered and open-air non-weather-protected locations for stationary telecom equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
    - Taxonomy evidence: Classes xx.xx and xx.xx recognize sheltered non-weather-protected locations. Shelter alone does not place equipment in the weather-protected regime. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
    - Taxonomy evidence: Classes xx.xx and xx.xx explicitly recognize sheltered non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
    - Taxonomy evidence: Classes xx.xx, xx.xx, and xx.xx recognize open-air non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
    - Taxonomy evidence: Classes xx.xx, xx.xx, and xx.xx explicitly recognize open-air non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
29. ETSI EN 300 019-1-8 V2.1.2 (2002-04) - Stationary Use at Underground Locations
    - Taxonomy evidence: The stationary environmental series recognizes a distinct underground-location regime, supporting separation of subterranean field infrastructure from ordinary enclosed-building conditions. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.02_60/en_3000190108v020102p.pdf))
    - Taxonomy evidence: The standard identifies a distinct underground stationary-use regime, including footway boxes, manholes, and some tunnels. This supports separating subterranean field exposure from ordinary enclosed building locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.02_60/en_3000190108v020102p.pdf))

30. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network
    - Taxonomy evidence: The access-network classification distinguishes local, centralized, cluster, and customer-origin reverse powering; battery-backed allocation must follow the outage path. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Recognizes local, centralized, cluster, and reverse powering; batteries may back up the remote source or receiving equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Local power units may provide access-equipment backup. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Local powering uses a colocated supply. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Remote sources with backup can protect distant access equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Remote-source backup can protect distant equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Centralized supply originates in a telecom center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Cluster powering uses a supply node serving access equipment in an area. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Cluster supply originates outside a telecom center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Reverse powering is customer-origin supply to access equipment; a qualifying battery-backed source transaction is not established. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Reverse powering feeds access equipment from customer premises; battery-specific commercial deployment remains unverified. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: The standard describes batteries providing additional power during heavy traffic, recognizing a duty beyond outage reserve. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Batteries can supplement telecom power during heavy traffic, supporting an additional duty beyond outage reserve. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: The scope includes wired and hybrid access networks and backup-power arrangements. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: The February 2021 standard covers copper, fiber, radio, and hybrid access networks and discusses backup batteries in DC supplies and UPS equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Customer-premises equipment is distinguished from shared access-network equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Sections xx.xx.xx.xx and xx.xx.xx.xx distinguish shared access-network equipment from equipment at customer premises, supporting a separate subscriber-premises application boundary. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: The telecom operator is identified as provider of a local backup power unit. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: Section xx.xx identifies the telecom operator as the provider of a local power unit with backup for access equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Taxonomy evidence: The customer-premises discussion recognizes business-customer AC UPS use; it supports a business connectivity setting, not a disclosed purchase value. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

31. IEC 62040-5-3:2016 | IEC

- Taxonomy evidence: The standard distinguishes a complete DC UPS from individual functional units and identifies continuity of DC load power as its principal function. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
- Taxonomy evidence: DC-output UPS equipment is an internationally recognized category even when its normal input source is AC. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

32. ETSI TR 102 532 V1.1.1 (2009-06) - The use of alternative energy solutions in telecommunications installations

- Taxonomy evidence: The historical telecommunications energy-storage overview separately identifies lithium-metal-polymer batteries; current telecom commercialization is not established. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))
- Taxonomy evidence: Nickel-iron batteries appear as a distinct named technology in the telecommunications energy-storage overview. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))
- Taxonomy evidence: Nickel-zinc batteries appear as a separate named technology; the historical discussion does not establish present telecom deployment. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))

33. ITU-T L.1221 (11/2018) - Innovative energy storage technology for stationary use: Battery

- Taxonomy evidence: The stationary-battery classification distinguishes lithium-metal cells from lithium-ion electrode variants, supporting a family-level distinction rather than overlapping electrode-label siblings. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Metal-air is a recognized stationary-battery technology grouping, with zinc and aluminum among its named variants; this is not proof of current commercial telecom adoption. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Flow batteries are separately recognized in the stationary technology overview, rather than classified solely by their constituent metals. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: The classification discusses sodium battery technologies within stationary storage, while distinguishing technological possibilities from established applications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

34. TEC 66160:2024 - Hybrid (AC+DC) Uninterrupted Power Supply System

- Taxonomy evidence: The official telecom classification recognizes a complete hybrid UPS supplying uninterrupted AC and DC power. Only attributable battery-backup hardware falls within this market's frozen perimeter. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))
- Taxonomy evidence: The classification explicitly describes backed AC and DC outputs within one telecom system, supporting a combined-output category distinct from AC-input/DC-output equipment. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))
- Taxonomy evidence: The record supplies a telecom-specific combined-output classification basis; its national requirements are not treated as worldwide mandates. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))

35. Vodafone Sustainability Framework 2021

- Taxonomy evidence: Vodafone's 2021 financing framework names flow batteries among network-energy storage project technologies. This is demand-side category recognition, not proof of completed purchases or an exclusively backup-related revenue perimeter. ([vodafone.com](https://www.vodafone.com/~/media/Files/V/vodafone/corp/documents/debt-investor/vodafone-sustainability-framework.pdf))

36. Technology and Tools | First Responder Network Authority

· Taxonomy evidence: The government network description distinguishes core, transport backhaul, and radio access as separate layers, supporting functional rather than building-based application classification. ([firstnet.gov](https://firstnet.gov/network/TT))

· Taxonomy evidence: Core functions include switching, information processing, and network services; these are distinguished from transport links and radio base stations. ([firstnet.gov](https://firstnet.gov/network/TT))

· Taxonomy evidence: Transport backhaul carries user traffic and signaling between radio base stations and the core network. ([firstnet.gov](https://firstnet.gov/network/TT))

· Taxonomy evidence: Radio access is the base-station infrastructure connecting user devices to the network. The record establishes the network function, not battery purchasing volume. ([firstnet.gov](https://firstnet.gov/network/TT))

37. State of Delaware - Public Safety Communications Equipment, 700 MHz Systems, Contract GSS21869-700MHz, Appendix E

· Taxonomy evidence: The public radio-system procurement requires battery-backed UPS equipment at radio sites and communications-control locations. It establishes a public demand requirement, not completed contract delivery. ([bidcondocs.delaware.gov](https://bidcondocs.delaware.gov/GSS/GSS_21869_700mhz_appE.pdf))

· Taxonomy evidence: The state department solicits a communications-system upgrade including UPS equipment, establishing an institutional own-use purchasing role distinct from a telecom carrier or reseller. ([bidcondocs.delaware.gov](https://bidcondocs.delaware.gov/GSS/GSS_21869_700mhz_appE.pdf))

38. FCC Residential Voice Backup-Power Final Rule - Federal Register, October 16, 2015

· Taxonomy evidence: The 2015 residential-voice rulemaking addresses battery or UPS backup for subscriber-premises equipment and distinguishes provider and subscriber responsibilities. It is used as historical category evidence, not a worldwide or current compliance instruction. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2015-xx.xx-xx.xx/pdf/2015-xx.xx.pdf))

39. Terms of Service - AT&T Legal Policy Center

· Taxonomy evidence: Section xx.xx.xx.xx states that customers may purchase battery backup for telecom equipment from third-party manufacturers or retailers. This establishes customer-side procurement alternatives rather than a universal channel allocation. ([att.com](https://www.att.com/legal/terms.iframes.wirelessCustomerAgreement.html?utm_source=openai))

40. DC Power Plant / Rectifiers - UPS Rental

· Taxonomy evidence: The public offering advertises rental of batteries and complete DC power plants for telecom continuity. This supplier example supports category occurrence, not independently demonstrated leasing uptake or a market-wide partition. ([upsrental.com](https://www.upsrental.com/product/rectifiers-dc-plants/))

41. Your landline is going digital: what you need to know - Ofcom

· Taxonomy evidence: The consumer guidance describes at least one hour of backup for eligible landline-dependent customers and notes provider offerings lasting up to seven hours. These UK examples do not establish global bands. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

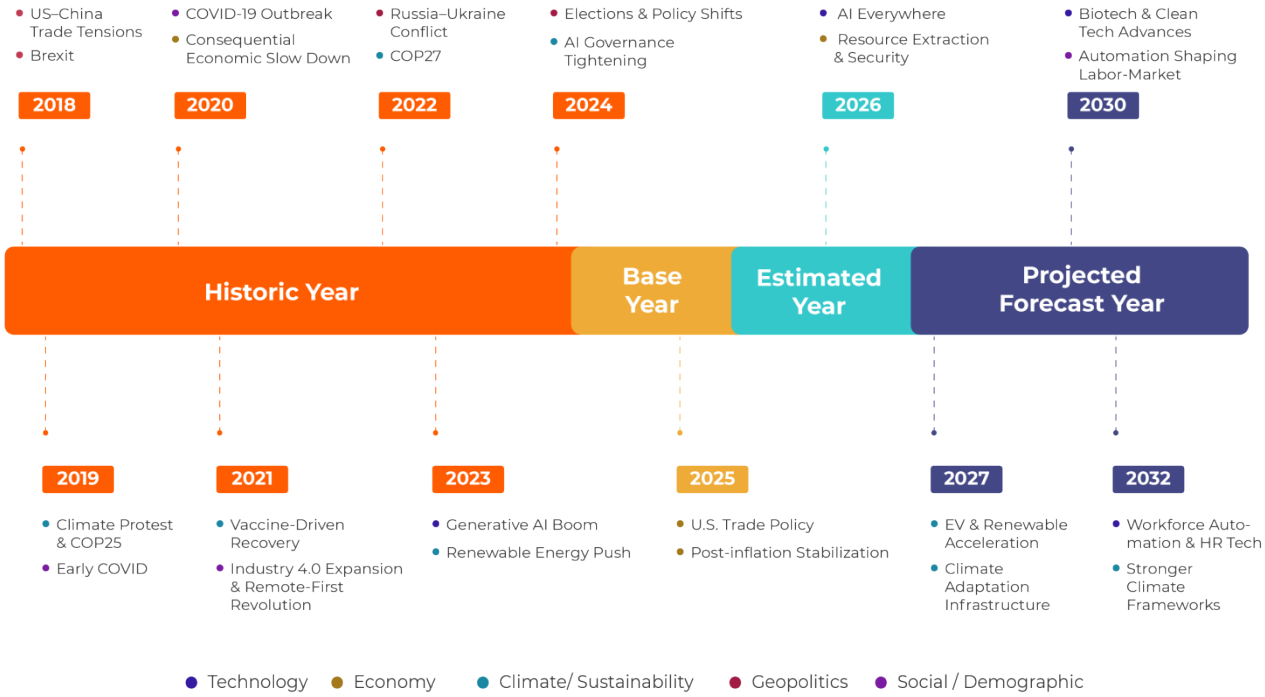
· Taxonomy evidence: The one-hour minimum is an anchor at the modeled intermediate band's lower boundary. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

· Taxonomy evidence: The disclosed availability of offerings lasting up to seven hours supplies another illustrative anchor within the modeled extended band. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

1.4. Years Considered for the Study

The study designates 2024 as the historical year, 2025 as the base year, 2026 as the estimated year, and 2032 as the forecast endpoint. These roles distinguish historical and base-year evidence from estimated and forecast interpretations.

Figure 1. Global Telecom Battery Backup System Market, Years Considered for the Study



1.5. Currency Considered for the Study

The reporting currency is the United States dollar (USD). Monetary market values are expressed on an absolute scale.

1.6. Language Considered for the Study

The report is published in American English.

1.7. Key Stakeholders

- Telecommunications Network Operators: assess qualified backup offerings, supplier switching, and the allocation of network-continuity and service obligations.
- Telecom Infrastructure & Tower Operators: assess purchasing authority, asset responsibilities, and backup delivery commitments in relation to the networks they support.
- Telecom Energy-Service Providers: evaluate managed delivery commitments, supplier dependencies, and the division of equipment ownership and continuity responsibility.

- Equipment Leasing & Rental Providers: evaluate qualification, contractual exposure, service responsibilities, and the suitability of equipment for the intended buyer and application.
- Battery and complete-system suppliers: assess documented offering participation, buyer qualification, business rights, and the capabilities required to support their intended commercial relationships.
- Systems integrators and contractors: assess integration responsibilities, supplier authorization, buyer acceptance, and the boundary between equipment delivery and continuing service.
- Distributors, retailers, and telecom service providers: assess supply rights, customer access, geographic coverage, and responsibility for warranties and after-sales support.
- Business & Institutional Connectivity Owners: compare backup propositions against purchasing authority, continuity requirements, and contractual accountability for their connectivity assets.
- Household Connectivity Purchasers: assess customer-premises offering compatibility, channel access, and the scope of equipment and support commitments.
- Regulators, standards organizations, and end-of-life service organizations: establish the jurisdictional and institutional conditions relevant to lawful commercial participation and lifecycle responsibilities.
- Investors and financing partners: distinguish equipment ownership from contracted service exposure and assess the evidence supporting supplier capability, buyer access, and ongoing obligations.

2. Research Methodology

2.1. Introduction

The study frames the Global Telecom Battery Backup System market through the commercial provision of batteries, assemblies, and complete backup systems for telecommunications continuity. Its approach connects the accepted categories to decisions about purchasing, supplier qualification, distribution, ownership, and service responsibility.

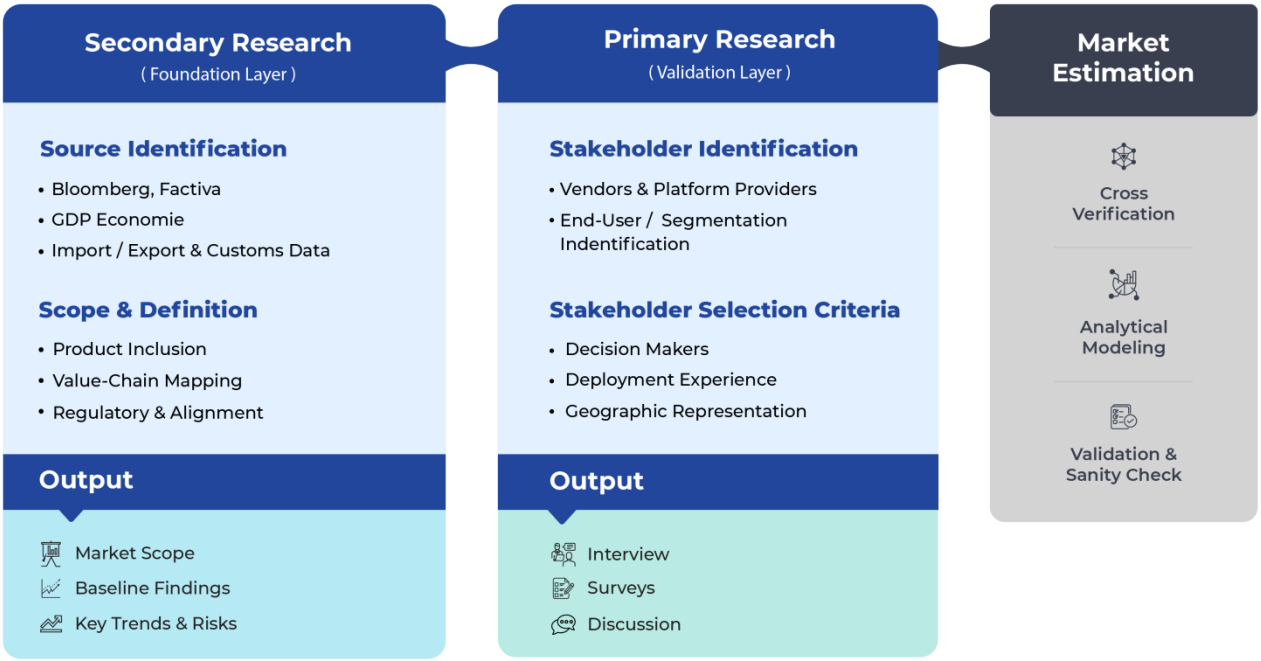
Methodological interpretation distinguishes what a business record establishes from the economic implications drawn from it. The approved qualitative challenge layer informs those explanations, while quantitative conclusions require separate support consistent with the same market boundaries.

2.2. Research Design

The study is organized around the accepted offerings, buyer constituencies, network applications, operating contexts, and commercial relationships. Each business question calls for evidence with matching authority and scope: offering identity, ownership or licensing, legal status, purchasing conditions, and delivery commitments are distinct subjects.

The design separates documented facts from economic interpretation and conditional options. Comparisons must account for differences between battery supply and complete-system supply, between equipment ownership and managed delivery, and between a purchasing party and the connectivity beneficiary. No preferred technology or route to market follows from taxonomy membership alone.

Figure 2. Global Telecom Battery Backup System Market, Research Design



2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Suitable secondary evidence depends on the commercial question. Official company portfolios can establish advertised offering identity and stated service commitments; mandatory filings can establish disclosed operations and corporate relationships; licensing and ownership records can establish business rights. Regulatory records establish legal status within their stated jurisdiction, while public buyer policies and awards can establish purchasing conditions or a particular procurement event.

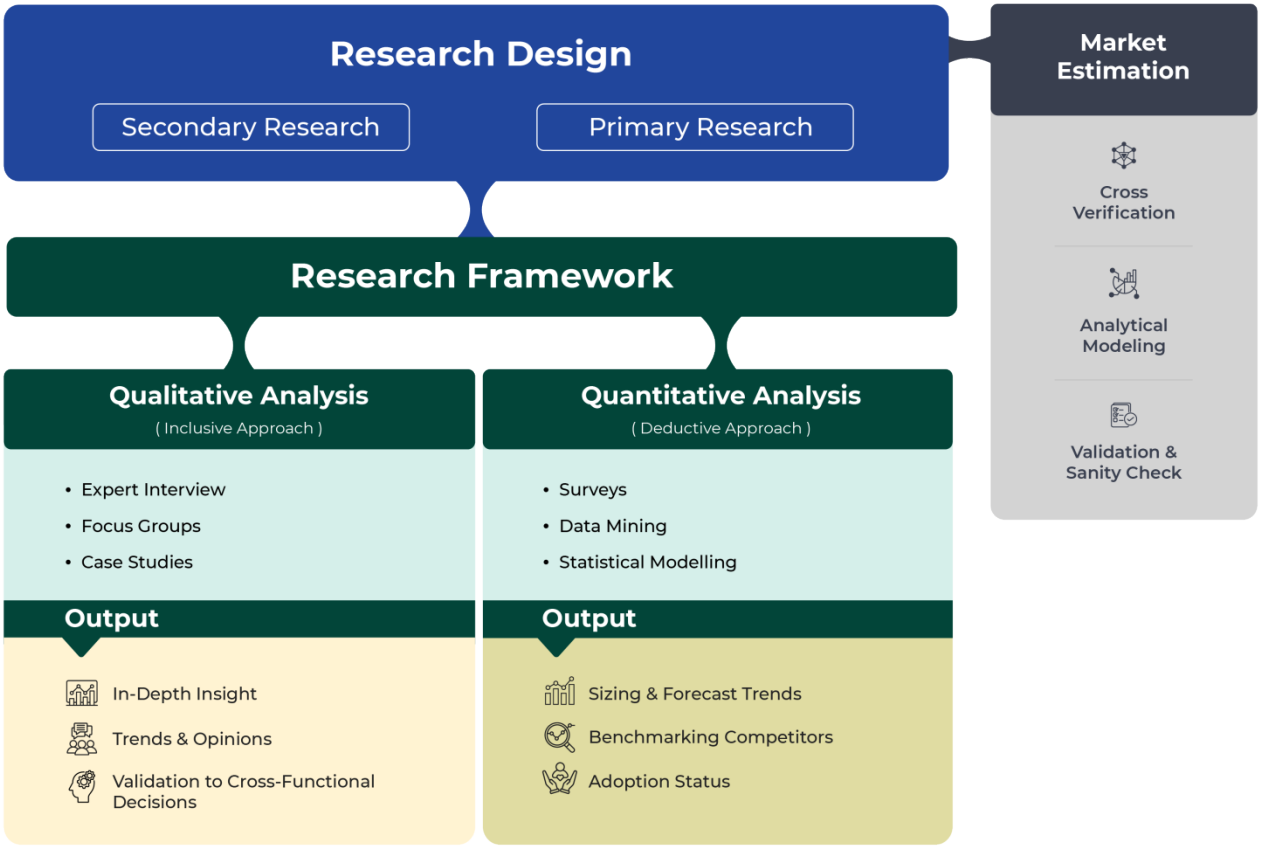
Each record must be interpreted within its effective period, geographic reach, and underlying authority. An announcement is not equivalent to demonstrated availability, an authorization is not evidence of adoption, and a purchasing example does not establish a universal buyer requirement. Syndicated commercial market estimates are not a substitute for attributable original business evidence.

2.3. Research Framework

The framework connects the market definition to the accepted taxonomy, then to identifiable offerings, suppliers, buyers, and contractual relationships. Offering and Battery Technology identify what is being compared; Network Application and Buyer Type identify the purchasing context; the remaining axes distinguish compatibility, operating context, delivery, and access.

Measurement questions follow those commercial boundaries rather than redefine them. Competitive interpretation should then compare documented rights, capabilities, qualification conditions, and service responsibilities. Recommendations remain conditional on the evidence supporting the exact buyer, offering, geography, and relationship concerned.

Figure 3. Global Telecom Battery Backup System Market, Research Framework



2.3.1. Qualitative Analysis

Qualitative analysis examines how purchasing authority, qualification, distribution rights, contractual responsibilities, and service commitments shape access to telecom battery backup business. Comparisons should address the accepted buyer and application categories rather than presume that a proposition suited to a tower operator also suits an institutional connectivity owner or household purchaser.

The approved primary-research challenge layer informs interpretation of these mechanisms and challenges analytical assumptions alongside secondary evidence. Its role is explanatory: it does not independently establish commercial availability, regulatory authorization, or numerical estimates.

2.3.2. Quantitative Analysis

Quantitative interpretation is bounded by the Global geography, the accepted offering hierarchy, the designated study periods, and absolute USD reporting. Supporting business records must be assessed for their relationship to the telecom application, the commercial offering, the jurisdiction, and the relevant period before they can support a comparable market observation.

The segmentation axes describe different attributes of the same activity and should not be treated as independent additive markets. Historical and base-year observations must remain

distinguishable from the estimated-year and forecast interpretations; qualitative hypotheses require independent quantitative support.

2.4. Market Size Estimation

A defensible market-value estimate must concern the accepted telecom battery backup offerings within the Global boundary and use absolute USD reporting. Evidence must connect the business activity to that perimeter rather than equate a diversified battery, power-system, or telecommunications business with the entire studied market.

Battery Units and Assemblies, Complete Backup Systems, and the accepted delivery models require explicit comparability assessment. Their inclusion establishes commercial coverage, not an automatic additive valuation perimeter. Any quantitative conclusion requires its own support and must remain distinguishable from an interpretation of market mechanisms.

2.4.1. Top-Down Approach

A top-down perspective is relevant only where a broader business record provides a defensible connection to the telecom battery backup perimeter. General battery, energy-storage, power-system, or telecommunications activity cannot be treated as an equivalent measure merely because it includes related businesses.

The analytical role is to challenge boundary consistency: whether the broader record distinguishes the accepted offerings, geography, and period sufficiently to inform the study. A broader disclosure may contextualize a supplier or application without supporting a scoped market-value conclusion.

2.4.2. Bottom-Up Approach

A bottom-up perspective requires supplier- or offering-specific business records with a demonstrable relationship to the accepted telecom battery backup scope. An advertised product can establish offering identity, but it does not by itself establish economically comparable activity.

Before comparison or aggregation is defensible, records need compatible offering, geographic, and period boundaries. Battery supply, complete-system supply, and channel participation must be assessed for overlapping commercial relationships rather than presumed to represent separate final activities. Named supplier participation alone cannot establish the completeness of a business universe.

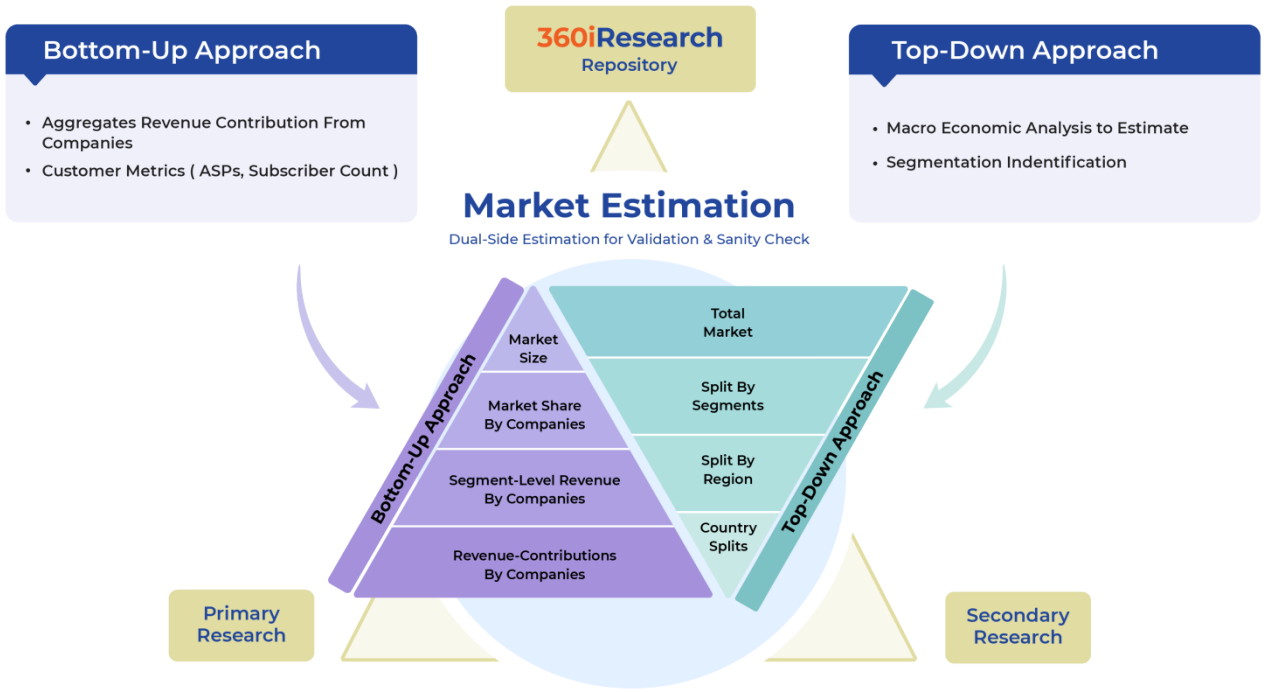
2.5. Data Triangulation

Triangulation concerns whether complementary records establish a consistent offering identity, commercial relationship, jurisdiction, and period. A portfolio, a regulatory record, and a buyer award may corroborate different parts of a proposition without proving the same business fact.

Differences in scope or authority should remain explicit rather than be treated as interchangeable observations. The qualitative challenge layer can identify assumptions

requiring further evidence, but agreement with a qualitative explanation is not independent numerical validation.

Figure 4. Global Telecom Battery Backup System Market, Data Triangulation



2.6. Research Outcomes

The intended outcome is a commercially defensible basis for evaluating supplier participation, buyer requirements, procurement routes, and competitive alternatives within the Global Telecom Battery Backup System market. Decision support should distinguish documented capabilities from announced activity and identify the conditions under which an offering or commercial relationship merits further consideration.

The analysis should clarify what a buyer, supplier, channel partner, or investor must verify before committing: the relevant offering, purchasing authority, qualification requirements, geographic rights, delivery obligations, and exposure to switching or service failure. Opportunity priorities and preferred entry routes require their own supporting commercial evidence.

2.7. Research Assumptions

- Every accepted Battery Technology category remains in scope. Commercial availability, supplier participation, jurisdictional authorization, and buyer qualification must be established separately for the exact offering; category inclusion establishes none of those facts.

- The segmentation axes are independent lenses on the same commercial activity, not separate additive opportunity pools. Cross-axis comparisons require consistent offering and period definitions.
- The contracting buyer, asset owner, network operator, and service provider are not assumed to be the same party. Route-to-market interpretation depends on the documented allocation of purchasing authority and delivery responsibilities.
- Inclusion of Backup with Energy Management and Managed Backup Capacity does not imply that every mixed-use contract belongs exclusively to telecom backup. Comparisons require a documented telecom role and a clear distinction from adjacent activities.
- Offerings sharing a technology, interface, environment, or autonomy category are not assumed to be commercially interchangeable. Substitution conclusions require comparable buyer requirements, qualification status, and contractual commitments.

2.8. Research Limitations

- A business disclosure spanning telecommunications and other applications may establish participation without isolating the studied activity. It cannot justify attributing the entire diversified business to telecom battery backup.
- Complete Backup Systems, Leased or Rented Equipment, and Managed Backup Capacity can represent different bundles of equipment and obligations. Comparisons remain conditional where their contractual boundaries are not demonstrably compatible.
- Product announcements, regulatory authorizations, purchasing awards, and continuing service commitments establish different facts. Evidence for one does not settle the others, limiting conclusions about availability, qualification, or sustained delivery.
- Evidence supporting qualification, distribution rights, or service commitments in one jurisdiction cannot automatically establish access elsewhere. Global commercial choices require support for the jurisdictions involved.
- Backup Autonomy and Installation Environment labels do not establish identical purchasing requirements across offerings. Technology substitution and switching conclusions remain conditional on comparable commercial claims and buyer obligations.

3. Executive Summary

3.1. Introduction

The Global Telecom Battery Backup System market is organized around accountability for connectivity during power disruption, rather than one interchangeable equipment purchase. Battery Units and Assemblies, Complete Backup Systems, and contracted equipment access or managed fulfillment allocate different responsibilities. IHS identifies battery servicing and replacement within required maintenance linked to customer service levels, while its disclosed South African power-service unwind demonstrates why tower ownership does not settle power responsibility. The starting commercial questions are the protected service, actual payer, and obligation being purchased.

Supplier portfolios provide distinct comparison paths. EnerSys' PowerSafe SBS is a named telecom battery offering; Vertiv's NetSure M Series presents configurable infrastructure with battery options. Vertiv also advertises cross-manufacturer upgrades as alternatives to replacing an entire DC plant. Supported replacement can therefore preserve existing infrastructure, while a broader package can consolidate coordination only where its contract accepts those duties. Portfolio breadth alone establishes neither equivalent buyer acceptance nor a local fulfillment commitment.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   · EnerSys lists PowerSafe SBS for telecom applications, establishing a named battery offering without establishing buyer-specific acceptance or surrounding-plant responsibility. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))
2. Vertiv NetSure M Series
   · Vertiv presents NetSure M Series outdoor infrastructure with DC power and battery options, supporting a distinct bundle comparison rather than identical contents in every quotation. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
3. DC Power Services | Vertiv
   · Vertiv advertises DC projects across manufacturers and upgrades as alternatives to replacing an entire plant. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
4. IHS Holding Limited First-Quarter 2026 Financial Statements
   · IHS's first-quarter 2026 filing includes generator and battery servicing and replacement within non-discretionary maintenance linked to service-level agreements. It also describes the South African power-service unwind and changed fulfillment responsibility. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

3.2. CXO Perspective

Network and tower executives should allocate capital against an accepted continuity obligation, comparing supported replacement or upgrade with an explicitly defined system package. Narrow procurement preserves existing assets and component choice but retains coordination duties; broader prime responsibility is preferable only when the contract assigns those duties and continuing support. Component entrants should identify the replacement

payer, equipment-approval authority, warranty interfaces, and local fulfillment before choosing direct supply or an integration role. Verizon's continuing supplier-code requirements demonstrate that contractor involvement does not bypass procurement compliance.

Operators considering managed fulfillment should distinguish ownership and maintenance transfer from public resilience responsibility: UK communications providers retain that responsibility despite outsourcing. Counterparty certainty is another commitment gate. Polarium Energy Solutions AB appears in its contact record, while governance wording uses Polarium Energy Systems AB. This unresolved inconsistency prevents confident attribution of equipment and digital-service liabilities; offering evaluation can proceed, but binding commitments require authoritative counterparty confirmation.

Sources & Evidence

1. Vertiv NetSure M Series
   · The configurable infrastructure proposition supports requesting an explicit equipment boundary before comparison with narrower replacement procurement. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
2. DC Power Services | Vertiv
   · The offering supports comparison of narrower upgrades with complete replacement; customer-specific continuing support remains a condition of the capital-allocation inference. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
3. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   · Ofcom's June xx.xx 2026 guidance retains UK communications-provider resilience responsibility for network portions operated by third parties, including managed-service arrangements. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
4. Verizon Supplier Code of Conduct
   · Verizon's May 2025 supplier code incorporates continuing compliance into procurement decisions, permits disqualification or termination, and requires oversight of subcontractor compliance. ([verizon.com](https://www.verizon.com/about/our-company/how-we-lead/policies/supplier-code-of-conduct))
5. IHS Holding Limited First-Quarter 2026 Financial Statements
   · The disclosed change in South African power responsibility supports contract-specific verification of the purchasing and fulfillment counterparty rather than inference from tower ownership. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
6. Contact | Polarium
   · Polarium's contact page identifies Polarium Energy Solutions AB; it does not reconcile the different governance wording. ([polarium.com](https://polarium.com/contact/))
7. Investor Relations at Polarium
   · Polarium's corporate-governance text identifies Polarium Energy Systems AB, establishing the naming inconsistency with its contact record without resolving the legal seller. ([polarium.com](https://polarium.com/investor-relations/))

3.3. New Revenue Opportunities

The Opportunity Mapping assessment identifies conditional routes in supported replacement for network and tower customers; payer-specific, provider-compatible premises fulfillment; temporary continuity during maintenance and transitions; managed capacity for operators

seeking agreed ownership and upkeep transfer; and selective energy-flexibility participation by eligible asset owners. Documented maintenance obligations provide a concrete replacement trigger when the payer and accepted scope are known. The remaining routes require an appropriate funding, duration, service, or participation relationship rather than a generic backup proposition. Rental demand does not automatically establish an equipment-sale commitment, and energy flexibility is not a default justification for continuity investment. Opportunity Mapping provides the detailed assessment.

Sources & Evidence

1. DC Power Services | Vertiv
   · Cross-manufacturer upgrade services provide an evidenced supported-replacement comparison route, not automatic account access. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
2. Your landline is going digital: what you need to know
   · Ofcom requires free backup solutions for qualifying landline-dependent customers without a working mobile phone or reliable mobile signal, establishing a bounded provider-funded premises route. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
3. How to participate in the reserve markets | Fingrid
   · Fingrid documents applicable resource-owner permission, reserve-product agreements, and settlement arrangements as separate Finnish participation prerequisites. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
4. IHS Holding Limited First-Quarter 2026 Financial Statements
   · Required battery servicing and replacement provide a documented maintenance-related purchasing trigger; the filing does not establish each site's accepted procurement scope. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
5. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
   · Elisa Industriq's June xx.xx 2025 announcement reports DNA Tower Finland's reserve-market implementation, providing a jurisdiction-specific commercial precedent for selective flexibility assessment. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))
6. Telecommunications | Aggreko US
   · Aggreko advertises telecom rental support including battery storage and support during upgrades and maintenance; the offering does not identify every underlying equipment purchaser. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))
7. Battery Backup | Meriwether Lewis Electric Cooperative
   · MLConnect recommends Precision Power for its equipment, permits cooperative or direct purchasing, retains battery-care duties with customers, and excludes backup from its service plan. This supports a provider-specific customer-purchase route. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
8. Solar & Battery as a Service - IPT Website
   · IPT advertises installation, ownership, and maintenance of solar-and-battery systems for telecom and other users, supporting a managed relationship subject to a separately defined continuity obligation. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

3.4. Next-Generation Business Models

The assessed business models separate equipment acquisition, continuing services, and additional asset monetization. Aggreko advertises temporary telecom equipment access, while IPT PowerTech Group advertises provider-owned and maintained solar-and-battery

services under consumption-based or fixed-payment agreements. Polarium Energy Solutions AB markets connected batteries and additional care services, creating distinguishable hardware, digital-access, and support commitments. These are evidenced propositions, not proof that every customer receives the same bundle.

For Backup with Energy Management, DNA Tower Finland's reported reserve-market implementation provides a specific commercial precedent, and Gridle advertises aggregation and trading. Service-assisted participation can contribute market coordination, but Fingrid's Finnish permissions, product agreements, and applicable settlement arrangements remain separate prerequisites. Direct participation and Reserve-Only Backup are alternatives. Continuity protection, warranty acceptance, data access, remedies, and exit rights determine whether added services justify reduced control and continuing counterparty dependence; the Finnish example does not establish access or outcomes elsewhere.

Sources & Evidence

1. Gridle Telco Solutions
   · Gridle advertises aggregation and electricity-market trading around telecom backup batteries, establishing a service-assisted comparison rather than guaranteed customer benefits. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
2. How to participate in the reserve markets | Fingrid
   · Participants may enter independently or with service-provider assistance, but that choice does not waive the documented permissions, agreements, or applicable settlement responsibilities. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
3. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
   · The announcement reports connected base-station batteries serving Finnish reserve markets alongside an outage-continuity role; it does not establish transferable access or another customer's outcomes. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))
4. Telecommunications | Aggreko US
   · The telecom rental proposition establishes temporary equipment access as a commercial alternative to permanent acquisition, without settling an individual agreement's fulfillment or return terms. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))
5. Connected Batteries - Polarium
   · Polarium markets Connected Batteries with cellular connectivity, cloud integration, remote monitoring, and support functions; these descriptions do not settle a customer's enforceable digital-service terms. ([polarium.com](https://polarium.com/connected-batteries/))
6. Polarium Care - Our Services
   · Polarium separately advertises operations, maintenance, lifecycle management, and extended-warranty services, supporting separation of hardware ownership from additional continuing commitments. ([polarium.com](https://polarium.com/services/))
7. Solar & Battery as a Service - IPT Website
   · IPT's advertised provider-owned service includes consumption-based or fixed-payment agreements, distinguishing its ownership-and-upkeep proposition from equipment rental or supply. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

3.5. Industry Roadmap

In 2026-2027, EU-facing sellers should resolve category applicability, finished-battery accountability, and necessary information rights before affected delivery commitments. Relevant battery passports become mandatory on February xx.xx 2027; relevant due-diligence obligations apply from August xx.xx 2027 following a separate postponement. That postponement does not provide passport relief. The commercial milestone is incorporation of applicable responsibilities into an executable supply agreement, not passage of either date alone.

For 2028-2029, managed-service expansion should follow verified customer fulfillment and enforceable renewal and exit terms. IFC's March xx.xx 2026 financing for IPT PowerTech in Ethiopia, Liberia, and Sierra Leone establishes expansion support, not completed delivery everywhere. Supplier-independence reviews should follow ownership and customer-contract changes: Stryten Energy LLC's completed October xx.xx 2026 acquisition retained the C&D Technologies and Trojan Battery brands, making parent, contracting, and support relationships more informative than brand counts.

For 2030-2032, preserve commercial options across renewals through continuing energy-market permissions, protected telecom duty, accountable service access, and orderly exit. Eligible separate lifecycle arrangements can also preserve equipment choice; EnerSys advertises Americas lead-acid takeback regardless of original manufacturer. Continue mixed use only while its rights and customer-specific benefits justify the additional obligations; otherwise retain dedicated backup and supported equipment purchasing.

Sources & Evidence

1. Gridle Telco Solutions
   · The marketed optimization and trading role establishes a continuing commercial relationship relevant to service renewal and mixed-use optionality; promotional outcomes are not adopted. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
2. How to participate in the reserve markets | Fingrid
   · Finnish reserve participation rests on commercial permissions and agreements, supporting the conditional need to preserve eligible participation relationships across renewals. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
3. Recycling | EnerSys
   · EnerSys identifies Americas availability for spent lead-acid collection regardless of original manufacturer, with recycling documentation. Territorial eligibility and individual service commitments remain separate conditions. ([enersys.com](https://www.enersys.com/en-gb/products/services/after-market-services/recycling/))
4. Digital Product Passport for Batteries | European Commission
   · The Commission identifies February xx.xx 2027 as the mandatory passport date for relevant battery categories and assigns creation and maintenance responsibility to the operator placing the finished battery on the market, rather than individual component or module suppliers. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/single-market/digital-product-passport/batteries_en))
5. Simplification: Council adopts law to stop the clock on due diligence rules for batteries
   · The Council's July xx.xx 2025 announcement records adoption of the postponement of relevant battery due-diligence obligations until August xx.xx 2027. This is a separate obligation from the passport milestone. ([consilium.europa.eu](https://www.consilium.europa.eu/en/press/press-releases/2025/xx.xx/xx.xx/simplification-council-adopts-law-to-stop-the-clock-on-due-diligence-rules-for-batteries/))

6. Solar & Battery as a Service - IPT Website

   · The provider-owned and maintained proposition supplies the commercial premise for assessing continuing service commitments; the page does not establish customer-specific renewal, remedy, or exit terms. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

7. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

   · IFC's March xx.xx 2026 announcement establishes financing supporting IPT telecom-energy modernization, operation, and maintenance in Ethiopia, Liberia, and Sierra Leone; prospective benefits do not establish completed fulfillment at every deployment. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

8. Stryten Energy Completes Acquisition of C&D Trojan, Creating a Leading Battery Manufacturing Platform for Transportation, Industrial, Critical Infrastructure, and Military Applications

   · Stryten Energy LLC announced completion of its C&D Technologies and Trojan Battery Company acquisition on October xx.xx 2026 while retaining their product brands. The record does not establish immediate integration of customer contracts or warranty support. ([stryten.com](https://www.stryten.com/stryten-energy-completes-acquisition-of-cd-trojan/))

4. Market Overview

4.1. Introduction

[redacted] Owned Equipment, Leased or Rented Equipment, and Managed Backup Capacity represent different purchasing relationships. Battery Technology, Power Interface, Installation Environment, Powering Architecture, Grid Availability, Backup Duty, and Backup Autonomy remain independent commercial classification lenses, not separate additive markets.

The market contains established battery and infrastructure-service propositions alongside commercialized energy-flexibility services. [redacted] Participation in any technology category must be distinguished from documented offering availability, local support, and buyer acceptance.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - EnerSys lists PowerSafe SBS batteries for telecom and other infrastructure applications.
2. Vertiv NetSure M Series
   - Vertiv describes NetSure M Series enclosures with power supply and battery-backup options for telecom applications.
3. Gridle Telco Solutions
   - Elisa Industriq describes Gridle as a virtual-power-plant proposition using telecom RAN backup batteries.
4. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The subscription anchor establishes the starting customer perimeter, not the forecast customer pool or market value. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
7. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
10. IHS Holding Limited - First-Quarter 2026 Financial Statements
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
12. Ofcom - Your Landline Is Going Digital: What You Need to Know
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
· Evidence informing the 2040 market-value input; displayed series and growth include calculations: The access conditions are a forecast counterforce; the source does not measure worldwide adoption or realized telecom-battery returns.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

4.2. Key Growth Contribution

Existing service-level obligations can sustain telecom battery purchasing independently of discretionary network expansion. IHS identifies battery replacement and servicing within non-discretionary site maintenance, creating a commercial role for accepted offerings such as EnerSys' PowerSafe SBS. Serving this need requires the correct maintenance payer, an accepted replacement boundary, and accountable local support. The constraint is that a required replacement does not automatically justify Complete Backup Systems or a change in Battery Technology; retaining supported infrastructure can preserve the buyer's purchasing flexibility.

Figure 6. Global Telecom Battery Backup System Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

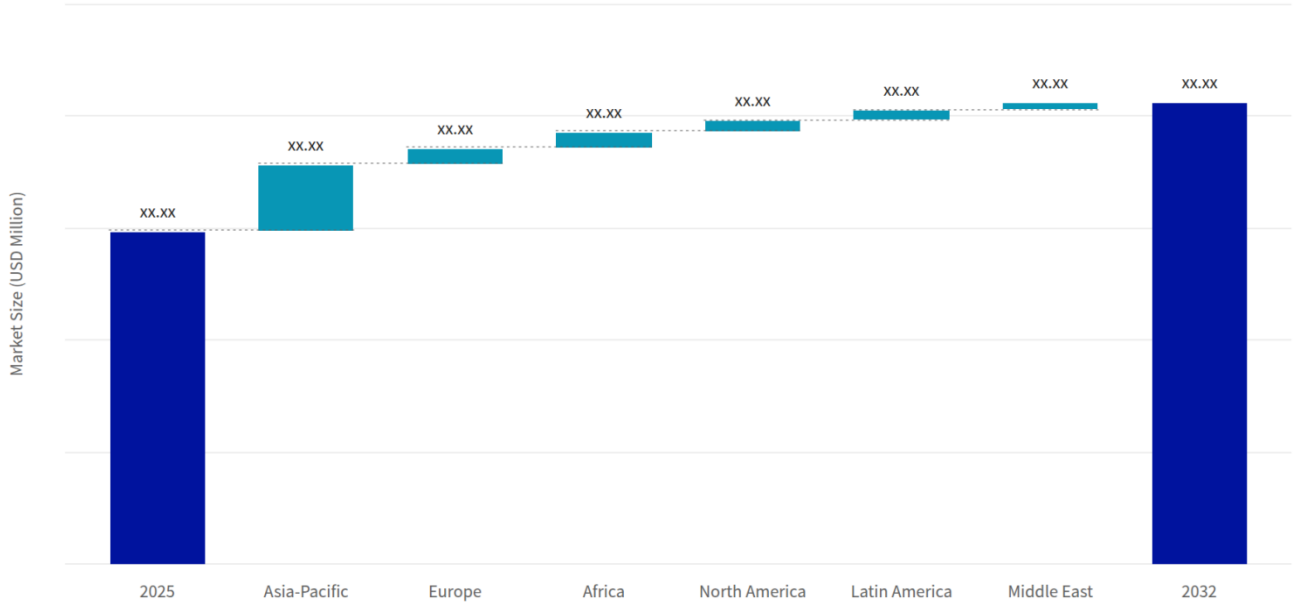

Figure 7. Global Telecom Battery Backup System Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

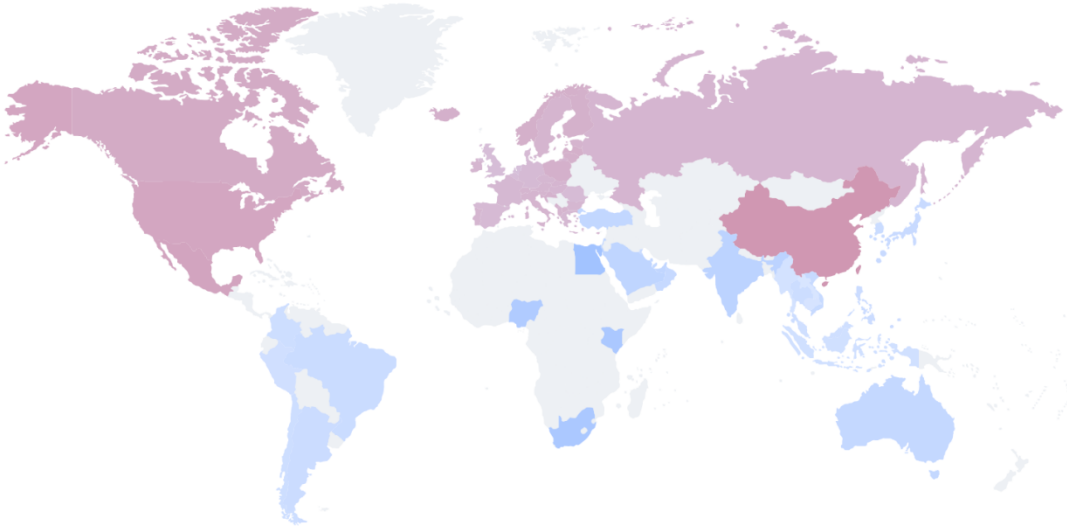

Table 3. Global Telecom Battery Backup System Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Backup Autonomy	xx.xx	xx.xx	xx.xx	xx.xx
Backup Duty	xx.xx	xx.xx	xx.xx	xx.xx
Battery Technology	xx.xx	xx.xx	xx.xx	xx.xx
Buyer Type	xx.xx	xx.xx	xx.xx	xx.xx
Commercial Delivery Model	xx.xx	xx.xx	xx.xx	xx.xx
Country	xx.xx	xx.xx	xx.xx	xx.xx
Grid Availability	xx.xx	xx.xx	xx.xx	xx.xx
Installation Environment	xx.xx	xx.xx	xx.xx	xx.xx
Network Application	xx.xx	xx.xx	xx.xx	xx.xx
Offering	xx.xx	xx.xx	xx.xx	xx.xx
Power Interface	xx.xx	xx.xx	xx.xx	xx.xx
Powering Architecture	xx.xx	xx.xx	xx.xx	xx.xx
Region	xx.xx	xx.xx	xx.xx	xx.xx
Sales Channel	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - PowerSafe SBS is a named telecom battery offering. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.
2. IHS Holding Limited First-Quarter 2026 Financial Statements
   - IHS links battery replacement and servicing to non-discretionary maintenance and customer service levels. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

4. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

5. Ofcom - Your Landline Is Going Digital: What You Need to Know
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
6. Fingrid - How to Participate in the Reserve Markets
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Applicable owner permission and market agreements are commercial access gates. They constrain forecast mixed-duty adoption without measuring its Global percentage. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
7. China Tower announces 2025 annual results - March 18, 2026
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

8. China Tower - 2025 Annual Results Presentation
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
9. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

10. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
11. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

12. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
13. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.
14. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
15. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
16. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.

17. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.
18. Shuangdeng Group - Annual Results Announcement for the Year Ended December 31, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
19. Vertiv NetSure M Series
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.

20. Battery Backup - Meriwether Lewis Electric Cooperative
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
21. EnerSys 2026 Proxy Statement and Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.

22. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2026 guidance identifies approximately four hours as good practice for active fixed-access cabinets. This supports a conditional Extended purchasing shift, not completed orders or a Global mandate. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

23. Technology and Tools | First Responder Network Authority
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.

24. BT - Digital Voice for Business Service Schedule, May 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.

25. Los Angeles Metro - Board Report 2024-1128, UPS Battery Replacement
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.

26. ETSI EN 300 019-1-3 V3.1.1 - Stationary Use at Weatherprotected Locations, May 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.

27. ETSI EN 300 019-1-4 V3.1.1 - Stationary Use at Non-Weatherprotected Locations, May 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.
28. DC Power Plant / Rectifiers - UPS Rental
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.
29. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.

30. Helios Towers - Full Year Results 2025, March 12, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.
31. Telecommunications | Aggreko US
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.
32. EnerSys PowerSafe SBS Front Terminal Batteries | Alpine Power Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.
33. DC Power Services | Vertiv
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.

34. Shuangdeng Group Co., Ltd. - Global Offering Prospectus, August 18, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
35. Amara Raja Crosses 1 GWh Lithium Storage Deployment Powering India's Telecom Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
36. HORIEN Salt Battery Solutions and Inlyte Energy Announce a Strategic Partnership
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))
37. Energy Backup - Phinergy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))

38. Australian Flow Batteries - RFB40X Series

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))

39. PowerReserve - Verizon Residential Accessories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))

40. Alkaline Manganese Dioxide Handbook and Application Manual - Energizer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))

41. ITU-T Work Programme - Aqueous Zinc-Based Battery Systems for Base Station Applications

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aqueous-zinc base-station work item is Under study with December 2027 timing. It constrains the forecast commercialization assumption but establishes neither approval nor customer purchases. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))

42. ITU-T L.1397 - Battery System with Integrated Control and Monitoring Information Model

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

43. ETSI EN 300 132-1 V2.2.1 - ICT Power Supply Interface: Alternating Current
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
44. ETSI EN 300 132-2 V2.8.1 - ICT Power Supply Interface: Direct Current
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
45. Vertiv NetSure Inverter Series - Converged AC and DC Power System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
46. ETSI EN 302 099 V2.2.1 - Powering of Equipment in Access Network
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

47. Set Up Your Battery Backup - AT&T G.Fast Service with BGW210

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

48. DNA Tower Offers Battery Capacity in Electricity Reserve Markets with Elisa DES

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

49. Case Elisa: Virtual Power Plant in the Telecom Industry

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company case reports over 2,000 aggregated sites and approximately xx.xx MWh. This is an installed commercial scale check, not annual purchasing value or Global prevalence. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/customer-stories/elisacase))

4.3. Industry Ecosystem & Value Chain Analysis

■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ Vertiv's NetSure M Series illustrates an enclosure proposition paired with DC power and battery options. Buying Battery Units and Assemblies separately leaves the buyer or another contractor responsible for obligations outside that component purchase; a Complete Backup Systems bid must define its actual bundle.

Contract allocation can change even within an established tower relationship. ■■■ ■■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■ ■■ ■■■■ ■■■■ ■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ Before contracting, buyers must identify who controls the battery budget, maintenance obligation, and outage exposure.

■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ This provides a counterexample to assuming that lifecycle support must remain with the original equipment brand. Chemistry, territory, and contractual responsibility still need to match the actual service arrangement.

Sources & Evidence

1. Vertiv NetSure M Series
   - The enclosure proposition is paired with NetSure DC power and battery options, supporting analysis of bundle boundaries.
2. IHS Holding Limited First-Quarter 2026 Financial Statements
   - IHS reports the unwind of its MTN South Africa power Managed Services agreement and diesel-linked indexation in renewed MTN Nigeria contracts.
3. Recycling | EnerSys
   - The page identifies Americas availability and describes spent lead-acid pickup regardless of manufacturer, with recycling documentation.

4.3.1. Supply-Side Analysis

[illegible] EnerSys's PowerSafe SBS portfolio and Vertiv's Telecom Lithium Batteries listing establish named alternatives for telecom applications, not interchangeable approval across every Battery Technology category. Ordering access, buyer acceptance, warranty scope, and local support remain offering-specific.

EnerSys's fiscal 2026 filing describes company-owned sales and service locations alongside independent representatives. Vertiv separately advertises DC power projects across manufacturers and narrower upgrades instead of complete replacement. [illegible]

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - The named PowerSafe SBS portfolio establishes a lead-based telecom battery proposition, not universal customer acceptance.
2. EnerSys 2026 Proxy Statement and Annual Report
   - EnerSys describes company-owned sales and service facilities and independent manufacturers' representatives.
3. DC Power Services | Vertiv
   - Vertiv advertises DC power projects regardless of manufacturer and maintenance across industry-accepted battery technologies.
4. Telecom Lithium Batteries | Vertiv
   - Vertiv lists Telecom Lithium Batteries as a named lithium-ion proposition for telecom applications.

4.3.2. Demand-Side Analysis

[illegible] This supports prioritization by network dependency and disruption exposure rather than a universal purchasing threshold. A contract should identify the service, network paths, and assets covered before offerings are compared.

Replacement can be an obligation-driven budget item: IHS's third-quarter 2025 disclosures classify existing-site power-equipment maintenance and replacement as necessary to meet service-level agreements. Household purchasing has a different payer structure. ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - The June xx.xx 2026 guidance differentiates access, aggregation, and core-network power-resilience expectations.
2. IHS Towers 3Q25 Supplemental Information
   - IHS identifies existing-site power-equipment repair, refurbishment, and replacement as non-discretionary maintenance needed for service-level performance.
3. Your landline is going digital: what you need to know
   - Providers must offer free backup solutions to qualifying landline-dependent customers.

4.3.3. Stakeholder Analysis

■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■ Operators need oversight of delegated obligations, while service providers require clear authority and access to fulfill them.

Procurement gatekeepers also control participation. ■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ An OEM or contractor therefore needs business-compliance standing as well as an appropriate portfolio.

Other stakeholders control separate rights. Fingrid requires permission for reserve use where the participant does not own the resource, while EU extended producer responsibility adds end-of-life accountability. ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - Communications providers retain responsibility for network portions operated through third-party arrangements.
2. Verizon Supplier Code of Conduct
   - Verizon's May 2025 code links continuing compliance to procurement decisions and permits disqualification or termination.
3. How to participate in the reserve markets | Fingrid
   - Reserve providers who do not own the resource require owner permission for reserve use.
4. Council adopts new regulation on batteries and waste batteries
   - The EU battery regulation establishes end-of-life obligations and extended producer responsibility.

4.4. Market Dynamics

Grid conditions and asset-use rights produce different purchasing incentives. ■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■ ■■ ■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ This supports a resilience and energy-management rationale for reviewing site power, but does not establish that every network or chemistry offers the same commercial benefit.

■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ Nokia's February 2024 VPP Controller announcement establishes a software proposition intended to use surplus backup capacity, not market permission or guaranteed returns. Mixed-use demand consequently depends on preserving connectivity obligations while obtaining the relevant energy-market rights.

Sources & Evidence

1. Strategic approach to network and supply emissions: building a sustainable network with ATC
   · MTN's April xx.xx 2025 case describes American Tower lithium-ion storage and renewable-energy initiatives where grid or fuel access is irregular.
2. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
   · The June xx.xx 2025 announcement states that DNA Tower Finland connected base-station batteries to Finnish reserve markets using Elisa's service.
3. Nokia adds Virtual Power Plant to its leading energy efficiency solution portfolio
   · Nokia announced VPP Controller Software on February xx.xx 2024, describing a proposition for surplus telecom backup capacity and reserve-market bidding.

4.4.1. Key Drivers

4.4.1.1. Jurisdiction-specific resilience obligations trigger continuity investment

Resilience obligations create a procurement trigger where continuity is a documented provider responsibility. ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ Purchasing depends on the applicable obligation and permitted resilience alternatives.

Sources & Evidence

1. Statement: Network and Service Resilience Guidance
   · The June 2026 update states that Ofcom clarified mobile-network backup-power expectations within its resilience guidance.
2. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies
   · The July xx.xx 2020 decision required a xx.xx-hour backup-power arrangement for minimum service in Tier xx.xx and Tier xx.xx High Fire Threat Districts.
   · Resiliency plans encompass backup power, redundancy, temporary facilities, and coordination.

4.4.1.2. Digital-landline migration changes backup responsibility and budget ownership

Digital-landline migration creates a customer-premises power dependency. Ofcom requires a free backup solution for landline-dependent customers without a working mobile phone or reliable mobile signal. ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■

Sources & Evidence

1. Your landline is going digital: what you need to know
   - Digital landlines depend on mains electricity; eligibility for free backup includes lacking a working mobile phone or reliable mobile signal.

4.4.1.3. Energy-market participation creates an additional battery-use incentive

■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ This demonstrates a commercial role for Backup with Energy Management beyond reserve-only continuity. The purchasing incentive remains conditional on local market access, protected telecom obligations, and acceptable service and warranty terms.

Sources & Evidence

1. Virtual power plant | Elisa
   - Elisa describes a Finnish virtual power plant using mobile-network backup batteries and reports permission for grid-balancing participation.
2. Elisa DES is now Gridle - delivering energy flexibility services at scale
   - The September xx.xx 2025 announcement renamed Elisa Distributed Energy Storage to Gridle and described commercialization beyond Elisa's own telecom sites.

4.4.2. Key Restraints

4.4.2.1. Service-specific backup commitments limit substitution

A backup offering can protect a narrower service than the buyer expects. ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ Buyers must establish the protected service boundary rather than treat a voice-backup proposition as comprehensive connectivity continuity.

Sources & Evidence

1. PowerReserve | Verizon Residential Accessories
   - Verizon states that PowerReserve supports voice and emergency calling but not Fios internet, television, or specified connected devices.

4.4.2.2. Staged upgrades can defer complete-system procurement

[redacted] This constrains the automatic conversion of replacement needs into Complete Backup Systems purchases. The counterforce is an existing plant whose support or contractual suitability cannot be preserved through a narrower upgrade.

Sources & Evidence

1. DC Power Services | Vertiv
   · Vertiv describes upgrades and battery changes as alternatives where replacement of the entire DC plant may be unnecessary.

4.4.2.3. Temporary requirements constrain permanent ownership commitments

Temporary continuity needs do not automatically justify permanent equipment ownership. [redacted] This restrains permanent-system commitments without excluding Leased or Rented Equipment from the market.

Sources & Evidence

1. Telecommunications | Aggreko US
   · Aggreko describes telecom battery-storage rentals supporting exchanges, upgrades, maintenance, and remote locations.

4.4.3. Key Opportunities

4.4.3.1. Supported replacement without unnecessary plant-wide procurement

Existing-site maintenance creates a need for replacements that preserve accepted infrastructure rather than automatically expand the procurement bundle. [redacted] A broader system purchase is the alternative when retained responsibilities cannot be supported.

Sources & Evidence

1. DC Power Services | Vertiv
   · Vertiv offers cross-manufacturer projects and alternatives to entire-plant replacement. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
2. IHS Holding Limited First-Quarter 2026 Financial Statements
   · Existing-site maintenance includes battery replacement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

4.4.3.2. Payer-specific, provider-compatible premises backup

[redacted] Qualifying UK households create provider-funded fulfillment, while MLConnect demonstrates a customer purchase with an accepted Precision Power proposition and retained battery-care duties. The opportunity is an explicitly supported service boundary and payer-specific route, not a universal household entitlement or a generic broadband-continuity promise.

Sources & Evidence

1. Your landline is going digital: what you need to know
   - Qualifying UK landline-dependent customers must receive free backup solutions. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
2. Battery Backup | Meriwether Lewis Electric Cooperative
   - MLConnect recommends Precision Power but retains customer battery-care responsibilities. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

4.4.3.3. Contractually defined temporary continuity

[redacted] Capture depends on an accepted offering and enforceable delivery, servicing, replacement, and return commitments for the actual period. Continuing site obligations or repeated extensions can make ownership the more suitable alternative.

Sources & Evidence

1. Telecommunications | Aggreko US
   - Aggreko advertises telecom battery-storage rental and maintenance-related support. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))

4.4.3.4. Accountable managed fulfillment with explicit retained duties

[redacted] IPT advertises provider-owned and maintained systems, establishing a comparison route. Managed Backup Capacity is suitable only when local fulfillment, protected telecom service, remedies, and exit obligations are assigned; UK provider responsibility is not erased by outsourcing.

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - UK providers retain resilience responsibility across managed-service arrangements. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
2. Solar & Battery as a Service - IPT Website
   - IPT advertises provider installation, ownership, and maintenance of solar-and-battery systems. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

4.4.3.5. Authorized energy flexibility around protected backup assets

The reported DNA Tower Finland implementation demonstrates an additional commercial role for backup assets. Infrastructure owners can assess mixed use when participation rights

and protected telecom obligations coexist. ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. How to participate in the reserve markets | Fingrid
   - Finnish participation requires agreements and applicable owner permission. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
2. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
   - Elisa Industriq reported DNA Tower Finland's reserve-market implementation on June xx.xx 2025. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

4.4.4. Key Challenges

4.4.4.1. Converting service descriptions into site-specific fulfillment commitments

■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■■ Buyers still need to establish geographic coverage, access responsibility, and incident response for their particular sites. Weather-Protected Locations, Non-Weather-Protected Locations, and Underground Locations remain included, but category labels do not establish identical service access.

Sources & Evidence

1. Site & Network Remote Services | Vertiv
   - Vertiv describes continuous support and field service, single-source monitoring accountability, and customized escalation for batteries and other infrastructure.

4.4.4.2. Reconciling telecom continuity contracts with energy-market rights

Battery ownership and software access do not by themselves authorize reserve-market participation. ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ Direct participation and a service-provider route are alternatives, but neither removes the relevant contractual prerequisites.

Sources & Evidence

1. How to participate in the reserve markets | Fingrid
   - Fingrid requires product-specific agreements and specified settlement arrangements.
   - Participants can carry out market entry independently or with service-provider support.

4.4.4.3. Assigning finished-battery data and lifecycle accountability

[redacted] System sellers and importers must establish applicability, data ownership, and continuing accountability before delivery. A battery-component purchase does not automatically discharge the finished-offering obligation.

Sources & Evidence

1. Digital Product Passport for Batteries | European Commission
   - Passport requirements apply to relevant categories from February xx.xx 2027.
   - The operator placing the finished battery on the market is responsible for creating and maintaining the passport, rather than component or module suppliers.

4.5. Porter's Five Forces Analysis

Competitive rivalry spans different commercial objects. EnerSys lists PowerSafe SBS batteries for telecom applications, while Vertiv's NetSure M Series supports a broader enclosure and power proposition with lead-acid or lithium-ion battery options. [redacted]

Entry barriers include procurement compliance and service credibility, not a demonstrated market-wide patent gate. Verizon incorporates continuing supplier-code compliance into purchasing decisions. [redacted]

Substitution is conditional on the continuity obligation. [redacted] Supplier bargaining therefore depends on the supported bundle and service reach, while buyers must distinguish an alternative ownership arrangement from an alternative capable of meeting the same service requirement.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - The battery portfolio provides a commercial object distinct from a broader enclosure and system bundle.
2. Vertiv NetSure M Series
   - The portfolio supports lead-acid and lithium-ion battery options without establishing universal interchangeability.
3. EnerSys 2026 Proxy Statement and Annual Report
   - EnerSys states that no single patent is material and emphasizes product quality and customer relationships.
   - EnerSys reports purchasing lead from multiple suppliers and using hedging arrangements.

4. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - The guidance recognizes battery and generator arrangements rather than imposing a universal battery-only approach.
5. Verizon Supplier Code of Conduct
   - The policy establishes business-compliance conditions affecting supplier access, separate from product capability.
6. Telecommunications | Aggreko US
   - The rental proposition establishes an ownership alternative rather than universal equivalence to permanent backup systems.

4.6. PESTLE Analysis

Public policy changes both market access and the party funding continuity. UK protections for landline-dependent customers can place the backup obligation on the communications provider. [redacted]

Trade exposure depends on product classification and origin. USTR's September 2024 determination scheduled Section xx.xx changes for covered Chinese non-electric-vehicle lithium-ion batteries in 2026. [redacted]

Environmental procurement increasingly involves infrastructure accountability rather than chemistry labels alone. [redacted] Consequently, sustainability claims, continuity commitments, and lifecycle responsibilities require separate documentation; satisfying one does not establish the others.

Sources & Evidence

1. Your landline is going digital: what you need to know
   - Protected-customer obligations can allocate backup responsibility to the communications provider.
2. Council adopts new regulation on batteries and waste batteries
   - Lifecycle obligations make end-of-life accountability relevant to the commercial relationship.
3. IHS Holding Limited First-Quarter 2026 Financial Statements
   - The first-quarter 2026 disclosure identifies foreign-exchange and financing exposure.
4. Strategic approach to network and supply emissions: building a sustainable network with ATC
   - The collaboration includes enhanced site-level emissions information and shared environmental objectives.
5. Digital Product Passport for Batteries | European Commission
   - The passport timetable is distinct from other battery compliance obligations.

6. Simplification: Council adopts law to stop the clock on due diligence rules for batteries
   - The Council's July xx.xx 2025 announcement postpones relevant battery due-diligence obligations until August xx.xx 2027.
7. USTR Section 301 Four-Year Review Modifications Determination, September 2024
   - USTR's September 2024 determination schedules Section xx.xx changes for covered Chinese non-electric-vehicle lithium-ion batteries in 2026 under a specified tariff classification.
   - This record does not by itself establish every transaction's total applicable treatment.

4.7. Market Outlook

[illegible] IHS also identifies improved grid availability as a potential reduction in generator and battery maintenance expenditure. Suppliers should therefore monitor changes in customer obligations and the accepted replacement boundary rather than assume that every continuity need converts into a complete-system award.

Additional energy duties create a separate conditional path. The reported DNA Tower Finland implementation establishes commercial feasibility within a particular relationship; participation agreements remain a distinct access gate. [illegible]

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - Ofcom differentiates network-domain expectations and recognizes combined battery-and-generator arrangements.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
2. How to participate in the reserve markets | Fingrid
   - Software ownership alone does not establish participation rights.
   ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
3. IHS Holding Limited First-Quarter 2026 Financial Statements
   - IHS states that improved grid availability may reduce generator and battery maintenance expenditure.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

4. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
   · The reported implementation establishes a Finnish commercial example, not transferable global access. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

4.7.1. Near-Term Market Outlook (0-2 Years)

For 2026-2027, EU-facing sellers confront separate product-accountability milestones. ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ Before making affected delivery commitments, establish the offering's regulatory category, responsible operator, necessary information rights, and continuing accountability.

The near-term commercial indicator is whether those responsibilities are incorporated into an executable supply arrangement, not the date alone. ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ Where applicability or responsibility remains unresolved, defer the affected commitment rather than infer relief from a postponed obligation.

Sources & Evidence

1. Digital Product Passport for Batteries | European Commission
   · Relevant battery passports become mandatory on February xx.xx 2027; the finished-battery market operator carries responsibility. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/single-market/digital-product-passport/batteries_en))
2. Simplification: Council adopts law to stop the clock on due diligence rules for batteries
   · The Council's July xx.xx 2025 law postpones relevant battery due-diligence obligations until August xx.xx 2027. ([consilium.europa.eu](https://www.consilium.europa.eu/en/press/press-releases/2025/xx.xx/xx.xx/simplification-council-adopts-law-to-stop-the-clock-on-due-diligence-rules-for-batteries/))

4.7.2. Medium-Term Market Outlook (3-5 Years)

■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ The decision-changing milestones are completed customer fulfillment, an identifiable local contracting provider, and continuing responsibility for the protected telecom service. Operators should enlarge a framework only where those obligations remain enforceable; narrower equipment purchasing remains preferable when ownership transfer or exit exposure is unacceptable.

[redacted] A common parent may simplify coordination, but separate brand names do not alone diversify the relationship. Customer contract changes, warranty notices, and support allocations-not the acquisition announcement by itself-should determine changes to a supply framework.

Sources & Evidence

1. Solar & Battery as a Service - IPT Website
   - The service proposition establishes a continuing ownership-and-maintenance relationship. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))
2. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
   - IFC's March xx.xx 2026 announcement finances IPT telecom-energy modernization, operation, and maintenance in Ethiopia, Liberia, and Sierra Leone. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
3. Stryten Energy Completes Acquisition of C&D Trojan, Creating a Leading Battery Manufacturing Platform for Transportation, Industrial, Critical Infrastructure, and Military Applications
   - Stryten completed its C&D Technologies and Trojan Battery acquisition on October xx.xx 2026, retaining their product brands. ([stryten.com](https://www.stryten.com/stryten-energy-completes-acquisition-of-cd-trojan/))

4.7.3. Long-Term Market Outlook (5-10 Years)

For 2030-2032, the strategic choice is whether to retain dedicated backup responsibility or sustain an additional energy-service relationship through changing contracts and market conditions. [redacted] Further commitment is justified only when the additional role remains compatible with telecom continuity and the owner's actual commercial results.

[redacted] A bundled lifecycle relationship may simplify coordination, but becomes less attractive if it prevents use of accepted alternatives or fails to cover the destination and battery category. Changes in collection eligibility, warranty support, and responsible counterparties should trigger review rather than an automatic technology or supplier switch.

Sources & Evidence

1. Gridle Telco Solutions
   · Gridle markets aggregation and electricity-market trading around telecom backup batteries. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
2. How to participate in the reserve markets | Fingrid
   · Direct and service-assisted entry retain participation requirements. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
3. Recycling | EnerSys
   · EnerSys advertises Americas lead-acid collection regardless of manufacturer, with recycling documentation. ([enersys.com](https://www.enersys.com/en-gb/products/services/after-market-services/recycling/))

4.8. Go-to-Market Strategy

[redacted] An integrator contributes that coordination only through an agreed prime scope. The entrant still needs offering acceptance, continuing warranty allocation, and its own compliance responsibilities; Verizon's supplier code demonstrates that contractor involvement does not substitute for procurement standing.

Channel selection should follow the premises payer. For qualifying UK households, pursue the communications provider's accepted fulfillment route. [redacted]

Delivery-model positioning should distinguish a bounded temporary requirement from continuing energy fulfillment. [redacted] EnerSys' standard service terms illustrate why estimated dates and limited remedies require attention before a buyer treats service marketing as an enforceable continuity promise.

[redacted] A software-only purchase is unsuitable when the buyer needs another party to assume market responsibilities. Dedicated backup remains the alternative when the additional relationship cannot be justified or contractually supported.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - EnerSys provides a manufacturer quotation route for PowerSafe SBS. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))
2. Gridle Telco Solutions
   - Aggregation and trading are advertised partner capabilities, not guaranteed customer obligations. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
3. DC Power Services | Vertiv
   - The service offering establishes an integration alternative, not customer-specific acceptance. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
4. Your landline is going digital: what you need to know
   - Eligibility creates a provider-funded route; mobile alternatives narrow its constituency. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    - MLConnect permits cooperative or direct purchases and excludes backup from its service plan. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

12. Solar & Battery as a Service - IPT Website
    - IPT's provider-owned service differs from equipment rental or supply. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

Institutional purchasing is often triggered by an existing service obligation rather than a discretionary technology refresh. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Telecommunications Network Operators and Telecom Infrastructure & Tower Operators should identify the maintenance payer, protected service, and replacement responsibility before soliciting comparable bids; the asset user and economic buyer need not be the same party.

▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ By contrast, BT's May 2026 Digital Voice for Business schedule places backup-power provision at the business customer's expense. Household Connectivity Purchasers may therefore obtain eligible fulfillment through their provider, while Business & Institutional Connectivity Owners should establish their own contractual funding responsibility rather than assume equivalent consumer protection.

Procurement approval is distinct from product suitability. Verizon's May 2025 supplier code incorporates continuing compliance into purchasing decisions and permits disqualification or termination. ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

Sources & Evidence

1. Your landline is going digital: what you need to know
   · Ofcom requires providers to offer free backup solutions to landline-dependent customers without a working mobile phone or reliable mobile signal.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · IHS identifies battery replacement and servicing within non-discretionary maintenance needed to meet customer service-level agreements.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
4. Digital Voice for Business Service Schedule, May 2026
   · BT's May 2026 Digital Voice for Business schedule places secure power supply and backup-power provision at the customer's expense.
   ([business.bt.com](https://business.bt.com/content/dam/bt-business/pdfs/terms/bt-business-agreement/digital-voice-part-a-and-b-v3-xx.xx-may-2026.pdf))

5.2. Consumer Experience Benchmarking

[redacted] These are provider-specific scope benchmarks, not interchangeable guarantees: a purchaser needing broadband continuity should not treat a voice-only proposition as equivalent. Neither description establishes protection against an upstream network outage or continuity for every connected device.

[redacted] Buyers should compare the same site's contracted coverage, response obligations, exclusions, and remedies, then examine comparable service-fulfillment records before selecting on claimed reliability. Broader accountability can simplify escalation, while component-level purchasing preserves supplier choice but leaves coordination with the buyer.

Sources & Evidence

1. PowerReserve | Verizon Residential Accessories
   · Verizon limits PowerReserve to voice, including emergency calling, and excludes Fios internet, television, and specified connected devices. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
2. Site & Network Remote Services | Vertiv
   · Vertiv describes continuous support and field service, customized escalation, and monitoring accountability covering batteries and other critical infrastructure. ([vertiv.com](https://www.vertiv.com/en-ca/services-catalog/maintenance-services/remote-services/site--network-remote-services/))
3. Set up a Battery Back Up | BT Help
   · BT describes its Battery Back Up as supporting the Smart Hub and broadband services, including Digital Voice, during a power cut. ([bt.com](https://www.bt.com/help/home-phone/set-up-battery-back-up))
4. EnerSys Delaware Inc. Terms and Conditions for the Purchase of Services
   · EnerSys' July xx.xx 2025 service terms treat performance dates as estimates and exclude specified consequential losses, illustrating distinctions between service descriptions and contractual remedies. ([terms.enersys.com](https://terms.enersys.com/pdfs/en/Service/Service.pdf))

5.3. Opportunity Mapping

Obligation-driven replacement offers a comparatively concrete account-development route where the maintenance payer and accepted procurement scope are known. [redacted]

[illegible] Verizon's procurement code illustrates an additional business-compliance gate; none of these catalogs establishes automatic account access.

[illegible] Broader broadband protection must be expressly supported rather than inferred from an emergency-calling proposition. These examples establish distinct routes, not interchangeable eligibility across providers.

Temporary continuity is accessible as a defined rental requirement, not as an assumed commitment to buy equipment. [illegible] Equipment Leasing & Rental Providers are potential fleet customers for OEMs only after their actual purchasing authority and asset-support responsibilities are established.

Managed Backup Capacity is a more demanding route because the customer purchases continuing fulfillment rather than temporary access. [illegible] This route warrants priority only where delegated obligations, local delivery, and exit arrangements are enforceable.

[illegible]

■■■■■ ■■■■■■■■■■■■■■■■■ Defer commitment where any central right or service obligation remains unresolved; neither a software description nor an overseas implementation establishes local access. This prioritization concerns evidenced commercial routes, not a supplier-wide substitution preference.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   · The catalog supports battery-focused procurement, without establishing surrounding plant accountability. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))
2. Vertiv NetSure M Series
   · NetSure M Series presents configurable outdoor telecom infrastructure with battery options. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
3. Gridle Telco Solutions
   · The offering supplies a service-assisted comparison to direct participation. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
4. DC Power Services | Vertiv
   · Supported upgrades can be compared with complete replacement. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
5. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   · Outsourcing does not remove the UK provider's public resilience responsibility. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
6. Your landline is going digital: what you need to know
   · Emergency-contact obligations do not establish universal household battery funding. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
7. Verizon Supplier Code of Conduct
   · Procurement compliance is separate from offering-specific acceptance. ([verizon.com](https://www.verizon.com/about/our-company/how-we-lead/policies/supplier-code-of-conduct))
8. How to participate in the reserve markets | Fingrid
   · Owner permission, product agreements, and applicable settlement arrangements are separate prerequisites. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
9. IHS Holding Limited First-Quarter 2026 Financial Statements
   · Maintenance obligations and power-contract allocation are distinct purchasing considerations. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
10. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES
    · A named telecom deployment supports service-route assessment without proving another customer's outcomes. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))
11. Telecommunications | Aggreko US
    · The telecom proposition includes support during upgrades and maintenance. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))

12. Digital Voice for Business Service Schedule, May 2026
    · Business backup funding differs from qualifying household protection. ([business.bt.com](https://business.bt.com/content/dam/bt-business/pdfs/terms/bt-business-agreement/digital-voice-part-a-and-b-v3-xx.xx-may-2026.pdf))
13. Battery Backup | Meriwether Lewis Electric Cooperative
    · Provider compatibility, protected services, and continuing care are separate purchasing conditions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
14. Solar & Battery as a Service - IPT Website
    · Telecom is an advertised application; dedicated backup obligations still require agreement. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))
15. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    · The financed initiative establishes expansion support, not completed fulfillment at every deployment. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

5.4. Distribution Channel Analysis

[illegible] A distributor can consolidate equipment and service purchasing, but its listing does not establish manufacturer-confirmed authorization, stock, or a site-specific response commitment. Buyers should verify those conditions and identify whether the manufacturer, reseller, or separate service provider owns each obligation.

Systems Integrator and Contractor Supply is particularly relevant when the purchased object extends beyond Battery Units and Assemblies. [illegible] The prime contract should distinguish integration acceptance from each supplier's continuing warranty responsibility.

Telecom Service Provider Supply introduces a service-platform gate. [illegible] A retailer's equipment sale does not itself establish the provider's acceptance or responsibility for continuity.

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
    · EnerSys lists PowerSafe SBS for telecom applications and provides a manufacturer quotation route. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))

2. DC Power Services | Vertiv
   · Vertiv offers DC power projects across manufacturers and describes upgrades as alternatives to replacing an entire DC plant. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
3. PowerReserve | Verizon Residential Accessories
   · PowerReserve eligibility depends on the customer's installed Verizon equipment, and Verizon provides product support.
   ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
4. Set up a Battery Back Up | BT Help
   · BT directs customers to contact it to request a Battery Back Up.
   ([bt.com](https://www.bt.com/help/home-phone/set-up-battery-back-up))
5. EnerSys PowerSafe SBS Front Terminal Batteries | Alpine Power Systems
   · Alpine lists EnerSys PowerSafe SBS Front Terminal batteries, describes itself as an approved EnerSys distributor, and advertises associated monitoring and recycling services. Manufacturer confirmation and site-specific commitments remain separate.
   ([alpinepowersystems.com](https://alpinepowersystems.com/products/enersys-powersafe-sbs-front-terminal))

5.5. Pricing Trend Analysis

Commercial terms depend on cost-adjustment rights and the obligation purchased, rather than Battery Technology alone. EnerSys discloses lead-linked adjustment agreements, hedging, and delays between cost movements and customer adjustments, alongside competitive pressure. ■■■■ ■■■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■

Managed Backup Capacity introduces different exposures. IHS's first-quarter 2026 disclosure describes Nigerian power indexation and delayed foreign-exchange resets, while its South African arrangement allocates power responsibilities differently. ■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■

Tariffs add a classification-dependent contracting condition. ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ A historical tariff notice alone does not settle the complete treatment of a particular shipment.

Sources & Evidence

1. EnerSys 2026 Proxy Statement and Annual Report
   · EnerSys discloses lead-linked pricing agreements, hedging, adjustment delays, and competitive pricing pressure across its diversified business. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
2. IHS Holding Limited First-Quarter 2026 Financial Statements
   · IHS describes Nigerian power indexation, delayed foreign-exchange resets, and a different South African power-service allocation; these are contract examples, not battery-equipment pricing benchmarks. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
3. USTR Section 301 Four-Year Review Modifications Determination, September 2024
   · USTR's September 2024 determination scheduled product-specific Section xx.xx changes for covered Chinese non-electric-vehicle lithium-ion batteries in 2026. It does not establish every transaction's complete tariff treatment. ([ustr.gov](https://ustr.gov/sites/default/files/Section%xx.xx%20Modifications%20Determination%20FRN%xx.xx%28Sept%2012%xx.xx%xx.xx%xx.xx%28FINAL%xx.xx.pdf))

5.6. Regulatory Compliance & Standards Framework

[redacted] Separately, California's July xx.xx 2020 action required xx.xx-hour backup power for minimum service and coverage in Tier xx.xx and Tier xx.xx High Fire Threat Districts. Operators should map the applicable obligation before selecting equipment or managed capacity; these records do not establish a global battery-only requirement.

EU market access requires separate treatment of regulatory roles and dates. The European Commission identifies February xx.xx 2027 for mandatory passports in relevant battery categories and assigns accountability to the operator placing the finished battery on the market. [redacted]

Backup with Energy Management adds another access regime. [redacted] Infrastructure owners should confirm the participant role and compatibility with their telecom continuity contract before committing assets; service-provider support is an alternative to direct entry, not a waiver of eligibility.

Intellectual-property rights remain offering-specific. [redacted] Entrants must verify applicable product and jurisdiction rights separately from regulatory acceptance.

Sources & Evidence

1. EnerSys 2026 Proxy Statement and Annual Report
   · EnerSys reports numerous patents and licenses but does not consider any single patent material to its business; this does not establish product-specific freedom to operate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
2. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   · Ofcom's June xx.xx 2026 guidance explains statutory resilience duties and retains communications-provider responsibility for network portions operated by third parties. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
3. How to participate in the reserve markets | Fingrid
   · Fingrid requires owner permission where applicable, reserve-product agreements, and specified settlement arrangements; service-provider assistance does not remove these participation conditions. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
4. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies
   · The CPUC's July xx.xx 2020 action required xx.xx-hour backup power for minimum service and coverage in Tier xx.xx and Tier xx.xx High Fire Threat Districts, alongside broader resilience planning. ([docs.cpuc.ca.gov](https://docs.cpuc.ca.gov/PublishedDocs/Published/G000/M343/K979/xx.xx.PDF))
5. Digital Product Passport for Batteries | European Commission
   · The Commission identifies February xx.xx 2027 for mandatory passports in relevant battery categories and assigns responsibility to the operator placing the finished battery on the EU market. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/single-market/digital-product-passport/batteries_en))
6. Simplification: Council adopts law to stop the clock on due diligence rules for batteries
   · The Council's July xx.xx 2025 announcement postponed relevant battery due-diligence obligations until August xx.xx 2027, separately from passport obligations. ([consilium.europa.eu](https://www.consilium.europa.eu/en/press/press-releases/2025/xx.xx/xx.xx/simplification-council-adopts-law-to-stop-the-clock-on-due-diligence-rules-for-batteries/))

5.7. ESG & Sustainability Analysis

For tower-based backup, environmental purchasing depends on attributable site information across organizational boundaries. MTN's April 2025 American Tower case describes storage and renewable-energy initiatives together with improved site-level emissions visibility. ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■

End-of-life accountability creates a separate purchasing choice. ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■ Asset owners must still confirm territorial coverage, accepted chemistry, documentation, and who

owns the waste-management obligation; the described service does not establish equivalent treatment for every included Battery Technology.

Supplier governance also affects continuing access. Verizon expects environmental management, assessment of subcontractor supply chains, and tracking of waste managed on its behalf. [illegible]

Sources & Evidence

1. Verizon Supplier Code of Conduct
   · Verizon expects environmental management, subcontractor supply-chain assessment, and tracking and reporting of waste managed on its behalf. ([verizon.com](https://www.verizon.com/about/our-company/how-we-lead/policies/supplier-code-of-conduct))
2. Recycling | EnerSys
   · EnerSys identifies Americas availability for spent lead-acid collection regardless of manufacturer, with recycling certificates. This does not establish equivalent coverage for every chemistry or territory. ([enersys.com](https://www.enersys.com/en-gb/products/services/after-market-services/recycling/))
3. Strategic approach to network and supply emissions: building a sustainable network with ATC
   · MTN's April xx.xx 2025 case describes its American Tower collaboration on storage, renewable energy, and improved site-level emissions information; it does not establish comparative battery lifecycle superiority. ([mtn.com](https://www.mtn.com/case-study/strategic-approach-to-network-and-supply-emissions-building-a-sustainable-network-with-atc/))

5.8. Disruption & Risk Scenarios

[illegible] Buyers should preserve accepted temporary-support options while obtaining comparable permanent bids; Aggreko provides an advertised bridging route. Alternative resilience arrangements may satisfy the obligation, so a battery-only purchase should not be assumed necessary.

A revised tower-power agreement could move the purchasing budget and maintenance responsibility away from an established sales account. [illegible] An unchanged tower-access relationship is insufficient evidence that the power relationship also remains unchanged.

Failure to establish applicable EU passport accountability before relevant deliveries from February xx.xx 2027 could disrupt a seller's market-access plan. [illegible] This scenario does not assert that any named supplier is noncompliant.

[illegible] Contracts should define an orderly route to dedicated backup use or another accepted service arrangement, including outstanding obligations. The principal uncertainty is customer-specific allocation and realized economics, not evidence that the reported Finnish implementation has failed.

Sources & Evidence

1. Gridle Telco Solutions
   · Continuing optimization and trading create an additional service relationship. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
2. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   · Power, access, fuel, and interconnection are distinct continuity dependencies. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
3. How to participate in the reserve markets | Fingrid
   · Participation obligations persist independently of the software relationship. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
4. IHS Holding Limited First-Quarter 2026 Financial Statements
   · The South African power-service unwind changed IHS's fulfillment responsibility. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
5. Telecommunications | Aggreko US
   · The offering supports consideration of temporary bridging, not assumed local availability. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))
6. Digital Product Passport for Batteries | European Commission
   · Component documentation does not automatically discharge finished-battery passport accountability. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/single-market/digital-product-passport/batteries_en))

5.9. Return on Investment & Cost-Benefit Analysis

For an existing network asset owner, the relevant investment comparison is the least extensive accepted purchase that fulfills the same continuity obligation. ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ Eligible Americas lead-acid owners can also compare independent takeback with bundled lifecycle support, preserving sourcing choice while accepting additional coordination.

▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Its attractiveness depends on the local service boundary, remedies, counterparty continuity, and exit terms. Buyers should compare retained responsibilities across the alternatives before accepting recurring commitments; an apparently comprehensive package is unsuitable when critical obligations remain excluded.

For a tower owner, energy flexibility is an optional incremental commercial relationship rather than a justification for continuity investment by itself. Supplementary income must be assessed against software or service commitments, participation administration, settlement responsibilities, oversight, and any agreed additional maintenance exposure. ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Vertiv NetSure M Series
   - The configurable package provides a broader purchasing alternative; final battery inclusion requires an explicit quotation. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
2. Gridle Telco Solutions
   - The advertised commercial role supports examining supplementary income; promotional returns are not adopted. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
3. DC Power Services | Vertiv
   - Vertiv explicitly presents upgrading versus replacing a DC plant as a cost-benefit choice. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))

4. How to participate in the reserve markets | Fingrid
   · Market roles introduce agreements and settlement responsibilities. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
5. IHS Holding Limited First-Quarter 2026 Financial Statements
   · Required maintenance supports contractual continuity, not demonstrated investment returns. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

   · Rental establishes a different commitment period from permanent equipment ownership. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))
8. EnerSys Delaware Inc. Terms and Conditions for the Purchase of Services
   · The July xx.xx 2025 terms exclude specified consequential losses; contracting service does not establish complete outage-risk transfer. ([terms.enersys.com](https://terms.enersys.com/pdfs/en/Service/Service.pdf))
9. Solar & Battery as a Service - IPT Website
   · Ownership and upkeep can be assigned to the provider under the advertised service. ([iptpowertech.com](https://iptpowertech.com/solutions/solar-battery-as-a-service))

6. Cumulative Impact of Artificial Intelligence 2026

AI has a documented commercial role in Backup with Energy Management, rather than merely a hypothetical application. Elisa Industriq's June 2025 announcement reports DNA Tower Finland's connection of base-station batteries to Finnish reserve markets using its AI-based Distributed Energy Storage solution. ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■

Implementation requires commercial rights as well as software integration. Fingrid's owner-permission and market-agreement conditions remain relevant to the Finnish example. ■■■■■■■ ■■■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■

■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ This implies coordination among network, energy-market, and governance personnel, not demonstrated headcount replacement. Policy publication alone does not prove that these safeguards are implemented in an individual customer arrangement.

Sources & Evidence

1. Gridle Telco Solutions
   · Gridle describes AI-supported monitoring, forecasting, aggregation, and electricity-market trading for telecom backup batteries; supplier descriptions do not independently establish customer outcomes. ([elisaindustriq.com](https://www.elisaindustriq.com/gridle/telecom-energy-management-solutions))
2. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   · Ofcom identifies potential significant outages from failures in machine-learning software or logic affecting networks and services. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
3. How to participate in the reserve markets | Fingrid
   · Finnish reserve-market eligibility depends on asset permissions and contractual market roles rather than possession of optimization software alone. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

4. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES

   · Elisa Industriq's June 2025 announcement reports DNA Tower Finland's connection of base-station batteries to Finnish reserve markets using its AI-based Distributed Energy Storage solution. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

5. Elisa's Ethical Principles for Data and Artificial Intelligence, 2021

   · Elisa's published 2021 Data and AI principles retain human accountability and address intended data use, protection, security, and auditability; policy publication does not establish individual-contract implementation. ([static.elisa.com](https://static.elisa.com/v2/image/2tqybbhjs47b/3NlAhU5S11vQxTe4vKgLqH/2021%20ELISA%20Ethical%20principles%20for%20Data%20and%20AI.pdf?w=xx.xx))

7. Telecom Battery Backup System Market, by Offering

[illegible] EnerSys lists PowerSafe SBS as a telecom battery offering, while Vertiv's NetSure M Series combines an enclosure proposition with DC power and battery options. A system quotation should therefore identify its included equipment and acceptance obligations; the presence of battery options does not establish that every configured package includes them.

Existing infrastructure can favor a narrower purchase. Vertiv offers cross-manufacturer DC power projects and describes upgrades as alternatives to replacing an entire plant. [illegible] Buyers should separate the equipment purchase from ongoing fulfillment obligations. Suppliers bidding either offering class should make these exclusions explicit rather than imply that a broader hardware package necessarily transfers maintenance or end-of-life responsibility.

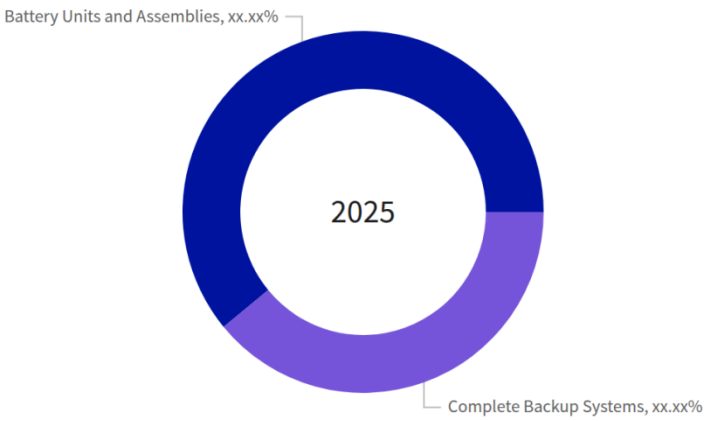

Figure 9. Global Telecom Battery Backup System Market, by Offering, 2032 (USD Million)

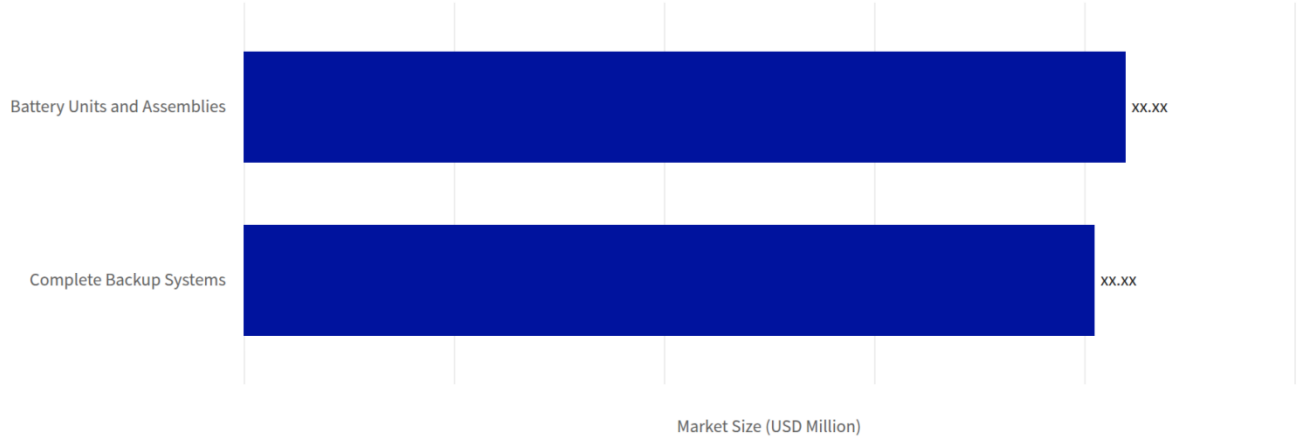

Table 4. Global Telecom Battery Backup System Market, by Offering growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Battery Units and Assemblies	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Complete Backup Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 5. Global Telecom Battery Backup System Market Size, by Offering, 2017-2032 (USD Million)

Offering	2023	2024	2025	2026	2027	2032	CAGR (%)
Battery Units and Assemblies	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Complete Backup Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys

   · EnerSys lists PowerSafe SBS batteries for telecom applications, establishing a named battery offering distinct from a broader configured infrastructure package. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.

2. Vertiv NetSure M Series
   - Vertiv describes NetSure M Series as an outdoor enclosure proposition paired with DC power and battery options; the description does not establish each customer's final bundle. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.
3. DC Power Services | Vertiv
   - Vertiv offers cross-manufacturer DC power projects and describes upgrades as alternatives to replacing an entire plant. The resulting replacement-versus-system choice remains conditional on continuing support. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
4. Battery Backup | Meriwether Lewis Electric Cooperative
   - MLConnect describes the backup device as a purchased product and assigns battery acquisition, replacement, and disposal responsibility to the customer. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The provider separately offers purchased backup devices and replacement batteries, supporting distinct finished-hardware deliverables. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The connectivity provider identifies purchased backup equipment and separately purchasable replacement batteries, corroborating distinct finished-hardware deliverables. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
5. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
6. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

7. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
14. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

7.1. Battery Units and Assemblies

Table 6. Global Telecom Battery Backup System Market Size, by Battery Units and Assemblies, by Region, 2017-2032 (USD Million)

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: Replacement batteries are separately purchasable. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Replacement batteries are separately offered for purchase rather than treated solely as inseparable elements of a new system. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
2. IEC 60896-22:2004 | IEC
   - Taxonomy evidence: The scope identifies stationary lead-acid cells and monobloc batteries for telecom applications, supporting finished battery deliverables. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The scope separately identifies stationary lead-acid cells and monobloc batteries used in telecom and UPS applications, supporting finished battery deliverables rather than only complete systems. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

3. ITU-T L.1397 (10/2025) - Battery system with integrated control and monitoring information model
   · Taxonomy evidence: The telecom recommendation recognizes battery cells, modules, strings, packs, and battery systems, including integrated control, without equating every battery assembly with a complete UPS. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
4. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

9. IHS Holding Limited - First-Quarter 2026 Financial Statements

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. PowerSafe SBS Batteries | EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named telecom batteries support the battery-unit offering boundary; allocation weights are assumed.

7.2. Complete Backup Systems

Table 9. Global Telecom Battery Backup System Market Size, by Complete Backup Systems, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 10. Global Telecom Battery Backup System Market Size, by Complete Backup Systems, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 11. Global Telecom Battery Backup System Market Size, by Complete Backup Systems, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: A purchased backup device protects the provider's ONT and gateway. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The provider offers a purchased battery-backup device protecting its optical network terminal and connectivity equipment. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
2. IEC 62040-3:2021 | IEC
   - Taxonomy evidence: The publication distinguishes complete UPS equipment from individual functional units and identifies continuity of load power as its principal function. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The standard identifies complete electronic UPS equipment whose principal function is continuity of load power. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

3. IEC 62040-5-3:2016 | IEC
   · Taxonomy evidence: The standard distinguishes a complete DC UPS from individual functional units and identifies continuity of DC load power as its principal function. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
4. TEC 66160:2024 - Hybrid (AC+DC) Uninterrupted Power Supply System
   · Taxonomy evidence: The official telecom classification recognizes a complete hybrid UPS supplying uninterrupted AC and DC power. Only attributable battery-backup hardware falls within this market's frozen perimeter. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))
5. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
6. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
7. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
    ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15. China Tower announces 2025 annual results - March 18, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

16. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

17. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
18. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

19. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
20. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
21. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
22. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
23. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
24. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

25. Vertiv NetSure M Series
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Configured enclosure, power and battery options support broader system classification, not universal bundle inclusion.

8. Telecom Battery Backup System Market, by Battery Technology

Battery Technology differentiates supplier screening and support commitments, not merely a chemistry label. EnerSys' central-office portfolio identifies Flooded Lead-Acid and Valve-Regulated Lead-Acid alternatives; ETSI describes Absorbent Glass Mat and Gel telecom examples, and EnerSys explicitly lists PowerSafe OPzV as a Gel offering for small cells, macro cells, and switching centers. ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■

■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ Encell positions its Fused Iron battery for telecom, while ZAF positions Nickel-Zinc for telecom and 5G. The latter supplier descriptions and the historical FDK launch warrant offering-specific inquiry, not an assumption of current local fulfillment. Buyers considering Nickel-Cadmium, Nickel-Metal Hydride, Nickel-Iron, or Nickel-Zinc should obtain a current named offering, accepted application, and accountable support commitment.

Sodium-Based and Metal-Air have supplier propositions beyond stationary-technology recognition. ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■ ■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ Buyers considering substitution should confirm the seller, protected telecom obligation, warranty allocation, and destination support before commitment.

Other evidence types require a different commitment threshold. ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ Buyers should obtain a dated offering and fulfillment commitment rather than infer commercial absence or readiness from these records.

Multi-Chemistry creates a separate accountability question. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ All included technologies remain in scope, regardless of the strength of evidence for an individual supplier or transaction.

Sources & Evidence

1. Telecom Lithium Batteries | Vertiv
   - Vertiv lists Telecom Lithium Batteries as a Lithium-Ion offering for telecom applications and provides a sales-contact route. The catalog does not establish customer-specific acceptance or destination fulfillment.
2. PowerSafe NiCd Batteries | EnerSys
   - EnerSys identifies PowerSafe NiCd as Nickel-Cadmium and lists central offices or switching centers and outside plant among its applications.

3. HORIEN Salt Battery Solutions and Inlyte Energy Announce a Strategic Partnership
   - HORIEN's March xx.xx 2025 company statement identifies sodium-metal-chloride storage and telecommunications backup as its own business proposition. The separate Inlyte memorandum is not treated as completed telecom commercialization.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))
4. HORIEN TL Range | Telecom Batteries | Alpine Power Systems
   - Alpine Power Systems lists HORIEN TL Range sodium-metal-chloride batteries for telecom base stations and core sites and provides a quotation route. This establishes Alpine's advertised channel proposition, not confirmed stock, manufacturer authorization, or customer acceptance.
5. Energy Backup | Phinergy
   - Phinergy markets Aluminum-Air backup systems and explicitly identifies telecom operators and tower companies as purchasing constituencies. Its portfolio does not independently establish comparative performance or another customer's acceptance.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))
6. Phinergy Ltd. Report for the First Half Ended June 30, 2026
   - Phinergy's first-half 2026 report discloses a March xx.xx 2026 agreement with Swisscom Broadcast AG and an initial purchase for demonstration. Further purchasing intentions are expressly nonbinding; the transaction does not establish broad end-customer rollout.
7. Central Office Power Systems | EnerSys
   - EnerSys' central-office portfolio identifies Flooded Lead-Acid, Valve-Regulated Lead-Acid, and Lithium-Ion alternatives. Portfolio inclusion does not establish interchangeable customer acceptance.
8. ETSI TS 103 553-2 V1.1.1 - Innovative Energy Storage Technology for Stationary Use; Part 2: Battery
   - ETSI TS xx.xx xx.xx-xx.xx published in November 2021, discusses Lithium-Metal within its stationary-battery overview and includes Absorbent Glass Mat and Gel telecom examples. These classification and application examples do not establish a current supplier delivery commitment.
   - Taxonomy evidence: The stationary-battery overview recognizes lead, nickel, lithium, sodium, metal-air, and flow technologies; it is not a census of commercial telecom sales. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The stationary technology overview distinguishes lead, nickel, lithium-ion, sodium, metal-air, and flow technologies; it does not establish an exhaustive commercial market partition. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
9. PowerSafe OPzV Batteries | EnerSys
   - EnerSys lists Gel as the PowerSafe OPzV chemistry and identifies small cells, macro cells, and central offices or switching centers among its applications.

10. FDK Ni-MH Battery Is Chosen for the Cellect 600 Product of Alpha Technologies
    - FDK's October xx.xx 2015 announcement identifies its Nickel-Metal Hydride battery in Alpha Technologies' Cellect xx.xx small-cell power supply. The historical announcement does not establish current destination-specific fulfillment.
11. Products | Encell Technology
    - Encell's product page identifies its Fused Iron Nickel-Iron battery and includes telecom among its intended applications. Undated supplier positioning does not establish a current customer-specific fulfillment commitment.
12. Telecom/5G | ZAF Energy Systems
    - ZAF positions Nickel-Zinc for telecom and 5G applications. Its supplier description does not establish a dated local delivery or support commitment.
13. Australian Flow Batteries - RFB40X Series
    - Australian Flow Batteries identifies RFB40X as a vanadium flow series for stationary applications including telecom. The product literature does not establish a customer's current telecom-backup contract or local fulfillment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))
14. ITU-T Work Programme - Aqueous Zinc-Based Battery Systems for Base Station Applications
    - ITU's Aqueous Zinc-Based Battery Systems for Base Station Applications work item has Under study status and December 2027 timing. This establishes standards-development status, not an approved recommendation or a customer procurement commitment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aqueous-zinc base-station work item is Under study with December 2027 timing. It constrains the forecast commercialization assumption but establishes neither approval nor customer purchases. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))
15. ITU-T L.1397 - Battery System with Integrated Control and Monitoring Information Model
    - ITU-T L.xx.xx approved on October xx.xx 2025, names hybrid lithium-lead, lithium-sodium, and sodium-lead combinations in its information model. Category recognition does not identify a currently available supplier package or assign contractual accountability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
16. China Tower - 2025 Annual Results, March 18, 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

17. Broadband Commission - The State of Broadband: Our Digital World, 2025

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

18. Battery Backup - Meriwether Lewis Electric Cooperative

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

19. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

20. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

21. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

22. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

23. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
24. Ofcom - Your Landline Is Going Digital: What You Need to Know
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
25. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
26. Fingrid - How to Participate in the Reserve Markets
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

27. Shuangdeng Group Co., Ltd. - Global Offering Prospectus, August 18, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
28. Amara Raja Crosses 1 GWh Lithium Storage Deployment Powering India's Telecom Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
29. PowerReserve - Verizon Residential Accessories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
30. Alkaline Manganese Dioxide Handbook and Application Manual - Energizer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))

8.1. Lead-Acid

Table 14. Global Telecom Battery Backup System Market, by Lead-Acid growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Flooded Lead-Acid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Valve-Regulated Lead-Acid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**N/A**	**xx.xx**

Table 15. Global Telecom Battery Backup System Market Size, by Lead-Acid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 16. Global Telecom Battery Backup System Market Size, by Lead-Acid, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IEC 60896-22:2004 | IEC
   - Taxonomy evidence: Stationary lead-acid is explicitly recognized for telecom and UPS applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The standard establishes a stationary lead-acid battery category with explicit telecom applicability. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
2. IEC 60896-11:2002 | IEC
   - Taxonomy evidence: The stationary lead-acid classification separately identifies vented construction, supporting separation from valve-regulated products. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
   ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
11. Ofcom - Your Landline Is Going Digital: What You Need to Know
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
13. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Shuangdeng Group Co., Ltd. - Global Offering Prospectus, August 18, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's own five-month 2025 lead-acid realization of RMB520.xx.xx/kWh constrains the relative-price bridge; syndicated industry claims are excluded. Forecast convergence remains assumed. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))
25. Central Office Power Systems - EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The central-office portfolio identifies Flooded Lead-Acid as a distinct telecom alternative, supporting the legacy-network category mapping but not its purchasing fraction. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The central-office portfolio identifies Flooded Lead-Acid as a distinct telecom alternative, supporting the legacy-network category mapping but not its purchasing fraction. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies Valve-Regulated Lead-Acid, supporting the within-lead construction boundary used by the model. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies Valve-Regulated Lead-Acid, supporting the within-lead construction boundary used by the model. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))

8.1.1. Valve-Regulated Lead-Acid

Table 18. Global Telecom Battery Backup System Market, by Valve-Regulated Lead-Acid growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Absorbent Glass Mat	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Gel	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**N/A**	**xx.xx**

Table 19. Global Telecom Battery Backup System Market Size, by Valve-Regulated Lead-Acid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 21. Global Telecom Battery Backup System Market Size, by Valve-Regulated Lead-Acid, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IEC 60896-22:2004 | IEC

   · Taxonomy evidence: The publication specifically covers valve-regulated stationary lead-acid construction. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

   · Taxonomy evidence: Its scope is specifically valve-regulated stationary lead-acid batteries, distinguishing this construction category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

2. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Central Office Power Systems - EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies Valve-Regulated Lead-Acid, supporting the within-lead construction boundary used by the model. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies Valve-Regulated Lead-Acid, supporting the within-lead construction boundary used by the model. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
24. PowerSafe OPzV Batteries - EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnerSys identifies OPzV as Gel and lists telecom applications. This supports commercial subtype mapping, not the assumed Gel/AGM volume or price mix. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-opzv/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnerSys identifies OPzV as Gel and lists telecom applications. This supports commercial subtype mapping, not the assumed Gel/AGM volume or price mix. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-opzv/))

8.1.1.1. Absorbent Glass Mat

Table 22. Global Telecom Battery Backup System Market Size, by Absorbent Glass Mat, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 23. Global Telecom Battery Backup System Market Size, by Absorbent Glass Mat, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 24. Global Telecom Battery Backup System Market Size, by Absorbent Glass Mat, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   - Taxonomy evidence: The telecom/ICT implementation examples identify AGM valve-regulated backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The telecom implementation examples explicitly identify AGM VRLA backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

8.1.1.2. Gel

Table 25. Global Telecom Battery Backup System Market Size, by Gel, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   - Taxonomy evidence: The implementation examples separately identify gel backup batteries at telecom/ICT sites. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The telecom implementation examples separately identify gel stationary backup batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. PowerSafe OPzV Batteries - EnerSys

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnerSys identifies OPzV as Gel and lists telecom applications. This supports commercial subtype mapping, not the assumed Gel/AGM volume or price mix. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-opzv/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnerSys identifies OPzV as Gel and lists telecom applications. This supports commercial subtype mapping, not the assumed Gel/AGM volume or price mix. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-opzv/))

8.1.2. Flooded Lead-Acid

Table 28. Global Telecom Battery Backup System Market Size, by Flooded Lead-Acid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 29. Global Telecom Battery Backup System Market Size, by Flooded Lead-Acid, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IEC 60896-11:2002 | IEC
   - Taxonomy evidence: The publication's scope is restricted to vented stationary lead-acid batteries; it does not establish telecom sales volumes. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The stationary lead-acid classification separately covers vented types, providing the category basis for flooded stationary batteries. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.

18. Australian Government - Mobile Network Hardening Program
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.

19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.

20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.

21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.

22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Central Office Power Systems - EnerSys

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The central-office portfolio identifies Flooded Lead-Acid as a distinct telecom alternative, supporting the legacy-network category mapping but not its purchasing fraction. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The central-office portfolio identifies Flooded Lead-Acid as a distinct telecom alternative, supporting the legacy-network category mapping but not its purchasing fraction. ([enersys.com](https://www.enersys.com/en/industries/communications-networks/central-office/))

8.2. Lithium-Based

Table 31. Global Telecom Battery Backup System Market, by Lithium-Based growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Lithium-Ion	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Lithium-Metal	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 32. Global Telecom Battery Backup System Market Size, by Lithium-Based, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IEC 62619:2022 | IEC
   - Taxonomy evidence: The industrial secondary-lithium scope expressly includes stationary telecom and UPS applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The international industrial secondary-lithium classification explicitly includes telecom and UPS stationary applications. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Shuangdeng Group Co., Ltd. - Global Offering Prospectus, August 18, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own lithium-ion realization of RMB595.xx.xx/kWh is an input to the Lithium-Based value model, not a Global share or a Lithium-Metal sales observation. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2025/xx.xx/xx.xx.pdf))

24. Amara Raja Crosses 1 GWh Lithium Storage Deployment Powering India's Telecom Networks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2026 disclosure reports approximately xx.xx GWh across xx.xx cumulative telecom lithium sites over four years. This is a commercial adoption scale check, not annual Global revenue or a supplier-share input. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed deployment identifies lithium-ion commercialization at scale, supporting the subtype's established commercial position without directly measuring its conditional Global share. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed deployment identifies lithium-ion commercialization at scale, supporting the subtype's established commercial position without directly measuring its conditional Global share. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))

25. Bolloré - 2017 Registration Document

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official filing identifies LMP professional outage-protection applications including telecom relays. This is a dated commercial boundary input, not evidence of 2025 telecom shipment value. ([bollore.com](https://www.bollore.com/wp-content/uploads/2018/xx.xx/bollore_ddr_2017_gb_bag-xx.xx-juin.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official filing identifies LMP professional outage-protection applications including telecom relays. This is a dated commercial boundary input, not evidence of 2025 telecom shipment value. ([bollore.com](https://www.bollore.com/wp-content/uploads/2018/xx.xx/bollore_ddr_2017_gb_bag-xx.xx-juin.pdf))

26. Bolloré - Business Report 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 report establishes continuing Lithium Metal Polymer commercial applications in electricity storage and buses, while omitting separately attributable telecom sales. It constrains the low-access expected-purchase model; no capacity-to-sales conversion is used. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 report establishes continuing Lithium Metal Polymer commercial applications in electricity storage and buses, while omitting separately attributable telecom sales. It constrains the low-access expected-purchase model; no capacity-to-sales conversion is used. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report preserves the distinction between LMP and conventional lithium-ion, supporting the exhaustive subtype attribution rule rather than treating polymer packaging as Lithium-Metal. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report preserves the distinction between LMP and conventional lithium-ion, supporting the exhaustive subtype attribution rule rather than treating polymer packaging as Lithium-Metal. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))

27. AT&T to Replace U-Verse Cabinet Batteries - Fierce Network, January 15, 2008

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2008 report corroborates AT&T's replacement of approximately xx.xx Avestor batteries after the supplier's closure. The obsolete stock is therefore not carried into the 2025 or 2032 purchasing numerator. ([fierce-network.com](https://www.fierce-network.com/telecom/at-t-to-replace-u-verse-cabinet-batteries))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2008 report corroborates AT&T's replacement of approximately xx.xx Avestor batteries after the supplier's closure. The obsolete stock is therefore not carried into the 2025 or 2032 purchasing numerator. ([fierce-network.com](https://www.fierce-network.com/telecom/at-t-to-replace-u-verse-cabinet-batteries))

8.2.1. Lithium-Ion

Table 35. Global Telecom Battery Backup System Market Size, by Lithium-Ion, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 36. Global Telecom Battery Backup System Market Size, by Lithium-Ion, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IEC 62619:2022 | IEC

   · Taxonomy evidence: The secondary-lithium category supports telecom applicability, not worldwide sales or electrode-subtype allocation. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

   · Taxonomy evidence: The scope establishes industrial secondary lithium batteries as relevant to stationary telecom backup; it does not establish worldwide sales or subtype shares. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

2. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Amara Raja Crosses 1 GWh Lithium Storage Deployment Powering India's Telecom Networks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed deployment identifies lithium-ion commercialization at scale, supporting the subtype's established commercial position without directly measuring its conditional Global share. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed deployment identifies lithium-ion commercialization at scale, supporting the subtype's established commercial position without directly measuring its conditional Global share. ([amararaja.com](https://amararaja.com/press_release/amara-raja-crosses-xx.xx-gwh-lithium-storage-deployment-powering-indias-telecom-networks/))
24. Bolloré - Business Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report preserves the distinction between LMP and conventional lithium-ion, supporting the exhaustive subtype attribution rule rather than treating polymer packaging as Lithium-Metal. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report preserves the distinction between LMP and conventional lithium-ion, supporting the exhaustive subtype attribution rule rather than treating polymer packaging as Lithium-Metal. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))

8.2.2. Lithium-Metal

Table 38. Global Telecom Battery Backup System Market Size, by Lithium-Metal, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 39. Global Telecom Battery Backup System Market Size, by Lithium-Metal, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 40. Global Telecom Battery Backup System Market Size, by Lithium-Metal, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TR 102 532 V1.1.1 (2009-06) - The use of alternative energy solutions in telecommunications installations

   · Taxonomy evidence: The historical telecommunications energy-storage overview separately identifies lithium-metal-polymer batteries; current telecom commercialization is not established. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))

2. ITU-T L.1221 (11/2018) - Innovative energy storage technology for stationary use: Battery

   · Taxonomy evidence: The stationary-battery classification distinguishes lithium-metal cells from lithium-ion electrode variants, supporting a family-level distinction rather than overlapping electrode-label siblings. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Bolloré - 2017 Registration Document

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official filing identifies LMP professional outage-protection applications including telecom relays. This is a dated commercial boundary input, not evidence of 2025 telecom shipment value. ([bollore.com](https://www.bollore.com/wp-content/uploads/2018/xx.xx/bollore_ddr_2017_gb_bag-xx.xx-juin.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official filing identifies LMP professional outage-protection applications including telecom relays. This is a dated commercial boundary input, not evidence of 2025 telecom shipment value. ([bollore.com](https://www.bollore.com/wp-content/uploads/2018/xx.xx/bollore_ddr_2017_gb_bag-xx.xx-juin.pdf))

25. Bolloré - Business Report 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 report establishes continuing Lithium Metal Polymer commercial applications in electricity storage and buses, while omitting separately attributable telecom sales. It constrains the low-access expected-purchase model; no capacity-to-sales conversion is used. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 report establishes continuing Lithium Metal Polymer commercial applications in electricity storage and buses, while omitting separately attributable telecom sales. It constrains the low-access expected-purchase model; no capacity-to-sales conversion is used. ([bollore.com](https://www.bollore.com/wp-content/uploads/2026/xx.xx/0421a_boll25t40_rapport_activite_gb_2025_mel.pdf))

26. AT&T to Replace U-Verse Cabinet Batteries - Fierce Network, January 15, 2008

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2008 report corroborates AT&T's replacement of approximately xx.xx Avestor batteries after the supplier's closure. The obsolete stock is therefore not carried into the 2025 or 2032 purchasing numerator. ([fierce-network.com](https://www.fierce-network.com/telecom/at-t-to-replace-u-verse-cabinet-batteries))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2008 report corroborates AT&T's replacement of approximately xx.xx Avestor batteries after the supplier's closure. The obsolete stock is therefore not carried into the 2025 or 2032 purchasing numerator. ([fierce-network.com](https://www.fierce-network.com/telecom/at-t-to-replace-u-verse-cabinet-batteries))

8.3. Nickel-Based

Table 41. Global Telecom Battery Backup System Market, by Nickel-Based growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Nickel-Cadmium	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nickel-Iron	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nickel-Metal Hydride	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nickel-Zinc	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 42. Global Telecom Battery Backup System Market Size, by Nickel-Based, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 43. Global Telecom Battery Backup System Market Size, by Nickel-Based, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   - Taxonomy evidence: Nickel-cadmium, nickel-metal-hydride, nickel-iron, and nickel-zinc are grouped under nickel-based batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
   - Taxonomy evidence: The overview groups nickel-iron, nickel-cadmium, nickel-zinc, and nickel-metal-hydride technologies under nickel-based batteries. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. PowerSafe NiCd Batteries - EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnerSys identifies Nickel-Cadmium for central offices and outside plant, supporting the modeled legacy telecom cohort but not its installed attachment or replacement spending. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-nicd/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnerSys identifies Nickel-Cadmium for central offices and outside plant, supporting the modeled legacy telecom cohort but not its installed attachment or replacement spending. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-nicd/))
24. FDK Ni-MH Battery Is Chosen for the Cellect 600 Product of Alpha Technologies
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2015 announcement identifies NiMH in Alpha's Cellect xx.xx small-cell backup proposition. It supports a historical cohort rather than current fulfillment or assumed surviving stock. ([fdk.com](https://www.fdk.com/whatsnew-e/release20151019-e.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2015 announcement identifies NiMH in Alpha's Cellect xx.xx small-cell backup proposition. It supports a historical cohort rather than current fulfillment or assumed surviving stock. ([fdk.com](https://www.fdk.com/whatsnew-e/release20151019-e.html))
25. Products - Encell Technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Encell positions its Fused Iron Nickel-Iron battery for telecom. This supports the commercial category lead, while current purchases and attachment remain modeled. ([encell.com](https://encell.com/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Encell positions its Fused Iron Nickel-Iron battery for telecom. This supports the commercial category lead, while current purchases and attachment remain modeled. ([encell.com](https://encell.com/products/))
26. Telecom/5G - ZAF Energy Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ZAF positions Nickel-Zinc for telecom/5G. Its supplier proposition supports application mapping, not the modeled annual attachment or threefold forecast value multiplier. ([zafsys.com](https://zafsys.com/telecom-5g/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ZAF positions Nickel-Zinc for telecom/5G. Its supplier proposition supports application mapping, not the modeled annual attachment or threefold forecast value multiplier. ([zafsys.com](https://zafsys.com/telecom-5g/))

8.3.1. Nickel-Cadmium

Table 45. Global Telecom Battery Backup System Market Size, by Nickel-Cadmium, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   · Taxonomy evidence: Nickel-cadmium is a named stationary-battery chemistry; this does not establish current telecom purchases.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))

2. IEC 60623:2026 | IEC
   - Taxonomy evidence: The August xx.xx 2026 publication recognizes vented nickel-cadmium industrial cells and battery systems. It establishes construction/category identity, not 2025 telecom adoption. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The August xx.xx 2026 publication identifies vented nickel-cadmium industrial cells and battery systems as a distinct category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
3. IEC 60622:2026 | IEC
   - Taxonomy evidence: The September xx.xx 2026 publication separately recognizes sealed nickel-cadmium industrial construction; sealed and vented products remain within the retained chemistry category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
   - Taxonomy evidence: The September xx.xx 2026 publication separately recognizes sealed nickel-cadmium industrial cells and battery systems, supporting construction breadth within the same chemistry category. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))
4. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
7. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
14. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
15. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

16. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

17. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
18. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

19. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
20. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
21. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
22. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
23. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
24. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

25. PowerSafe NiCd Batteries - EnerSys
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnerSys identifies Nickel-Cadmium for central offices and outside plant, supporting the modeled legacy telecom cohort but not its installed attachment or replacement spending. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-nicd/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnerSys identifies Nickel-Cadmium for central offices and outside plant, supporting the modeled legacy telecom cohort but not its installed attachment or replacement spending. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-nicd/))

8.3.2. Nickel-Zinc

Table 48. Global Telecom Battery Backup System Market Size, by Nickel-Zinc, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   · Taxonomy evidence: Nickel-zinc is explicitly placed in the nickel-based family. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. ETSI TR 102 532 V1.1.1 (2009-06) - The use of alternative energy solutions in telecommunications installations
   · Taxonomy evidence: Nickel-zinc batteries appear as a separate named technology; the historical discussion does not establish present telecom deployment. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))
3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Telecom/5G - ZAF Energy Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ZAF positions Nickel-Zinc for telecom/5G. Its supplier proposition supports application mapping, not the modeled annual attachment or threefold forecast value multiplier. ([zafsys.com](https://zafsys.com/telecom-5g/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ZAF positions Nickel-Zinc for telecom/5G. Its supplier proposition supports application mapping, not the modeled annual attachment or threefold forecast value multiplier. ([zafsys.com](https://zafsys.com/telecom-5g/))

8.3.3. Nickel-Metal Hydride

Table 51. Global Telecom Battery Backup System Market Size, by Nickel-Metal Hydride, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. FDK Ni-MH Battery Is Chosen for the Cellect 600 Product of Alpha Technologies

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2015 announcement identifies NiMH in Alpha's Cellect xx.xx small-cell backup proposition. It supports a historical cohort rather than current fulfillment or assumed surviving stock. ([fdk.com](https://www.fdk.com/whatsnew-e/release20151019-e.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2015 announcement identifies NiMH in Alpha's Cellect xx.xx small-cell backup proposition. It supports a historical cohort rather than current fulfillment or assumed surviving stock. ([fdk.com](https://www.fdk.com/whatsnew-e/release20151019-e.html))

8.3.4. Nickel-Iron

Table 54. Global Telecom Battery Backup System Market Size, by Nickel-Iron, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 55. Global Telecom Battery Backup System Market Size, by Nickel-Iron, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   - Taxonomy evidence: Nickel-iron is separately named, without proof of current telecom commercialization. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. ETSI TR 102 532 V1.1.1 (2009-06) - The use of alternative energy solutions in telecommunications installations
   - Taxonomy evidence: Nickel-iron batteries appear as a distinct named technology in the telecommunications energy-storage overview. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102500_102599/xx.xx/xx.xx.01_60/tr_102532v010101p.pdf))
3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.

19. Australian Government - Mobile Network Hardening Program
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.

20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.

21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.

22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.

23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Products - Encell Technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Encell positions its Fused Iron Nickel-Iron battery for telecom. This supports the commercial category lead, while current purchases and attachment remain modeled. ([encell.com](https://encell.com/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Encell positions its Fused Iron Nickel-Iron battery for telecom. This supports the commercial category lead, while current purchases and attachment remain modeled. ([encell.com](https://encell.com/products/))

8.4. Multi-Chemistry

Table 57. Global Telecom Battery Backup System Market Size, by Multi-Chemistry, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T L.1397 (10/2025) - Battery system with integrated control and monitoring information model

   · Taxonomy evidence: The October 2025 telecom recommendation expressly names hybrid lithium-lead, lithium-sodium, and sodium-lead battery modes. It does not establish inseparable transaction pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

   · Taxonomy evidence: The recommendation expressly identifies lithium-lead, lithium-sodium, and sodium-lead battery combinations. It does not establish their global prevalence or transaction pricing. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October 2025 recommendation names lithium-lead, lithium-sodium and sodium-lead combinations. This supports mixed-family classification, not inseparable pricing or Global prevalence. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

8.5. Sodium-Based

Table 60. Global Telecom Battery Backup System Market Size, by Sodium-Based, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IEC 62984-3:2020 | IEC

   · Taxonomy evidence: The official publication identifies sodium-based stationary batteries as a distinct classification. Its scope does not establish attributable telecom-backup sales. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

   · Taxonomy evidence: The international sodium-based stationary-battery classification includes sodium-sulfur and sodium-nickel chloride; application-specific telecom sales are not established by this scope. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

2. ITU-T L.1221 (11/2018) - Innovative energy storage technology for stationary use: Battery

   · Taxonomy evidence: The classification discusses sodium battery technologies within stationary storage, while distinguishing technological possibilities from established applications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. HORIEN Salt Battery Solutions and Inlyte Energy Announce a Strategic Partnership
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HORIEN's March xx.xx 2025 statement identifies sodium-metal-chloride telecom backup. Its separate partnership announcement is not counted as delivered telecom sales. ([horien.com](https://horien.com/wp-content/uploads/2025/xx.xx/Press-Release_HORIEN-Inlyte-International-Version.pdf))

8.6. Aqueous Zinc-Based

Table 63. Global Telecom Battery Backup System Market Size, by Aqueous Zinc-Based, by Region, 2017-2032 (USD Million)

Sources & Evidence

1. ITU-T Work Programme - Aqueous Zinc-Based Battery Systems for Base Station Applications

   · Taxonomy evidence: The inspected official work item names Aqueous Zinc-Based Battery Systems for Base Station Applications, lists its status as Under study, and gives December 2027 timing. Approval and commercial deployment are not established. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))

   · Taxonomy evidence: The official work programme names aqueous zinc-based battery systems for base-station applications. Its status is under study, with a December 2027 target; neither approval nor marketed deployment is established. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The aqueous-zinc base-station work item is Under study with December 2027 timing. It constrains the forecast commercialization assumption but establishes neither approval nor customer purchases. ([itu.int](https://www.itu.int/itu-t/workprog/wp_item.aspx?isn=xx.xx))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. PowerReserve - Verizon Residential Accessories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Verizon advertises an alkaline-cell voice-backup device at USD39.xx.xx excluding batteries. This supports a qualifying primary-zinc premises route and price comparator, not assumed Global attachment or first-sale realization. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
24. Alkaline Manganese Dioxide Handbook and Application Manual - Energizer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's alkaline manganese-dioxide classification supports the zinc-family mapping for qualifying premises backup. It provides no telecom purchasing weight. ([data.energizer.com](https://data.energizer.com/pdfs/alkaline_appman.pdf))

8.7. Flow Batteries

Table 66. Global Telecom Battery Backup System Market Size, by Flow Batteries, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 67. Global Telecom Battery Backup System Market Size, by Flow Batteries, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   · Taxonomy evidence: Flow batteries are separately recognized; qualifying telecom transactions remain unestablished by this classification.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. ITU-T L.1221 (11/2018) - Innovative energy storage technology for stationary use: Battery
   · Taxonomy evidence: Flow batteries are separately recognized in the stationary technology overview, rather than classified solely by their constituent metals.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
3. Vodafone Sustainability Framework 2021
   · Taxonomy evidence: Vodafone's 2021 financing framework names flow batteries among network-energy storage project technologies. This is demand-side category recognition, not proof of completed purchases or an exclusively backup-related revenue perimeter.
   ([vodafone.com](https://www.vodafone.com/~/media/Files/V/vodafone/corp/documents/debt-investor/vodafone-sustainability-framework.pdf))

4. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue.
   ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions.
   ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
7. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
   ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
   ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
10. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
16. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

17. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
18. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

19. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
20. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
21. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
22. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
23. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
24. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

25. Australian Flow Batteries - RFB40X Series

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RFB40X literature identifies telecom among stationary commercial applications. It supports the qualifying project boundary, not delivered projects, revenue or assumed attachment. ([afb.energy](https://www.afb.energy/wp-content/uploads/2025/xx.xx/Australian-Flow-Batteries-RFB40X-Series-2024.pdf))

8.8. Metal-Air

Table 69. Global Telecom Battery Backup System Market Size, by Metal-Air, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 103 553-2 V1.1.1 (2021-11) - Innovative energy storage technology for stationary use; Part 2: Battery
   · Taxonomy evidence: Metal-air is recognized as a stationary technology grouping rather than merely a constituent-metal label.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/103500_103599/xx.xx/xx.xx.01_60/ts_10355302v010101p.pdf))
2. ITU-T L.1221 (11/2018) - Innovative energy storage technology for stationary use: Battery
   · Taxonomy evidence: Metal-air is a recognized stationary-battery technology grouping, with zinc and aluminum among its named variants; this is not proof of current commercial telecom adoption.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-L.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Energy Backup - Phinergy

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phinergy markets Aluminum-Air continuity offerings to telecom operators and tower companies. The source supports category and buyer mapping, not the modeled installed attachment or replacement numerator. ([phinergy.com](https://phinergy.com/solutions/energy-backup/))

9. Telecom Battery Backup System Market, by Power Interface

Power Interface determines which protected equipment a backup proposition can commercially serve. ETSI publishes separate AC and DC equipment-interface standards, locating compatibility at the boundary between the power supply and the consuming ICT equipment. ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■ ■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■

Combined AC/DC Output can consolidate a mixed-load purchase. ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ Suppliers should identify which outputs receive backup within the quoted package and who accepts responsibility for both.

■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ Separate AC Output and DC Output purchases preserve independent supplier selection but leave the buyer or integrator responsible for their respective boundaries. The decision should change when the protected-equipment mix changes, or when the proposed common package cannot carry an enforceable commitment for both outputs.

Figure 12. Global Telecom Battery Backup System Market Size, by Power Interface, 2025 (%)

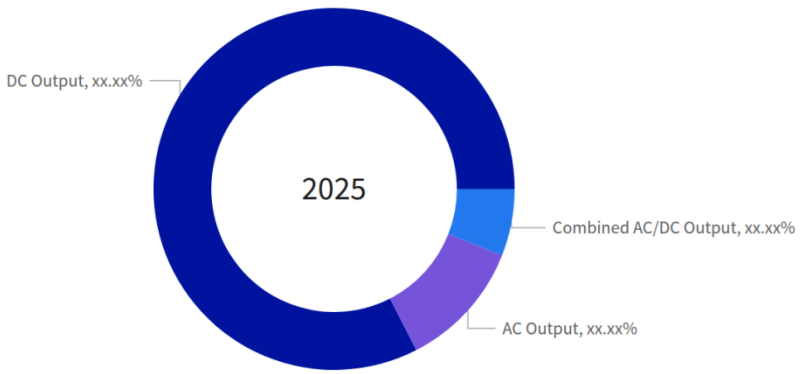

Figure 13. Global Telecom Battery Backup System Market, by Power Interface, 2032 (USD Million)

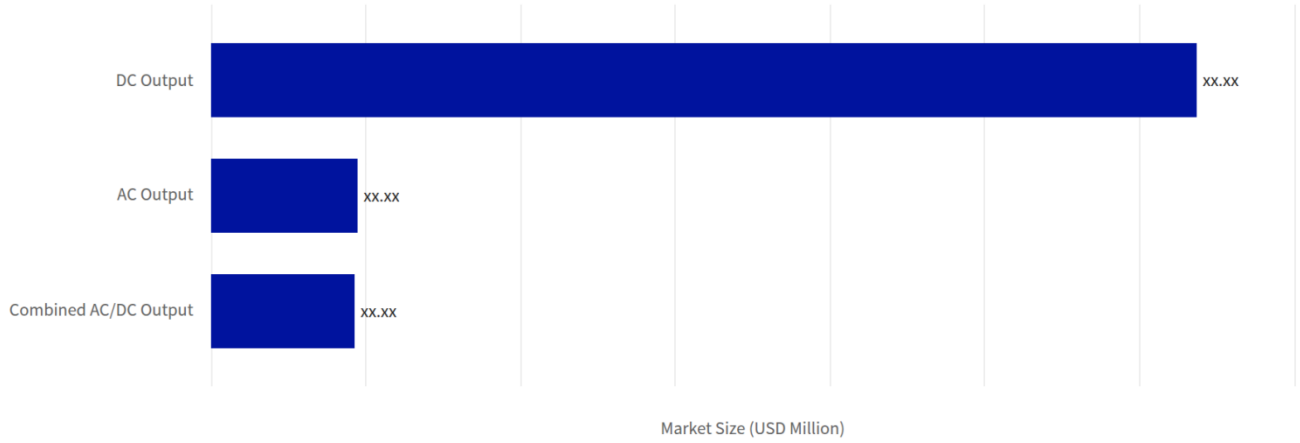

Table 72. Global Telecom Battery Backup System Market, by Power Interface growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
AC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Combined AC/DC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
DC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 73. Global Telecom Battery Backup System Market Size, by Power Interface, 2017-2032 (USD Million)

Power Interface	2023	2024	2025	2026	2027	2032	CAGR (%)
AC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Combined AC/DC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
DC Output	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ETSI EN 300 132-1 V2.2.1 - ICT Power Supply Interface: Alternating Current
   - ETSI's AC interface standard locates compatibility between power-supply equipment and consuming ICT equipment at the AC interface. Only interface scope is used. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   - Taxonomy evidence: The AC interface classification is distinct from the separately published DC interface category; neither determines battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   - Taxonomy evidence: The standards series distinguishes AC and DC equipment interfaces, corroborating classification by load-side electrical compatibility rather than battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
2. ETSI EN 300 132-2 V2.8.1 - ICT Power Supply Interface: Direct Current
   - ETSI's DC interface standard locates the interface between the power-supply system and consuming ICT equipment and identifies DC backup in that system. Only the commercial compatibility boundary is used. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
3. Vertiv NetSure Inverter Series - Converged AC and DC Power System
   - Vertiv describes NetSure Inverter Series as supporting AC and DC loads with a common battery bank and single management interface. This supports a named combined-output proposition, not every customer's contracted configuration. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
4. Telecommunication Engineering Centre - Standards/Specifications, TEC 66160:2024 entry
   - Taxonomy evidence: The telecom catalog recognizes a hybrid AC/DC continuity-equipment category alongside single-current interface classifications; its national listing is not a worldwide mandate. ([tec.gov.in](https://tec.gov.in/standards-specifications))

5. TEC 66160:2024 - Hybrid (AC+DC) Uninterrupted Power Supply System
   · Taxonomy evidence: The record supplies a telecom-specific combined-output classification basis; its national requirements are not treated as worldwide mandates. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))
6. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
7. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
8. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
9. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
10. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
11. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
12. IHS Holding Limited - First-Quarter 2026 Financial Statements
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

13. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
14. Ofcom - Your Landline Is Going Digital: What You Need to Know
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
15. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
16. Fingrid - How to Participate in the Reserve Markets
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

9.1. DC Output

Table 74. Global Telecom Battery Backup System Market Size, by DC Output, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 75. Global Telecom Battery Backup System Market Size, by DC Output, by Group, 2017-2032 (USD Million)

Sources & Evidence

1. ETSI EN 300 132-2 V2.8.1 (2024-10) - ICT power supply interface: Direct Current

   · Taxonomy evidence: The ICT interface standard identifies the established DC equipment-input interface. For this taxonomy, backup output follows the documented protected-load interface rather than battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_EN/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))

   · Taxonomy evidence: The October 2024 ICT interface standard separately identifies the established telecom DC equipment interface; it does not classify the equipment by battery chemistry. ([etsi.org](https://www.etsi.org/deliver/etsi_EN/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))

2. IEC 62040-5-3:2016 | IEC

   · Taxonomy evidence: DC-output UPS equipment is an internationally recognized category even when its normal input source is AC. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. ETSI EN 300 132-2 V2.8.1 - ICT Power Supply Interface: Direct Current
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard separately identifies the DC protected-equipment interface, supporting the DC-output boundary independently of battery chemistry. It is not a purchasing census. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013202v020801p.pdf))

9.2. AC Output

Table 77. Global Telecom Battery Backup System Market Size, by AC Output, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IEC 62040-3:2021 | IEC

   · Taxonomy evidence: The classified UPS equipment delivers AC output, supporting output-form classification independently of battery chemistry. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

   · Taxonomy evidence: The classified UPS equipment delivers AC output, establishing an output-interface distinction rather than a battery-chemistry distinction. ([webstore.iec.ch](https://webstore.iec.ch/en/publication/xx.xx))

2. ETSI EN 300 132-1 V2.2.1 (2022-11) - ICT power supply interface: Alternating Current
   · Taxonomy evidence: The ICT standards series separately identifies AC equipment-input compatibility, supporting current-form classification at the protected-load boundary. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   · Taxonomy evidence: The ICT interface classification explicitly covers AC power interfaces, including worldwide nominal-voltage compatibility and customer-premises and network-site applications. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ICT standard identifies the protected-load AC interface, supporting output-side attribution rather than classification by chemistry or normal utility input. It supplies no sales mix. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300100_300199/xx.xx/xx.xx.01_60/en_30013201v020201p.pdf))
3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

9. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
13. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

9.3. Combined AC/DC Output

Table 80. Global Telecom Battery Backup System Market Size, by Combined AC/DC Output, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Telecommunication Engineering Centre - Standards/Specifications, TEC 66160:2024 entry

   · Taxonomy evidence: The official catalog lists Hybrid (AC+DC) Uninterrupted Power Supply System as TEC xx.xx:2024, dated June xx.xx 2024. This establishes the named category, not transaction-specific backed outputs. ([tec.gov.in](https://tec.gov.in/standards-specifications))

2. TEC 66160:2024 - Hybrid (AC+DC) Uninterrupted Power Supply System

   · Taxonomy evidence: The classification explicitly describes backed AC and DC outputs within one telecom system, supporting a combined-output category distinct from AC-input/DC-output equipment. ([tec.gov.in](https://tec.gov.in/pdf/GRFA/Final%20TEC_%20GR_%20Hybrid%20UPS_June%202024_21062024.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Vertiv NetSure Inverter Series - Converged AC and DC Power System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NetSure Inverter Series identifies AC and DC loads supported through a common battery bank. This establishes a combined-output proposition, not its modeled purchasing fraction or future adoption. ([vertiv.com](https://www.vertiv.com/en-us/products-catalog/critical-power/dc-power-systems/vertiv-netsure-inverter-series/))

10. Telecom Battery Backup System Market, by Network Application

Network Application changes the consequence and contractual boundary of a backup purchase. FirstNet distinguishes core functions, transport backhaul, and radio access, supporting classification by the protected network function rather than the building containing it. ▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ Across these applications, local battery protection should not be represented as an end-to-end service guarantee unless the remaining network dependencies are included. Responsibility for a shared facility and responsibility for its protected telecom function may need separate contracts.

Customer-Premises Connectivity requires a different comparison: which customer services remain supported. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ The relevant trigger for changing the purchase is an expanded protected-service requirement, not simply a change in the equipment's application label.

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026

- Ofcom's June xx.xx 2026 guidance differentiates access, aggregation/backhaul, core, and interconnection; expects battery and generator provision at core and larger aggregation sites; and addresses resilience across third-party peering and interconnection. These are UK-specific expectations, not global mandates. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: The June xx.xx 2026 guidance distinguishes access, aggregation/backhaul, core, and interconnection domains; management is cross-cutting. This supports functional rather than facility-based classification. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Taxonomy evidence: The June xx.xx 2026 guidance differentiates access, aggregation/backhaul, core, and interconnection domains and recognizes management as cross-cutting. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.

2. PowerReserve | Verizon Residential Accessories
   · Verizon limits PowerReserve to voice, including emergency calls, and excludes Fios internet and television. This supports a protected-service distinction within Customer-Premises Connectivity. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
3. Battery Backup | Meriwether Lewis Electric Cooperative
   · MLConnect describes protection of its optical network terminal and separately discusses terminal-plus-gateway support for voice and internet. Only the protected-service distinction is used. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
4. Technology and Tools | First Responder Network Authority
   · FirstNet distinguishes core network functions, transport backhaul, and radio access as separate network layers. This supports functional application classification rather than classification solely by facility. ([firstnet.gov](https://firstnet.gov/network/TT))
   · Taxonomy evidence: The government network description distinguishes core, transport backhaul, and radio access as separate layers, supporting functional rather than building-based application classification. ([firstnet.gov](https://firstnet.gov/network/TT))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.
5. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
6. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
7. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
   ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
    ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
15. Mobile Network Hardening Program | Australian Department of Infrastructure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.

10.1. Wireless Access Networks

Table 85. Global Telecom Battery Backup System Market Size, by Wireless Access Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Taxonomy evidence: Wireless radio access is an explicit access-domain application. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Taxonomy evidence: Access-domain examples include cellular RAN, fixed wireless access, and non-terrestrial access networks. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

2. ENISA - Power Supply Dependencies in the Electronic Communications Sector, December 2013

   · Taxonomy evidence: Provider examples describe batteries protecting individual access-network base stations during power interruptions. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

3. Oregon Department of Transportation - Bid S-73000-00006485, Battery Backup Power Systems for Wireless Communication Sites

   · Taxonomy evidence: The May 2023 public solicitation seeks battery-backup power systems for two-way communications sites, establishing institutional radio-network demand rather than completed delivery. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))

4. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   - Taxonomy evidence: The report discusses battery backup at mobile radio-access sites, establishing an application context rather than Global adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
5. Technology and Tools | First Responder Network Authority
   - Taxonomy evidence: Radio access is the base-station infrastructure connecting user devices to the network. The record establishes the network function, not battery purchasing volume. ([firstnet.gov](https://firstnet.gov/network/TT))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio access, transport backhaul and core are separate network functions, supporting functional attribution without duplicate facility counting.
6. State of Delaware - Public Safety Communications Equipment, 700 MHz Systems, Contract GSS21869-700MHz, Appendix E
   - Taxonomy evidence: The public radio-system procurement requires battery-backed UPS equipment at radio sites and communications-control locations. It establishes a public demand requirement, not completed contract delivery. ([bidcondocs.delaware.gov](https://bidcondocs.delaware.gov/GSS/GSS_21869_700mhz_appE.pdf))

7. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
8. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
9. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
10. EnerSys 2026 Proxy Statement and Annual Report
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
11. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
12. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

13. IHS Holding Limited - First-Quarter 2026 Financial Statements

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
    ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

14. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

15. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

16. Fingrid - How to Participate in the Reserve Markets

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

17. China Tower announces 2025 annual results - March 18, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

18. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

19. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
20. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

21. IHS Holding Limited - Annual Report on Form 20-F for 2024
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.

22. Australian Government - Mobile Network Hardening Program
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed battery enhancements and broader resilience projects provide a delivered regional demand signal, not a global forecast rate.

23. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.

24. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.

25. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.

26. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

10.2. Customer-Premises Connectivity

Table 88. Global Telecom Battery Backup System Market Size, by Customer-Premises Connectivity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: The protected equipment is subscriber-premises connectivity equipment. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The customer record describes purchased battery-backup equipment protecting an ONT and residential gateway, establishing a customer-premises connectivity application. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
2. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network
   - Taxonomy evidence: Customer-premises equipment is distinguished from shared access-network equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Taxonomy evidence: Sections xx.xx.xx.xx and xx.xx.xx.xx distinguish shared access-network equipment from equipment at customer premises, supporting a separate subscriber-premises application boundary. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

10.3. Transport & Backhaul Networks

Table 91. Global Telecom Battery Backup System Market Size, by Transport & Backhaul Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Taxonomy evidence: Aggregation/backhaul is distinguished from core and last-mile access and has explicit power-resilience expectations. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated xx.xx-xx.xx-fold site-scale distinction motivates lower-value, more numerous transport purchase equivalents.

2. ENISA - Power Supply Dependencies in the Electronic Communications Sector, December 2013

   · Taxonomy evidence: The 2013 provider accounts describe battery protection at transmission and aggregation sites. This is historical application evidence, not current Global adoption. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

   · Taxonomy evidence: The report separately identifies battery protection at critical transmission and aggregation sites. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

3. Oregon Department of Transportation - Bid S-73000-00006485, Battery Backup Power Systems for Wireless Communication Sites

   · Taxonomy evidence: The solicitation also includes wireless microwave communications sites; their application allocation depends on the protected network function. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))

4. Technology and Tools | First Responder Network Authority

   · Taxonomy evidence: Transport backhaul carries user traffic and signaling between radio base stations and the core network. ([firstnet.gov](https://firstnet.gov/network/TT))

5. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

6. Broadband Commission - The State of Broadband: Our Digital World, 2025

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

7. Battery Backup - Meriwether Lewis Electric Cooperative

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

8. EnerSys 2026 Proxy Statement and Annual Report

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

9. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

10. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

11. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

12. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

13. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

14. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
15. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
16. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

17. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

18. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
19. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

20. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
21. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
22. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
23. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
24. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
25. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

10.4. Core Networks & Network Control

Table 94. Global Telecom Battery Backup System Market Size, by Core Networks & Network Control, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 95. Global Telecom Battery Backup System Market Size, by Core Networks & Network Control, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Taxonomy evidence: Core sites contain key control/service functions, and the guidance expressly includes battery backup in their electrical provision. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Core is a distinct, comparatively concentrated function with explicit backup expectations; global spending remains estimated.

2. ENISA - Power Supply Dependencies in the Electronic Communications Sector, December 2013

   · Taxonomy evidence: Provider interviews in the December 2013 report describe core sites protected by UPS systems and batteries, alongside generators. This establishes historical core-backup use, not current global adoption. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

3. Technology and Tools | First Responder Network Authority

   · Taxonomy evidence: Core functions include switching, information processing, and network services; these are distinguished from transport links and radio base stations. ([firstnet.gov](https://firstnet.gov/network/TT))

4. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
7. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
10. IHS Holding Limited - First-Quarter 2026 Financial Statements
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
16. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

17. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
18. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

19. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
20. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
21. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
22. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
23. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
24. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

10.5. Wireline Access Networks

Table 97. Global Telecom Battery Backup System Market Size, by Wireline Access Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Taxonomy evidence: Fixed access is distinguished from aggregation/backhaul and core functions. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Taxonomy evidence: Fixed access examples include DSL, hybrid fiber-coax, and fiber-to-premises networks. These are network applications, not global battery-adoption estimates. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

2. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: The scope includes wired and hybrid access networks and backup-power arrangements. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: The February 2021 standard covers copper, fiber, radio, and hybrid access networks and discusses backup batteries in DC supplies and UPS equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

10.6. Network Interconnection & Peering

Table 100. Global Telecom Battery Backup System Market Size, by Network Interconnection & Peering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Taxonomy evidence: Internet peering and non-Internet interconnection are separately identified network functions, not disclosed battery transactions. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Taxonomy evidence: The guidance distinguishes Internet peering from non-Internet interconnection. It establishes a separate function but not an attributable battery-backup transaction. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Peering and non-Internet interconnection are distinct functions; attributable backup purchase values are not disclosed.

2. Internet Society - The Internet Exchange Point Toolkit & Best Practices Guide

   · Taxonomy evidence: The historical Tanzania Internet Exchange case describes an online UPS with external batteries protecting an exchange site. It establishes battery-backed interconnection use, not current purchases or attributable hardware revenue. ([internetsociety.org](https://www.internetsociety.org/wp-content/uploads/2021/xx.xx/Global-IXPToolkit_Collaborative-Draft_Feb-xx.xx.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

11. Telecom Battery Backup System Market, by Buyer Type

[redacted] IHS' first-quarter 2026 filing provides a concrete counterexample to a uniform tower-power responsibility: its South African business ceased supplying diesel or alternative power under the disclosed contractual change. Suppliers approaching Telecommunications Network Operators, Telecom Infrastructure & Tower Operators, or Telecom Energy-Service Providers should establish the actual acquisition and replacement counterparty before bidding; access to a tower customer does not automatically confer access to its backup-equipment budget.

Equipment Leasing & Rental Providers require a fleet-procurement conversation rather than an end-user ownership proposition. [redacted] OEMs should verify procurement authority and continuing fleet-service responsibility before treating customer interest in rental as a hardware purchasing commitment.

Business & Institutional Connectivity Owners can purchase for their own continuity obligations. [redacted] Suppliers should distinguish contractual funding responsibility from tender eligibility; the Oregon example establishes a particular purchasing process, not completed delivery or a universal institutional rule.

Household Connectivity Purchasers face a different payer boundary. [redacted] Suppliers should identify the funding party before choosing a provider-procurement or consumer-sales proposition.

Figure 16. Global Telecom Battery Backup System Market Size, by Buyer Type, 2025 (%)

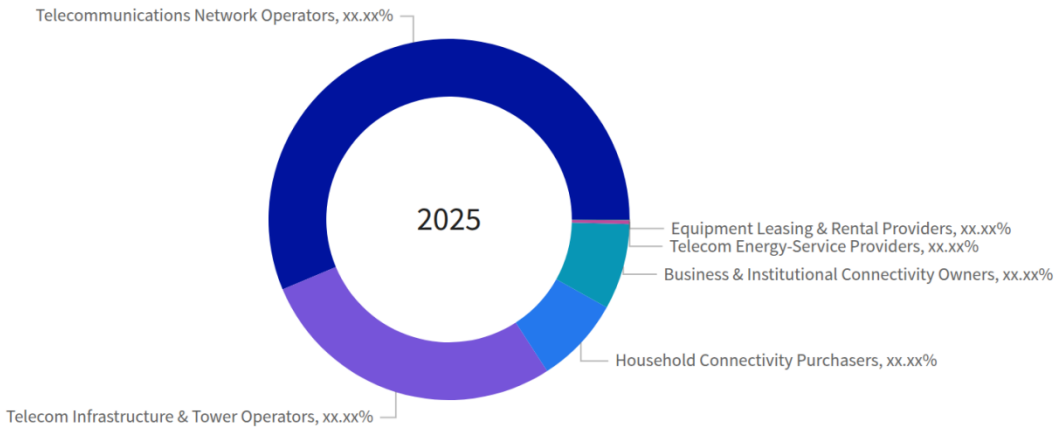

Figure 17. Global Telecom Battery Backup System Market, by Buyer Type, 2032 (USD Million)

Sources & Evidence

1. Your landline is going digital: what you need to know

   · Ofcom requires free backup solutions for landline-dependent customers without a working mobile phone or reliable mobile signal. This establishes a qualifying provider-funded route rather than universal household funding.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.

2. IHS Holding Limited First-Quarter 2026 Financial Statements

   · IHS' first-quarter 2026 filing describes the South African contractual unwind and states that the business is no longer responsible for supplying diesel or alternative power to tower sites. This supports verification of actual power and purchasing responsibilities rather than assuming a uniform tower role.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

3. Telecommunications | Aggreko US

   · Aggreko describes telecom rental support including battery storage for telephone exchanges and temporary support during upgrades and maintenance. The description does not identify procurement authority for each underlying battery asset. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))

4. Digital Voice for Business Service Schedule, May 2026

   · BT's May 2026 Digital Voice for Business schedule places secure power supply and backup-power provision at the customer's expense.
   ([business.bt.com](https://business.bt.com/content/dam/bt-business/pdfs/terms/bt-business-agreement/digital-voice-part-a-and-b-v3-xx.xx-may-2026.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.

5. Battery Backup | Meriwether Lewis Electric Cooperative
   · The purchased-device relationship supplies a customer-funded counterexample to provider-funded eligibility arrangements. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
6. IFC Summary of Investment Information - IPT PowerTech, Project 49095
   · IFC distinguishes IPT PowerTech's long-term energy services to mobile operators or tower companies from telecom contracting and power-equipment activities. The business-role distinction does not establish the purchaser of every underlying battery asset. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
   · Taxonomy evidence: The project record distinguishes telecom energy services, telecom contracting services, and equipment-power activities, demonstrating why customer, contractor, and asset-service roles are not interchangeable. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
7. Oregon Department of Transportation - Bid Solicitation S-73000-00006485
   · Oregon's 2023 battery-backup solicitation names the Department of Transportation as purchaser and requires a mandatory pre-proposal conference. Its June xx.xx 2023 notice expresses intent to award pending negotiations, not completed delivery. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sda?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))
8. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021
   · Taxonomy evidence: The IFC-led framework separates energy-service asset ownership, equipment supply, maintenance, tower-company power provision, and asset leasing/financing. Only qualitative role definitions are used. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
   · Taxonomy evidence: The September 2021 framework distinguishes telecom energy-service firms, network operators, tower companies, equipment supply, and asset leasing/financing. Only qualitative role definitions are used; attributed market estimates and rankings are excluded. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))
9. IFC Environmental & Social Review Summary - Western Balkan Towers, Project 48526
   · Taxonomy evidence: The investment record distinguishes tower-owning entities from telecom-operator anchor tenants, supporting separate infrastructure and connectivity-provider roles. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))
   · Taxonomy evidence: The investment disclosure distinguishes tower-owning companies from their telecommunications-operator anchor tenants, supporting separate infrastructure and connectivity-provider buyer roles. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))
10. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.

11. Broadband Commission - The State of Broadband: Our Digital World, 2025
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
12. EnerSys 2026 Proxy Statement and Annual Report
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
13. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
14. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
15. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
16. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.

17. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
18. Los Angeles Metro - Board Report 2024-1128, UPS Battery Replacement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.
19. DC Power Plant / Rectifiers - UPS Rental
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.

11.1. Telecommunications Network Operators

Table 105. Global Telecom Battery Backup System Market Size, by Telecommunications Network Operators, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ENISA - Power Supply Dependencies in the Electronic Communications Sector, December 2013

   · Taxonomy evidence: The provider accounts discuss the cost of procuring and maintaining batteries, supporting a communications-operator purchaser role. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

   · Taxonomy evidence: The interviewed communications providers describe procuring and maintaining batteries as part of network-continuity protection, supporting the operator purchaser role. ([enisa.europa.eu](https://www.enisa.europa.eu/sites/default/files/publications/Power%20Supply%20Dependencies%20in%20the%20Ecomms%20Sector.pdf))

2. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: The telecom operator is identified as provider of a local backup power unit. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Section xx.xx identifies the telecom operator as the provider of a local power unit with backup for access equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

11.2. Telecom Infrastructure & Tower Operators

Table 108. Global Telecom Battery Backup System Market Size, by Telecom Infrastructure & Tower Operators, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IFC Environmental & Social Review Summary - Western Balkan Towers, Project 48526

   · Taxonomy evidence: The tower-business record states that outage backup will predominantly use batteries. This establishes an infrastructure-owner setting, not ownership or purchase value for each individual battery. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))

   · Taxonomy evidence: The disclosed tower-asset business includes battery backup for outages. This supports an infrastructure-owner backup setting, without proving ownership of every individual battery or purchase. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/ESRS/xx.xx/western-balkan-towers))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

8. IHS Holding Limited - First-Quarter 2026 Financial Statements

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

11.3. Household Connectivity Purchasers

Table 111. Global Telecom Battery Backup System Market Size, by Household Connectivity Purchasers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 112. Global Telecom Battery Backup System Market Size, by Household Connectivity Purchasers, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 113. Global Telecom Battery Backup System Market Size, by Household Connectivity Purchasers, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: The customer purchases the product and is responsible for replacement batteries. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The provider explicitly describes the backup device as a purchased product and assigns battery acquisition and replacement responsibility to the customer. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
2. FCC Residential Voice Backup-Power Final Rule - Federal Register, October 16, 2015
   - Taxonomy evidence: The 2015 residential-voice rulemaking addresses battery or UPS backup for subscriber-premises equipment and distinguishes provider and subscriber responsibilities. It is used as historical category evidence, not a worldwide or current compliance instruction. ([govinfo.gov](https://www.govinfo.gov/content/pkg/FR-2015-xx.xx-xx.xx/pdf/2015-xx.xx.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

11.4. Business & Institutional Connectivity Owners

Table 114. Global Telecom Battery Backup System Market Size, by Business & Institutional Connectivity Owners, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 115. Global Telecom Battery Backup System Market Size, by Business & Institutional Connectivity Owners, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Oregon Department of Transportation - Bid S-73000-00006485, Battery Backup Power Systems for Wireless Communication Sites

   · Taxonomy evidence: The transportation department is the procuring organization, supporting an institutional own-use purchaser role. The notice does not establish final installed hardware values. ([oregonbuys.gov](https://oregonbuys.gov/bso/external/bidDetail.sdo?docId=S-xx.xx-xx.xx&external=true&parentUrl=close))

2. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: The customer-premises discussion recognizes business-customer AC UPS use; it supports a business connectivity setting, not a disclosed purchase value. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

3. State of Delaware - Public Safety Communications Equipment, 700 MHz Systems, Contract GSS21869-700MHz, Appendix E

   · Taxonomy evidence: The state department solicits a communications-system upgrade including UPS equipment, establishing an institutional own-use purchasing role distinct from a telecom carrier or reseller. ([bidcondocs.delaware.gov](https://bidcondocs.delaware.gov/GSS/GSS_21869_700mhz_appE.pdf))

4. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
7. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
10. IHS Holding Limited - First-Quarter 2026 Financial Statements
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

14. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
16. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

17. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
18. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

19. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
20. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
21. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
22. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
23. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
24. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

25. BT - Digital Voice for Business Service Schedule, May 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Business customers bear backup-power expense, supporting a distinct institutional/business payer route rather than consumer eligibility extrapolation.

26. Los Angeles Metro - Board Report 2024-1128, UPS Battery Replacement
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transit authority's purchasing program supports an institutional own-use role, not its global spending proportion.

11.5. Telecom Energy-Service Providers

Table 117. Global Telecom Battery Backup System Market Size, by Telecom Energy-Service Providers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 118. Global Telecom Battery Backup System Market Size, by Telecom Energy-Service Providers, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021

   · Taxonomy evidence: Telecom energy-service firms are defined through power-asset ownership and contracted supply to telecom sites; equipment-only and maintenance-only firms are excluded from that definition. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

   · Taxonomy evidence: The definitions identify telecom energy-service firms through power-asset ownership and telecom-site supply, distinguishing them from supply-only and maintenance-only businesses and tower-company power offerings. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

2. IFC Summary of Investment Information - IPT PowerTech, Project 49095

   · Taxonomy evidence: Contracted energy services are supplied to mobile operators or tower companies; those beneficiaries are not automatically the provider's hardware purchasers. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

   · Taxonomy evidence: The disclosed energy-service business provides contracted energy to mobile network operators or independent tower companies. These beneficiaries are not automatically the purchasers of the provider's backup assets. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

3. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Energy-service activity supports the role; the modeled provider-as-buyer subcontract share is not established.

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

11.6. Equipment Leasing & Rental Providers

Table 120. Global Telecom Battery Backup System Market Size, by Equipment Leasing & Rental Providers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021

   · Taxonomy evidence: Asset leasing/financing is recognized in the value chain, but standalone lessor purchases of qualifying battery-backup hardware are not established. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

   · Taxonomy evidence: The value-chain framework recognizes asset leasing/financing. This supports recognition of the role, but not qualifying purchases or materiality for standalone backup-equipment lessors. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

2. GSA - Leasing of New Electronic Equipment

   · Taxonomy evidence: The listing corroborates a telecommunications equipment-leasing role but supplies no record of a standalone lessor acquiring eligible backup batteries. ([gsa.gov](https://www.gsa.gov/technology/it-contract-vehicles-and-purchasing-programs/multiple-award-schedule-it/electronic-equipment-leasing))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. DC Power Plant / Rectifiers - UPS Rental
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial rental availability is a role premise only; modeled lessor sub-hire procurement remains unverified.

12. Telecom Battery Backup System Market, by Installation Environment

[redacted] Buyers should obtain an offering-specific suitability declaration and assign responsibility for the building or enclosure services on which that declaration depends, including the treatment of an interruption to environmental control. The classification itself establishes neither a product's acceptance nor a worldwide purchasing mandate.

Non-Weather-Protected Locations include Sheltered Non-Weather-Protected Locations and Open-Air Locations; shelter alone should not be treated as equivalent to the weather-protected category. Vertiv's NetSure M Series provides a named outdoor enclosure proposition with power, battery, and climate-management options. [redacted]

Underground Locations present a distinct siting choice rather than an ordinary enclosed-room equivalent. [redacted] Historical literature supports the commercial rationale for that comparison, not an unconditional recommendation to procure the older product.

Figure 18. Global Telecom Battery Backup System Market Size, by Installation Environment, 2025 (%)

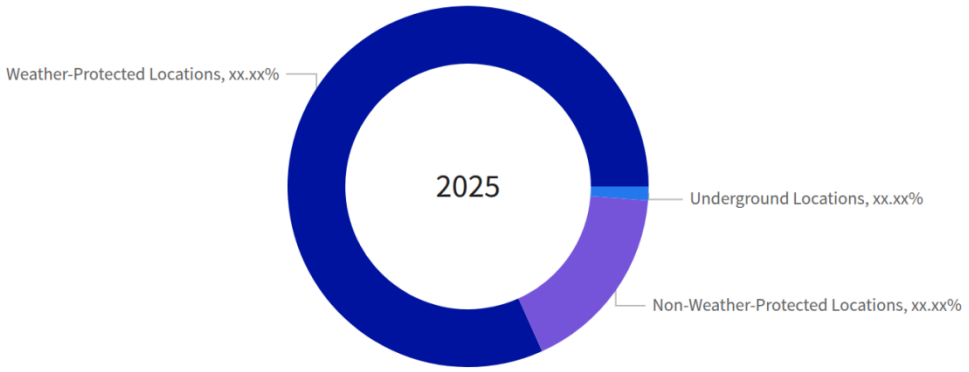

Figure 19. Global Telecom Battery Backup System Market, by Installation Environment, 2032 (USD Million)

Table 123. Global Telecom Battery Backup System Market, by Installation Environment growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Non-Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Underground Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 124. Global Telecom Battery Backup System Market Size, by Installation Environment, 2017-2032 (USD Million)

Installation Environment	2023	2024	2025	2026	2027	2032	CAGR (%)
Non-Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Underground Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Vertiv NetSure M Series
   - NetSure M Series lists power, battery, and climate-management options, supporting comparison of configured enclosure responsibility with separate purchasing. Site-specific acceptance is an analytical prerequisite, not an established commitment. ([vertiv.com](https://www.vertiv.com/en-emea/products-catalog/facilities-enclosures-and-racks/outdoor-enclosures/netsure-m-series/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.
2. ETSI EN 300 019-1-3 V3.1.1 - Stationary Use at Weatherprotected Locations
   - ETSI's May 2026 weather-protected location classification distinguishes temperature-controlled enclosed, uncontrolled enclosed, and partly weather-protected locations. Only location definitions are used, without operational parameters or an inferred worldwide mandate. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
   - Taxonomy evidence: The May 2026 stationary-location classification distinguishes enclosure and environmental control; it informs category design rather than worldwide obligations or 2025 adoption. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
   - Taxonomy evidence: The May 2026 standard classifies stationary telecom-equipment locations by enclosure and environmental control; it supplies category terminology, not worldwide compliance obligations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.
3. ETSI EN 300 019-1-4 V3.1.1 - Stationary Use at Non-Weatherprotected Locations
   - ETSI's May 2026 non-weather-protected classification recognizes sheltered and open-air location categories. Shelter alone does not establish equivalence with the separate weather-protected regime. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.

4. ETSI EN 300 019-1-8 V2.1.2 - Stationary Use at Underground Locations
   · ETSI's underground stationary-use classification identifies footway boxes, manholes, and some tunnels as location examples. It does not establish current supplier availability or local purchasing approval. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.02_60/en_3000190108v020102p.pdf))
5. Underground Battery Vaults - UBV Series, January 2006 | Alpha Technologies
   · Alpha's January 2006 UBV battery-vault datasheet states that the offering was designed to address municipal and state line-of-sight restrictions. It establishes a historical siting proposition, not current local supply or an independently verified present legal requirement. ([enersys.com](https://www.enersys.com/4a3268/globalassets/documents/product-documentation2/alpha/enclosures/broadband/underground-battery-vault/amer/ubv_datasheet.pdf))
6. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
7. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
8. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
9. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
10. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
11. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
12. IHS Holding Limited - First-Quarter 2026 Financial Statements
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

13. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
14. Ofcom - Your Landline Is Going Digital: What You Need to Know
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
15. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
16. Fingrid - How to Participate in the Reserve Markets
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
17. Los Angeles Metro - Board Report 2024-1128, UPS Battery Replacement
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.

12.1. Weather-Protected Locations

Table 125. Global Telecom Battery Backup System Market, by Weather-Protected Locations growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Enclosed Locations Without Temperature Control	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Partly Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Temperature-Controlled Enclosed Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 126. Global Telecom Battery Backup System Market Size, by Weather-Protected Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 300 019-1-3 V3.1.1 (2026-05) - Stationary Use at Weatherprotected Locations
   - Taxonomy evidence: The weather-protected regime includes totally enclosed and partly protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
   - Taxonomy evidence: Weather-protected locations include enclosed and partly protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weather-protected categories distinguish enclosure from environmental control; the standard does not measure market mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintained temperature control is a separate classification premise for the modeled conditional allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintained temperature control is a separate classification premise for the modeled conditional allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Enclosed locations without temperature control are distinguished from controlled locations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Enclosed locations without temperature control are distinguished from controlled locations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Partial weather protection is recognized separately; sales weights and future adoption remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Partial weather protection is recognized separately; sales weights and future adoption remain assumed.
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
12. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Vertiv NetSure M Series
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed outdoor enclosure supports a protection option; global adoption and configuration proportions remain modeled.

12.1.1. Enclosed Locations Without Temperature Control

Table 129. Global Telecom Battery Backup System Market Size, by Enclosed Locations Without Temperature Control, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 300 019-1-3 V3.1.1 (2026-05) - Stationary Use at Weatherprotected Locations

   · Taxonomy evidence: Class xx.xx identifies enclosed locations without temperature or humidity control. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Taxonomy evidence: Class xx.xx identifies enclosed locations without temperature or humidity control, including unattended equipment stations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Enclosed locations without temperature control are distinguished from controlled locations.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Enclosed locations without temperature control are distinguished from controlled locations.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.1.2. Temperature-Controlled Enclosed Locations

Table 132. Global Telecom Battery Backup System Market Size, by Temperature-Controlled Enclosed Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ETSI EN 300 019-1-3 V3.1.1 (2026-05) - Stationary Use at Weatherprotected Locations

   · Taxonomy evidence: Class xx.xx identifies temperature-controlled enclosed locations, including telecommunications centers. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Taxonomy evidence: Class xx.xx identifies enclosed locations with maintained temperature control, including telecom centers. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintained temperature control is a separate classification premise for the modeled conditional allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintained temperature control is a separate classification premise for the modeled conditional allocation.

2. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.1.3. Partly Weather-Protected Locations

Table 135. Global Telecom Battery Backup System Market Size, by Partly Weather-Protected Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ETSI EN 300 019-1-3 V3.1.1 (2026-05) - Stationary Use at Weatherprotected Locations

   · Taxonomy evidence: Class xx.xx permits openings to outside air and partial weather protection; the category cannot be equated with every outdoor shelter. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Taxonomy evidence: Class xx.xx recognizes partially weather-protected locations with openings to outside air. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190103v030101p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Partial weather protection is recognized separately; sales weights and future adoption remain assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Partial weather protection is recognized separately; sales weights and future adoption remain assumed.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.2. Non-Weather-Protected Locations

Table 138. Global Telecom Battery Backup System Market, by Non-Weather-Protected Locations growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Open-Air Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Sheltered Non-Weather-Protected Locations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 139. Global Telecom Battery Backup System Market Size, by Non-Weather-Protected Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 140. Global Telecom Battery Backup System Market Size, by Non-Weather-Protected Locations, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 300 019-1-4 V3.1.1 (2026-05) - Stationary Use at Non-Weatherprotected Locations

- Taxonomy evidence: The May 2026 classification distinguishes sheltered and open-air non-weather-protected stationary locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
- Taxonomy evidence: The May 2026 classification distinguishes sheltered and open-air non-weather-protected locations for stationary telecom equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-weather-protected locations form a distinct classification regime, not a measured global spending pool.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sheltered non-weather-protected locations support the named conditional category.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sheltered non-weather-protected locations support the named conditional category.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Open-air locations are separately recognized; their purchasing mix remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Open-air locations are separately recognized; their purchasing mix remains modeled.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.2.1. Sheltered Non-Weather-Protected Locations

Table 142. Global Telecom Battery Backup System Market Size, by Sheltered Non-Weather-Protected Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. ETSI EN 300 019-1-4 V3.1.1 (2026-05) - Stationary Use at Non-Weatherprotected Locations

   · Taxonomy evidence: Classes xx.xx and xx.xx recognize sheltered non-weather-protected locations. Shelter alone does not place equipment in the weather-protected regime. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))

   · Taxonomy evidence: Classes xx.xx and xx.xx explicitly recognize sheltered non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sheltered non-weather-protected locations support the named conditional category.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sheltered non-weather-protected locations support the named conditional category.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.

18. Australian Government - Mobile Network Hardening Program
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.

19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.

20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.

21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.

22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.2.2. Open-Air Locations

Table 145. Global Telecom Battery Backup System Market Size, by Open-Air Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 146. Global Telecom Battery Backup System Market Size, by Open-Air Locations, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. ETSI EN 300 019-1-4 V3.1.1 (2026-05) - Stationary Use at Non-Weatherprotected Locations

   · Taxonomy evidence: Classes xx.xx, xx.xx, and xx.xx recognize open-air non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))

   · Taxonomy evidence: Classes xx.xx, xx.xx, and xx.xx explicitly recognize open-air non-weather-protected locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.01_60/en_3000190104v030101p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Open-air locations are separately recognized; their purchasing mix remains modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Open-air locations are separately recognized; their purchasing mix remains modeled.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

12.3. Underground Locations

Table 148. Global Telecom Battery Backup System Market Size, by Underground Locations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 300 019-1-8 V2.1.2 (2002-04) - Stationary Use at Underground Locations

   · Taxonomy evidence: The stationary environmental series recognizes a distinct underground-location regime, supporting separation of subterranean field infrastructure from ordinary enclosed-building conditions. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.02_60/en_3000190108v020102p.pdf))

   · Taxonomy evidence: The standard identifies a distinct underground stationary-use regime, including footway boxes, manholes, and some tunnels. This supports separating subterranean field exposure from ordinary enclosed building locations. ([etsi.org](https://www.etsi.org/deliver/etsi_en/300001_300099/xx.xx/xx.xx.02_60/en_3000190108v020102p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Los Angeles Metro - Board Report 2024-1128, UPS Battery Replacement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed and additional UPS battery replacements support continuing underground demand; mixed-load project budgets are not telecom-only revenue.

13. Telecom Battery Backup System Market, by Powering Architecture

[redacted] Within Remote Powering, Centralized Powering originates at a telecommunications center, while Cluster Powering originates outside one. These distinctions, recognized in ETSI's 2021 access-network standard, mean that an equipment list for the receiving location alone cannot establish which counterparty supplies its backup.

Remote-source backup can provide a commercial alternative to separate batteries at receiving locations. [redacted] Consolidating backup accountability may simplify purchasing, but suitability depends on the supplier's commitment covering the receiving equipment rather than merely the source asset.

Reverse Powering introduces a different dependency because its supply originates at customer premises. [redacted] Operators considering this route should require an offering or contract that identifies the premises-origin backup obligation, purchasing authority, and continuing service responsibility before treating it as a substitute for local backup.

Figure 20. Global Telecom Battery Backup System Market Size, by Powering Architecture, 2025 (%)

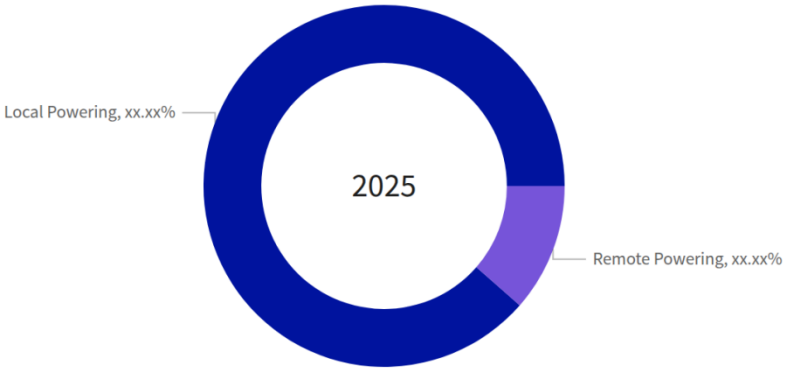

Figure 21. Global Telecom Battery Backup System Market, by Powering Architecture, 2032 (USD Million)

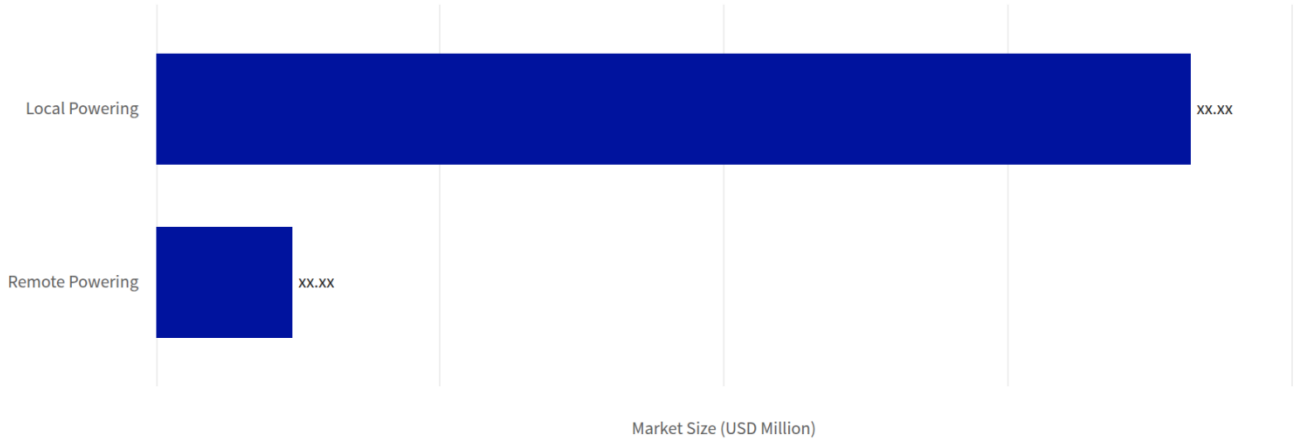

Table 151. Global Telecom Battery Backup System Market, by Powering Architecture growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Local Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Remote Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 152. Global Telecom Battery Backup System Market Size, by Powering Architecture, 2017-2032 (USD Million)

Powering Architecture	2023	2024	2025	2026	2027	2032	CAGR (%)
Local Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Remote Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 - Environmental Engineering; Powering of equipment in access network
   - The 2021 standard distinguishes colocated local supply, centralized and cluster remote sources, and customer-premises-origin reverse powering; it discusses differing backup locations and responsible parties. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Taxonomy evidence: The access-network classification distinguishes local, centralized, cluster, and customer-origin reverse powering; battery-backed allocation must follow the outage path. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Taxonomy evidence: Recognizes local, centralized, cluster, and reverse powering; batteries may back up the remote source or receiving equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
2. LPR48-300-IP67 - Alpha and Outback Energy
   - The LPR48-xx.xx-IP67 offering describes using existing centralized power-node backup instead of AC utility or battery backup at the remote location; this is a supplier proposition, not an installation award. ([alpha-outback-energy.com](https://alpha-outback-energy.com/products/lpr48-xx.xx-ip67/))
3. ADTRAN Delivers First 2nd-Gen Gfast Solutions as Worldwide Deployments Ramp
   - ADTRAN's October xx.xx 2018 announcement describes reverse-powering options in its own Gfast portfolio without establishing a battery-backed premises-origin supply transaction. Only the company's portfolio statement is used. ([investors.adtran.com](https://investors.adtran.com/news/news-details/2018/ADTRAN-Delivers-First-2nd-Gen-Gfast-Solutions-as-Worldwide-Deployments-Ramp/default.aspx))
4. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
5. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
6. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

7. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
14. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13.1. Local Powering

Table 153. Global Telecom Battery Backup System Market Size, by Local Powering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: Local power units may provide access-equipment backup. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Local powering uses a colocated supply. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local powering uses a colocated source; allocation follows the backed source rather than receiver inventory. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

13.2. Remote Powering

Table 156. Global Telecom Battery Backup System Market, by Remote Powering growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Centralized Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cluster Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Reverse Powering	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: Remote sources with backup can protect distant access equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Remote-source backup can protect distant equipment. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Remote-source backup is distinguished from local backup, supporting the parent commercial boundary but not purchasing weights. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cluster powering uses a source outside the telecommunications center, supporting separation within Remote Powering. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cluster powering uses a source outside the telecommunications center, supporting separation within Remote Powering. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reverse powering is customer-origin supply, supporting source-level attribution of the battery-backed provider package. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reverse powering is customer-origin supply, supporting source-level attribution of the battery-backed provider package. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Set Up Your Battery Backup - AT&T G.Fast Service with BGW210

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 provider document names a battery-backed package protecting G.fast customer and distribution equipment through reverse power feed. It establishes a dated source-backup proposition, not current Global quantities. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2021 provider document names a battery-backed package protecting G.fast customer and distribution equipment through reverse power feed. It establishes a dated source-backup proposition, not current Global quantities. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

13.2.1. Centralized Powering

Table 160. Global Telecom Battery Backup System Market Size, by Centralized Powering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 161. Global Telecom Battery Backup System Market Size, by Centralized Powering, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network
   - Taxonomy evidence: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Taxonomy evidence: Centralized supply originates in a telecom center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized powering originates at a telecommunications center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

13.2.2. Cluster Powering

Table 163. Global Telecom Battery Backup System Market Size, by Cluster Powering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: Cluster powering uses a supply node serving access equipment in an area. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Cluster supply originates outside a telecom center. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cluster powering uses a source outside the telecommunications center, supporting separation within Remote Powering. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cluster powering uses a source outside the telecommunications center, supporting separation within Remote Powering. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

13.2.3. Reverse Powering

Table 166. Global Telecom Battery Backup System Market Size, by Reverse Powering, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 167. Global Telecom Battery Backup System Market Size, by Reverse Powering, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: Reverse powering is customer-origin supply to access equipment; a qualifying battery-backed source transaction is not established. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Reverse powering feeds access equipment from customer premises; battery-specific commercial deployment remains unverified. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reverse powering is customer-origin supply, supporting source-level attribution of the battery-backed provider package. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reverse powering is customer-origin supply, supporting source-level attribution of the battery-backed provider package. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. Set Up Your Battery Backup - AT&T G.Fast Service with BGW210

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 provider document names a battery-backed package protecting G.fast customer and distribution equipment through reverse power feed. It establishes a dated source-backup proposition, not current Global quantities. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2021 provider document names a battery-backed package protecting G.fast customer and distribution equipment through reverse power feed. It establishes a dated source-backup proposition, not current Global quantities. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

14. Telecom Battery Backup System Market, by Commercial Delivery Model

[illegible] MLConnect describes its premises backup as a purchased product, assigns battery replacement and disposal to the customer, and excludes the backup from its service plan. Ownership therefore does not automatically purchase lifecycle support or a connectivity guarantee; buyers should identify those remaining obligations separately.

Leased or Rented Equipment addresses a different commitment period. UPS Rental advertises batteries and complete DC power plants for temporary replacement and emergency needs, while Aggreko describes telecom rental support during upgrades and maintenance. [illegible] In the UK, Ofcom retains communications-provider responsibility for network portions operated by third parties. Buyers should compare retained asset control with delegated fulfillment, specifying continuity commitments, maintenance ownership, remedies, and end-of-term responsibilities before selecting a delivery model.

Figure 22. Global Telecom Battery Backup System Market Size, by Commercial Delivery Model, 2025 (%)

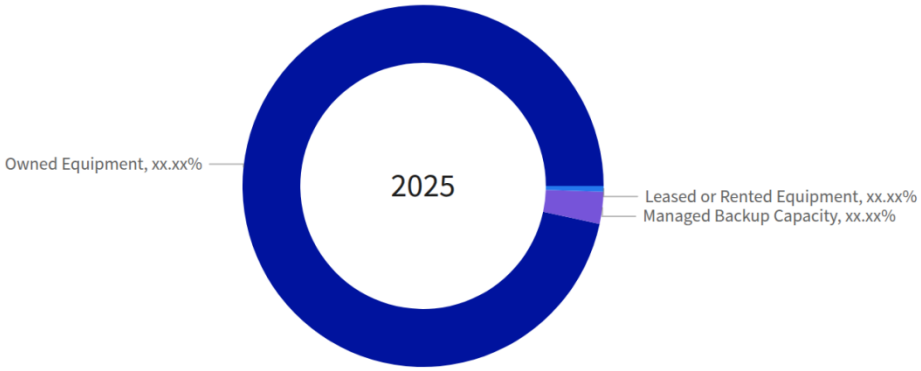

Figure 23. Global Telecom Battery Backup System Market, by Commercial Delivery Model, 2032 (USD Million)

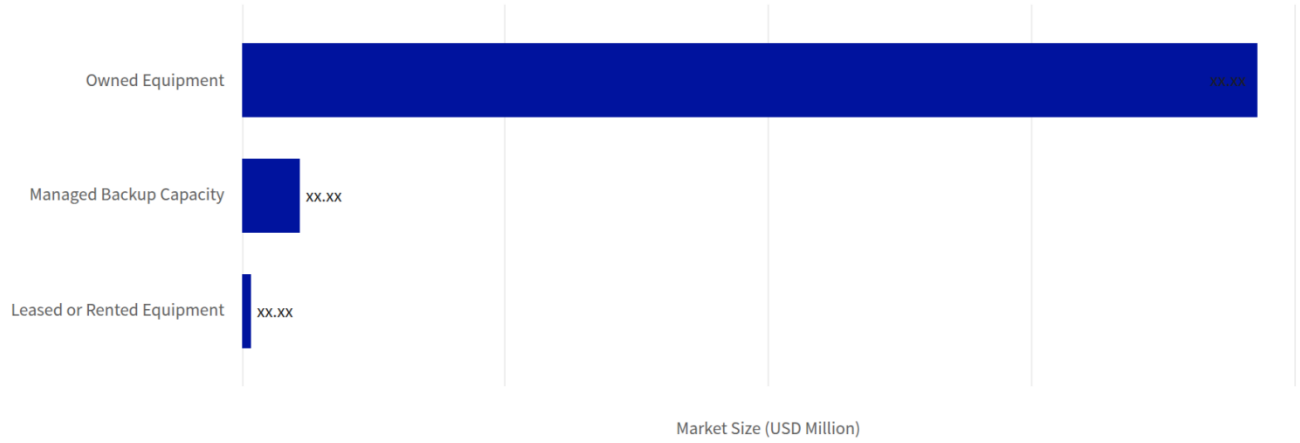

Table 169. Global Telecom Battery Backup System Market, by Commercial Delivery Model growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Leased or Rented Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Managed Backup Capacity	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Owned Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 170. Global Telecom Battery Backup System Market Size, by Commercial Delivery Model, 2017-2032 (USD Million)

Commercial Delivery Model	2023	2024	2025	2026	2027	2032	CAGR (%)
Leased or Rented Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Managed Backup Capacity	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Owned Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · Ofcom's June xx.xx 2026 guidance retains communications-provider resilience responsibility for network portions operated by third parties, including managed-service arrangements. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

2. Telecommunications | Aggreko US
   · Aggreko describes telecom rental support for exchanges during commissioning, upgrades, and maintenance, and identifies battery storage among its telecom offerings. ([aggreko.com](https://www.aggreko.com/en-us/sectors/telecommunications))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.
3. Battery Backup | Meriwether Lewis Electric Cooperative
   · MLConnect describes purchased backup, customer battery replacement and disposal responsibilities, and exclusion of the backup from its service plan. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
4. IFC Summary of Investment Information - IPT PowerTech, Project 49095
   · IFC distinguishes IPT PowerTech's long-term tower-energy contracts from turnkey telecom activities and battery-system supply; the project involves modernizing, maintaining, and operating clients' energy systems. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
   · Taxonomy evidence: The project disclosure separates long-term telecom energy-service contracts from turnkey telecom and power-equipment activities. Its original disclosure date is January xx.xx 2025, with a June xx.xx 2026 update. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
   · Taxonomy evidence: The investment disclosure distinguishes long-term telecom energy-service contracts from equipment supply and turnkey telecom activities. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))
5. DC Power Plant / Rectifiers - UPS Rental
   · UPS Rental advertises batteries and complete DC power plants for telecom-related continuity, including waiting for replacement equipment and emergency situations; the listing does not specify finance-lease title or return rights. ([upsrental.com](https://www.upsrental.com/product/rectifiers-dc-plants/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.
6. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
7. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

8. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

9. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

10. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

11. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

12. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

13. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

14. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.
15. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14.1. Owned Equipment

Table 171. Global Telecom Battery Backup System Market Size, by Owned Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: The disclosed arrangement is equipment purchase, not temporary equipment access. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The telecom customer disclosure describes a purchased backup product with customer responsibility for replacement batteries. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
   ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
7. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
9. Ofcom - Your Landline Is Going Digital: What You Need to Know
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
11. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
12. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

14.2. Managed Backup Capacity

Table 174. Global Telecom Battery Backup System Market Size, by Managed Backup Capacity, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 175. Global Telecom Battery Backup System Market Size, by Managed Backup Capacity, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. IFC Summary of Investment Information - IPT PowerTech, Project 49095

   · Taxonomy evidence: The financed project modernizes, maintains, and operates mobile-network clients' energy systems under long-term contracts and anticipates increased battery use. This supports a managed-performance arrangement, not attributed backup-hardware revenue. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

   · Taxonomy evidence: Telecom energy systems are modernized, maintained, and operated under long-term service contracts; the project includes increased use of solar panels and batteries. ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD45m financing and xx.xx planned site modernizations support an expansion signal, not observed backup-only service revenue.

12. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

14.3. Leased or Rented Equipment

Table 177. Global Telecom Battery Backup System Market Size, by Leased or Rented Equipment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 178. Global Telecom Battery Backup System Market Size, by Leased or Rented Equipment, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 179. Global Telecom Battery Backup System Market Size, by Leased or Rented Equipment, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. GSA - Leasing of New Electronic Equipment

   · Taxonomy evidence: The government procurement scope recognizes leasing and lease-with-option-to-own arrangements for telecommunications hardware. It does not specifically establish qualifying battery-backup leases.
   ([gsa.gov](https://www.gsa.gov/technology/it-contract-vehicles-and-purchasing-programs/multiple-award-schedule-it/electronic-equipment-leasing))

2. DC Power Plant / Rectifiers - UPS Rental

   · Taxonomy evidence: The public offering advertises rental of batteries and complete DC power plants for telecom continuity. This supplier example supports category occurrence, not independently demonstrated leasing uptake or a market-wide partition.
   ([upsrental.com](https://www.upsrental.com/product/rectifiers-dc-plants/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Battery and complete DC-plant rentals establish delivery-category occurrence; global fees and utilization are not disclosed.

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Telecommunications | Aggreko US
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom battery-storage rental for temporary continuity supports delivery occurrence, not the estimated global fee scale.

15. Telecom Battery Backup System Market, by Sales Channel

Direct Manufacturer Supply and Distributor and Retailer Supply can provide access to the same named offering without allocating support identically. ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ The distributor's description is not independent manufacturer confirmation or a site-specific fulfillment commitment.

Systems Integrator and Contractor Supply is differentiated by responsibility for the existing plant rather than simply resale. Vertiv describes DC power projects across manufacturers and upgrades as alternatives to replacing an entire plant. ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■■■■

■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■ ■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ AT&T's internet-service terms instead permit customer purchases from third-party manufacturers or retailers, retain customer replacement and recycling responsibilities, and exclude support for equipment not supplied by AT&T. Household purchasers should first establish which route their provider supports. A retail purchase can supply equipment without transferring the connectivity provider's service obligations to the retailer.

Figure 24. Global Telecom Battery Backup System Market Size, by Sales Channel, 2025 (%)

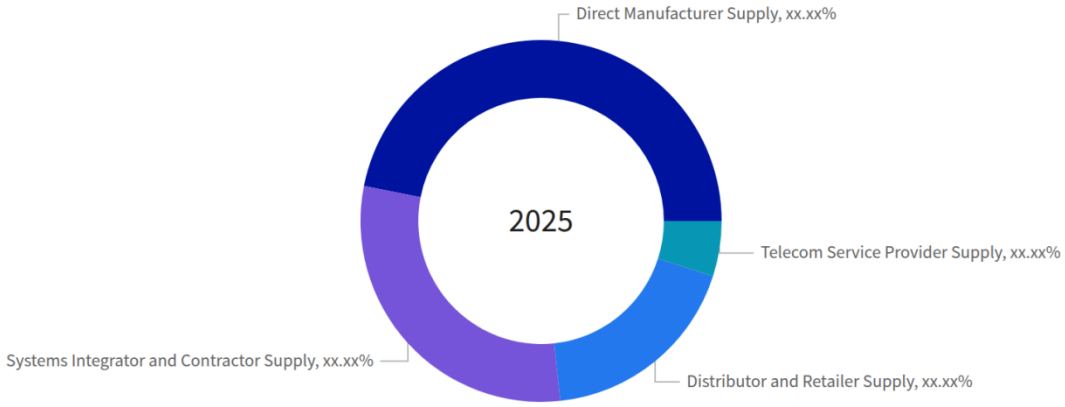

Figure 25. Global Telecom Battery Backup System Market, by Sales Channel, 2032 (USD Million)

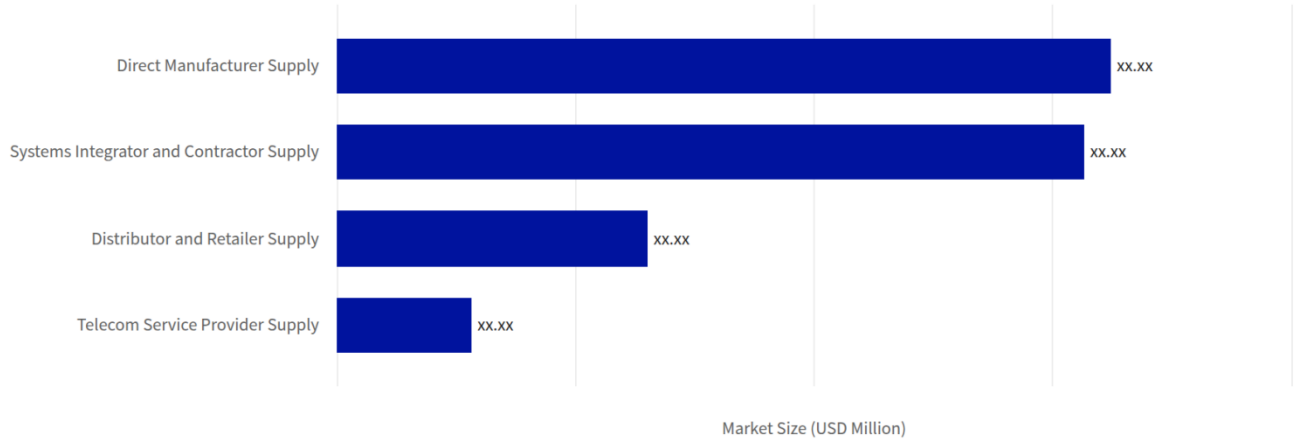

Table 180. Global Telecom Battery Backup System Market, by Sales Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys
   - EnerSys lists PowerSafe SBS for telecom applications and supplies a manufacturer quotation route. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))
2. DC Power Services | Vertiv
   - Vertiv describes DC power projects regardless of manufacturer and upgrades as alternatives to replacing an entire DC plant, supporting a distinct integration-prime purchasing option. ([vertiv.com](https://www.vertiv.com/en-us/products/services/dc-power-services/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.
3. Set up a Battery Back Up | BT Help
   - BT directs customers to contact the provider to request backup and describes the offering as supporting its Smart Hub and broadband services, including Digital Voice. ([bt.com](https://www.bt.com/help/home-phone/set-up-battery-back-up))
4. EnerSys PowerSafe SBS Front Terminal Batteries | Alpine Power Systems
   - Alpine lists PowerSafe SBS Front Terminal batteries and describes itself as an approved EnerSys distributor; this is Alpine's authorization statement, not independent manufacturer confirmation. ([alpinepowersystems.com](https://alpinepowersystems.com/products/enersys-powersafe-sbs-front-terminal))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.
5. Terms of Service - AT&T Legal Policy Center
   - AT&T's internet-service terms permit third-party manufacturer or retailer backup purchases, assign replacement and recycling to the customer, and exclude support for equipment not provided by AT&T. ([att.com](https://www.att.com/legal/terms.iframes.wirelessCustomerAgreement.html))
6. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
7. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
8. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.

9. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
10. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
11. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
12. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
13. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

14. Ofcom - Your Landline Is Going Digital: What You Need to Know
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
15. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
16. Fingrid - How to Participate in the Reserve Markets
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15.1. Direct Manufacturer Supply

Table 182. Global Telecom Battery Backup System Market Size, by Direct Manufacturer Supply, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: Customers may obtain devices and batteries directly through the named manufacturer. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: Customers may purchase backup units and replacement batteries directly from the named equipment supplier. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
   ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
7. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
9. Ofcom - Your Landline Is Going Digital: What You Need to Know
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
11. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
12. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

15.2. Systems Integrator and Contractor Supply

Table 185. Global Telecom Battery Backup System Market Size, by Systems Integrator and Contractor Supply, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 186. Global Telecom Battery Backup System Market Size, by Systems Integrator and Contractor Supply, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. IFC Summary of Investment Information - IPT PowerTech, Project 49095

   · Taxonomy evidence: The independent investment record describes turnkey telecom and energy-system integration activities alongside battery-system supply. It corroborates an integration/contractor role, not an exhaustive channel partition.
   ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

   · Taxonomy evidence: The disclosure identifies systems integration, turnkey telecom delivery, and battery-system supply as distinct public business activities. This supports the intermediary role, not an exhaustive channel partition.
   ([disclosures.ifc.org](https://disclosures.ifc.org/project-detail/SII/xx.xx/ipt-powertech))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. DC Power Services | Vertiv

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cross-manufacturer projects and narrower upgrades support integration-prime and supported-replacement routes; numerical route proportions remain assumed.

15.3. Distributor and Retailer Supply

Table 188. Global Telecom Battery Backup System Market Size, by Distributor and Retailer Supply, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 189. Global Telecom Battery Backup System Market Size, by Distributor and Retailer Supply, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. U.S. Census Bureau - 2022 Economic Census Form WH-42361

   · Taxonomy evidence: The Economic Census form recognizes nonautomotive batteries and communications equipment within merchant-wholesale activities and distinguishes own-account distributors from agents. It supports the distribution role, not telecom-backup channel shares. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_WH-42361_su.pdf))

   · Taxonomy evidence: The government business-classification questionnaire recognizes nonautomotive batteries and communications equipment within merchant-wholesale activities. It supports the distribution role, not telecom-backup channel shares. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_WH-42361_su.pdf))

2. Terms of Service - AT&T Legal Policy Center

   · Taxonomy evidence: Section xx.xx.xx.xx states that customers may purchase battery backup for telecom equipment from third-party manufacturers or retailers. This establishes customer-side procurement alternatives rather than a universal channel allocation. ([att.com](https://www.att.com/legal/terms.iframes.wirelessCustomerAgreement.html?utm_source=openai))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

9. IHS Holding Limited - First-Quarter 2026 Financial Statements

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. EnerSys PowerSafe SBS Front Terminal Batteries | Alpine Power Systems
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A named battery distributor supports the intermediary route; its listing is not a global channel-sales observation.

15.4. Telecom Service Provider Supply

Table 191. Global Telecom Battery Backup System Market Size, by Telecom Service Provider Supply, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 192. Global Telecom Battery Backup System Market Size, by Telecom Service Provider Supply, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative
   - Taxonomy evidence: The connectivity provider also sells them through local offices. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Taxonomy evidence: The cooperative also offers those backup products through its own local offices. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
7. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

9. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

11. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

12. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

16. Telecom Battery Backup System Market, by Grid Availability

[redacted] Reliable Grid does not mean that backup has no commercial purpose: Ofcom's February 2025 report describes prolonged telecom disruption during severe weather despite generally reliable UK services. Buyers in this setting should match the purchase to the documented continuity obligation and exceptional outage exposure rather than assume that ordinary grid access removes the requirement.

Unreliable Grid introduces recurring supply uncertainty alongside outage protection. MTN's April 2025 American Tower case connects energy-storage initiatives with irregular grid access and fuel-supply constraints. [redacted]

Off-Grid creates a distinct purchasing boundary because the site lacks a national-grid connection. IFC's 2021 telecom energy-services framework separates that condition from connected sites experiencing outages and describes energy services extending beyond backup alone. [redacted]

Figure 26. Global Telecom Battery Backup System Market Size, by Grid Availability, 2025 (%)

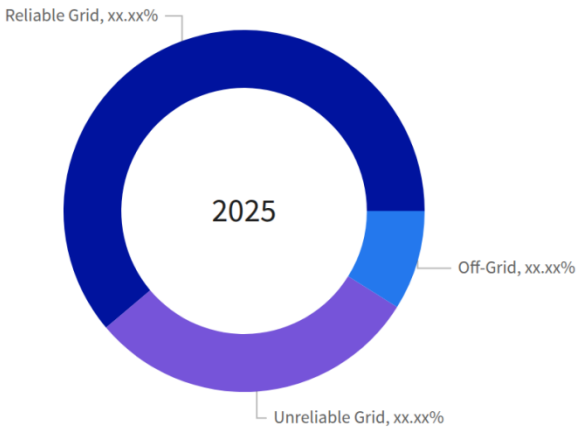

Figure 27. Global Telecom Battery Backup System Market, by Grid Availability, 2032 (USD Million)

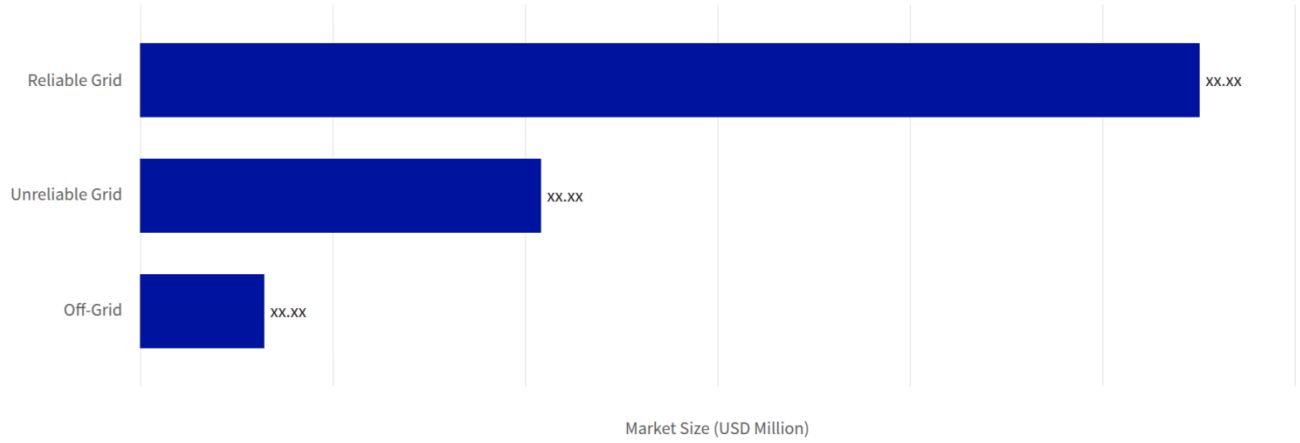

Table 194. Global Telecom Battery Backup System Market, by Grid Availability growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Off-Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Reliable Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unreliable Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 195. Global Telecom Battery Backup System Market Size, by Grid Availability, 2017-2032 (USD Million)

Grid Availability	2023	2024	2025	2026	2027	2032	CAGR (%)
Off-Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Reliable Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unreliable Grid	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Strategic approach to network and supply emissions: building a sustainable network with ATC

   · MTN's April xx.xx 2025 American Tower case connects energy-storage initiatives with irregular grid access and fuel-supply constraints; it does not establish storage as complete energy fulfillment. ([mtn.com](https://www.mtn.com/case-study/strategic-approach-to-network-and-supply-emissions-building-a-sustainable-network-with-atc/))

2. Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies

   · IFC's September 2021 framework distinguishes disconnected sites from connected sites with differing outage exposure using study-specific definitions; it describes telecom energy services as wider than backup alone. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-xx.xx-final.pdf))

   · Taxonomy evidence: The framework distinguishes off-grid, bad-grid, and good-grid contexts using study-specific definitions. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-xx.xx-final.pdf))

3. Mobile RAN power resilience: Technical Report and CFI Update - February 10, 2025

   · Ofcom's February xx.xx 2025 report describes generally reliable UK telecom services and prolonged power-related disruption during severe weather, supporting a distinction between ordinary reliability and exceptional exposure. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

4. GSMA - Renewable Energy for Mobile Towers: Opportunities for Low- and Middle-Income Countries, September 2020

   · Taxonomy evidence: The association's September 2020 definitions separate sites disconnected from or receiving no grid electricity from connected sites with prolonged outages. Its six-hour daily-outage cutoff differs from the inspected IFC framework's eight-hour cutoff; neither is adopted as a Global rule. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

   · Taxonomy evidence: The association's 2020 report distinguishes good-grid, bad-grid, and off-grid telecom contexts. Only category distinctions are used; embedded commercial research estimates are excluded. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

5. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

6. Broadband Commission - The State of Broadband: Our Digital World, 2025

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

7. Battery Backup - Meriwether Lewis Electric Cooperative

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

8. EnerSys 2026 Proxy Statement and Annual Report

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

9. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
10. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
11. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
12. Ofcom - Your Landline Is Going Digital: What You Need to Know
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.

14. Fingrid - How to Participate in the Reserve Markets
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

15. Helios Towers - Full Year Results 2025, March 12, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.

16.1. Reliable Grid

Table 196. Global Telecom Battery Backup System Market Size, by Reliable Grid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 197. Global Telecom Battery Backup System Market Size, by Reliable Grid, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021

   · Taxonomy evidence: Good-grid is defined using the study's daily-outage cutoff, not a universally comparable reliability benchmark.
   ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

2. GSMA - Renewable Energy for Mobile Towers: Opportunities for Low- and Middle-Income Countries, September 2020

· Taxonomy evidence: Good-grid is an explicit context in the report's telecom energy-management classification. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

4. Broadband Commission - The State of Broadband: Our Digital World, 2025

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

5. Battery Backup - Meriwether Lewis Electric Cooperative

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

6. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

9. IHS Holding Limited - First-Quarter 2026 Financial Statements

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
   ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Helios Towers - Full Year Results 2025, March 12, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid-integration investment supplies a connection-improvement counterforce used conditionally in the forecast.

16.2. Unreliable Grid

Table 199. Global Telecom Battery Backup System Market Size, by Unreliable Grid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 200. Global Telecom Battery Backup System Market Size, by Unreliable Grid, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
    ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx% weak/off-grid project exposure constrains service-cohort concentration, not the global grid mix.

13. Fingrid - How to Participate in the Reserve Markets

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Helios Towers - Full Year Results 2025, March 12, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx-hour average daily grid availability supports weak-grid commercial exposure, without a global classification share.

16.3. Off-Grid

Table 202. Global Telecom Battery Backup System Market Size, by Off-Grid, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 203. Global Telecom Battery Backup System Market Size, by Off-Grid, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 204. Global Telecom Battery Backup System Market Size, by Off-Grid, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IFC - Investing in Sustainable Access to Communications: The Role of Telecom Energy Services Companies, September 2021

   · Taxonomy evidence: Off-grid sites are defined as not connected to the national grid. ([ifc.org](https://www.ifc.org/content/dam/ifc/doc/mgrt/tesco-study-web-xx.xx-xx.xx-xx.xx-final.pdf))

2. GSMA - Renewable Energy for Mobile Towers: Opportunities for Low- and Middle-Income Countries, September 2020

   · Taxonomy evidence: The off-grid definition includes sites disconnected from the grid or receiving no grid electricity, supporting the usable-connection qualification. No market estimates are used. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

   · Taxonomy evidence: Off-grid identifies telecom sites without a national-grid connection, separately from connected sites receiving unreliable electricity. ([gsma.com](https://www.gsma.com/solutions-and-impact/connectivity-for-good/mobile-for-development/wp-content/uploads/2020/xx.xx/Clean_Tech_Report_R_WebSingles.xx.xx.pdf))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.
11. Ofcom - Your Landline Is Going Digital: What You Need to Know
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The project confirms disconnected-site commercial demand; its weak/off-grid combined statistic does not separate those categories.

13. Fingrid - How to Participate in the Reserve Markets
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

14. China Tower announces 2025 annual results - March 18, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

24. Helios Towers - Full Year Results 2025, March 12, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Grid integration and alternative-power investment qualify assumptions of permanently unchanged disconnected-site exposure.

17. Telecom Battery Backup System Market, by Backup Duty

[redacted] EnerSys positions PowerSafe SBS for telecom and describes both float and cyclic applications; this portfolio description does not establish an individual customer's exclusive reserve duty. Buyers requiring dedicated continuity should make permitted uses and associated maintenance and warranty responsibilities explicit rather than infer exclusivity from a backup label.

Backup with Energy Management has a documented commercial implementation. [redacted] The Finnish deployment establishes a specific implementation, not transferable access or guaranteed outcomes elsewhere.

Figure 28. Global Telecom Battery Backup System Market Size, by Backup Duty, 2025 (%)

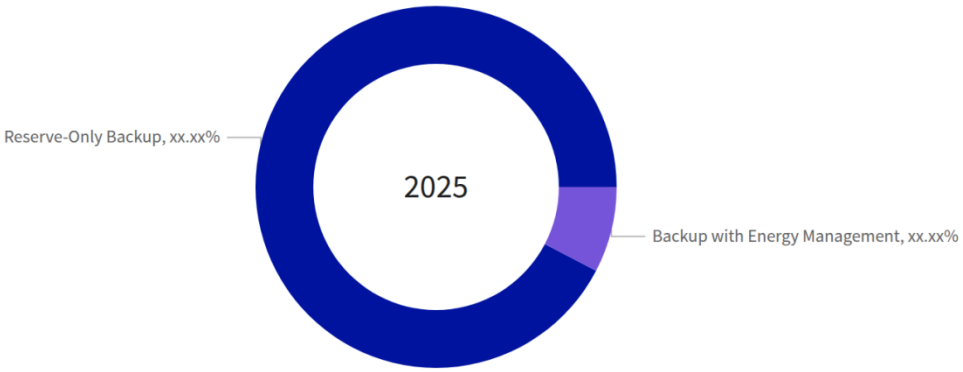

Figure 29. Global Telecom Battery Backup System Market, by Backup Duty, 2032 (USD Million)

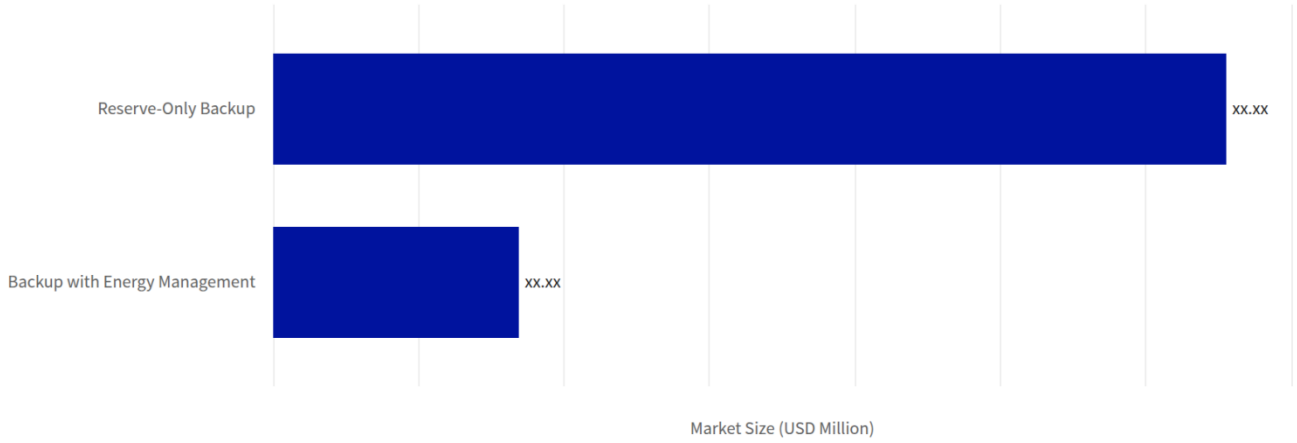

Table 205. Global Telecom Battery Backup System Market, by Backup Duty growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Backup with Energy Management	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Reserve-Only Backup	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 206. Global Telecom Battery Backup System Market Size, by Backup Duty, 2017-2032 (USD Million)

Backup Duty	2023	2024	2025	2026	2027	2032	CAGR (%)
Backup with Energy Management	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Reserve-Only Backup	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. PowerSafe SBS Batteries | EnerSys

   · EnerSys describes PowerSafe SBS for float and cyclic applications; that portfolio positioning does not establish a customer's exclusive reserve-use contract. ([enersys.com](https://www.enersys.com/en/products/batteries/powersafe/powersafe-sbs/))

2. How to participate in the reserve markets | Fingrid

· Fingrid requires applicable owner permission, reserve-product agreements, and specified settlement arrangements, and allows service-provider assistance without waiving participation requirements. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Applicable owner permission and market agreements are commercial access gates. They constrain forecast mixed-duty adoption without measuring its Global percentage. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

3. DNA Tower becomes world's first tower company to offer battery capacity in electricity reserve markets with Elisa DES

· Elisa Industriq's June xx.xx 2025 announcement reports DNA Tower Finland's base-station batteries connected to Finnish reserve markets and retaining an outage-continuity role; no comparative priority or guaranteed-outcome claim is adopted. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))

4. China Tower - 2025 Annual Results, March 18, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

5. Broadband Commission - The State of Broadband: Our Digital World, 2025

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

6. Battery Backup - Meriwether Lewis Electric Cooperative

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

7. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

8. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

9. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

10. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

11. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

12. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

13. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
14. Case Elisa: Virtual Power Plant in the Telecom Industry
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company case reports over 2,000 aggregated sites and approximately xx.xx MWh. This is an installed commercial scale check, not annual purchasing value or Global prevalence. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/customer-stories/elisacase))

17.1. Reserve-Only Backup

Table 207. Global Telecom Battery Backup System Market Size, by Reserve-Only Backup, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 208. Global Telecom Battery Backup System Market Size, by Reserve-Only Backup, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative

   · Taxonomy evidence: Outage continuity is the stated purpose; exclusive reserve duty is not expressly established. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

   · Taxonomy evidence: The advertised purpose is outage continuity; exclusivity of reserve duty is not expressly established. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

2. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
7. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

9. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

11. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

12. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

17.2. Backup with Energy Management

Table 210. Global Telecom Battery Backup System Market Size, by Backup with Energy Management, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI EN 302 099 V2.2.1 (2021-02) - Powering of Equipment in Access Network

   · Taxonomy evidence: The standard describes batteries providing additional power during heavy traffic, recognizing a duty beyond outage reserve. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

   · Taxonomy evidence: Batteries can supplement telecom power during heavy traffic, supporting an additional duty beyond outage reserve. ([etsi.org](https://www.etsi.org/deliver/etsi_en/302000_302099/xx.xx/xx.xx.01_60/en_302099v020201p.pdf))

2. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

10. Ofcom - Your Landline Is Going Digital: What You Need to Know

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
    ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

12. Fingrid - How to Participate in the Reserve Markets

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Applicable owner permission and market agreements are commercial access gates. They constrain forecast mixed-duty adoption without measuring its Global percentage.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

23. DNA Tower Offers Battery Capacity in Electricity Reserve Markets with Elisa DES
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement reports DNA Tower batteries connected to Finnish reserve markets while retaining outage continuity. This establishes a specific mixed-duty implementation, not Global attachment or guaranteed returns. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/press-releases/dna-tower-becomes-worlds-first-tower-company-to-offer-battery-capacity-in-electricity-reserve-markets-with-elisa-des))
24. Case Elisa: Virtual Power Plant in the Telecom Industry
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company case reports over 2,000 aggregated sites and approximately xx.xx MWh. This is an installed commercial scale check, not annual purchasing value or Global prevalence. ([elisaindustriq.com](https://www.elisaindustriq.com/resources/customer-stories/elisacase))

18. Telecom Battery Backup System Market, by Backup Autonomy

[redacted] These are planning options rather than completed purchases or worldwide category boundaries. Separately, UK guidance requires at least one hour of backup for qualifying landline-dependent customers, illustrating how eligibility and the protected service can establish a particular purchasing requirement.

[redacted] A longer advertised duration can therefore reflect a narrower protected service rather than a different or superior offering. Buyers should establish the promised service and declared equipment coverage before comparing duration claims.

Whole-site resilience must not be mistaken for battery-only autonomy. Ofcom's June 2026 guidance identifies approximately four hours as good practice for active fixed-access cabinets at installation, while its five-day core-site expectation combines batteries and generators. [redacted]

Figure 30. Global Telecom Battery Backup System Market Size, by Backup Autonomy, 2025 (%)

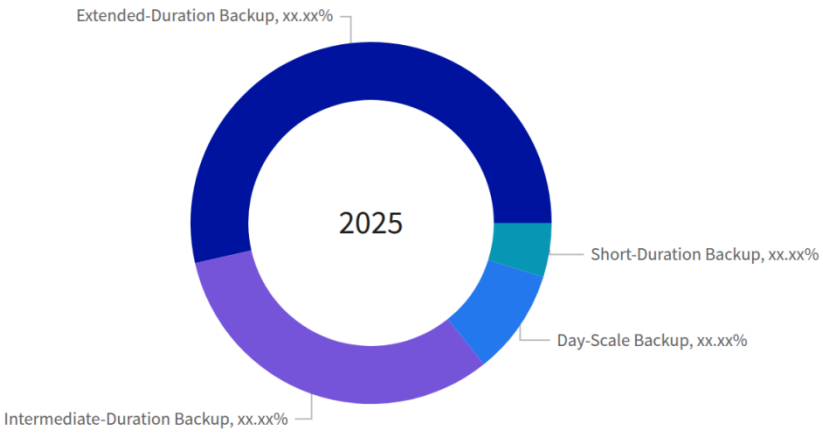

Figure 31. Global Telecom Battery Backup System Market, by Backup Autonomy, 2032 (USD Million)

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026

   · The guidance identifies approximately four hours as good practice for active fixed-access cabinets at installation and a minimum five-day core-site expectation involving batteries and generators, not five-day battery-only autonomy. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2026 guidance identifies approximately four hours as good practice for active fixed-access cabinets. This supports a conditional Extended purchasing shift, not completed orders or a Global mandate. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

2. Your landline is going digital: what you need to know

   · Ofcom requires free backup lasting at least one hour for qualifying landline-dependent customers without a working mobile phone or reliable mobile signal; the requirement is constituency-specific. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

3. Battery Backup | Meriwether Lewis Electric Cooperative

- MLConnect advertises xx.xx hours of phone service and approximately five hours when the backup supports both voice and internet. These are offering claims, not comparative field-performance findings. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Taxonomy evidence: Disclosed duration changes with the protected service and connected load. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Taxonomy evidence: The same unit has different disclosed endurance for voice-only and combined voice-and-internet protection. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

4. Mobile RAN power resilience: Technical Report and CFI Update - February 10, 2025

· The report evaluates xx.xx-minute, one-hour, and two-hour battery alternatives. These are planning options, not completed-purchase records or global autonomy-category thresholds. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Taxonomy evidence: The February 2025 regulator report considers battery options of xx.xx minutes, one hour, two hours, and four hours. These are planning alternatives, not a worldwide band standard or completed-purchase record. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Taxonomy evidence: The February 2025 regulator report evaluates battery-backup alternatives lasting xx.xx minutes, one hour, two hours, and four hours. These are studied options, not evidence of completed purchases or global duration bands. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or

5. Your landline is going digital: what you need to know - Ofcom

   · Taxonomy evidence: The consumer guidance describes at least one hour of backup for eligible landline-dependent customers and notes provider offerings lasting up to seven hours. These UK examples do not establish global bands.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

6. China Tower - 2025 Annual Results, March 18, 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue.
   ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

7. Broadband Commission - The State of Broadband: Our Digital World, 2025

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

8. EnerSys 2026 Proxy Statement and Annual Report

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate.
   ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

9. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

10. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand.
    ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

11. IHS Holding Limited - First-Quarter 2026 Financial Statements

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement.
    ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
    ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
14. PowerReserve - Verizon Residential Accessories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification.
    ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification.
    ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
15. Set Up Your Battery Backup - AT&T G.Fast Service with BGW210
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference.
    ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference.
    ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative

· Taxonomy evidence: Combined voice-and-Internet protection is described as approximately five hours. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

· Taxonomy evidence: Combined ONT and gateway protection is described as approximately five hours, an illustrative duration within the modeled band. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

2. Ofcom - Network and Service Resilience Guidance for Communications Providers, June 16, 2026

· Taxonomy evidence: Approximately four hours of backup is described as UK good practice for active fixed-access cabinets; this is not a Global battery-only duration rule. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

· Taxonomy evidence: The June 2026 guidance regards approximately four hours of backup as good practice for active fixed-access equipment in cabinets at installation. This is UK guidance, not a worldwide minimum. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2026 guidance identifies approximately four hours as good practice for active fixed-access cabinets. This supports a conditional Extended purchasing shift, not completed orders or a Global mandate. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/network-and-service-resilience-guidance-for-communications-providerspdf?v=xx.xx))

3. Your landline is going digital: what you need to know - Ofcom

· Taxonomy evidence: The disclosed availability of offerings lasting up to seven hours supplies another illustrative anchor within the modeled extended band. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

4. China Tower - 2025 Annual Results, March 18, 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

5. Broadband Commission - The State of Broadband: Our Digital World, 2025

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

6. EnerSys 2026 Proxy Statement and Annual Report

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

9. IHS Holding Limited - First-Quarter 2026 Financial Statements

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

11. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

12. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

13. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
    ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
14. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
15. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

16. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
17. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

18. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
19. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
20. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
21. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
22. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

18.2. Intermediate-Duration Backup

Table 218. Global Telecom Battery Backup System Market Size, by Intermediate-Duration Backup, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

   · Taxonomy evidence: The one-hour and two-hour options supply anchors within the modeled intermediate band.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Taxonomy evidence: Evaluated one-hour and two-hour alternatives supply anchors within the modeled intermediate band.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue.
   ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

2. Your landline is going digital: what you need to know - Ofcom

   · Taxonomy evidence: The one-hour minimum is an anchor at the modeled intermediate band's lower boundary.
   ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls?SQ_VARIATION_197646=xx.xx))

3. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
4. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
5. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
6. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
7. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
8. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
9. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

10. Ofcom - Your Landline Is Going Digital: What You Need to Know
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility-limited provider backup and the one-hour minimum for qualifying customers constrain premises demand and anchor the Intermediate band's lower boundary. They do not establish universal adoption. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
11. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
12. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
13. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

14. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

15. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
16. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

17. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
18. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
19. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
20. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
21. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
22. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

18.3. Day-Scale Backup

Table 221. Global Telecom Battery Backup System Market Size, by Day-Scale Backup, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 222. Global Telecom Battery Backup System Market Size, by Day-Scale Backup, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 223. Global Telecom Battery Backup System Market Size, by Day-Scale Backup, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Battery Backup - Meriwether Lewis Electric Cooperative

- Taxonomy evidence: Voice-only ONT protection is described as xx.xx hours. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Taxonomy evidence: Voice-only ONT protection is described as xx.xx hours, a commercial anchor for the modeled day-scale category. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

2. China Tower - 2025 Annual Results, March 18, 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. EnerSys 2026 Proxy Statement and Annual Report
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
7. IHS Holding Limited - First-Quarter 2026 Financial Statements
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

9. Ofcom - Your Landline Is Going Digital: What You Need to Know

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate.
([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))

10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions.
([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))

11. Fingrid - How to Participate in the Reserve Markets

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue.
([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))

12. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

22. PowerReserve - Verizon Residential Accessories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertised voice-only protection reaches xx.xx hours; internet and television protection are excluded. This supports service-specific Day-Scale classification. ([verizon.com](https://www.verizon.com/home/accessories/powerreserve/?skuParam=sku190001))
23. Set Up Your Battery Backup - AT&T G.Fast Service with BGW210
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises a xx.xx-hour service window for the particular package, supporting Day-Scale mapping without a universal premises-duration inference. ([att.com](https://www.att.com/idpassets/images/support/pdf/BatterybackupforG.FastservicewithBGW210.pdf))

18.4. Short-Duration Backup

Table 224. Global Telecom Battery Backup System Market Size, by Short-Duration Backup, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 225. Global Telecom Battery Backup System Market Size, by Short-Duration Backup, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Taxonomy evidence: The considered xx.xx-minute battery option supplies a public planning anchor for subhour autonomy. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Taxonomy evidence: The evaluated xx.xx-minute battery option supplies a public commercial-planning anchor for subhour autonomy. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Uneven existing UK backup coverage and costed multi-year alternatives constrain adoption and purchasing assumptions.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

2. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
3. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))
4. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
5. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
6. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.
7. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))
8. IHS Holding Limited - First-Quarter 2026 Financial Statements
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

9. Ofcom - Your Landline Is Going Digital: What You Need to Know
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
10. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
   - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
11. Fingrid - How to Participate in the Reserve Markets
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
12. China Tower announces 2025 annual results - March 18, 2026
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China Tower reports xx.xx tower sites at year-end 2025, an installed-stock input rather than annual battery sales.

13. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

14. American Tower Corporation - Annual Report on Form 10-K for 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US owned/operated towers are a disclosed company footprint, not a verified national inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazilian tower inventory supports a substantial local wireless-network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexican tower inventory constrains the local network-stock bridge.
15. Cellnex - Integrated Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: French telecom site portfolio anchors part of the modeled national installed footprint.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Italian telecom site portfolio constrains the national network pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK sites and upgrade activity provide a commercial footprint, not total battery purchasing.

16. IHS Holding Limited - Annual Report on Form 20-F for 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
17. Australian Government - Mobile Network Hardening Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-specific battery upgrades and mixed hardening measures support localized Australian procurement, not a regional battery mandate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
18. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies - July 16, 2020
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A location-specific backup obligation supports a compliance purchasing context, not a nationwide battery-only spending percentage.
19. CRTC - Request for Information on Telecommunications Network Resiliency, May 12, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The information request seeks evidence on possible backup requirements and customer equipment costs; it is not an enacted national procurement program.
20. FCC - Internet Access Services: Status as of December 31, 2024, official state-government-hosted copy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National residential/business and fixed/mobile connections constrain the US customer perimeter, but not state equipment-purchasing attribution.
21. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: High mature-market fibre adoption is retained as a saturation counterforce to the purchasing forecast.

19. Telecom Battery Backup System Market, by Region

[redacted] Battery suppliers should pursue the awarded operator's defined procurement package, not assume that government funding creates a battery-only order. Awarded work provides a concrete purchasing context, but equipment acceptance and delivery remain separate conditions; the Australian program does not establish equivalent requirements in China, India, Indonesia, or Japan.

North America requires a distinction between enacted location-specific obligations and regulatory proposals. [redacted] A consultation question is not an awarded replacement program, and neither document establishes one purchasing specification across the United States, Canada, and Mexico.

[redacted] This differs from an integrated tower-power service relationship. The historical company example is not a regional contract rule; a subsequently revised power-service agreement would change the appropriate counterparty.

Europe separates network continuity accountability from battery-product accountability. Ofcom's June 2026 guidance retains UK communications-provider responsibility for network portions operated by third parties. [redacted]

[redacted]

Selling through the responsible service counterparty may align fulfillment, while direct supply preserves the customer's supplier choice. The announced renewal does not establish the relationship's present term or equivalent arrangements elsewhere in the region.

Africa contains contrasting power-service allocations even within one infrastructure group. IHS's first-quarter 2026 statements describe Nigerian power indexation and the unwinding of a South African power managed-services arrangement. ▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Table 228. Global Telecom Battery Backup System Market Size, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Network and Service Resilience Guidance for Communications Providers, June 16, 2026
   - Ofcom's June 2026 guidance retains provider responsibility for operational network portions run through third-party arrangements.
2. IHS Holding Limited First-Quarter 2026 Financial Statements
   - IHS's first-quarter 2026 statements describe Nigerian power indexation and the unwinding of the South African power managed-services arrangement.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))
3. CPUC Requires Wireless Companies to Better Serve Customers in Emergencies
   - California's July xx.xx 2020 action required backup power for minimum service in specified high-fire-threat districts and broader resilience planning.
4. Digital Product Passport for Batteries | European Commission
   - The Commission assigns passport accountability to the operator placing the finished battery on the EU market.
5. Mobile Network Hardening Program
   - The Australian program identifies Optus and Telstra battery upgrades alongside other resilience measures; this supports operator-specific procurement analysis, not region-wide requirements.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The limited Australian program qualifies extrapolation of resilience funding across Asia-Pacific.
6. Telecom Staff Letter: Request for Information on Telecommunications Network Resiliency
   - The May xx.xx 2026 CRTC information request asks about possible mandatory backup requirements; the request itself does not establish those requirements.
7. IHS Holding Limited Annual Report on Form 20-F for 2024
   - IHS's 2024 annual report assigns power provision to customers under its Latin American operating model and discusses Brazil and Colombia.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African maintenance-capex envelopes and differentiated power arrangements support higher purchasing intensity, but do not isolate battery-only revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Latin American power and maintenance economics prevent use of tower-wide revenue as backup-system demand.
8. TAWAL and Ericsson Extend Partnership to Deliver Sustainable and Efficient Telecom Infrastructure in Saudi Arabia
   - The May xx.xx 2023 TAWAL-Ericsson renewal covered operations management and energy modernization in Saudi Arabia; it is a dated relationship, not proof of present contract terms.
9. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.

10. Broadband Commission - The State of Broadband: Our Digital World, 2025

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

11. Battery Backup - Meriwether Lewis Electric Cooperative

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))

12. EnerSys 2026 Proxy Statement and Annual Report

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))

13. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

14. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

15. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Jurisdiction-specific resilience economics qualify a uniform Europe-wide demand uplift.

16. Ofcom - Your Landline Is Going Digital: What You Need to Know
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
17. IFC Supports IPT PowerTech to Deliver Clean Telecom Power Across Ethiopia, Liberia, and Sierra Leone
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: IFC's March 2026 announcement establishes financing support for IPT's telecom-energy expansion in Ethiopia, Liberia and Sierra Leone. Financing is an expansion indicator, not completed deployment or attributable backup-fee revenue. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: The financed expansion supports consideration of managed delivery, while global served-site counts and backup-only fees remain assumptions. ([ifc.org](https://www.ifc.org/en/pressroom/2026/ifc-supports-ipt-powertech-to-deliver-clean-telecom-power-across-ethiopia-liberia-))
18. Fingrid - How to Participate in the Reserve Markets
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Fingrid's participation conditions establish contractual and permission gates for Finnish reserve markets. They support retaining an access constraint rather than assuming every backup asset earns additional energy-market revenue. ([fingrid.fi](https://www.fingrid.fi/en/electricity-market/reserves/reserve-products/how-to-participate-in-the-reserve-markets/))
19. China Tower announces 2025 annual results - March 18, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed 2025 physical tower-site stock constrains the regional network pool; destination demand is modeled, not manufacturing-based.

20. Government of India, Department of Telecommunications - Telecom Statistics India 2025, international comparison tables
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country telecom-connectivity tables constrain customer and installed-network allocation proxies.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National fixed-access and mobile pools constrain the modeled country purchasing footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country connectivity scale and reporting discontinuities constrain European proxy estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific fixed-access and mobile pools constrain regional demand estimates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Wireless and fixed-access customer pools are distinguished in the country model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country tables constrain the starting connectivity pools; attachment, prices and forecasts remain assumptions.

21. American Tower Corporation - Annual Report on Form 10-K for 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mandatory national site inventories provide footprint checks; tower rent and data centers are not included as battery revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-owned and operated tower inventories constrain Latin American commercial activity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African operating-country inventories provide installed-commercial-footprint anchors.

22. Cellnex - Integrated Annual Report 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country-specific telecom site portfolios constrain European network-footprint estimates; broadcasting sites are separately identified.

23. OECD - High-capacity broadband networks gain ground across OECD, October 13, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed mature-market connectivity growth and differing fibre/5G adoption constrain replacement and expansion assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Latin American fibre migration supports a conditional fixed-access expansion premise, not automatic battery attachment.

19.1. Asia-Pacific

Table 229. Asia-Pacific Telecom Battery Backup System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. China Tower - 2025 Annual Results, March 18, 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed spending slowdown is a counterforce used in the restrained 2026 purchasing assumption, not an observation of 2026 global revenue. ([ir.china-tower.com](https://ir.china-tower.com/en/ir/presentation/pre260318.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Infrastructure expenditure and replacement/improvement restraint constrain the purchasing forecast; broader capital expenditure is not battery-only revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's spending cycle is retained as a counterforce in the regional forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx.149m-site inventory constrains wireless activity; forecast purchasing remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement/improvement CAPEX fell from RMB6837m to RMB5474m, qualifying automatic replacement-led growth.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed tower operations establish a material infrastructure purchasing setting, not a global buyer share.
2. Broadband Commission - The State of Broadband: Our Digital World, 2025
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The fixed-broadband pool supports the premises-demand model, with future adoption and replacement assumptions remaining modeled. ([itu.int](https://www.itu.int/dms_pub/itu-s/opb/pol/s-pol-broadband.xx.xx-2025-pdf-e.pdf))

3. Battery Backup - Meriwether Lewis Electric Cooperative
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The provider distinguishes voice-only protection from combined voice-and-internet protection, supporting service-specific rather than universal premises adoption assumptions. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately available replacement batteries support a battery-only replacement route.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD100-plus-tax device is a retail comparator, not an observed 2025 first-sale realization.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer purchase and replacement responsibilities support household-funded procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchased equipment does not automatically include continuing service-plan coverage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Local provider sales establish this route alongside manufacturer-direct purchasing.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider advertises approximately five hours for combined voice and internet, supporting service-specific Extended classification, not an observed 2025 purchase mix. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same proposition advertises xx.xx-hour voice-only protection, supporting Day-Scale mapping without equating duration with a universally larger purchase basket. ([mlec.com](https://mlec.com/mlconnect/battery-backup/))
4. EnerSys 2026 Proxy Statement and Annual Report
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 segment growth included data-center and industrial demand and communications mix effects. It is not accepted as a telecom-only global growth rate. ([s206.q4cdn.com](https://s206.q4cdn.com/xx.xx/files/doc_financials/2026/ar/b317caf6-56f8-42fa-bea1-bf685eb4132a.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct customer supply is disclosed within a diversified international business; telecom channel proportions are not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor supply is disclosed, supporting route occurrence rather than its modeled sales weight.

5. Shuangdeng Group Co., Ltd. - Annual Results Announcement for the Year Ended December 31, 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The telecom-specific decline is a counterweight to using broad energy-storage growth as the 2026 market forecast. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific sales weakness is a purchasing-cycle counterforce, not a measure of all Asian backup-system demand.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom application revenue provides counterevidence to extrapolating broad energy-storage growth into China's backup forecast.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 telecom revenue of RMB1,xx.xx declined xx.xx%; telecom purchasing weakness is retained as counterevidence to automatic substitution-led aggregate growth. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Telecom-specific results are separated from adjacent data-center and power-storage growth when assessing lithium substitution; the filing does not disclose the modeled Global split. ([www1.hkexnews.hk](https://www1.hkexnews.hk/listedco/listconews/sehk/2026/xx.xx/xx.xx.pdf))

6. Amara Raja Energy & Mobility - Q2/H1 FY2026 Earnings Presentation, November 6, 2025

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Amara Raja subsequently reported more than xx.xx MWh of telecom volumes in its second quarter of fiscal 2026. This commercial shipment aggregate provides counterevidence to treating lead-acid weakness as disappearance of telecom backup demand. ([amararajaeandm.com](https://www.amararajaeandm.com/Files/FinancialResults/2025/Earningspresentation06112025.pdf))

7. IHS Holding Limited - First-Quarter 2026 Financial Statements

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosure supports a continuing replacement mechanism, but supplies no isolated global battery spending or replacement-cycle measurement. ([ihstowers.com](https://www.ihstowers.com/content/dam/ihs/corporate/documents/investors/earnings-materials/2026/IHS_Holding_Limited_1Q26_Financial_Statements.pdf.downloadasset.pdf))

8. Ofcom - Mobile RAN Power Resilience: Technical Report and CFI Update, February 2025

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom estimated UK-wide one-hour battery-backup alternatives at GBP1.xx.xx-xx.xx in 2024 prices, including capital expenditure and multiple years of operating costs. This is a jurisdictional scenario, not realized annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The costed alternatives constrain the commercial significance and limitations of resilience upgrades; their existence does not establish forecast implementation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The evaluated xx.xx-minute alternative supplies a subhour commercial-planning anchor, not observed shipments.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One-hour and two-hour alternatives anchor the analytical Intermediate band. Aggregate scenarios include multiple years of operating costs and are not annual battery revenue.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The four-hour alternative anchors the Extended band's lower boundary without establishing a Global minimum or purchasing allocation.
([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/consultations/category-xx.xx-xx.xx-weeks/xx.xx-resilience-guidance-and-mobile-ran-power-back-up/associated-documents/mobile-ran-power-resilience-technical-report-cfi-update.pdf?v=xx.xx))

9. Ofcom - Your Landline Is Going Digital: What You Need to Know

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Ofcom describes provider-funded backup eligibility for landline-dependent customers lacking a working mobile phone or reliable mobile signal. Eligibility is narrower than the total broadband customer pool. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The eligibility boundary supports conditional premises adoption, not a universal entitlement or a quantified global take-up rate. ([ofcom.org.uk](https://www.ofcom.org.uk/phones-and-broadband/landline-phones/future-of-landline-calls))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restricted provider-funded eligibility constrains operator-funded premises attribution and forecast adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Eligibility is not universal household funding; purchaser proportions remain assumptions.
